## 1.1 OVERVIEW

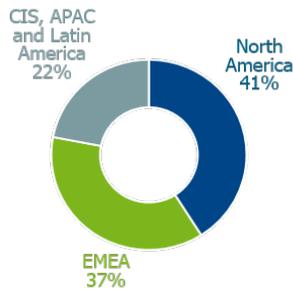

### 1.1.1 THE GROUP'S BUSINESS

With more than 130 years of experience, Tarkett is a worldwide leader in innovative flooring and sports surfaces solutions.

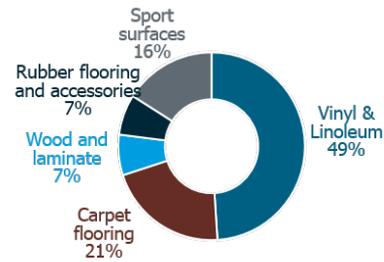

Tarkett offers one of the widest ranges of flooring solutions in the industry. With experienced teams and sales in more than 100 countries, the Group has acquired extensive localized knowledge and understanding of the cultures,

tastes and requirements of its customers, local regulations, and the use of flooring in each country.

With 34 industrial sites and customer service centers located close to the local markets, Tarkett is able to offer highly flexible solutions to respond to customers' specific needs.

### 1.1.2 KEY FIGURES

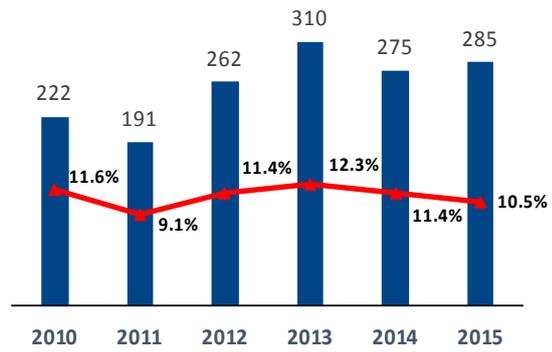

The financial data presented below is derived from the Group's consolidated financial statements as of and for the fiscal year ended December 31, 2015, prepared in accordance with IFRS as adopted by the European Union, which are included in Section 5.1, "Consolidated Financial Statements as of and for the Year Ended December 31, 2015". The consolidated financial statements as of and for the year ended December 31, 2015 have been audited by the Company's statutory auditors. The statutory auditors' report is included in Section 5.9, "Statutory Auditors' Report on the Consolidated Financial Statements".

The financial information shown below should be read in conjunction with (i) the Group's audited consolidated financial statements as of and for the year ended December 31, 2015 as presented in Section 5.1, "Consolidated Financial Statements as of and for the Year Ended December 31, 2015"; (ii) the analysis of the Group's financial condition and results presented in Section 4.1, "Operating Review"; and (iii) the analysis of the Group's cash position and equity capital presented in Section 4.3, "Liquidity and Capital Resources".

(1) Adjusted EBITDA, which is not a standardized accounting term with a generally accepted definition, is equal to operating income before depreciation, amortization and adjustments. Adjustments include, among others, restructuring costs intended to grow the Group's future profits; gains or losses on significant asset sales; costs relating to corporate and legal restructuring, including legal fees and acquisition costs as well as the impact on margins of recording inventory of acquired companies in the Group's balance sheet at fair value; management fees invoiced by the shareholders of the Company; and expenses relating to share-based payments without any cash payment. Adjusted EBITDA is not a financial measure defined under IFRS. It should not be taken as a substitute for operating income, net income or cash flows from operating activities, nor should it be treated as a measure of liquidity. Adjusted EBITDA may be calculated differently by other companies with businesses that are similar to or different from the Group's. Accordingly, the Group's EBITDA calculation may not be comparable to that calculated by other issuers. See Section 3.1.3 of Note 3, "Operating Data", in Section 5.2 for a discussion and a reconciliation to the most comparable IFRS measure.

(2) ROCE corresponds to the ratio between EBIT, which the Group defines as operating income before financial items and taxes and capital employed (which corresponds to tangible and intangible assets (including goodwill), plus working capital). ROCE is not a standardized accounting term corresponding to a generally accepted definition. ROCE may be calculated differently by other companies with businesses that are similar to or different from that of the Group. Accordingly, the Group's ROCE calculation may not be comparable to that calculated by other issuers. See Section 4.3.8, "Return on Capital Employed", for a discussion of ROCE and a reconciliation to the most comparable IFRS measure.

(3) The Group defines net debt as the sum of non-current interest-bearing loans and borrowings and current interest-bearing loans and borrowings, minus cash and cash equivalents. For more information on how net financial debt is calculated, see Section 7.2 of Note 7 "Financing and Financial Instruments" in Section 5.2.

(4) Operating cash flow corresponds to cash flow from operations minus investments.

(5) Free cash flow corresponds to operating cash flow minus interest paid, other items and taxes paid, plus the proceeds from sales of fixed assets.

(6) The Group's headcount as of the end of 2014 includes the headcount of Desso, which was acquired on December 31, 2014.

## 1.2 HISTORY

The Group takes its name from Tarkett AB, its Swedish subsidiary that began its operations in the late 19th century.

The Group was formed in 1997 through the merger of the French company Sommer Allibert S.A. and Tarkett AG (which were at the time listed on the Paris and Frankfurt Stock Exchanges, respectively). Sommer Allibert S.A. was itself the result of the merger of two French companies created in the early 20th century. The members of the Deconinck family, who own SID (Société d'Investissement Deconinck), the majority shareholder of the Group, are the heirs of Mr. Allibert, the founder of one of these companies.

Beginning in 1997, the Group gradually sold off its non-flooring businesses, in particular Sommer Allibert S.A.'s automotive business in 2001, in order to focus its business exclusively on flooring.

At the same time, the Group began a strategy of dynamic growth in the flooring sector through a series of acquisitions and joint ventures. In 2002, the Group strengthened its business in Eastern Europe by forming a partnership with the Serbian company Sintelon AD (then listed on the Belgrade Stock Exchange), which had a particularly strong presence in Russia. The Group then progressively increased its investment in Sintelon AD's capital and bought out all of the minority shareholders in 2009. In 2003, the Group delisted its Canadian subsidiary, Domco-Tarkett, from the Toronto Stock Exchange, combining the Group's activities in North America. In 2004, it took a minority interest in the Canadian company FieldTurf, a manufacturer of artificial grass, acquiring control of that company the following year.

In 2005, the Group continued to pursue its development strategy by entering into two joint ventures: one with the Aconcagua group, to develop the Group's production of laminate flooring in North America, and another with Sonae Industria-SGPS, S.A., to develop the Group's production of laminate flooring in Western Europe. The Group also acquired the U.S. company Johnsonite Inc., a manufacturer of resilient flooring and accessories, which strengthened its presence in North America.

In 2006, the Group finalized the delisting of its subsidiary Tarkett AG from the Frankfurt Stock Exchange.

In 2007, investment funds advised and managed by Kohlberg Kravis Roberts & Co. L.P. ("KKR") indirectly acquired approximately 50% of the Company's shares while the Deconinck family retained approximately 50% of the share capital, the remaining shares being held directly or indirectly by management. Also in 2007, Mr. Michel Giannuzzi was appointed as Chairman of the Management Board, and the Group began the process of overhauling its management team.

In the same year, the Group acquired the North-American company Defargo, which specialized in manufacturing sports surfaces, and began the process of selling its wood

floor business in North America, which would be finalized in 2009.

In 2008, the Group acquired the U.S. company Beynon Sports Surfaces, a specialist in manufacturing athletic tracks, bought out the remaining minority shareholders in FieldTurf, and sold its share of the laminate-flooring joint venture in North America.

In 2009, to consolidate its leadership in sports surfaces in North America, the Group acquired Atlas Track, a U.S. company specialized in the manufacture of athletic tracks.

It also accelerated its international expansion in regions with strong growth potential. In order to strengthen its presence in Turkey, the Group created a distribution company through a joint venture with the company Aspen. In Brazil, the Group acquired Fademac, the leading Brazilian manufacturer of vinyl flooring.

In order to strengthen its positions in the residential market in Europe and to enrich its trademark portfolio, in 2010, the Group acquired some of Armstrong's assets in the UK. Next, the Group acquired Centiva, a U.S. company specializing in the design of LVT. It also acquired control of the Spanish company Poligras (which has since been renamed Fieldturf Poligras), the Spanish leader in the manufacture and distribution of sports surfaces, and a specialist in the manufacture of artificial grass.

In the same year, the Group entered into two joint ventures. The first was with the U.S. company EasyTurf, a specialist in the distribution of artificial grass for the U.S. landscaping market. The second was with the German company Morton ExtrusionsTechnik (MET), a specialist in producing fibers for artificial grass. These two partnerships reinforced the Group's artificial grass business and allowed it to in-source fiber production for its artificial grass.

In 2011, the Group continued to reinforce its positions by acquiring Parquets Marty (which became Tarkett Bois), a French wood flooring manufacturer, and creating two joint ventures: one with a Dutch distributor of artificial grass called AA SportSystems (now called Fieldturf Benelux) and the other with a Chinese distributor of resilient flooring, now called Tarkett Asia Pacific (Shanghai) Management Co. Ltd.

In 2012, the Group acquired Tandus, a U.S. company that designs, manufactures and sells carpeting for the commercial market. This acquisition enabled the Group to establish itself as a major player in the North American commercial carpet market.

In 2013, the Group completed its initial public offering on the Paris Stock Exchange.

In 2014, the Group entered into four external growth transactions. First, the Group reinforced its industrial and commercial presence in China through two transactions: the buyout of the 30% minority interest in the Group's subsidiary that markets Tarkett-brand products in China (located in Shanghai), and the acquisition of a vinyl floor

production plant near Beijing. In the same year, the Group acquired Gamrat (a Polish company specialized in high-performance vinyl flooring), Renner Sports Surfaces (an expert in athletic tracks and tennis courts located in the Rocky Mountains in the United States) and the Desso group (a European leader in commercial carpet).

## 1.3 STRATEGY

The Group's vision is to be the global leader in innovative solutions that generate value for customers in a sustainable way. The Group creates safe and inspiring flooring and sports surfaces that enhance its customers' return on investment and quality of life. The Group's goal is to grow faster and be more profitable than its competitors in comparable geographies or market segments.

### 1.3.1 THE GROUP'S STRATEGIC OBJECTIVES

The Group intends to take advantage of regional growth opportunities, expanding its offerings of innovative products and solutions, selectively seeking complementary acquisitions, and constantly optimizing operational performance.

- a) **Regional growth:** the Group intends to take advantage of its strong positions in key markets to benefit from anticipated regional growth.
- In Europe, where the economic outlook seems relatively limited, the Group believes that the industrial adaptation processes that it has put in place over the past few years position it well to benefit from medium- and long-term economic growth while maintaining strong market positions and good levels of profitability in the near-term. In 2015 the Group made significant investments in its European design and manufacturing capabilities to fully capture the strong growth of the LVT market (see Section 1.6). In addition, in 2015 the Group successfully completed the industrial and commercial integration of Desso into the EMEA division (with respect to commercial carpet) and into the Sports Surfaces division (with respect to sports). Because Desso and Tarkett have complementary entrepreneurial values, the integration process helped the Group identify numerous opportunities for innovation, growth, and cost optimization.
  - In North America, the Group seeks to take advantage of the economic growth underway to grow across the board in its residential, commercial and sports businesses. The Group has long pursued a strategy of positioning itself with products that best enable it to realize the potential of this market. The acquisition of Tandus in 2012, for example, made the Group a leader in the North American commercial carpet market and provides it with future cross-sales synergy opportunities in the United States and the ability to offer Tandus products in other regions.
  - In the Commonwealth of Independent States ("CIS"), and particularly in Russia, where economic forecasts

In 2015, the Group acquired some of the assets of California Track and Engineering (CTE), a specialist in the construction of athletic tracks in the United States. In addition, EasyTurf became a wholly owned subsidiary of the Group following the Group's acquisition of the minority interests. Finally, the Group acquired Ambiente Textil, Desso's exclusive distributor in Austria.

were again recently downgraded – in January 2016, the IMF forecast a 1.0% decrease in GDP in 2016 – the Group intends to take advantage of its leading position, brand recognition and unique local manufacturing capacity to tap growth in a market that is estimated to have approximately two billion square meters of residential flooring in need of refurbishing in Russia alone. As a large majority of Russian citizens own their own housing, home improvements will represent one of the top uses of disposable income when the country's economic environment improves.

- In other high-potential markets such as Asia Pacific and Latin America, the Group has adopted a disciplined and selective approach in order to capture profitable growth potential with increased penetration of resilient products. In particular, the Group believes there is potentially strong future demand in China and Brazil for high-quality commercial resilient products where its innovation and added value provide a differentiating factor that should serve it well as it develops in these markets.
- b) **Expansion of product lines:** the Group intends to build on its long tradition of innovation, which dates back to the 1940s, when it first introduced three-layer hardwood flooring, continuing into the 1950s, with its offering of durable vinyl flooring and a wide choices of decorations, and then into the 1990s, with the launch of the first infilled artificial turf for athletes, and into recent years, with the Group's creation of various ecologically sustainable flooring solutions. The Group currently maintains one international research and innovation center and numerous product and process development labs. The Group also has a scientific council that brings together its senior R&I officers with external scientists, professors and other experts to review and challenge its technology roadmap, and maintains formal partnerships with suppliers to involve them in the R&I process. The Group's future product innovation and development efforts are focused on renewing its offer with projects that it believes have significant market potential and ecologically sustainable qualities.
- c) **The Group plans to continue its strategy of complementing its internal development with targeted acquisitions,** which it has successfully used to accelerate its profitable growth through a broader product portfolio of solutions, as well as through an expanded presence in fast-growing markets. The Group's acquisition strategy focuses on targets that allow for immediate leverage of their industrial and

commercial strengths, taking advantage of the expertise of existing management whenever it is feasible and sensible to do so. In the future, the Group intends to maintain its strategy of selective acquisition.

- d) Continued operational optimization:** this strategy involves a constant effort to improve the Group's day-to-day operational processes, as well as the implementation of turnaround action plans where required.
- The Group's ongoing optimization strategy involves constantly seeking ways to improve manufacturing efficiency, such as through continued implementation of the World Class Manufacturing ("WCM") program. The Group believes its WCM program has the potential to produce significant additional cost savings in the future. For that reason, the Group maintains a dedicated WCM team that compares methods and procedures between sites, helps local teams at each manufacturing site implement the program, adapts the program to local specificities and supervises the program's process. The Group's overall objective is to achieve savings from the WCM program of approximately 2% of cost of goods sold per year on average over the next few years. The Group also works constantly to optimize its supply chain strategy in order to offer the best service and lead-time in the most economical way. The Group is continuing the rollout of its SAP system, with a goal of becoming the industry reference for supply chain management.
  - The Group's optimization strategy also includes taking affirmative measures where necessary to ensure that its existing businesses successfully weather changing economic and market conditions. For example, the Sports Surfaces division has been completely turned around since 2011, recording adjusted EBITDA of €41 million in 2015. The Group is also continuing to restructure certain parts of its wood flooring business in Europe. Going forward, the Group expects to continue the efforts already underway to improve its operations and to continue to implement restructuring initiatives such as these when necessary.

### 1.3.2 TARKETT'S STRENGTHS

The Group has realized significant growth in recent years, while maintaining a high level of profitability and a sound financial structure. Its success is the result of a number of factors that the Group believes make it unique in the international flooring market. These factors include the following:

- a) Global market leadership.** The Group occupies leadership positions among flooring manufacturers for the products that constitute the heart of its business and in the principal geographical markets in which it does business. The Group is the third largest flooring supplier worldwide (on the basis of 2015 sales). Scale is essential in the Group's markets, providing raw material purchasing power (particularly for PVC, plasticizers and polyurethane) and allowing the Group to leverage research and innovation investments. The Group is the number one vinyl flooring company worldwide

and the number one global supplier of sports surfaces. It is also the leading vinyl flooring company in Russia and more generally in the CIS, as well as in a number of major European countries, including France and Sweden. The Group believes it has one of the broadest product offerings in the flooring industry, including vinyl, linoleum, wood and laminate, commercial carpet and rubber products, featuring one of the strongest brand portfolios, which is critical to the success of its multi-brand distribution strategy. The breadth of the Group's product range allows it to create fully integrated flooring solutions that companies with less diverse offerings cannot match. The Group believes its product and technology development capabilities and in-house research and innovation teams are best-in-class, allowing it to provide innovative products that are tailored to the needs and demands of each of its markets, while promoting environmentally responsible solutions that keep it ahead of regulatory and industry norms.

- b) Attractive geographical footprint with substantial growth potential:** The Group has one of the widest geographical reaches among its peers, with thousands of customers and end-users in over 100 countries and production and sales facilities in Europe, North America, the CIS countries, Latin America and Asia. It has built its geographical footprint through substantial investments realized over many years. Today, this is a unique differentiating factor and essential to the Group's lasting success, for the following reasons:

- The Group is able to capture growth wherever it arises— in particular, it will be able to take advantage of the economic growth in the United States; the substantial stock of residential flooring that requires renovation in Russia; the most innovative market segments in Northern Europe, France and Germany; and the early stage markets for sophisticated commercial flooring products in China and Brazil.
- The Group is intimately familiar with the local tastes and design and technical preferences that drive market demand, allowing it to tailor its product range and obtain a competitive advantage over suppliers who do not have the same scale and presence.
- The Group's local manufacturing capacity in each of its principal regional markets allows it to enhance customer service by reducing lead times, while optimizing transportation costs, minimizing customs duties and limiting working capital requirements.

- c) Balanced geographic and end-market exposure providing resilience to cycles.** The Group's diversified geographic exposure and its large customer base provide the Group with natural protection against regional economic cycles in the construction and renovation sectors. The Group's broad product range allows it to offer flooring solutions that are adapted to meet varied technical specifications, budgets, safety and design requirements, opening up a broad range of attractive end-markets (housing, health care, education, offices, stores and shops, hospitality and sports). Approximately 80% of the Group's product sales, in terms of square meters, are for renovation projects, a market that is subject to less volatility than the new construction market. The Group's sales are divided between commercial end-users, which represented 70% of

2015 sales and residential end-users, which represented 30% of 2015 sales. It sells its products to vast numbers of customers worldwide, with little concentration risk; in 2015, the Group's largest customer represented less than 5% of consolidated net revenues. The Group believes its unique product range, diversified exposure to attractive end-markets, extensive customer base and global footprint reduce its dependence on any one industry, region or sector of the economy.

**d) Scale and execution excellence across the value chain, providing strong competitive advantages.** The Group's global reach and size enable it to remain close to customers, leverage research and innovation and benchmark best practices across the Group's global operations.

- Its three regional design teams continuously monitor local trends to adapt product designs and meet customer preferences. The Group's sales force of approximately 1,500 is in regular contact with distributors and retailers, providing them with the selection, brands and service that make the Group's products an attractive choice for their end-user customers.
- The Group maintains close long-term relationships with architects, designers, installers and contractors, who play an essential role in the choice of flooring solutions, particularly in the commercial market. The Group's training programs for building sector professionals and installers—"Tarkett Academies"—develop loyalty to its brands and ensure that end-users receive installation services commensurate with the quality of the Group's products.
- The Group's WCM program, managed by a dedicated team that regularly visits and benchmarks the Group's operating units, spreads expertise and best practices while ensuring quality, operational optimization, cost efficiency and best-in-class service.

**e) Track record of profitable growth, strong cash flow generation and Return on Capital Employed (ROCE).** The

Group has demonstrated a consistent ability to grow profitably, both organically and externally, even through periods of economic downturn. It has, for example, successfully integrated 20 acquisitions over the past nine years. Since 2010, consolidated net revenues and adjusted EBITDA have grown at a compounded annual growth rate of 7.2% and 5.1%, respectively. The Group has maintained an adjusted EBITDA margin in the range of 9.1% to 12.3% since 2010. The Group's profitability has been enhanced by the productivity improvement aspects of the WCM program, which include reducing raw material costs and streamlining operations. The WCM program has enabled the Group to achieve significant cost savings. The Group believes that the WCM program will continue to generate substantial savings in the coming years. The Group's profitable operations, combined with disciplined asset management, have translated into strong cash generation and return on capital employed. The Group's ROCE (which the Group defines as earnings before interest and tax divided by the sum of tangible and intangible assets (including goodwill and working capital) has averaged 14% since 2010, allowing the Group to maintain a strong financial structure and giving it the financial capacity to invest in future development.

**f) Experienced and international management team leading a decentralized and agile organization.** The

Group's internationally diverse management team is deep and has extensive experience, leading the Company in an entrepreneurial spirit. The current management team has been instrumental in the successful implementation of the Group's internal development strategy, while successfully managing several turnaround projects (such as the sports surface segment), and acquiring and integrating 20 targets over the past nine years. The management team includes a mix of experience in the flooring business as well as in other industries such as the automotive and chemicals sectors.

## 1.4 BUSINESS

### 1.4.1 NOTE ON SOURCES OF INFORMATION

Unless otherwise noted, the information included in this section is based on Group estimates for 2014 and is provided solely for informational purposes. The Group is currently in the process of updating its estimates for 2015. To the best of the Group's knowledge, there are no authoritative external sources providing exhaustive and comprehensive coverage or analysis of the flooring market. Consequently, the Group makes estimates based on a number of sources, including studies and statistics from independent third parties (in particular Freedonia, the European Federation Parquet Industry Federation and the European Resilient Flooring Manufacturers' Institute), data published by other market participants and data from the Group's operating subsidiaries. These various studies, estimates, research and information, which the Group considers reliable, have not been verified by independent experts. The Group does not guarantee that a third party using other methods to analyze or compile the market data would obtain the same results. In addition, the Group's competitors may define their economic and geographic regions differently.

### 1.4.2 OVERVIEW

The Tarkett Group is a leading global flooring company, providing integrated flooring and sports surface solutions to professionals and end-users in the residential and commercial markets. Leveraging over 130 years of experience, the Group offers fully-integrated flooring solutions that it believes represent one of the widest and most innovative product ranges in the industry. The Group currently sells in the aggregate an average of 1.3 million square meters of flooring per day, and operates 34 manufacturing sites located around the world in each of its principal geographic regions. The Group has a diversified geographical footprint, which enables it to capture growth opportunities wherever they arise. The Group holds leading positions in each of its principal product categories and geographic regions, built through robust organic development, as well as successful and profitable external growth.

In 2015, the Group generated net consolidated revenues of €2,714.8 million, adjusted EBITDA of €285.3 million and net profit attributable to owners of the Company of €83.5 million. The Group's segment reporting is based on four operational segments—three of which relate to its flooring products and their geographic regions (EMEA; North America; and CIS, Asia Pacific ("APAC") and Latin America), and one of which relates to its sports surfaces products.

### 1.4.3 TARKETT'S MARKETS

The Group sells its products in more than 100 countries. With local sales forces and manufacturing facilities in each of its principal geographic regions, the Group is able to match its products to local and regional demands and tastes. The Group's flooring sales are well balanced geographically, with 37% of 2015 sales realized in EMEA, 41% in North America and 22% in CIS, APAC and Latin America.

The Group's sales are divided between commercial end-users, which represented approximately 70% of 2015 sales and residential end-users, which represented approximately 30% of 2015 sales. In these two principal channels, renovations typically account for the large majority of sales (approximately 80% in terms of square meters). The Group sells residential products with designs and styles that are adapted to each geographical region that it serves. The CIS countries represent the Group's largest geographic region for residential products. The Group's products for commercial end-users are sold mainly in North America and Western Europe, although the Group's business is growing in the APAC and Latin American markets. The Group's commercial products benefit from its substantial research and innovation capacity, which is essential for meeting the technical specifications of commercial end-users such as schools, universities, hospitals, health care facilities, offices, hotels and retail establishments. The Group's capacity for innovation is also key to its success in the sports surface market, where it holds leading positions in artificial turf and athletic tracks in North America, as well as leading positions in artificial turf in key countries in Europe.

The Group has strong global and national brands that are recognized by end-users and professionals and adapted to the distribution strategy used in each market. Tarkett uses a diversified mix of distribution channels that include wholesalers, specialty chains, installers and contractors, independent retailers, DIY (do-it-yourself) retailers, direct key accounts and builders-merchants. The quality of the Group's products is recognized by architects, installers and contractors who are instrumental in specifying and choosing flooring solutions, particularly for commercial applications. The Group's distribution strategy is tailored to each market in which it operates and includes service centers that put the Group close to its customers and training facilities that generate brand loyalty and ensure the highest quality installation services for the Group's products. The Group has a network of 62 sales and marketing offices with a local sales force in each of its main markets.

### 1.4.4 TARKETT'S PRODUCTS

Tarkett offers products with innovative designs and textures adapted to local tastes and demand in each of its markets. It designs, manufactures, markets and sells five key types of flooring:

- **Resilient Flooring (Vinyl and Linoleum) (approximately 49% of 2015 revenues).** The Group's resilient products include a broad range of flooring options, including vinyl sheet, vinyl tile, safety and static-control vinyl flooring, luxury vinyl tiles (LVT), and linoleum products. The Group's resilient products are offered to both residential and commercial end-users. The Group's strength in design and innovation allows it to offer resilient flooring in a wide variety of styles and colors, providing end-users with ease of installation, durability and reduced maintenance. The Group is currently the leading supplier of resilient flooring solutions worldwide.

- **Carpet Flooring (approximately 21% of the Group's 2015 revenues).** The Group's carpet products include a wide range of modular, broadloom and hybrid products (such as Powerbond™) for commercial end-users such as offices, universities, schools, health care facilities and government facilities. Tarkett's presence in the carpet segment was reinforced by the 2014 acquisition of the Desso Group, which expanded the Group's product portfolio by adding carpet, a strong value added product, for its European customers, reinforced the Group's European presence, and also allowed it to offer commercial carpet solutions to all of its customers worldwide, in conjunction with the 2012 Tandus acquisition.
- **Wood and Laminate Flooring (approximately 7% of 2015 revenues):** The Group's wood and laminate flooring products are used primarily in residential renovation projects and, to a lesser extent, in commercial applications such as retail, hospitality, offices and indoor sports facilities. The Group's wood product range includes high-quality engineered wood floors in a variety of wood species, colors, tones and finishes. The Group's laminate product range offers a functional alternative to wood flooring that is both stylish and affordable. The Group is a leading supplier of wood flooring in Europe and the CIS countries.
- **Rubber Flooring and Accessories (approximately 7% of 2015 revenues):** The Group's rubber flooring products and rubber and vinyl accessories are sold mainly to commercial end-users in North America, primarily in the healthcare, education, industrial and indoor sports sectors. They include rubber tiles and sheets, vinyl baseboards, stair nosing, stair borders, tactile warning strips, decorative wall skirting and other accessories. They are shock-absorbent and slip-resistant and offer natural acoustic properties with low maintenance requirements. The Group is currently the leading supplier of vinyl accessories in North America.
- **Sports Surfaces (approximately 16% of 2015 revenues):** The Group's sports products include innovative synthetic turf and track solutions for a wide range of sports venues ranging from community multi-purpose sports fields to professional football, soccer and rugby stadiums. The Group also offers artificial grass for landscaping purposes as well as indoor sports flooring. The Group has been recognized by the International Rugby Board (IRB) and FIFA (Fédération Internationale de Football Association) for the quality of its patented FieldTurf technology. The Group is currently the leading global supplier of artificial turf for sports surfaces worldwide and the leading provider of athletic tracks in North America.

## 1.5 GENERAL PRESENTATION OF THE FLOORING AND SPORTS SURFACES MARKET

The Group estimates that approximately 13.4 billion square meters of flooring were sold globally in 2014, excluding sales of specialized products such as concrete, bamboo and metal flooring. The categories of products that Tarkett sells account for approximately 22% of the total global flooring market, or approximately 2.9 billion square meters in 2013.

The table below presents an estimated breakdown of the global flooring market in 2014 by product category, based on the number of square meters of product sold.

	Volume in millions of square meters	% Percent of global market
Vinyl, linoleum and rubber	1,059	8%
Wood and laminate	1,221	9%
Carpet (commercial)	613	5%
<b>Total for product categories sold by the Group</b>	<b>2,892</b>	<b>22%</b>
Carpet (residential)	2,304	17%
Ceramic	7,682	57%
Other	486	4%
<b>Total</b>	<b>13,365</b>	<b>100%</b>

The market segments in which the Group is present are resilient flooring (vinyl, linoleum and rubber), wood flooring, laminate flooring and carpeting products for the commercial market, an area that the Group strengthened with the 2014 acquisition of Desso. The Group believes that its current product categories benefit from strong growth potential, but it may expand its portfolio to new categories if they present opportunities for profitable growth in line with the Group's strategy. For more information, see Section 1.3, "Strategy".

The flooring market is divided into residential and commercial end-users. In 2015, for the product categories in

which the Group is present, the residential market represented approximately 30% of global sales, while the commercial market represented approximately 70%. In these two primary market categories and in each region, the vast majority of sales (approximately 80%) are for renovation projects, while a minority is for new construction.

The Group's sports surface products are generally intended for commercial use, primarily by universities, schools and public facilities. Artificial turf, on the other hand, is also sold to residential end-users, particularly for landscaping purposes in the southern United States.

### 1.5.1 GENERAL PRESENTATION OF THE FLOORING MARKET

The demand for a particular flooring product can vary significantly from one geographic region to another as a result of cultural differences, as well as differences in climate and regulatory requirements that can vary from region to region.

The table below presents a breakdown of the global flooring market in 2014 by product category and geographic region, based on the number of square meters of product sold.

<i>(in millions of square meters)</i>	EMEA		North Americ a	CIS, APAC and Latin America			Total
	West ern Euro pe <sup>(1)</sup>	Middle East/Africa		CIS and Balkan s	Asia- Pacifi c	Latin Amer ica	
Vinyl, linoleum and rubber	257	39	250	194	292	27	1,059
Wood and laminate	312	110	202	153	400	44	1,221
Carpet (commercial)	112	43	255	10	185	8	613
<b>Total for product categories sold by the Group</b>	<b>681</b>	<b>192</b>	<b>707</b>	<b>357</b>	<b>878</b>	<b>79</b>	<b>2,892</b>
Carpet (residential)	420	163	959	38	696	29	2,304
Ceramic	436	910	204	175	4,959	998	7,682
Other	64	0	24	6	368	24	486
<b>Total</b>	<b>1,601</b>	<b>1,265</b>	<b>1,893</b>	<b>576</b>	<b>6,902</b>	<b>1,129</b>	<b>13,365</b>

<sup>(1)</sup> The countries included in Western Europe are Germany, Austria, Belgium, Luxembourg, Denmark, Finland, France, Italy, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, the United Kingdom and other Central and Southern European countries.

The information below presents the principal characteristics of the geographic regions in which the Group sells its products.

### 1.5.1.1 EMEA

#### ■ *Characteristics of the market*

In 2014, demand for flooring in Western Europe was 1.6 billion square meters, representing 12.0% of global demand for flooring. The categories of products that the Group sells accounted for 681 million square meters in 2014, or approximately 42.5% of flooring products sold in Western Europe, including 19.5% of sales for wood and laminate products, 16.0% for resilient flooring and 7.0% for commercial carpet. Products in these categories are used in both the residential and commercial markets.

In Western Europe, demand for different categories of flooring products varies significantly from country to country, especially between Northern and Southern Europe. For example, carpet is frequently used in the United Kingdom, whereas wood floors are more popular in Scandinavian countries and ceramic is more in demand in the South. In Germany and France, the breakdown by product category is more balanced.

The Group sells primarily vinyl resilient flooring, wood flooring and laminate flooring in Western Europe, mainly in France, Sweden, Germany and the United Kingdom. Most of the Group's sales of resilient flooring are in France, Sweden, Germany and the United Kingdom, while the majority of its wood and laminate flooring sales are in Scandinavia.

In 2014, demand for flooring in the Middle East and Africa was 1.3 billion square meters, representing 9.5% of global demand for flooring. In this region, where ceramic represents close to 72% of demand for flooring, the categories of products that the Group sells represented 192 million square meters in 2014, or 15.2% of volumes sold in the Middle East/Africa region, including 8.7% for wood flooring and laminates, 3.4% for commercial carpet, and 3.1% for resilient flooring.

#### ■ *Growth Drivers*

Recent trends in the EMEA region vary from country to country. In the United Kingdom, total construction activity has decreased in recent years, despite an increase in do-it-yourself improvements and home renovations. The French flooring industry suffered as a result of a difficult economic environment, while flooring demand was less affected by the economic crisis in Scandinavia and Germany (although there was a decrease in sales of laminate flooring in a highly competitive environment).

The Group believes that flooring demand in this region is currently stable, despite an economic context that continues to be uncertain and shows limited prospects for potential growth. Demand for wood floors may stabilize, in particular in Scandinavia. On the other hand, sales volumes of laminate flooring are likely to decline slightly. The sources the Group analyzed indicate, however, that there may be growth in resilient flooring for the commercial market, in particular in Germany and the United Kingdom.

#### ■ *The Group's Competitive Position*

The Group is a leader in the Western European flooring industry. It is a leader in vinyl flooring in Europe and a leading flooring company overall in France and Sweden. It is also the third largest manufacturer of wood and linoleum flooring in Western Europe. It accounts for less than 5% of laminate flooring sales in most countries. However, it is a leader in wood and laminate flooring in Scandinavia, with approximately 15% of sales in that region.

The Group's main competitors in this region are European groups, which generally concentrate their businesses on a limited number of countries and products. Its most important competitors in this region are Forbo (resilient flooring), Gerflor (resilient flooring), Kahrs-Karelia Upofloor (wood flooring), IVC (resilient flooring and wood flooring, a company acquired by the Mohawk group in 2015), Beauflor (resilient flooring), James Halstead (resilient flooring), Bauwerk-Boen (wood flooring), and DLW Flooring (resilient flooring). In addition, in certain countries the Group faces local competitors. Finally, with respect to commercial carpet, Desso's main competitor is the American group Interface.

### 1.5.1.2 North America

#### ■ *Characteristics of the market*

In 2014, demand for flooring in North America was 1.9 billion square meters, representing 14.2% of global demand for flooring products. Demand in North America is dominated by carpet, which represented 64.1% of total volumes sold in 2014. The categories of products that the Group sells represented 707 million square meters in 2014, or approximately 37.3% of the total volume of flooring sold in North America, including 10.7% of total flooring sales for wood and laminate products and 13.2% of sales for resilient flooring. In North America, the Group sells these products primarily to commercial end-users and, to a lesser extent, to residential end-users. Commercial carpet represents 13.5% of total North American demand.

The Group's flooring sales in North America are divided fairly evenly among carpet, resilient flooring, rubber flooring, and vinyl and rubber accessories, with wood and laminate flooring accounting for a smaller portion of sales. The Group sells its products primarily in the United States, and to a lesser extent in Canada (approximately 10%). The Mexican market is considered to be part of Latin America, in the CIS/APAC/Latin America segment.

#### ■ *Growth Drivers*

Between 2006 and 2011, North American demand for flooring fell, in particular as a result of the decrease in new construction in that region. However, the U.S. construction market grew in 2013 and continued to improve in 2014 and 2015, due primarily to the residential market.

In the coming years, the Group expects significant growth to result from the U.S. economy's recovery. The sources that the Company analyzed indicate a potentially significant

increase in demand for all products, including the Group's principal products in this geographical segment: residential and commercial resilient flooring, rubber and vinyl accessories for the commercial market, and commercial carpeting.

#### ■ **The Group's Competitive Position**

The Group has a strong presence in several product categories in North America. In this region, it is the third largest resilient flooring company (including LVT, since the acquisition of Centiva at the end of 2010) and the third largest rubber flooring company. Due to the 2012 acquisition of Tandus, it is also the fifth largest commercial carpet company in North America. The Group's Johnsonite products occupy a leadership position in the vinyl and rubber accessories market.

The Group's main competitors in this region are the Mohawk, Shaw, Armstrong, Interface, Mannington, and Beaulieu of America groups. For most of these competitors, the large majority of their sales are in the U.S. market. In keeping with the strong North American preference for carpet, this product category represents a significant share of these companies' sales (this is particularly the case for Mohawk, Shaw and Interface). However, some of these companies, including Mohawk, Armstrong and Mannington, also market resilient flooring, as well as wood and laminate flooring. Johnsonite's competitors include Nora, a rubber flooring manufacturer, as well as local manufacturers.

#### 1.5.1.3 CIS & Balkans

##### ■ **Characteristics of the market**

In 2014, demand for flooring in Russia, the other CIS countries and the Balkans (the former Yugoslavia) was 0.6 billion square meters, representing 4.3% of global flooring demand. In these countries, resilient flooring is most popular, representing 33.7% of total flooring demand, as compared with 7.9% for the global market as a whole. Other than resilient flooring, the main products sold are ceramic tiles (30.4% of total flooring demand), wood and laminate flooring (approximately 26.5%) and carpet (8.3%).

Unlike Western Europe and North America, resilient flooring is used primarily by the residential market in the CIS countries. Most of the residents of these countries became the owners of their homes following the dissolution of the Soviet Union. For these new homeowners, renovation is a high priority, and resilient flooring is both well suited to local tastes and to the climate, and attractive for household budgets. The commercial market in this region has been slower to develop, but shows strong growth potential. Commercial end-users initially chose residential resilient flooring for their first renovation projects. However, these floors are not well adapted to high-traffic commercial premises. Moreover, Russia has adopted stringent fire regulations for commercial products. As a result of these factors, the resilient flooring market has shown moderate growth in recent years, although its size remains modest compared to the residential market. In Russia and the other CIS countries, the Group sells primarily vinyl flooring to residential end-users, and to a lesser extent wood and laminate flooring.

##### ■ **Growth Drivers**

As indicated above, following the dissolution of the Soviet Union in 1991, most homes were given to their occupants, resulting in a very high homeownership rate. Due to economic growth in these countries, renovation demand has grown significantly in recent years. However, given the current unfavorable macro-economic environment, economic forecasts for this region were recently downgraded (in January 2016, the IMF forecast a 1.0% contraction in Russia's GDP in 2016). Nevertheless, despite the current difficulties, two-thirds of flooring in the Russian residential sector will need substantial renovation, according to Rosstat, the Russian government statistics agency. Moreover, over the last several years Russians have begun to buy laminate floors in order to give the appearance of wood floors while remaining within a reasonable budget.

In the CIS countries, as soon as the economic situation improves, residential and commercial resilient flooring demand is expected to recover, as is demand for wood and laminate flooring. Today, residential renovation represents a significant growth area, with approximately two billion square meters requiring renovation out of the three billion square meters currently installed in Russian residential housing stock, according to Rosstat.

##### ■ **The Group's Competitive Position**

The Group has been doing business for more than 20 years in the CIS and the Balkans, primarily in Russia, Serbia, Ukraine and Kazakhstan. As a result of its long-standing presence in this geographic region, the Group considers itself to be a local company and a market leader. It is the number one resilient flooring company in Russia, Ukraine, Kazakhstan, Serbia and Belarus. It is also the number four laminate flooring company in Russia.

Tarkett's market leadership in the Russian resilient flooring market is the result of its well-known brands, local production, well-developed distribution platforms and deep understanding of local tastes. In the Group's opinion, Komitex and Juteks/Beaulieu, two local companies, are the other leading companies in this region, alongside the international suppliers IVC/Mohawk and Forbo.

The Group is a significant distributor of laminate flooring. However, it is not as strong in laminate flooring as it is in resilient flooring.

In the laminate flooring market, Chinese manufacturers occupy a leading position due to their ability to offer low-cost entry-level products. The other principal companies in this market are Kronostar, Kronospan, Classen and Unilin (a member of the Mohawk group). Finally, the Group is a major player in sales of wood flooring in the CIS countries, where its main competitors are Barlinek and Kährs-Karelia Upofloor.

#### 1.5.1.4 Latin America and APAC

##### ■ **Characteristics of the market**

In 2014, demand for flooring in Latin America and APAC was 1.1 billion and 6.9 billion square meters, respectively, representing 8.4% and 51.6% of global flooring demand. Ceramic is the most frequently used material in Latin America and APAC, as a result of local climate, ease of manufacture and the multiplicity of local suppliers.

In Latin America, the Group does business principally in Brazil, where most of its sales are vinyl products for commercial end-users. In APAC, the Group sells primarily carpet and vinyl flooring to commercial users in Australia and China.

##### ■ **Growth Drivers**

The Group believes that demand for the product categories that it offers in Latin America could grow, in the context of an overall market that is stagnant or even declining. In Brazil, in addition to structural factors, the economy could benefit significantly from the 2016 Olympic Games, after having benefited temporarily from the 2014 Soccer World Cup. In this region, sales of luxury vinyl tiles continue to grow at a faster pace than the general flooring market.

With respect to APAC, governmental initiatives in China should continue to sustain the construction market, according to a market study that the Group conducted in collaboration with a consulting firm. The aging of the Chinese population should also fuel growth in the retirement home sector, in addition to projected growth from the healthcare and education markets. Given the size of its residential housing stock, China is, by volume, the largest in the world. Vinyl flooring's market penetration is still limited, but this product category may grow in the future.

##### ■ **The Group's Competitive Position**

The Group's position in Latin America and APAC is in a development phase. Its position in Latin America was strengthened in 2009 with the acquisition of Fadamac, a Brazilian vinyl flooring manufacturer; it is now the number one commercial vinyl flooring manufacturer in this country.

In 2014, the Group reinforced its manufacturing and sales presence in APAC through two transactions in China.

In addition, since the 2012 Tandus acquisition, the Group has benefited from a commercial carpet production site in China.

The Group's main competitors in vinyl flooring in Latin America are Gerflor and Forbo. Its main competitors in APAC for vinyl flooring are Armstrong, Gerflor, LG and Forbo, as well as local Chinese manufacturers.

#### 1.5.2 SPORTS SURFACES

##### ■ **Characteristics of the market**

Within the sports surfaces segment, the Group primarily sells artificial turf, athletic tracks and indoor sports flooring. The Group sells sports surfaces mainly in the United States and Canada, but also sells elsewhere, particularly in European countries including France, Spain, the Benelux countries and the United Kingdom.

The Group's sports surface products are generally intended for commercial use, primarily by universities, schools and public facilities. In addition, artificial turf is sold to residential end-users, particularly for landscaping purposes in the southern United States.

##### ■ **Growth Drivers**

The Group believes that the growth in demand for sports surfaces seen in 2015 should continue over the next few years, in particular with respect to artificial turf, which represents a significant share of the Group's sports surfaces sales. The artificial turf market in Europe, which was in decline until 2013, is expected to continue to grow, and growth is also expected to continue in the North American market. The growth in demand for artificial turf is due to the increased need for renovation of athletic fields, the economic expansion underway in the United States, and governmental restrictions on water consumption (particularly in the United States).

##### ■ **The Group's Competitive Position**

The Group is the leading provider of artificial turf in North America and the leading provider of athletic tracks in the United States. It has numerous competitors, including small companies and resellers who outsource the manufacture of synthetic fiber. In the artificial turf market, the Group's strongest competitors in North America are Astroturf, Hellas, Shaw and Sprinturf. In Europe, the group is the second artificial turf player behind Tencate, and its other large competitors include Polytan, Limonta and Domo. Its principal competitors in athletic tracks are Hellas, Apt, Stockmeier and Mondo.

## 1.6 PRODUCTS SOLD BY THE TARKETT GROUP

The Group offers a diversified range of flooring solutions, enabling it to tailor its products to the needs of each market and region. The choice of a flooring solution depends heavily on the type of premises where the product is used. In addition, the products demanded by both professionals and individuals tend to vary significantly from one geographic region to another, due primarily to cultural differences but also due to differences in climate and environmental factors.

The Group designs and sells products as a function of the needs, tastes and budgets of various end-users and differentiates its products through choice of materials, design and compliance with differing regulatory standards, as well as resistance to varying levels of foot traffic. Its large product range allows it to offer integrated decorative and functional solutions using several product categories in a single project, by coordinating accessories with floor coverings. By combining and coordinating its products, the Group can respond to several different needs at a single site.

Each of the Group's products features technological enhancements that improve product quality for end-users. Each of the Group's products is engineered with environmental stability in mind through a focus on the raw materials used in production, environmentally sound manufacturing processes and ecologically safe product disposal. The Group designs-in the use of renewable and recycled resources wherever possible. The Group's products are also designed to protect indoor air quality. For example, the levels of volatile organic compounds ("VOCs") emissions given off by the Group's products are lower than current standards, and the Group uses phthalate-free plasticizers for its vinyl floors in certain regions.

The Group's products are also designed to be recyclable, either within its own production chain or in other uses. The Group's production process is designed to minimize the use of water and energy at its production sites.

The Group has been doing business for decades throughout the world, and its brands are internationally and locally recognized, associated with high quality at competitive prices. The Group provides training to local installers to optimize the performance of the products purchased by commercial end-users, thereby improving installation quality. The Group's customer service representatives provide support throughout the life of its products.

### 1.6.1 PRESENTATION OF THE GROUP'S PRODUCTS

The Group sells the following types of flooring:

- **Resilient flooring (vinyl and linoleum)**, including:
  - resilient flooring for residential end-users, including heterogeneous (multi-layer) vinyl, which can be sold in rolls or as tiles, especially high-end vinyl tiles (luxury vinyl tiles, or "LVT"), and
  - resilient flooring for commercial end-users, including heterogeneous vinyl, which can be sold in rolls or as

tiles, including LVT, homogeneous vinyl (single-layer), and linoleum floors;

- **Wood and laminate flooring**, including plain wood and engineered wood floors as well as multi-layer laminate floors using several materials, sold to both residential and commercial end-users;
- **Carpets**, principally for commercial users;
- **Rubber flooring and accessories**; and
- **Sports surfaces** (primarily artificial turf and athletic tracks).

The following table presents the breakdown of the Group's 2015 consolidated net revenues by product type:

2015 Net Revenues	% of 2015 Net Revenues
Resilient flooring (vinyl and linoleum)	49%
Wood and laminate flooring	7%
Carpets	21%
Rubber and accessories	7%
Sports surfaces	16%
<b>Total</b>	<b>100%</b>

The Group's business is organized into four segments—three geographical segments for flooring (EMEA, North America and CIS/APAC/Latin America) and one global segment for sports surfaces. The following table presents the breakdown of the Group's 2015 consolidated net revenues by segment (including sports surfaces).

2015 Net Revenues	% of 2015 Net Revenues
EMEA	37%
North America	41%
CIS, APAC and Latin America	22%
<b>Total</b>	<b>100%</b>

#### 1.6.1.1 Resilient Flooring (Vinyl and Linoleum)

The Group offers a large range of resilient flooring, including homogenous and heterogeneous vinyl and linoleum. Both residential and commercial end-users purchase heterogeneous vinyl. Homogeneous vinyl and linoleum, on the other hand, are purchased primarily by commercial end-users. Residential end-users and commercial end-users purchase resilient flooring with similar characteristics, and the Group's LVT products for residential end-users are very similar to the resilient flooring that it sells to commercial end-users in terms of design, price ranges and the materials used.

The Group has a very strong position in the resilient flooring market as a result of being the largest vinyl-flooring manufacturer in the world. Resilient flooring represents the largest portion of the Group's sales in the EMEA and CIS,

APAC and Latin America regions, and also accounts for a significant share of its sales in North America. In particular, the Group is the largest manufacturer of resilient flooring in France, Germany, Sweden, Russia, and Ukraine. It is also the number two North American manufacturer of resilient flooring, and it offers these products in Latin America (in particular in Brazil, where it is the largest manufacturer of commercial vinyl flooring) and in APAC (in particular in China).

#### ■ **Residential Vinyl Flooring**

The Group offers a variety of heterogeneous vinyl floors for the residential market, which includes apartments and houses (the common areas of multi-family residences and apartment buildings are considered commercial premises).

Design, appearance and price ranges of residential vinyl flooring must be adapted to the budgets, uses and tastes of the residential users in each geographical region, which can be very culturally specific.

Heterogeneous vinyl flooring is composed of felt or fiberglass backing covered with compact PVC and foam padding for insulation, covered successively with a printed decorative layer, a wear layer coating and a scuff-resistant finishing treatment. Heterogeneous vinyl flooring for residential end-users contains a thin wear layer, which enables it to be sold at competitive prices while maintaining the level of durability needed for residential use.

In terms of the pattern printed on the flooring surface, the Group offers its end-users a variety of colors and designs. In order to keep up with decorating trends, the Group must tailor its product lines to conform to prevailing styles and fashions, which can vary widely from one geographic region to the next. Heterogeneous vinyl products offer several advantages in terms of livability and remain attractive over a long period of time.

Residential heterogeneous vinyl flooring can be sold in rolls or in modular format (tiles or plates). Rolls are generally installed with glue, whereas modular products may be installed using glue, self-adhesive attachments or they may be snapped together, which facilitates installation and repair.

The Group helps customers choose flooring that matches their tastes and interior decoration. Tarkett also designed Starfloor Click, a line of modular, easy-to-install LVT with a solid click-locking installation system that is resistant, durable and adapts well to different types of architecture.

#### ■ **Commercial Resilient Vinyl Flooring**

Commercial resilient flooring is specifically designed for high-traffic areas and can withstand numerous shocks. It is used in commercial premises including offices, administrative buildings, schools, hospitals, retirement homes, hotels, stores, the common areas of apartment buildings and in train stations and factories.

Resilient flooring for commercial uses includes a large range of products, including homogeneous and heterogeneous vinyl and linoleum flooring.

#### ■ **Heterogeneous Vinyl Flooring**

Heterogeneous vinyl flooring for commercial use is designed to withstand intense foot traffic. A thicker wear layer is applied to the product than is used on the Group's residential resilient flooring products in order to reinforce the product and ensure its durability. Heterogeneous vinyl flooring is suitable for almost any commercial use.

The Group classifies its heterogeneous vinyl flooring products into two types: acoustic products, which are designed to absorb ambient noise (such as footsteps and talking) and compact products, which reinforce the floor's robustness.

The Group offers a diverse range of designs and patterns printed on the decor layer, for both rolled and modular products (including LVT, as further described in the next paragraph, and loose lay tiles). *These frequently updated product lines give end-users a wide product selection.*

Among the Group's other heterogeneous vinyl flooring products, it has developed LVT, which is a high-end modular product designed primarily for the commercial market. This product offers high precision printing of designs and patterns, using sophisticated graphics techniques.

#### ■ **Homogeneous Vinyl Flooring**

Unlike heterogeneous flooring, homogeneous vinyl flooring is made in a single layer with the pattern embedded directly into the material. This type of flooring is covered with a layer of pigment and reinforced by a polyurethane surface treatment that prevents metallization and facilitates maintenance.

Its resistance to wear-and-tear makes it a durable solution for high-traffic areas. It comes in a compact version for high-traffic areas and in an acoustic version. The absence of multiple layers in its composition makes the design simple and offers advantages in terms of hygiene and maintenance.

As a result of its particular acoustic benefits, anti-bacterial properties and reinforced durability homogeneous vinyl flooring is frequently used in the healthcare and educational sectors, as well as in aged-care facilities.

#### ■ **Linoleum Flooring**

The Group has been making linoleum for more than one hundred years.

Linoleum is composed of a jute backing treated with renewable raw materials such as linseed oil, rosin, cork flour or wood flour, to which a surface treatment is added.

Linoleum is a natural product covered with a surface treatment that makes it extremely robust and easy to maintain. The Group's linoleum products are extremely durable and therefore well adapted to the intense use of flooring that is typical of common areas in educational buildings and healthcare facilities, as well as offices and indoor sports facilities.

### 1.6.1.2 Wood and Laminate Flooring

#### ■ Wood flooring

The Group sells wood flooring in Europe (EMEA segment), primarily in Scandinavia. It also markets these products in the CIS countries and the Balkans and, to a lesser extent, in North America. The Group is a leading manufacturer of wood flooring in Europe and in the CIS. Wood floors are generally sold in the residential market. Although most of the wood the Group uses comes from Europe, it uses a staining process to adapt to demand in different markets and regions, in particular by offering wood flooring that resembles exotic wood.

The engineered wood flooring that the Group sells is composed of three main layers: the bottom stabilizing layer; a middle layer in soft wood such as pine or spruce or HDF (high density fiber); and a top layer of high-quality wood. This composition results in a more responsible use of the high-quality wood in a thin layer and allows the Group to optimize the hidden layers of fast-growing species of wood. These three stacked layers ensure the longevity of the Group's wood floors, in addition to reinforcing their structural integrity.

The Group uses high-performance protection techniques to reinforce resistance to scratches and wear. Engineered wood helps limit the use of high-grade wood, such as oak, which requires relatively long regeneration cycles. In this way, the Group contributes to sustainable forest management.

#### ■ Laminate Flooring

Laminate flooring is primarily sold to end-users in the residential market and can be designed to reproduce the pattern that the end-user wants—wood, stone, ceramic or a graphic design—but with enhanced durability and at a lower cost.

Laminate flooring consists of a paper balancing layer, a core board of high-density wood fiber or HDF, a decor layer of printed paper and an overlay to protect the visible surface.

Laminate flooring is sold at competitive prices compared to wood and provides a durable flooring solution. The Group offers a large range of designs to end-users to satisfy all of their wishes, although this product type is intended primarily for the residential market through DIY (do-it-yourself) distribution channels and construction materials, in particular.

Laminate flooring is easy to install thanks to the Group's 2-Lock Click and T-Lock systems, which make it possible to lock the plates to each other without gluing them to the supporting layer. Laminate flooring can also be adapted to the specific needs of each end-user: heavy use and weight, high resistance to shocks or high-traffic areas. Due to its modular nature, Laminate flooring also allows users to easily change their flooring without incurring prohibitive costs.

### 1.6.1.3 Carpets

The Group primarily offers carpets for use in commercial spaces such as office buildings, governmental institutions, hospitals and schools. Tandus's historical market, North America, is currently the Group's principal geographic region for commercial carpeting.

The Group offers three types of carpeting, which correspond to three generations of the product:

- broadloom carpet, which is made from a polypropylene backing and fibers that are either tufted or woven;
- modular carpet, which is sold in tiles, and made of a vinyl or urethane backing and tufted (nylon) fibers; and
- hybrid resilient sheet flooring, which is an inseparable structure made of a resilient base, a nylon carpet and a specific foam that contributes to its performance and enhances design options.

Carpet is a shock-absorbent floor covering with good acoustic properties that adds comfort and warmth to an interior environment. The Group offers a wide selection of colors and patterns that are frequently updated and tailored to appeal to customers in different geographic regions. The different carpet products also offer acoustic properties and high-performance resistance to rolling and heavy traffic, as well as ease of maintenance.

### 1.6.1.4 Rubber Flooring and Accessories

The Group sells a wide range of rubber flooring as well as rubber and vinyl accessories. Flooring products include rubber sheets and tiles, while accessories include stair nosing, tactile warning strips, tactile paving tiles, warning tiles, baseboards, decorative wall skirting, thresholds and adhesives.

Sold primarily in North America, these products are used mostly by commercial end-users in the healthcare, educational and industrial sectors, as well as in indoor sports facilities. The Group is the leading supplier of vinyl accessories in North America.

As part of the Group's sustainable development initiative, it can produce these products with recycled rubber.

The Group offers rubber flooring and accessories in a wide variety of colors, patterns and textures, in order to coordinate with its other flooring solutions. These products and accessories are slip-resistant and shock-absorbent and provide a high level of safety. They have natural acoustic properties, require little maintenance, and are easy to install and replace.

### 1.6.1.5 Sports Surfaces

The sports surfaces that the Group manufactures are used throughout the world by amateur and professional athletes, providing safety, comfort, performance and aesthetic enjoyment. Sports surfaces are installed at universities, schools and public sports facilities, primarily in North America, as well as in Europe (in France, Spain and the Netherlands).

The Group has a strong presence in the sports market due to the diversity of its products. It is one of the only flooring manufacturers able to provide such a wide range of sports surface solutions.

The Group's sports surfaces include three product types: artificial turf, athletic tracks and indoor sports flooring.

#### ■ **Artificial Turf**

Artificial turf represents the largest portion of the Group's sales of sports surfaces. The Group is the leading artificial turf manufacturer in the world, and particularly in North America. Artificial turf can be used for both sports surfaces and landscaping.

The Group is certified as an artificial turf manufacturer by FIFA (Fédération Internationale de Football Association) and the IRB (International Rugby Board), and its turf is used for training and competition fields by some of the leading European soccer clubs, for hockey, tennis and other multi-purpose sports facilities. However, the principal end-users of this product are universities and high school facilities, and to a lesser extent, local municipalities for landscaping purposes.

The manufacture of artificial turf is a three-step process for which the Group has numerous patented innovative processes: fiber production, tufting and backing coating.

For sports facilities, the Group produces high-quality fibers, whose properties result from the chemical composition, extrusion parameters and unique, carefully designed geometry. The Group has become a leader in fiber extrusion technology since 2010, when it entered into a joint venture with Morton Extrusionstechnik (MET), a German company specialized in fiber extrusion. This joint venture enables the Group to control the fiber production process for its artificial turf.

Artificial turf is a cost-effective solution for owners or maintenance personnel of sports facilities because it is less expensive to maintain than natural turf. From a sustainable development standpoint, it also reduces water use and eliminates the need for fertilizers. Artificial turf offers resistance to wear and tear from constant, year-round play.

The Group also offers an innovative range of landscaping products with a variety of designs that respond to the specific needs of end-users, in particular hotels and commercial campuses. The Group also sells these products to residential end-users, particularly in the southern United States.

#### ■ **Athletic tracks**

The Group offers athletic tracks that promote athlete speed, safety and comfort. It sells them principally in North America, where it is the leading manufacturer.

Athletic tracks are composed of successive shock-absorbing layers of composite rubber, to which a polyurethane layer is applied, with the surface then worked on to give a particular color and external appearance, whether smooth or rough.

Because of the polyurethane surface layer, the Group's athletic tracks are extremely durable and provide athletes with important safety advantages, in particular due to their stability and shock absorption. The track surface essentially acts like a trampoline, propelling the athlete slightly with each stride. Easy-to-install, these tracks can be used in any weather conditions and also have good acoustic properties.

#### ■ **Indoor Sports Flooring**

The Group offers indoor sports surface products in wood, vinyl or linoleum for multi-purpose sports venues and gymnasiums.

Within the vinyl flooring line, the Omnisports collection is adapted to multi-purpose sports venues. It is available in several thicknesses to respond to the technical requirements of a wide range of sporting events, and to offer performance qualities adapted to the needs of its end-users. The Group also offers lines of wood flooring for sports such as basketball, handball, dance, volleyball, badminton, squash and martial arts.

The Group's wide range of indoor sports surfaces satisfies the requirements of both experienced athletes and amateurs in terms of shock absorption, ball bounce and anti-slip surfaces. Certain of the Group's wood flooring product lines are popular for their ease of installation, such as its removable wooden floors (*Sportable*).

Indoor sports surfaces are marketed by a dedicated sales force in the North America sports segment and by the general flooring sales forces in other regions. These indoor sports sales are then recorded in the corresponding segments.

## 1.6.2 MANUFACTURE OF THE GROUP'S PRODUCTS

### 1.6.2.1 Raw Materials and Suppliers

The Group uses various raw materials to manufacture its flooring products: PVCs and plasticizers for vinyl flooring; wood for wood and laminate flooring; polymers and fibers for carpets and artificial turf; rubber, which is used in several flooring types; and cork for linoleum flooring. The Group builds its supplier base on long-term relationships, while focusing on optimizing purchasing terms and adapting the Group's procurement policy to the specific needs of each country.

#### ■ **Raw Materials**

##### ■ **PVC and Plasticizers for Vinyl Flooring**

The Group primarily uses two raw materials to manufacture its products: PVC and plasticizers. These are used to manufacture homogenous and heterogeneous vinyl.

Petroleum-derived products accounted for slightly more than half of the Group's raw materials purchases in 2015. PVC and plasticizer producers have worldwide presences, but with regional differences relating to the relationship of supply and demand in different geographies.

When the Group makes acquisitions, it ensures that it is able to reduce raw material costs by working jointly with the target's suppliers to honor the prices negotiated with the rest of the Group.

Despite its close relationships with its suppliers, the Group is constantly looking for new raw materials opportunities, with regard to both technical characteristics and geographical location, to ensure continued competitiveness.

- **Other raw materials**

Wood represented less than 10% of the Group's raw material costs in 2015. The Group uses wood to make wood and laminate flooring. The wood flooring market remains very local, due to the significant cost of transporting logs or rough timber. The Group is therefore subject to local fluctuations in the price of wood.

The Group purchases other raw materials, in particular fiberglass for vinyl flooring; rubber for rubber flooring, accessories and artificial turf; nylon and polypropylene for carpet; melamine and decor paper for laminate floors; and linseed oil, jute and cork for linoleum floors.

- **Supplier Relationships and Purchasing Policy**

Suppliers are essential partners of the Group, with whom it develops close and durable relationships. The Group has chosen to build long-term relationships with selected partners.

- **Supplier relations**

The Group is careful to maintain relationships of trust over the long term with all of its suppliers. These relationships enable the Group to negotiate favorable commercial terms, but also to create value through innovations.

In order to adapt its procurement structure to different geographic regions, the Group favors partnerships with:

- The leading international chemical companies, such as BASF, Inovyn, Eastman, Vinnolit, Vestolit, and Evonik, which supply the Group throughout the world; and
- Local suppliers.

- **Purchasing policy**

The Group tries to centralize its purchases at the global level for the most important raw materials used to manufacture vinyl flooring, wood flooring, and, since 2015, carpet.

In the majority of the Group's supplier agreements, pricing is indexed monthly or quarterly to market prices of the raw materials used in manufacturing its products. These agreements have terms of between one and three years, with no obligation to purchase specific quantities of materials.

The Group's purchasing policy is based on four principles:

- market analysis and construction of a world-wide pool of suppliers;
- optimization of raw materials;
- collaboration with key suppliers to achieve continuous improvement; and

- annual review of its principal contracts, to ensure efficient procurement.

The Group actively manages its portfolio of partner suppliers. The Group reviews its main contracts annually in order to renegotiate prices and determine supplier availability. Price formulas give the Group visibility as to price evolution over several years.

Diversification of the raw materials that the Group uses enables it to substitute inputs between several suppliers and thus reduce its dependence on certain specialized suppliers.

The Group tries to cooperate closely with its key suppliers on technical issues and innovations. It shares its growth objectives with them in order to ensure that they increase production capacities sufficiently to respond to increased demand.

### 1.6.2.2 Production Facilities

The Group's production facilities are located as close as possible to product delivery sites, while maintaining competitive production costs. The Group has 34 production sites in more than 15 countries in order to be close to its markets, minimize transport costs and customs duties and remain competitive with local players.

The Group tries to constantly improve its manufacturing processes to reduce production times, improve product quality and reduce manufacturing costs.

It uses flexible assembly lines so that it can adapt production to changes in end-user demand.

- **Location of Production Sites**

The Group has 34 production sites; of these, it owns 32 and rents two (in the United Kingdom and in China).

As a result of the Group's historical presence, it has 13 production sites (other than for sports surfaces) in EMEA, including two major sites with more than 500 employees each in Luxembourg and Sweden. The Group's production sites supply the products it markets in this region: resilient flooring, laminate flooring, wood flooring, carpet (since the 2014 Desso acquisition) and sports surfaces. A small portion of European production is also marketed in North America, the Middle East, Latin America and Asia.

The Group owns eight production sites (excluding Sports) in North America, which produce resilient flooring, carpet tiles, and, to a lesser extent, sports surfaces.

The CIS, APAC and Latin America segment also has a substantial number of production sites to satisfy local demand. In the CIS, APAC and Latin America segment, the Group has seven production sites, including one in Otradny, Russia with more than a thousand employees. This is the Group's largest site and offers its largest production capacity in the world. Other production sites in the CIS, APAC and Latin America regions make resilient flooring, wood flooring, laminate flooring, carpets and rugs. The Group also has a carpet production site in China as a result of the Tandus acquisition and the acquisition of a production plant in

Beijing. In Brazil, where the Group is the leading supplier of commercial vinyl flooring, it has a factory that produces to satisfy local demand.

The sports surfaces segment includes six production sites. Three of them manufacture artificial turf (one in the United States and two in Western Europe), and two make athletic tracks in the United States. The remaining production site is

a fiber extrusion factory for artificial turf in Germany (a Group's joint venture with Morton ExtrusionsTechnik (MET), in which the Group holds a 51% interest).

The following table presents the Group's manufacturing sites and the main products manufactured at each site.

Product Line	Country	Site	Products	Location
EMEA	Germany	LaminatePark	Laminate Flooring	Eiweiler
		MET	Artificial turf (fibers)	Absteinach
		Tarkett	Resilient flooring	Konz
	Spain	Fieldturf Poligras	Artificial turf	Valls
	France	Fieldturf	Artificial turf	Auchel
		Tarkett	Resilient flooring	Sedan
	Italy	Tarkett	Resilient flooring (linoleum)	Narni
	Luxembourg	Tarkett	Resilient flooring	Clervaux
	United Kingdom	Tarkett	Resilient flooring	Lenham
	Sweden	Tarkett	Wood flooring	Hanaskog
		Tarkett	Resilient flooring	Ronneby
	Poland	Tarkett	Wood flooring	Orzechowo
		Gamrat	Resilient flooring	Jaslo
	Netherlands	Desso	Carpets	Waalwijk
		Desso	Carpets	Goirle
Belgium	Desso	Carpets Artificial turf	Dendermonde	
North America	Canada	Johnsonite	Resilient flooring	Waterloo
		Tandus	Carpets	Truro
		Tarkett	Resilient flooring	Farnham
	United States	Beynon	Athletic tracks	Hunt Valley
		Beynon	Athletic tracks and tennis courts	Denver
		Fieldturf	Artificial turf	Calhoun
		Johnsonite	Resilient flooring	Chagrin Falls
		Johnsonite	Resilient flooring	Middlefield
		Tandus	Carpets	Calhoun
		Tandus	Carpets	Dalton
Tarkett	Resilient flooring	Florence		
CIS	Russia	Tarkett	Laminate Flooring	Mytishchi
		Tarkett	Resilient flooring	Otradny
	Serbia	Tarkett/Sintelon	Resilient flooring Wood flooring Carpets and rugs	Backa Palanka
	Ukraine	Tarkett	Resilient flooring Wood flooring Carpets	Kalush
APAC	China	Tandus	Carpets	Suzhou
		Tarkett	Resilient flooring	Beijing
Latin America	Brazil	Tarkett Fadamac	Resilient flooring	Jacarei

### ■ **The Group's Investments in Production Sites**

Over the last five years, the Group has made significant investments in its production sites in order to respond to increasing demand, maintain competitiveness and continue reducing production costs.

### ■ **Continued Improvement of Manufacturing Processes**

The Group continually works to improve its manufacturing processes, with the goals of improving worker safety and customer satisfaction and reducing costs.

In February 2009, the Group launched its World Class Manufacturing ("WCM") program, which is inspired by similar successful programs in the automobile sector.

This program seeks to improve:

- product quality and customer service;
- the safety and performance of production sites; and
- the Group's financial profitability, while reducing its impact on the environment.

In connection with the WCM program, the Group is carrying out initiatives to improve product quality, on-time delivery and production yields, all while limiting effects on the environment.

The Group has appointed WCM directors for all of its sites who coordinate ongoing improvement projects on-site and develop related methodologies. They can then share their experiences within the WCM network, thus spreading efficiency improvements throughout the Group's production network to improve profitability. The Group also has a dedicated WCM team that travels to each production site to help local teams deploy the WCM improvements. By traveling to the various production sites, the WCM team can adapt the program's methodologies to local conditions, while at the same time managing action plans centrally.

The Group has seen positive results from the WCM program. A study conducted by an independent party confirmed significant improvement in customer satisfaction in 15 countries where the Group sells its products. There has been a substantial decrease in accidents at the Group's production sites and a decreased environmental impact from the manufacture of its products. In addition, the WCM program has improved management of the Group's supply chain and led to a significant reduction in production costs over the course of the last five years.

The Group believes that the WCM program will continue to generate substantial savings in production costs in the coming years.

#### ■ **Special Attention to Worker Safety**

The WCM program emphasizes accident prevention in the Group's factories by requiring systematic analysis of all incidents, identification of principal causes and implementation of a rigorously monitored action plan.

At the same time, the Group conducts training to raise employee and management awareness of safety issues. The Group's Executive Committee is particularly sensitive to employee safety and discusses the subject with employees when it visits factories.

#### ■ **Strengthened Quality Control**

The Group has implemented a quality-control structure in its factories to ensure rigorous monitoring of its products.

In connection with the WCM program, the Group's teams systematically analyze the principal causes of customer complaints and quality defects and create action plans to limit them.

#### ■ **A Manufacturing Process That Respects the Environment**

The Group takes the environment into consideration at every stage of product design. For that reason, it does its best to select the materials that present the least risk to end-users and the environment, and that can be part of a biological or technical cycle. It prioritizes the use of renewable and recyclable materials in manufacturing its products.

The Group has also developed a system for collection and recycling of flooring, ReUse/ReStart and Floore (for Tandus), which consists of gathering clean flooring waste at the production sites and installation sites in order to re-use it to manufacture new flooring.

The Group has also entered into a partnership agreement with the German research institute Environment Protection Encouragement Agency ("EPEA") in order to deploy the Cradle to Cradle® concept. This program aims to reduce the environmental impact of industrial activities and to design products with materials that protect human health and the environment and that allow for indefinite recycling of the products at end of use.

### 1.6.3 DISTRIBUTION AND SALE OF THE GROUP'S PRODUCTS

The indoor flooring market is split between commercial and residential end-users. Residential users buy the Group's products primarily to renovate existing homes, but they may also purchase them in connection with new construction projects. Commercial users choose flooring for areas that are generally open to the public, in connection with both renovation and construction projects.

Residential end-users generally have a limited ability to distinguish between different products' various qualities and attributes and are therefore relatively dependent on the salesperson at the point of sale to select the appropriate flooring type. In general, residential purchases of flooring are made in DIY stores. These products may, however, also be purchased from specialized construction material suppliers, especially when the general contractor or installer is making the purchase. Therefore, brand awareness among installers and salespeople may have a large influence on product choice.

The commercial market ranges from large-scale projects to shopkeepers with small surface areas, such as artisans and boutiques, whose purchasing patterns tend to be similar to residential users. This segment is markedly more heterogeneous than the residential market in terms of technical requirements, but less varied in terms of design. In a commercial project, each space is designed for a very specific purpose, and materials must often be supplied in large quantities. For example, in a hospital project, the flooring solutions must conform to strict hygiene requirements to prevent the spread of nosocomial infections. A hospital floor will also be required to meet minimum standards of slip-resistance, static-absorption and noise absorption. A large department store or a mall, on the other hand, would require an ultra-resistant flooring to bear intense foot traffic without showing signs of wear. Office flooring must possess the ability to absorb sound, withstand high foot traffic and contribute to temperature control. Most importantly, public areas are subject to explicit regulations, in terms of interior environmental health and safety, which can vary considerably from one country to the next, even within a single economic zone such as the European Union, or from state to state as in the United States.

On the commercial market, construction materials must comply with many requirements in terms of design, cost, technical performance (including resistance and acoustics), durability, compliance with standards and public health. General contractors must make purchases in accordance with the terms dictated by the specifiers, who choose flooring in consultation with the end-user. Specifiers can include almost any type of construction industry professional: they may be architects, interior decorators, installers, project managers or general contractors. These professionals are tasked with studying each product and understanding the relative advantages and disadvantages of the various flooring solutions offered. As a result, specifiers are often open to examining the relative strengths and merits of specific technological innovations. The Group has teams dedicated to maintaining close relationships with specifiers at all stages of project development and management. These relationships constitute a key factor in the Group's sales success on the commercial market.

Because of the way products are chosen, the commercial flooring market has other particularities in terms of

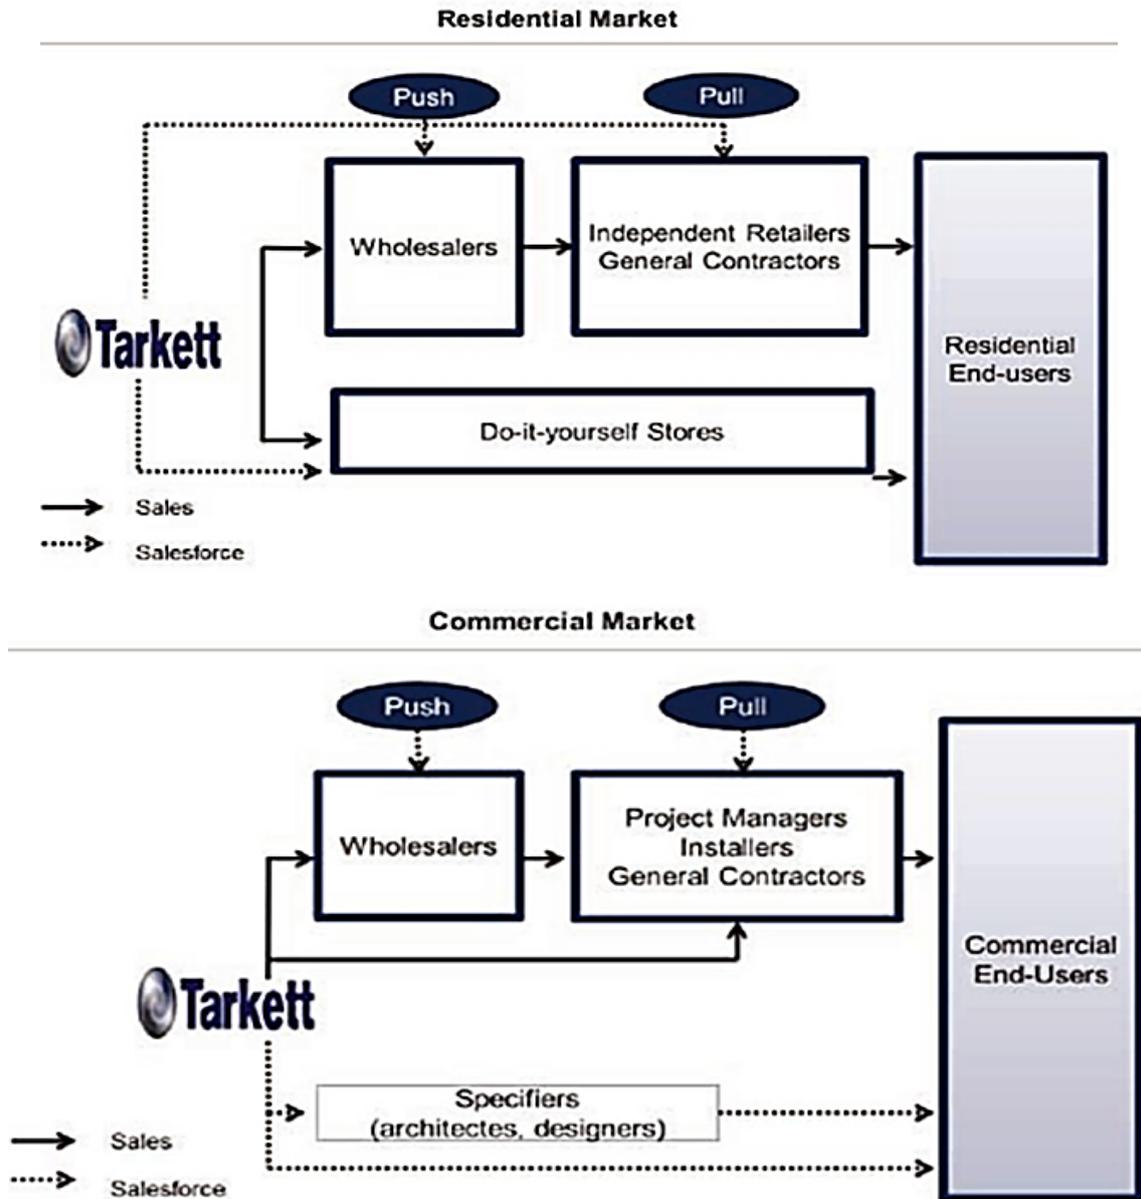

distribution channels. Unlike the residential market, where consumers go to a physical point of sale and order products immediately upon selection, commercial buyers plan their purchases in detail prior to placing an order. In general, a project will begin with a detailed planning phase, during which the quantities and qualities of each type of construction material will be determined, and delivery and installation schedules for each phase of the project will be estimated. It is during the planning phase that a manufacturer has the opportunity to act as a consultant to the specification team and design a one-stop, customized solution based on the project's technical and aesthetic requirements. Once the building materials have been selected and the quantity specified, the installer simply places the order with a wholesaler or directly with the manufacturer, and takes delivery in accordance with the construction calendar.

### 1.6.3.1 Distribution Strategy

Distribution channels in the residential and commercial markets differ as a result of the characteristics of each market. The Group uses both "push" and "pull" strategies within both of these markets.

- *Push.* The Group has specialized teams to implement its "push" strategy, whose objective is to encourage wholesalers to buy its products. To that end, the Group's sales force meets with them to discuss the advantages of its flooring and present the brands under which it markets its products. The Group has entered into numerous agreements with the principal wholesalers in each market. In the residential market, in addition to wholesalers, this strategy also includes DIY chains and specialty retailers.
- *Pull.* The Group also has teams to implement its "pull" strategy, whose objective is to encourage the sale of products stocked by wholesalers. In the commercial market, the sales force concentrates on the main specifiers, such as architects, interior design firms and construction companies.

The following flow charts illustrate how the Group's distribution strategy works for the residential and commercial markets.

The Group's distribution strategy for the commercial market is complemented by training centers, called "Tarkett Academies", which promote awareness of the Group's products among specifiers and ensure the highest quality installation in order to reinforce the Group's image. There are 15 Tarkett Academies throughout the world, including a new Tarkett Academy opened in Backa Palanka (Serbia) in 2014. These training centers train building industry professionals, such as architects, designers, flooring installers and general contractors.

In these training centers, installers learn how to correctly install Tarkett-brand products, which often influences them to choose or recommend Tarkett products for their future projects. By ensuring proper installation of its products, the Group also improves its reputation, increases brand loyalty, develops relationships with its commercial partners and improves customer satisfaction by ensuring optimal installation of its products.

### 1.6.3.2 Distribution Channels

The Group's products are distributed primarily by distributors, retail chains, installers, specialized chains and independent stores. The weight of each distribution channel is different in each geographic region:

- Most of the Group's sales in North America and in the CIS, APAC and Latin America segment are through distributors. Buildings in these markets are characterized by large interior spaces, providing significant economies of scale in terms of logistics, with services being provided by distributors to a large number of retail stores. In Western Europe, on the other hand, a smaller share of sales is through distributors, though the number still remains significant.
- Large retail chains are common in Western Europe and North America, representing a significant share of the Group's sales in these markets. This distribution channel is currently less significant in the CIS countries, but could grow in the years to come.
- Independent stores represent a relatively significant share of the Group's distribution in Western Europe and in the CIS, APAC and Latin America segment, with a larger presence in high-end products such as wood flooring.
- Installers and builders represent a significant share of sales in Western Europe, particularly in the commercial sector.

It should be noted that commercial carpet (the activity of Tandus, acquired in 2012, and of Desso, acquired in 2014) is a special case, since it is generally distributed directly to commercial end-users in the form of "turnkey" solutions.

### 1.6.3.3 Customers

The Group has a large and diversified customer base, including, in particular, distribution companies and leading large retail chains. Distributors are the Group's principal customers and represent the majority of sales volume, followed by retail chains (including DIY chains).

The Group is not dependent on its principal customers. In 2015, the Group's largest customer represented less than 5% of total consolidated net revenue.

### 1.6.3.4 Organization of the Group's Sales Force

The Group's 62 sales offices employ approximately 1,500 sales professionals dedicated to selling the Group's products. They are spread over 38 countries, enabling the Group to adapt to local differences and better understand the needs of each market and region. Each sales office has its own organization, responding to the requirements and structure of the local region. One of the strengths of the Group's sales force is its ability to adapt to local demand.

### 1.6.3.5 Logistics

The Group's logistics is organized around three principles:

- improving the quality of customer service, in particular by offering a wide product selection and rapid delivery;
- reducing costs, in particular storage, transport costs and customs duties; and
- adapting the distribution network to the characteristics of local markets.

The Group works with its distributors to support their logistics needs and limit the Group's costs. For example, in 2013 and 2014 the Group extended its logistics platforms in the CIS with the opening of ten new regional service centers located close to its principal distributors. This unique approach to distribution gives the Group a significant advantage over its competitors in the CIS. This proximity to customers also results in a clear improvement in service through a reduction in lead times and better training of the Group's customer service teams, giving the Group a strong competitive advantage.

#### ■ Logistics and Transport

Transport of the Group's products is organized with the objective of improving the quality of customer service while managing transportation costs both upstream and downstream.

Upstream, for delivery of raw materials and other materials needed to manufacture products, the Group negotiates framework agreements with its principal suppliers covering prices and lead times and tries to locate its production sites near its suppliers' manufacturing sites.

Downstream, for delivery of products to customers, the primary objective of the Group's logistics organization is to offer short lead times so that customers can optimize their inventory levels. In some countries the Group uses outside service providers.

Most of the Group's production sites are located in the regions in which it sells its products. By reducing the distance between products and customers, the Group improves customer service, significantly reduces transportation costs, saves on import duties and shortens lead times.

#### ■ Logistics and Information Systems

The Group's information systems include various applications, in particular applications to manage purchases and product life cycles, resource planning, customer relations, supply-chain management, accounting and financial information and human resources.

In 2010, the Group launched a wide scale program to rationalize, consolidate and secure its information systems Group-wide.

To do this, it invested in the deployment of an SAP system, which improves monitoring and management of the Group's activities, to make internal processes uniform, simplify the services offered to end-users and develop the Group's Internet presence.

The Group also made its computer infrastructure uniform with a single network and security system and a

consolidation of data centers, while relying on a significantly strengthened risk management program for its information systems.

#### 1.6.4 PRODUCT INNOVATION AND INTELLECTUAL PROPERTY RIGHTS

The Group has a long history of research and development. Innovations are incorporated into new products and procedures in order to provide residential and commercial end-users with new solutions.

To the extent permitted by local law, the Group systematically patents, trademarks or registers its industrial know-how and research and development innovations in order to protect its intellectual property.

##### 1.6.4.1 Research and Development

###### ■ *The Group's Research and Development Policy*

Research and innovation are at the center of the Group's strategy. Spending on research, design and development increased from €16 million in 2010 to €35 million in 2015 (i.e. 1.3% of 2015 revenues), demonstrating the Group's commitment to making research and development one of its pillars of success.

The Group has created many innovative flooring solutions, for which it has won several awards.

In order to position its products to respond to the market's demands and to anticipate future needs, the Group includes in its research and development initiatives a quality-assurance process as well as a graphic-design service that targets market trends.

###### ■ *Organization of the Group's Research and Development Activity*

###### ▪ *A Network of Internal Experts*

The Group's research and development activities are performed by more than 180 employees throughout the world. Research and development is organized around an international research and innovation center located in Luxembourg, as well as 24 development and application laboratories located in more than 15 countries around the world. This enables the Group to develop products that respond to the needs and tastes of local end-users, while relying on its center for excellence in research and innovation.

The directors of the research and development departments meet frequently to discuss product innovation, development and portfolio.

###### ▪ *Close Relationships With Outside Scientific Experts, Universities and Suppliers*

In order to create the most innovative flooring solutions, the Group has developed close relationships with outside experts.

For example, it created a scientific advisory board including both Tarkett experts and internationally known outside experts. The Group's directors of research and development consult with scientists from the world to validate their scientific research with respect to the Group's technologies and processes.

Experts within Tarkett also support development and innovation project leaders. They are also responsible for ensuring and developing the Group's level of technical and scientific knowledge and for identifying emerging technologies and market trends.

In connection with its "open innovation" policy, the Group spends approximately 30% of its research and innovation budget on external research activities.

In that regard, the Group has also entered into partnerships with research laboratories at some of the leading universities and engineering schools in the world, including the German research institute EPEA (Environment Protection Encouragement Agency) and the Ecole Nationale Supérieure des Arts Décoratifs.

The Group has also developed close relationships with certain suppliers to develop specific technical improvements, such as monitoring odors or improving the environmental attributes of the Group's flooring products.

##### 1.6.4.2 An Effective Innovation Process

###### ■ *Key Principles*

The Group's innovation strategy is based on three key principles.

First, it strongly emphasizes eco-design through a virtuous circle based on Cradle to Cradle® principles. To implement this principle, Tarkett constantly seeks new materials and processes that protect the environment and end-users. The Group is also working towards significantly increasing the share of renewable, abundant, recyclable and recycled materials used in the manufacture of its flooring products. It also aims to provide clear and precise information to consumers about its products' design. Using its own rating system, the Group labels its products with the proportion of renewable materials used in the product's design. The Group also indicates whether the product can be recycled, as well as its levels of VOC emissions.

The second principle on which the Group bases its innovation strategy is the development of solutions that can create unique living spaces. Modular solutions are well adapted to both residential and professional users who want ease of use combined with a wide selection of designs and decorations. Therefore, the Group has developed a full range of modular, carpet and vinyl solutions, offering a large choice of innovative models and design.

Finally, the Group aims to build on its position as a leader in interactive flooring solutions. Its FloorInMotion solution, designed for hospitals and for senior citizen residences and similar settings, provides fall detection and patient-activity monitoring. The Group has also developed lighted carpet solutions that enable messages to be shown on the floor.

The Group's goal is to develop solutions that change the user's awareness of the interaction between the floor and the environment.

### ■ *An Integrated Innovation Process*

To offer innovative products to its clients, the Group regularly launches new product lines. To design and develop these new lines, the Group has perfected a five-phase innovation process.

During the exploratory phase, the Group monitors the latest flooring, design and interior decorating trends. The Group also monitors technology and regulatory developments to ensure that the products it develops in the future will comply with applicable regulations.

Following the exploratory phase, the Group enters the trial phase. During this phase, the Group tests the designed product for market suitability, market demand, materials performance, technical feasibility and manufacturing process.

If the product is approved, the Group moves into the development phase. At this point, it creates the first prototypes for the new product.

Then the Group enters the production phase, which is subject to approval by the new product department, in charge of launching and marketing the new product. Once the product is industrially approved, the Group begins to manufacture the new product so that end-users can begin to benefit from the new innovation as soon as possible.

### ■ *The Group's Numerous Innovations*

The Group's research and development strategy helps provide its end-users with excellent flooring products. As early as 1942, the Group developed a new process for manufacturing wood flooring that reduced the amount of wood used. Since then, the Group has always worked to develop products and concepts that simplify end-users' lives while reducing environmental impact.

The Group has developed numerous eco-innovations combining performance, design and respect for human health and the environment.

In 2009, the Group began producing vinyl flooring without phthalates, with the iQ® Natural product line, designed using renewable plasticizers.

In 2010, Tarkett deployed a new technology, a non-phthalate plasticizer for vinyl flooring for both commercial and residential use. In 2013 and 2014, Tarkett deployed its non-phthalate plasticizer technology widely in Europe and North America, conducting significant development and adaptation of the formulations. This eco-innovation, combined with that of products with low to very low TVOC emissions, enables Tarkett to contribute to improving indoor air quality. See Section 3.2.2 of the Company's Corporate Social Responsibility report, "Quality of Materials". For example, in 2014 Tarkett launched a new line of residential vinyl flooring in Europe, using non-phthalate plasticizer technology and combining performance, design

and respect for human health and the environment. This new generation of flooring contributes to improving indoor air quality through these two major eco-innovations: non-phthalate technology and total VOC (Volatile Organic Compound) emissions that are ten to one hundred times lower than the strictest standards in the world. As of the end of 2015, the Group's vinyl flooring production sites in Europe and North America were using non-phthalate plasticizer technology.

In another example of eco-innovation, a sub-layer for ethos® carpet tiles was developed, composed of recycled materials from glass film taken from windshields and safety glass. Some of Desso's carpet product lines are designed using only health- and environment-friendly materials (such as recycled nylon fibers and calcium carbonate from water softening) and can be fully recycled due to the ability to separate fibers from their backings at end of use.

In 2013, Tarkett launched its new Linoleum xf2® collection, recyclable flooring made from natural and renewable ingredients (linseed oil, pine resin, cork flour and wood flour). For this collection, a new surface treatment, xf2, was developed, for greater durability and resistance to wear and tear. In addition, one product in particular, the Veneto® Essenza 100% linen, was designed without pigment, offering an authentic and natural decor, and obtained Cradle to Cradle® gold-level certification in 2014.

Tarkett also innovates in the area of self-adhering installation systems, in particular for its new modular lines. The loose-laid LVT line, launched in Europe in 2015, permits easy, rapid and durable installation.

In the CIS, the Group developed in 2014 and launched in 2015 a new line of wood flooring in 2014 with a unique digital printing system. Also in the CIS in 2015, Tarkett launched an innovative vinyl flooring technology in which the grain of the surface mimics the pattern of wood veins.

Through its innovations, the Group also improves the performance of its products. For example, Cool Play™, launched by FieldTurf, is a system that enables the Group to significantly reduce the temperature of its artificial turf while maintaining the same level of quality. In addition, in 2014 and 2015 FieldTurf developed the VersaTile™ system, a sub-layer made from recycled synthetic grass that combines drainage and shock-absorption properties.

Also in 2014/2015, Tarkett launched FloorInMotion™, a unique solution in the service of health and well-being, intended primarily for healthcare settings. FloorInMotion is an intelligent, connected floor that detects falls and sends an alert to computers or mobile devices. This service also makes it possible to monitor patients and helps medical teams by providing data on patient movement. This major innovation, providing an important service, is the result of an ambitious program undertaken by Tarkett's Research and Innovation department. The program relied on Tarkett's expertise in health as well as on numerous partnerships with hospitals, retirement homes and universities.

### ■ Awards for the Group's Innovations

The Group has received numerous awards demonstrating that its innovations are internationally recognized.

Over the last five years, the Group has received awards and certifications in numerous areas, and in particular:

- the application of Cradle to Cradle® principles to flooring production. In recent years, Tarkett has obtained several Cradle to Cradle® certifications<sup>1</sup>: Basic level for artificial turf; Basic level in 2014 and Bronze level in 2015 for rubber tiles and rubber accessories (BaseWorks®); Silver level for linoleum, wood, ethos® carpet tiles, and hybrid grass; and Gold level for Veneto® Essenza 100% Linen linoleum and the Desso EcoBase™ carpet sub-layer. In 2015, Desso's "Gold Collection" carpet line was certified Cradle to Cradle Gold. As of the end of 2015, 93% of Desso's commercial carpet tiles were Cradle to Cradle certified. In 2014, Evolay, a new resilient flooring that is an alternative to vinyl, was certified Cradle to Cradle® Bronze level.
- the development of products that contribute to solving health problems, in particular for asthma and allergy sufferers. In 2013, the Asthma and Allergy Foundation of America (AAFA) awarded asthma and allergy friendly™ certification to several vinyl floors for hotels, stores (I.D. Inspiration®), hospitals (the vinyl floor iQ®) and for indoor sports flooring (Omnisports™ 6.5mm and 8.3mm). FiberFloor® received the same certification in 2012. In addition, since 2015, the Swedish Asthma and Allergy Association has recommended the vinyl modular product Startfloor Click.
- its global sustainable development strategy: Tarkett received the BFM Green Business Award in 2011; the strategic development trophy awarded by the Agence Française de l'Environnement et de la Maîtrise de l'Energie (French Agency for the Environment and Energy Management) and by Ernst & Young in 2012; the responsible innovation prize awarded in 2013 by Bearing Point in partnership with Expansion magazine and the Ecole des Ponts Paris Tech; the "Woman in Sustainable Development 2014" prize at the Women in Industry Awards organized by the French magazine Usine Nouvelle (New Factory), which rewarded the commitment of Anne-Christine Ayed, Tarkett's director of Research, Innovation and Environment; and the Green Business Award of the Year prize in 2014 at the Green Business Summit in Luxembourg, initiated by GreenWorks and organized by the Farvest Group.
- its innovation management strategy: Tarkett received A.T. Kearney's Best Innovator prize in 2013 and the IMProve innovation management prize in the large company category in 2015.
- innovation of the FloorInMotion connected floor: Tarkett was selected for the ninth issue of "Objets de la Nouvelle France Industrielle" (Objects of the New

Industrial France) in 2014, organized by the Ministry of the Economy, Industrial Recovery and Digital Technology; it also received the Prix Janus de la Santé (Janus Health Prize) in 2014 in France, the official design seal sponsored by the Ministry of Industry and Foreign Trade; Batiactu's Trophée de la Construction (construction prize) in 2015 in France, in the technical solutions category, for its project entitled "Creation of Connected Living Spaces at the Saint Laurent Blangy Nursing Home (Northern France)."

- the development of products that respect human health and the environment: Tarkett was awarded the Prix Janus de l'Industrie (Janus Industry Prize) in France in 2014, in the category "Components and Materials" in the service of People, Industry, and the Community for the Linoleum Veneto Essenza 100% linen product, the official design seal sponsored by the Ministry of Industry and Foreign Trade (Ministère de l'Industrie et du Commerce Extérieur).

#### 1.6.4.3 Standards Applicable to the Group's Products

The Group complies with a large number of regulations, standards and certifications in its various markets. These standards vary depending on the geographic region, the type of building in which a product is installed and the type of flooring. The Group also uses a monitoring process to ensure that its products comply with applicable regulations, standards and certifications.

#### ■ Mandatory Standards and Standards with Which the Group Complies Voluntarily

The Group is subject to two types of standards: mandatory standards based on legal requirements (such as European regulations or national decrees) and voluntary standards that it has chosen to comply with to respond to its customers' needs.

In most cases, compliance with mandatory standards must be certified by independent laboratories and/or organizations as well as by a governmental authority. Their principal objective is to ensure the safety and protect the health of end-users by demonstrating that the product complies with regulatory requirements, which relate primarily to fire-resistance, slip-resistance and limits on toxic fumes.

Voluntary standards are primarily testing standards to determine a product's technical characteristics such as acoustic properties or dimensional stability, and specifications relating to minimum thresholds for a specific use. These standards vary depending on the product and its intended use, such as schools, hospitals or homes.

Especially in the commercial market, specifiers often stipulate compliance with non-mandatory standards in their order specifications. Specifiers (such as architects and project managers) require compliance with such standards

<sup>1</sup> Cradle to Cradle Certified™ is a certification brand owned by the Cradle to Cradle Products Innovation Institute.

in their specifications. Moreover, compliance with non-mandatory standards is also required by certain national or municipal governments for the construction or renovation of buildings that will be used as public administrations or government agencies.

The Group discloses the standards with which it has voluntarily chosen to comply. The use of such standards allows buyers, specifiers and end-users to be informed of the characteristics of the Group's flooring in order to better differentiate between the Group's products and those of its competitors. The technical specifications that the Group chooses to communicate vary depending on the requirements of the market in question.

#### ■ **Standard Organizations and the Standards Used in Different Geographical Markets**

Organizations for standardization define the technical characteristics and performance that a product must meet, as well as the tests to be used.

At the international level, the principal organization in charge of publishing the standards applicable to the Group is the International Organization for Standardization ("ISO"). Compliance with ISO standards is based on the principles developed by the World Trade Organization, and is technically voluntary, although is often required by architects and project managers, in particular for government buildings. Furthermore, agreements between ISO and the European Union enable the transposition of an ISO standard into a European standard.

In Europe, standards are established by the European Committee for Standardization ("CEN"). These standards, called "EN" standards, are mandatory when referenced by a European regulation. Each European Union Member State is required to transpose the European standards into its national standards, replacing the corresponding national standard.

The "CE" marking for construction products is governed primarily by Regulation No. 305/2011 of April 24, 2011, which entered into force on July 1, 2013. It covers health, user safety and energy savings, and defines the mandatory requirements in order to sell the Group's products in the European market. The CE marking indicates that the Group's products comply with the various harmonized standards specific to those products and attests that the flooring has been adequately tested. Among the requirements for the CE marking, products must demonstrate fire resistance, low levels of toxic fumes, and anti-slip properties. For example, the Group complies with the harmonized EN Standard 14041, which details requirements for resilient and laminate flooring and carpets.

In addition to CE marking, the Group is required to comply with Member State regulations, which may rely on national standards established by organizations in various European Union Member States, such as the Association Française de Normalisation ("AFNOR") in France and the Deutsches Institut für Normung ("DIN") in Germany. The Group is subject to national standards in the countries where it sells its products.

In the United States, environmental and workplace safety regulations are established at the federal level, whereas safety features such as fire resistance standards are generally regulated at the state or city level. The American Society for Testing and Materials ("ASTM") and the American National Standard Institute ("ANSI") develop most of the voluntary standards applicable to flooring products in the United States. Both the federal and state governments may decide to adopt ASTM or ANSI standards, thereby making them mandatory. ASTM and ANSI standards are mandatory when referenced in federal or state regulations.

In Russia, flooring products must comply with numerous technical standards imposed by various federal laws and technical regulations, including, in particular, Federal Law No. 184-FZ on the verification and compliance system for flooring and Federal Law No. 123 of July 22, 2008 on fire safety standards.

Countries such as Australia, New Zealand, Japan and China also develop standards as well as national regulations with which the Group may be required to comply.

Finally, certain laboratories and private sector organizations have established procedures for labeling products that comply with certain standards.

The Group actively participates with organizations such as ASTM, ANSI, ISO and CEN in the process of developing standards.

#### **1.6.4.4 Intellectual Property Rights**

The Group has a significant portfolio of trademarks and patents that it constantly works to protect, which gives it a strategic advantage over its competitors.

##### ■ **Trademark Portfolio**

The Group's products are sold under known brands targeted at each geographic region. The Group sells its products under its international brand, Tarkett®, which has worldwide name recognition, as well as under specialized international brands such as FieldTurf® and a variety of leading local brand names that enjoy strong name-recognition in their various markets, such as Johnsonite® in North America, Sinteros in the CIS, and Desso in Western Europe. In certain markets, the Group uses a multi-brand strategy, using different brands for different distribution channels, to cover the entire market and optimize coexistence between the Group's different distributors.

The Group has a significant portfolio of internationally known trademarks (in particular Tarkett and FieldTurf) and regionally known trademarks (Tandus®, Sintelon and Johnsonite), in addition to trademarks for particular product categories (in particular Easyturf® for artificial turf and Beynon® for athletic tracks). The Group's trademarks are protected in most of the markets where it does business.

Protection of the Group's trademarks can be based on registration or prior use of the marks. Such protections are the subject of national, European Community and international registrations for varying lengths of time.

## ■ Patent Portfolio

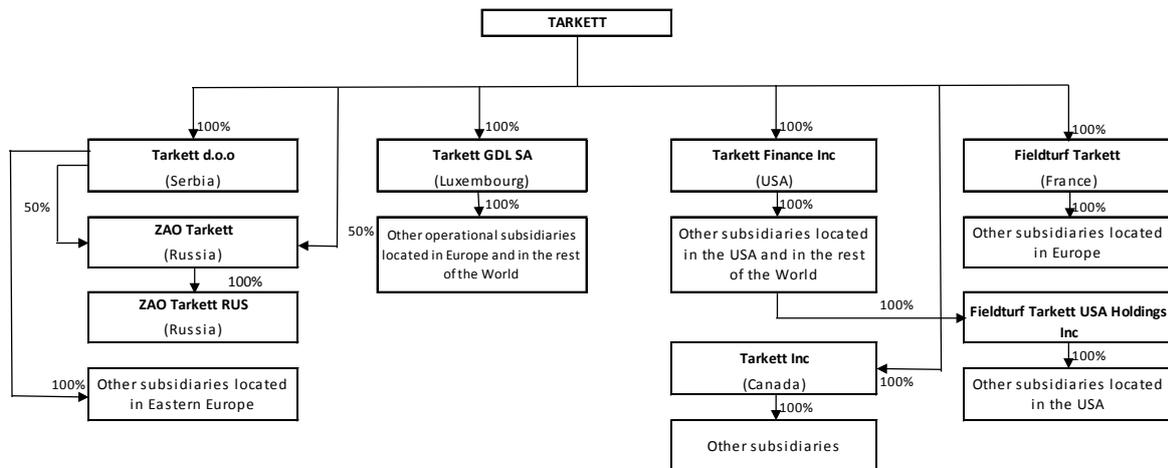

The Group holds full rights to a portfolio of numerous active patents in more than 42 countries. The Group's patents cover flooring and sports surface products as well as technologies for the development of new products.

The Group's patents cover approximately 15 different systems and technologies. Each year the Group files 10 to 15 new patent applications. The average age of the patents in the Group's portfolio is approximately eight years, which is the same as the average life span of its competitors' patents.

The geographical origin of the Group's patent portfolio is highly diversified, with 99 active patents originally filed in Western Europe, 13 in Eastern Europe and 29 in North America. Finally, the Group holds 28 patents relating specifically to its sports surfaces business.

Given the Group's research and development activity, it believes that it is not overly dependent on patents filed by third parties.

## 2.1 MANAGEMENT AND SUPERVISORY BODIES

### 2.1.1 MANAGEMENT BOARD, SUPERVISORY BOARD AND EXECUTIVE OFFICERS

The Combined General Meeting held on January 2, 2001 opted for the form of management structure for a *société anonyme* consisting of a Management Board and a Supervisory Board.

This management structure dissociates management and direction of the Company, which are the responsibility of the Management Board, from supervision of the

management bodies, which is the responsibility of the Supervisory Board.

A description of the main provisions of the Company's Bylaws relating to its functioning and powers, as well as a brief description of the main provisions of the Internal Regulations of the Supervisory Board and its specialized committees, is included in Section 7.6.

#### 2.1.1.1 Management Board

As of December 31, 2015, the Management Board was composed of the following three members:

	Year of Birth	Nationality	Date of 1st Appointment to the Management Board	Date of Most Recent Renewal	Expiration Date of Term in office	Number of Shares Held <sup>1</sup>
<b>Chairman</b>						
Michel Giannuzzi	1964	French	November 7, 2007	November 26, 2013	November 26, 2016	226,044
<b>Members</b>						
Fabrice Barthélemy	1968	French	May 23, 2008	November 26, 2013	November 26, 2016	38,566
Vincent Lecerf	1964	French	May 23, 2008	November 26, 2013	November 26, 2016	31,631

(1) Shares held by the executive and related persons.

The tables below show the main positions and offices held by the members of the Management Board outside the Company (whether inside or outside the Group) during the last five years.

#### MICHEL GIANNUZZI - Chairman and Member of the Management Board

##### Experience and Expertise

**Michel Giannuzzi**, a graduate of the Ecole Polytechnique and of Harvard Business School, has spent most of his career in industry, both in France and abroad.

From 1988 to 2001, he held several positions within the Michelin group. From his initial diverse industrial responsibilities in France and the United Kingdom, he went on to manage a tire production unit using very innovative technologies before taking on the responsibility of re-engineering the supply chain in Europe and becoming CEO of Michelin Japan.

In 2001, he joined the Valeo Group as Vice President and Member of the Executive Committee, successively in charge of the global Electrical Systems and Wiper Systems businesses.

### 2.1.1.2 Supervisory Board

#### ■ *Composition of the Supervisory Board*

At the time of the Company's initial public offering on November 22, 2013, the members of the Supervisory Board were either appointed or renewed early, for staggered terms. In accordance with the Afep-Medef Code and Article

18 of the Company's Bylaws, the entire Supervisory Board will be renewed for staggered terms over a period of four years.

Changes made in 2015	Changes proposed in 2016
<p>The Company's shareholders, meeting at an Ordinary and Extraordinary Shareholders' Meeting on April 24, 2015, decided as follows:</p> <ul style="list-style-type: none"> <li>- To renew Ms. Françoise Leroy's term as a member of the Supervisory Board for a period of four years;</li> <li>- To renew Mr. Gérard Buffière's term as a member of the Supervisory Board for a period of four years;</li> <li>- To appoint Mr. Eric La Bonnardière as a member of the Supervisory Board to replace Mr. Jean-Philippe Delsol, who is stepping down from the Supervisory Board, for the remainder of his predecessor's term, namely until the general shareholders' meeting called in 2018 to approve the financial statements for the fiscal year ending December 31, 2017;</li> <li>- To appoint Mr. Nicolas Deconinck as an observer on the Supervisory Board to replace Mr. Eric La Bonnardière, who is stepping down as an observer, subject to the condition precedent of Mr. Deconinck's appointment as a member of the Supervisory Board, for the remainder of his predecessor's term, namely until the general shareholders' meeting called in 2018 to approve the financial statements for the fiscal year ending December 31, 2017.</li> </ul> <p>The Supervisory Board decided on July 29, 2015, subject to ratification by the next general shareholders' meeting, to coopt Ms. Guylaine Saucier as an independent member of the Supervisory Board and as a member and chair of the Audit Committee to replace Ms. Sonia Bonnet-Bernard, who is stepping down, for the remainder of her predecessor's term, which will expire at the close of the general shareholders' meeting called in 2017 to approve the financial statements for the year ending December 31, 2016.</p>	<p>Following examination and an opinion provided by the Nominations and Compensation Committee, the Supervisory Board will propose that the General Shareholders' Meeting to be held on April 26, 2016 do the following:</p> <ul style="list-style-type: none"> <li>- To renew Mr. Eric Deconinck's term as a member of the Supervisory Board for a period of four years;</li> <li>- To renew Mr. Bernard-André Deconinck's term as a member of the Supervisory Board for a period of four years;</li> <li>- To ratify the cooptation of Ms. Guylaine Saucier as a member of the Supervisory Board</li> </ul>

Composition of the Supervisory Board as of December 31, 2015

As of December 31, 2015, the Supervisory Board was composed of nine members and two observers.

	Year of Birth	Nationality	Date of 1st Appointment to the Supervisory Board	Date of Most Recent Renewal	Expiration Date of Term in office	Number of Shares Held
<b>Chairman</b>

#### GERARD BUFFIERE - Independent Member of the Supervisory Board

##### Experience and Expertise

**G rard Buffi re** holds a degree from the  cole Polytechnique as well as a Master of Science from Stanford University.

He is a senior advisor to the Sagard funds and to Ergon Capital Partners. He also manages Soci t  Industrielle du Parc and GyB-Industries, which he founded.

Mr. Buffi re began his career in 1969 in the Mergers and Acquisitions department of Banexi before joining Otis Elevator in 1974. In 1979, he was appointed CEO of the Electricity Control division of Schlumberger, and then, in 1989, Chairman of the Electronic Transactions division. From 1996 until late 1997, he acted as CEO of the Industrial Equipment branch of Cegelec.

In early 1998, he joined Imetal, which then became Imerys, as a member of the Management Board responsible for the Materials and Construction and the Minerals for Ceramics divisions, and then, in 2000, the Pigments and Additives division. In 2002, he became the Chairman of the Management Board of Imerys, and was then appointed CEO upon the change in the group's structure in 2005, a position he held until 2011.

### ■ **Composition of the Supervisory Board**

As of December 31, 2015, the Supervisory Board was composed as follows:

- Two members representing KKR;
- Four members representing SID;
- Three members deemed independent by the Board, on the recommendation of the Nominations and Compensation Committee;
- Two observers, in accordance with Article 26 of the Bylaws and Article 10 of the Supervisory Board's Internal Regulations.

The Supervisory Board thus includes three independent members and six members proposed by the Company's

two principal shareholders. As a result, one-third of the members of the Supervisory Board are considered independent under the following criteria (set forth in Article 1 of the Supervisory Board's Internal Regulations):

- each independent member of the Board must have no relationship whatsoever with the Company, the Group or management (as an employee or representative, or a business or family relationship) that could compromise the free exercise of his judgment;
- he shall not hold any management position with the Company or the Group; and
- he shall have no special ties with the Company or the Group.

The Supervisory Board has ensured that the composition of the Board reflected a diversity of skills as well as balanced representation of men and women, in proportions that comply with the legal requirements in effect since January 1, 2014. As of December 31, 2015, women represented 22% of the members of the Supervisory Board. The Supervisory Board is currently continuing to reflect on gender balance, with the objective that women will represent 40% of its membership by 2017, in accordance with the law.

In accordance with the criteria used by the Company and the Afep-Medef Code with respect to the independence of members of the Supervisory Board, and after examination of the situation of each member of the Supervisory Board, the Supervisory Board deemed Ms. Guylaine Saucier, Ms. Françoise Leroy and Mr. Gérard Buffière to be independent. As a result, one-third of the members of the Supervisory Board are independent.

### 2.1.1.3 Composition of Other Executive Officers

#### ■ *Composition of Other Executive Officers*

The composition of the Group's Executive Committee is as follows:

Members	Position	Nationality	Age	Biography
Michel Giannuzzi	Chairman of the Management Board	French	51	See Section 2.1.1.1
Fabrice Barthélemy	Chief Financial Officer	French	47	See Section 2.1.1.1
Vincent Lecerf	Executive Vice President of Human Resources	French	51	See Section 2.1.1.1
Anne-Christine Ayed	Executive Vice President, Research, Innovation and Environment	Franco-Canadian	54	Ms. Ayed, who has a doctorate in polymer chemistry, joined Tarkett in 2009. Previously, she held various managerial and R&D positions with Dow Chemicals in Switzerland, Germany and the United States.
Jeff Buttitta	Senior Strategic Advisor	U.S.	68	Mr. Buttitta holds an accounting degree from Baldwin Wallace College (United States). He joined the Group in 2005. Previously, he was the Managing Director of Johnsonite from 1990 until its acquisition by the Group in 2005.
Stéphanie Couture	Group General Counsel	Canadian	47	Ms. Couture holds a law degree from the University of Montréal and has been a member of the Quebec bar since 1993. She joined Tarkett in 2000 and became General Counsel in 2006. She was previously a lawyer in the civil and administrative courts of Canada and was in-house counsel for Unibroue.
Eric Daliere	President, Tarkett Sports	U.S.	48	Mr. Daliere received an M.B.A from the J.L. Kellogg School of Management at Northwestern University, and joined the Group in 2009. Previously, he spent ten years working on complex projects for KKR Capstone, after having started with the Boston Consulting Group.
Slavoljub Martinovic	President, Tarkett Eastern Europe	Serbian	45	A graduate of the Technological Faculty of Novi Sad, Mr. Martinovic has been with the Group since 1996, first with Sintelon, which was acquired by the Group in 2002. Prior to being appointed to his current position in January 2013, he held various operational management and general management positions in Serbia and Russia.
Glen Morrison	President, North America	English	53	A graduate of the University of Lanchester Polytechnic in the United Kingdom, he joined the Group in 2015. Previously, he spent five years as the President of Building & Construction Systems at Alcoa. He has wide experience in the building and construction industry in the United States and in Europe.
Antoine Prévost	Executive Vice President of Operations	French	45	A graduate of the École Nationale Supérieure des Mines de Paris, Mr. Prévost joined the Company in 2011. From 1995 to 2011, he held various managerial positions with Vallourec.
Remco Teulings	President, Tarkett EMEA	Dutch	45	Mr. Teulings received a Masters in sociology from the University of Amsterdam and a Bachelor's degree in economics and an M.B.A from the Asian Institute of Technology. He joined the Company in December 2012. He was the Marketing Director and then the Managing Director of Central Europe for Knauf Insulation from 2006 to 2012.

#### ■ *Meetings*

The Group's Executive Committee meets monthly to review the Group's operational and financial performance and to discuss strategic projects and business operations.

## 2.1.2 STATEMENT RELATING TO CORPORATE GOVERNANCE

### 2.1.2.1 Conflicts of Interest

Other than as described in Section 2.1.2.2 “Statement Relating to the Management Board and the Supervisory Board” and Section 2.9.5 “Service Agreements”, as of December 31, 2015, to the Company's knowledge, there are no potential conflicts of interest between the duties owed to the Company by the members of the Management Board or the Supervisory Board and their private interests or other duties.

To the Company's knowledge and subject to the provisions of the Shareholders' Agreement described in Section 7.5, “Shareholders' Agreement,” there are no pacts or agreements of any kind with shareholders, clients, suppliers or others pursuant to which any of the members of the Company's Supervisory Board or Management Board has been appointed as such.

As of December 31, 2015 and except as described in Section 2.5, “Free Shares”, the members of the Management Board and the Supervisory Board have not agreed to any restriction on their right to sell shares of the Company, with the exception of the rules relating to the prevention of insider trading and the recommendations of the Afep-Medef Code with respect to the obligation to retain shares.

### 2.1.2.2 Statement Relating to the Management Board and the Supervisory Board

As of December 31, 2015, other than the family relationships among Didier Deconinck (Chairman and Member of the Supervisory Board), Bernard-André Deconinck (Member of the Supervisory Board) and Eric Deconinck (Member of the Supervisory Board), as well as between these three members of the Supervisory Board and Eric La Bonnardière (Member of the Supervisory Board), Nicolas Deconinck (observer) and Julien Deconinck (observer), their nephews, there are no family relationships among the Company's officers.

There are no business ties between any members of the Supervisory Board or the Management Board and the Company.

To the Company's knowledge, over the course of the past five years:

- no member of the Management Board or the Supervisory Board has been convicted of fraud;
- none of the above persons has been associated with any bankruptcy, receivership or liquidation;

- no accusation or official public sanctions have been pronounced against any of the above persons by statutory or regulatory authorities (including designated professional bodies); and
- none of the above persons has been disqualified by a court from acting as a member of the administrative, management or supervisory body of any company, or from being involved in the management or business of any company.

### 2.1.2.3 Independence of Members of the Supervisory Board

Pursuant to the recommendations of the Afep-Medef Code, Article 1.1 of the Internal Regulations of the Supervisory Board provides that at the time of each renewal or nomination of a member of the Supervisory Board and at least once per year prior to the publication of the Company's annual report, the Board must evaluate the independence of each of its members.

The determination of independence is discussed each year by the Nominations and Compensation Committee, which prepares a report relating thereto for the Supervisory Board. Each year, the Supervisory Board examines, based on such report, the status of each member of the Supervisory Board with regard to the independence criteria. The Supervisory Board must inform the shareholders of the conclusions of its analysis in the annual report.

The process for evaluating the independence of each member of the Supervisory Board was reviewed by the Nominations and Compensation Committee at its meeting on February 17, 2016 and then by the Supervisory Board at its meeting on February 18, 2016. Based on this analysis, three members of the Supervisory Board are independent: Ms. Guylaine Saucier, Ms. Françoise Leroy, and Mr. Gérard Buffière.

In addition, this analysis showed that as of December 31, 2015, the Audit Committee includes two independent members (Guylaine Saucier (Chairwoman) and Françoise Leroy). As of December 31, 2015, the Nominations and Compensation Committee has two independent members (Françoise Leroy and Gérard Buffière (Chairman)).

At its meeting on February 18, 2016, the Supervisory Board examined the terms of the Supervisory Board's members and proposed the renewal of the terms of Messrs. Eric and Bernard-André Deconinck.

## 2.2 OPERATION OF THE MANAGEMENT AND SUPERVISORY BOARDS

### 2.2.1 OPERATION OF THE MANAGEMENT BOARD

Articles 11 through 16 of Tarkett's Bylaws (see Sections 7.6, "The Company's Bylaws"), within the framework of applicable laws and regulations, sets forth the allocation of tasks among members of management, the organization and operation of the Management Board, and the rights and obligations of its members.

#### Work Performed by the Management Board During the Fiscal Year Ended December 31, 2015

This section reports on the activity of the Management Board during fiscal year 2015.

The Management Board met nine times in 2015 and five times in 2014. The attendance rate was 100%.

Activities relative to the results and to the annual shareholders' meeting:

- report on the Company's activities during the fourth quarter of 2014;
- report on the Company's activities during the first quarter of 2015;
- report on the Company's activities during the third quarter of 2015;
- closing of the half-year financial report as of June 30, 2015;
- review and closing of the company accounts for the fiscal year ended December 31, 2014;
- review and closing of the consolidated accounts for the fiscal year ended December 31, 2014;

- proposed allocation of the 2014 results;
- management report on the Company and the Group, and draft resolutions;
- convening the General Shareholders' Meeting of April 24, 2015;
- activities with respect to review of agreements and offices;
- related-party transactions within the meaning of Articles L.225-86 et seq. of the French Commercial Code;
- the terms of office of the members of the Supervisory Board;
- review of press releases;
- approval of projected management documents.

Activities relating to Tarkett's financial instruments:

- calculation of performance and determination of the number of shares to be granted to the beneficiaries of the LTIP 2012-2015;
- Modifications of the performance criteria for the LTIP 2012-2015 and the 2013-2016;
- Approval of the LTIP 2014-2017;
- Approval of the LTIP 2015-2018.

Other activities:

- Use of the delegation of power to trade in the Company's shares;
- Decision to refinance the Company's credit facilities;
- Decisions on strategy.

### 2.2.2 OPERATION AND EVALUATION OF THE SUPERVISORY BOARD

The operation of the Supervisory Board is described in Articles 17 to 23 of the Company's Bylaws, prepared in accordance with the laws and regulations in effect (See Section 7.6, "The Company's Bylaws"). On November 21, 2013, pursuant to the Company's Bylaws, Tarkett's Supervisory Board adopted Internal Regulations governing its organization and operation and the rights and responsibilities of its members.

The Internal Regulations follow best practices, in particular the recommendations of the Afep-Medef Code, with respect to ensuring compliance with fundamental principles of corporate governance. They may be modified at any time by vote of the Supervisory Board.

Pursuant to Article L. 225-68 of the French Commercial Code, the Chairman of the Supervisory Board must prepare a report regarding the conditions under which the work of the Supervisory Board was prepared and organized. On December 18, 2015, the Chairman of the Supervisory Board sent each member of the Supervisory Board a 2015 questionnaire that serves to evaluate the operation of the Board and its special committees, to verify that important questions are properly studied and debated within the Board, and finally to measure the effective contribution of

each member to the work of the Board. All of the members of the Supervisory Board responded to the questionnaire.

At its meeting on February 18, 2016, the Supervisory Board discussed the Board's operation and performance and carried out a self-evaluation. Taking into consideration the opinion of the Nominations and Compensation Committee, the Board found that its members were globally satisfied with the operation of the Supervisory Board, the Audit Committee, and the Nominations and Compensation Committee, including the quality of the discussions, preparation for important questions and the effective contribution of each member. In connection with the ongoing quest for improvement, the Board members made a number of suggestions that seemed to them likely to improve the nature of the Supervisory Board's collective work.

The Supervisory Board took note of the suggestions. Proposals for improvement will be made to the members of the Board.

In 2015, the Supervisory Board met nine times (ten times in 2014). The attendance rate averaged 98.7%, which shows the commitment of the members of the Supervisory Board to the Company.

Moreover, a formal evaluation is carried out at least every three years, either under the direction of an independent member of the Supervisory Board or with the help of an external consultant.

At the last Board meeting of each year, dates are set for all of the following year's meetings, in order to ensure that all members are able to be present. Notice is sent to each member of the Supervisory Board prior to each meeting, noting the place, time and agenda for the meeting. Detailed presentations on each item on the agenda are sent to each member in advance.

During the meeting, each item on the agenda is explained to the members of the Board. For certain technical subjects, presentations are made by qualified experts on the subject. Each item on the agenda is followed by questions, a discussion and a vote. Written minutes are prepared and delivered to the members of the Supervisory Board for approval at the next meeting.

### 2.2.2.1 Supervisory Board Special Committees

In accordance with Article 22 of the Company's Bylaws and Article 9 of its Internal Regulations, at its meeting on September 17, 2013 the Supervisory Board decided to create two committees – an audit committee and a nominations and compensation committee. These committees do not replace the Management Board or the Supervisory Board, which have sole decision-making power in their respective areas of authority, but rather issue proposals, recommendations and opinions in their areas of expertise.

The Internal Regulations of the Supervisory Board and its committees were adopted at the Supervisory Board's meeting of September 17, 2013 and entered into effect on November 26, 2013. The descriptions below reflect the Internal Regulations of the committees (see Section 7.6, "Constitutive Documents and Bylaws" for more information on the Supervisory Board's Internal Regulations).

#### ■ **Audit Committee**

The Company's Supervisory Board decided to establish an Audit Committee and set the following rules for its internal governance.

##### ■ Composition

Members of the Audit Committee are appointed for a term coinciding with their terms as members of the Supervisory Board. When selecting members of the Audit Committee, particular consideration is given to their competence in the areas of finance and accounting.

Based on its Internal Regulations, the Nominations and Compensation Committee is required to have between two (2) and four (4) members, at least two (2) of whom (including the Chairman) must be independent members of the Supervisory Board under the independence criteria adopted by the Company.

The Supervisory Board spends a significant amount of its time analyzing the Company's financial results and establishing its strategy. The Board also reviews the Company's activity, liquidity position and debt. It examines the annual company financial statements as well as the quarterly reports and half-year and annual consolidated financial statements, as well as the related press releases. It authorizes entry into related-party agreements and significant agreements, as defined in Article 16 of the Bylaws, as well as implementation of the share buyback program, in accordance with the terms and conditions set by the General Shareholders' Meeting.

All of the items that came before the Board in 2015 were analyzed in a satisfactory manner, due in particular to the work done in advance by the Supervisory Board's special committees.

As of December 31, 2015, this committee is composed of Ms. Guylaine Saucier (Chairwoman), Ms. Françoise Leroy and Mr. Josselin de Roquemaurel (see Section 2.1.1.2, "Supervisory Board", for biographical information). Independent members represent two-thirds of the Audit Committee. As a result, the Audit Committee's composition complies with the Afep-Medef Code, which requires a majority of independent members within this committee.

The Audit Committee's Internal Regulations provide that the secretary may be any person designated by the chairman of the committee or with the chairman's approval.

##### ■ Duties

The Audit Committee is responsible for monitoring the preparation and auditing of accounting and financial information, as well as for ensuring the effectiveness of risk-monitoring and internal control procedures to facilitate the Supervisory Board's review and approval thereof.

Accordingly, the Audit Committee's Internal Regulations set out its main responsibilities as follows:

- monitoring the preparation of financial information (in particular, annual or interim reports and consolidated financial statements);
- monitoring internal control, internal audit and risk management systems relating to financial and accounting information;
- monitoring the review of the individual company and consolidated financial statements by the Company's statutory auditors; and
- monitoring the independence of the statutory auditors.

The Audit Committee regularly reports to the Supervisory Board and informs it without delay of any difficulties that it encounters.

#### ▪ Operation

The Audit Committee may conduct meetings in person or via video or telephone conference pursuant to the same rules as the Supervisory Board, when convened by its chairman or secretary, so long as at least half of its members are present.

The Audit Committee makes recommendations to the Supervisory Board, indicating the number of votes a particular matter of business has received.

The Audit Committee meets as often as necessary and, in any event, at least twice a year in connection with the Group's preparation of annual and interim financial statements. The Audit Committee's meetings are held prior to the meeting of the Supervisory Board and, to the extent possible, are held at least two (2) days prior when the Audit Committee's agenda includes examination of interim or annual financial statements prior to their review by the Supervisory Board.

#### ▪ Activities of the Audit Committee in 2015

The Audit Committee met six (6) times during 2015, in particular prior to the Supervisory Board meetings called to approve the financial statements prepared by the Management Board, and reported on its work to the Supervisory Board.

In 2015, the Audit Committee's work focused principally on reviewing (i) the Group's consolidated financial statements for the fiscal year ended December 31, 2014 (ii) the Group's condensed interim consolidated financial statements for the six months ended June 30, 2015, (iii) the 2015 audit plan, (iv) specific line items including operating income, exceptional items, financial and tax income, the Group's balance sheet, cash flows and the Group's indebtedness and (v) the Group's annual risk mapping exercise for 2015.

The Audit Committee also reviewed the status and progress of the 2015 internal audit plan, the status of the Group's primary risks and disputes, and important points with respect to the 2015 accounts.

Audit Committee attendance was 100% in 2015.

### ■ ***Nominating and Compensation Committee***

The Company's Supervisory Board decided to establish a Nominations and Compensation Committee and set the following rules for its internal governance:

#### ▪ Composition

Members of the Nominations and Compensation Committee are appointed for a term coinciding with their terms as members of the Supervisory Board. When selecting members of the Nominations and Compensation Committee, particular consideration is given to their independence (see Article 1 of the Board's Internal Regulations for the definition of independence), as well as their competence in the selection and remuneration of

senior executives and company officers for listed companies.

Based on its Internal Regulations, the Nominations and Compensation Committee is required to have between two (2) and four (4) members, at least two (2) of whom (including the Chairman) must be independent members of the Supervisory Board under the independence criteria adopted by the Company.

As of December 31, 2015, the Nominations and Compensation Committee was composed as follows: Gérard Buffière (Chairman), Françoise Leroy, Jacques Garaïalde and Bernard-André Deconinck (see Section 2.1.1.1, "Supervisory Board", for biographical information).

The Nominations and Compensation Committee's Internal Regulations provide that the secretary may be any person designated by the Chairman of the Committee or with the Chairman's approval.

#### ▪ Duties

The Nominations and Compensation Committee is a specialized committee of the Supervisory Board whose main function is to assist the Supervisory Board in appointing members of the Executive Committees of the Company and the Group, as well as in determining and regularly reviewing the compensation and benefits awarded to the Company's senior executives, including any deferred benefits and/or voluntary or compulsory redundancy payments awarded by the Group.

Accordingly, it carries out the following functions:

- proposing the appointment of independent members of the Supervisory Board, of the Management Board and of the Supervisory Board's committees, and examining and assessing the application of non-independent members to the Supervisory Board;
- conducting an annual assessment of the independence of the Supervisory Board members;
- evaluation of the Organization and Operation of the Supervisory Board;
- preparation of a succession plan for the members of the Management Board as well as for the Group's senior executives;
- examining and proposing all aspects of and conditions to the remuneration of principal senior executives and the Group's executive management;
- reviewing and making proposals to the Supervisory Board with respect to attendance fees; and
- reviewing any exceptional compensation relating to assignments given by the Supervisory Board to any of its members outside the ordinary course of business.

#### ▪ Operation

The Nominations and Compensation Committee may conduct meetings in person or via video or telephone conference pursuant to the same rules as the Supervisory Board, when convened by its Chairman or secretary, so long as at least half of its members are participating.

The Nominations and Compensation Committee makes recommendations to the Supervisory Board, indicating the number of votes a particular matter of business has received.

The Nominations and Compensation Committee meets as often as necessary and, in any event, at least once (1) a year prior to the Supervisory Board's meeting on its members' independence and in advance of any Supervisory Board meeting during which matters of Management Board compensation or Supervisory Board attendance fees are to be decided.

The executive compensation policy is determined by reference to comparable issuers.

▪ Activities of the Nominations and Compensation Committee during 2015

The Nominations and Compensation Committee met five times during the fiscal year ended December 31, 2015 (four

times in 2014) and reported on its work to the Supervisory Board.

In 2015, the work of the Nominations and Compensation Committee included examination of the following:

- changes in the Group's management teams and the succession plan for those teams;
- the performance of the senior executives;
- the accomplishment of the economic objectives set for the senior executives;
- changes in compensation and the establishment of long-term incentive plans taking into account comparables prepared by external advisers;
- preparation for the advisory "Say on Pay" vote;
- the compensation section of the management report and the report of the Chairman of the Supervisory Board on corporate governance and on internal control.

Nominations and Compensation Committee attendance was 100% in 2015.

### 2.2.2.2 Statement Relating to Corporate Governance

The Company adheres to the Corporate Governance Code for Listed Companies of the Association Française des Entreprises Privées ("AFEP") and of the Mouvement des Entreprises de France ("MEDEF") (the "Afep-Medef Code").

The Afep-Medef Code may be consulted on the Internet at <http://www.medef.com/>. The Company keeps copies of such code available to the members of its governing bodies at all times.

Tarkett believes that it complies with the principles of corporate governance defined in the Afep-Medef Code to the extent that the Code's stated principles are compatible with the organization, size and means of the Tarkett group. The recommendations with which the Company does not strictly comply are set forth and explained below:

Provisions of the Afep-Medef Code that the Company does not apply	Explanations
<b>20.2.4</b> Termination payments for members of the Management Board	
The performance requirements set by the Board must be demanding and may not allow for the indemnification of an executive director, unless his or her departure is forced and linked to a change in control or strategy.	The Supervisory Board chose to ensure that Mr. Giannuzzi's termination payment would be due only in the event of his forced departure, in accordance with the recommendations of the Afep-Medef Code, without, however, limiting such events to change of control or disagreement on strategy. The Supervisory Board believes that, given the performance requirements to which these payments are subject, combined with the exclusion of serious misconduct or gross negligence, these measures provide the protections sought by the Afep-Medef Code.
<b>14.1, 15.1 and 16.1</b> The proportion of independent members on Nomination and Compensation Committees	
The Nominations and Compensation Committee must have a majority of independent members.	The Nominations and Compensation Committee is composed of four (4) members, half of whom are independent, including the Chairman. The current composition of this committee (two (2) independent members out of a total of four (4) members) does not comply with the Afep-Medef Code, which requires a majority of independent members. This composition reflects the wishes of the shareholders to have two (2) members appointed by each of the two principal shareholders, each with experience on these subjects.

## 2.3 COMPENSATION AND BENEFITS GRANTED TO THE MANAGEMENT AND SUPERVISORY BODIES

The Company's policy is to comply with all of the recommendations of the Afep-Medef Code.

The tables below show the compensation and benefits of any kind paid to members of the Management Board and the Supervisory Board in connection with their offices, by (i) the Company; (ii) companies controlled by the Company; (iii) companies controlled by companies that control the Company; or (iv) companies that control the Company, all within the meaning of Article L. 233-16 of the French Commercial Code. Since the Company belongs to a Group, this information includes amounts due by any company in the Group's control structure and relating to the office held in the Company.

The Company has built its executive compensation policy over the years on the following principles:

1. Base salaries in line with market practices, in order to ensure that the Company remains competitive and attractive. This positioning is measured through national and international compensation surveys (such as Mercer, Towers Watson, and Hay), as well as more targeted information (such as from headhunting firms).
2. Variable compensation based on annual objectives that are in line with market practices, including:
  - Economic criteria based on the year's performance as compared with budgetary commitments. These criteria (adjusted EBITDA and cash flow from operations) have been unchanged for the last eight years. In 2015, two additional economic objectives were introduced, in order to create more incentive for cost savings (personnel costs/activity; SG&A/net sales); and
  - Individual criteria defined specifically each year based on the Group's main challenges.
3. Tools to motivate and encourage loyalty in the medium term:
  - A Management Equity Plan ("MEP") was set up in 2007 in order to give management a stake in the Company's share capital, with a retention effect through October 2010. The plan was unlocked in November 2013, at the time of the IPO, in accordance with the plan's rules.
  - The Long Term Incentive Plan, put in place in July 2011 to make annual performance share grants or their equivalent in cash. The grants vest only if the grantee remains with the Group for three years and the Company achieves its economic performance goals. In each plan, "performance" is defined as achieving the objectives of the medium-term strategic plan with regard to growth in EBITDA and good debt control. This demanding performance criteria was 83% achieved and for the first two LTIP plans 50% of the objectives were achieved. The targeted amount for the plans was 0.6% for the 2013 plan and 0.44% for the 2014 plan. After a market analysis, the targeted amount of the 2015 LTIP was raised to 0.6%, in order to make the Group more competitive.
4. Unlike most listed companies of comparable size, the Group has chosen not to set up a supplemental retirement plan. Preference was given to tools built on medium-term performance, giving management a stake in the share capital, leaving it to them to build their own supplemental retirement portfolio, if desired.

### 2.3.1 TOTAL COMPENSATION OF MEMBERS OF THE MANAGEMENT BOARD FOR FISCAL YEARS 2014 AND 2015

The table below shows compensation paid and options and shares granted to Messrs. Michel Giannuzzi, Fabrice Barthélemy and Vincent Lecerf during the fiscal years ended December 31, 2014 and 2015.

**Table 1 - Summary Table of Compensation and Options and Shares Granted to Each Member of the Management Board**

<i>(in euros)</i>	Fiscal Year 2015	Fiscal Year 2014
<b>Michel Giannuzzi, Chairman of the Management Board</b>		
Compensation due for the fiscal year	1,715,596	1,076,125
Valuation of stock options granted during the year		
Valuation of performance shares granted during the year	1,644,000	571,200
<b>Total</b>	<b>3,359,596</b>	<b>1,647,325</b>
<b>Fabrice Barthélemy</b>		
Compensation due for the fiscal year	<b>536,907</b>	384,406
Valuation of stock options granted during the year		
Valuation of performance shares granted during the year	438,400	184,800
<b>Total</b>	<b>975,307</b>	<b>569,206</b>
<b>Vincent Lecerf</b>		
Compensation due for the fiscal year	<b>506,199</b>	366,972
Valuation of stock options granted during the year		
Valuation of performance shares granted during the year	438,400	184,800
<b>Total</b>	<b>944,599</b>	<b>551,772</b>

### 2.3.2 COMPENSATION OF EACH MEMBER OF THE MANAGEMENT BOARD FOR FISCAL YEARS 2014 AND 2015

The following table sets forth a breakdown of compensation paid to Messrs. Michel Giannuzzi, Fabrice Barthélemy and Vincent Lecerf during the fiscal years ended December 31, 2014 and 2015 into fixed, variable, and other compensation.

**Table 2 - Summary Table of Cash Compensation of Each Member of the Management Board**

	2015		2014	
	Amounts due (2)	Amounts paid (3)	Amounts due (2)	Amounts paid (3)
<b>Michel Giannuzzi, Chairman of the Management Board</b>				
Fixed compensation (1)	700,000	700,000	700,000	700,000
Variable compensation based on annual objectives (1)	1,009,540	361,637	372,260	863,413
Exceptional compensation (1)			0	0
Benefits in Kind	6,056	6,056	3,865	3,865
<b>Total</b>	<b>1,715,596</b>	<b>1,067,693</b>	<b>1,076,125</b>	<b>1,567,278</b>
<b>Fabrice Barthélemy</b>				
Fixed compensation (1)	305,000	305,000	305,000	305,000
Variable compensation based on annual objectives (1)	229,086	85,675	76,525	188,338
Exceptional compensation (1)			0	0
Benefits in Kind	2,821	2,821	2,881	2,881
<b>Total</b>	<b>536,907</b>	<b>393,496</b>	<b>384,406</b>	<b>496,219</b>
<b>Vincent Lecerf</b>				
Fixed compensation (1)	290,000	290,000	290,000	290,000
Variable compensation based on annual objectives (1)	213,469	74,066	74,066	166,740
Exceptional compensation (1)			0	0
Benefits in Kind	2,730	2,730	2,906	2,906
<b>Total</b>	<b>506,199</b>	<b>366,796</b>	<b>366,972</b>	<b>459,646</b>

(1) Gross compensation before tax.

(2) Compensation due in respect of relevant fiscal year, regardless of payment date.

(3) Compensation paid during fiscal year.

■ **Compensation of Michel Giannuzzi,  
Chairman of the Management Board**

Pursuant to the recommendation of the Nominations and Compensation Committee, in his capacity as Chairman of the Management Board for 2015, Mr. Michel Giannuzzi will receive the following compensation:

- fixed compensation of €700,000. This base salary has remained unchanged since the beginning of 2013; and
- variable compensation limited to 170% of his fixed compensation, payable at the latest on March 31 of the following year, for which the award criteria are reviewed each year by the Nominations and Compensation Committee and the amount of which is set by the Supervisory Board upon such Committee's proposal and based on the criteria set forth below.

No exceptional compensation was awarded to Mr. Giannuzzi for the year ended December 31, 2015.

Mr. Giannuzzi also has the use of a company car.

Mr. Giannuzzi will receive an additional €300,000 bonus to be paid in November 2017, provided that he remains within the Company until the payment date.

■ **Compensation of Fabrice Barthélemy**

Mr. Barthélemy receives no compensation for his duties as a member of the Management Board, but is instead compensated for his role as Chief Financial Officer of the Group.

Mr. Barthélemy has an employment agreement with the Company. Under this contract, he receives fixed compensation as well as variable compensation based on award criteria that are reviewed annually by the

Nominations and Compensation Committee, and the amount of which is fixed by the Supervisory Board upon such Committee's proposal and based on the criteria set forth below.

Mr. Barthélemy's variable compensation may vary between 0% and 85% of his fixed compensation depending on the achievement of these targets set by the Supervisory Board.

No exceptional compensation was awarded to Mr. Barthélemy for the year ended December 31, 2015.

Mr. Barthélemy also has the use of a company car.

■ **Compensation of Vincent Lecerf**

Mr. Lecerf receives no compensation for his duties as a member of the Management Board, but is instead compensated for his role as Executive Vice President, Group Human Resources.

Mr. Lecerf has an employment agreement with the Company. Under this contract, he receives fixed compensation as well as variable compensation based on award criteria that are reviewed annually by the Nominations and Compensation Committee, and the amount of which is fixed by the Supervisory Board upon such Committee's proposal and based on the criteria set forth below.

Mr. Lecerf's variable compensation may vary between 0% and 85% of his fixed compensation depending on the achievement of these targets set by the Supervisory Board.

No exceptional compensation was awarded to Mr. Lecerf for the year ended December 31, 2015.

Mr. Lecerf also has the use of a company car.

**Compensation of Members of the Management Board**

Members of the Management Board receive fixed compensation as well as variable compensation based on award criteria that are reviewed annually by the Nominations and Compensation Committee, and the amount of which is fixed by the Supervisory Board upon such Committee's proposal. In 2015, variable compensation was determined as follows:

- 70% was based on the achievement of economic objectives (30% on adjusted EBITDA, 30% on cash flow from operations, 5% on personnel cost control, and 5% on control of general costs), each multiplied by a coefficient of between 0% and 200%.
- 30% was based on the achievement of individual objectives, multiplied by a coefficient of 0% to 100%. In 2015:
  - Michel Giannuzzi's individual objectives were mainly focused on managing the economic situation in EE, reinforcing the Group's organization including in the US, launching new innovation and long term growth initiatives.
  - For Fabrice Barthélemy they centered on refinancing the syndicated credit facility, integrating Desso and deploying information systems.
  - Vincent Lecerf had as his main priorities reinforcing talents and the Group's organization and deepening the social and societal aspects of sustainable development within the Group.

The table below summarizes achievement of the variable compensation criteria by the members of the Management Board:

2015 Criteria	Reference	Weight assigned with respect to variable compensation	% achieved in 2015
<b>Economic criteria</b>			
Consolidated adjusted EBITDA	Budget	30%	167.4%
Cash flow from operations	Budget	30%	200%
Personnel costs as a % of revenue	< Budget	5%	0%
General costs as a % of revenue	< Budget	5%	200%
<b>Subtotal economic criteria</b>		<b>70%</b>	<b>171.8%</b>
<b>Individual criteria</b>			
		<b>30%</b>	See below
<b>TOTAL</b>		<b>100%</b>	

The table below breaks down the achievement of individual performance goals and the rate of overall achievement of variable compensation:

	Variable compensation target as a % of fixed compensation	Rate of achievement in 2015 as a % of target			Variable compensation due for 2015 as a % of fixed compensation
		Economic criteria (70%)	Individual criteria (30%)	Weighted total	
Michel Giannuzzi	100%	171.8%	80.0%	144.2%	<b>144.2%</b>
Fabrice Barthélemy	50%	171.8%	100.0%	150.2%	<b>75.1%</b>
Vincent Lecerf	50%	171.8%	90.0%	147.2%	<b>73.6%</b>

### 2.3.3 ATTENDANCE FEES AND OTHER COMPENSATION RECEIVED BY MEMBERS OF THE SUPERVISORY BOARD FOR FISCAL YEARS 2014 AND 2015

The following table sets forth the attendance fees and other compensation received by members of the Supervisory Board. At the General Shareholders' Meeting of November 4, 2013, the total amount of annual attendance fees for Supervisory Board members was set at €450,000, until otherwise resolved. On October 9, 2013, the Supervisory Board determined the allocation of this amount, which was then approved by the General Shareholders' Meeting, as follows:

AMOUNT OF ATTENDANCE FEES BY POSITION	
Position	Base amount
Members of the Supervisory Board	€35,000
Chairman of the Supervisory Board	€35,000
Vice Chairman of the Supervisory Board	€10,000
Committee Members	€5,000
Chairman of the Audit Committee	€15,000
Chairman of the Nominating and Compensation Committee	€15,000
PENALTY FOR ABSENCE	
Absence from a meeting of a specialized committee	€1,000
Absence from a meeting of the Supervisory Board	€3,000

The Supervisory Board decided on February 18, 2015 to raise the amount of the attendance fees allocated to the Chairman of the Nominations and Compensation Committee to €15,000, the same amount allocated to the Chairman of the Audit Committee. This change applies beginning in fiscal year 2015.

This allocation will remain in effect until a decision to the contrary by the Supervisory Board or reduction of the global amount allocated by the Company's shareholders' meeting.

**Table 3 - Summary Table of Compensation of Each Member of the Supervisory Board**

Members of the Supervisory Board	Gross Amounts Paid with Respect to Fiscal Year 2015 (in euros)	Gross Amounts Paid with Respect to Fiscal Year 2014 (in euros)
<b>Didier Deconinck</b>		
Attendance Fees	70,000	70,000
Other Compensation		96,000 <sup>(1)</sup>
<b>Jacques Garaïalde</b>		
Attendance Fees	50,000	50,000

Attendance Fees	40,000	39,000
Other Compensation		–

(1) Compensation paid by Société d'Investissement Deconinck (SID).

(2) Compensation is determined on a pro rata basis in the event of appointment or resignation during the fiscal year.

### 2.3.4 STOCK SUBSCRIPTION OR PURCHASE OPTIONS GRANTED DURING 2015 TO EACH MEMBER OF THE MANAGEMENT BOARD BY THE COMPANY OR ANY GROUP ENTITY

No stock subscription or purchase options were granted to members of the Management Board in 2015.

### 2.3.5 STOCK SUBSCRIPTION OR PURCHASE OPTIONS EXERCISED DURING 2015 BY EACH MEMBER OF THE MANAGEMENT BOARD

Not applicable.

### 2.3.6 PERFORMANCE SHARES GRANTED TO COMPANY OFFICERS IN 2015

No performance shares within the scope of Articles L. 225-197-1 et seq. of the French Commercial Code vested to the members of the Management Board during the fiscal year ended December 31, 2015.

Table 6 below sets forth information on performance shares not within the scope of Articles L.225-197-1 et seq. of the French Commercial Code that were awarded to members of the Company's Management Board in 2015.

During the same fiscal year, the second Long Term Incentive Plan ("LTIP 2012-2015") reached its term. The

plan provided for payment in either shares or their cash equivalent if the performance condition (based on the business plan's objectives) was achieved and the grantee remained with the Group on July 1, 2015.

The performance condition for the plan was reached at the 50% level.

Based on the recommendation of the Nominations and Compensation Committee, the plan was paid in cash in July 2015. Table 7 below shows the amounts vested to the members of the Management Board in connection with this plan.

**Table 6 - Performance Shares Granted During the Year to Each Company Officer by the Company or by Any Group Company**

### 2.3.7 HISTORY OF GRANTS OF STOCK SUBSCRIPTION OR PURCHASE OPTIONS

No stock subscription or purchase options were granted during the fiscal years ended December 31, 2015, 2014 or 2013.

There was no stock subscription or purchase option plan in effect as of December 31, 2015.

### 2.3.8 STOCK SUBSCRIPTION OR PURCHASE OPTIONS GRANTED TO THE TOP TEN EMPLOYEES

No stock subscription or purchase options were granted during the fiscal years ended December 31, 2015, 2014 or 2013. There was no stock subscription or purchase option plan in effect as of December 31, 2015.

### 2.3.9 EMPLOYMENT CONTRACTS, RETIREMENT PAYMENTS, AND DEPARTURE COMPENSATION OF MEMBERS OF THE MANAGEMENT BOARD

**Table 10 - Employment Agreements, Retirement Payments, and Departure Compensation of Members of the Management Board**

Members of the Management Board	Employment Contract	Supplemental Pension Plan	Severance or other benefits due or likely to become due as a result of termination or change of office	Compensation under a non-compete clause
<b>Michel Giannuzzi</b> Chairman of the Management Board Beginning of term: 11/26/2013 End of term: 11/26/2016	No	No	Yes	Yes
<b>Fabrice Barthélemy</b> Member of the Management Board and Chief Financial Officer Beginning of term: 11/26/2013 End of term: 11/26/2016	Yes	No	No	Yes
<b>Vincent Lecerf</b> Member of the Management Board and Executive Vice President of Human Resources Beginning of term: 11/26/2013 End of term: 11/26/2016	Yes	No	No	Yes

#### 2.3.9.1 Supplemental Pension Plan

No members of the Management Board benefit from supplemental pension plans. The Supervisory Board believes that it is the responsibility of the executive officers to set aside capital for retirement using the free shares granted under the LTIP, and decided as a result not to set up a supplemental retirement plan.

#### 2.3.9.2 Severance or other benefits due or likely to become due as a result of termination or change of office

Subject to the performance requirements defined below, Mr. Giannuzzi will be entitled to a severance payment equal to two years of his gross base salary and bonus during the twelve months prior to his departure as Chairman of the Management Board (including, if applicable, pursuant to his employment contract). In the event that Mr. Giannuzzi is to receive both severance pay and the non-compete payment described below, the total amount that he receives will be limited to two years of the gross base salary and bonus received during the twelve months prior to his departure as Chairman of the Management Board (including, if applicable, pursuant to his employment contract).

Performance is measured by the extent of achievement of annual performance goals defined by the Supervisory Board upon the recommendation of the Nominations and Compensation Committee, which serve as the basis for calculating variable compensation. The amount is equal to the average performance achieved by Mr. Giannuzzi during

the three calendar years preceding his departure. In the event that his departure should occur within the two calendar years following termination of his employment agreement, performance will be measured by the extent of achievement of the annual performance goals used as the basis for calculating the variable portion of his compensation as Chairman of the Management Board.

The severance payment is contingent on achieving 50% to 100% of the performance goals (i.e., no payment will be made unless the performance goal is reached to the extent of at least 50% and full payment will be received if the performance goal is achieved to the extent of 100%). The severance payment will be calculated in strict proportion to the extent of achievement of the performance goal. For example, if the performance goal is achieved to the extent of 90%, the severance payment will be 90% of the amount defined above.

Subject to achievement of the performance conditions, the Company will be required to pay this severance payment in the event of Mr. Giannuzzi's forced departure as Company officer (including, in particular, as a result of a change of control or a disagreement as to strategy) on the initiative of the Supervisory Board, regardless of whether Mr. Giannuzzi is removed or his mandate is not renewed, except in the event of gross negligence (defined as negligence of such extreme seriousness as to prevent the Company officer from continuing to serve as a Company officer) or serious misconduct (defined as extremely serious misconduct by the Company officer with the intent to harm the Company).

The conditions set forth above are consistent with the recommendations of the Afep-Medef Code, except as indicated in Section 2.2.2.1 above.

### **2.3.9.3 Company Officer Unemployment Insurance**

The Company has obtained company officer unemployment insurance on behalf of Mr. Giannuzzi, which would cover Mr. Giannuzzi in the event of his forced departure (an "F 70" policy, with an extension of coverage to 24 months depending on applicable rules).

### **2.3.9.4 Compensation Under a Non-Compete Clause**

Mr. Giannuzzi benefits from a clause providing for payment in the event that the non-compete clause provided for in connection with his office is triggered. Messrs. Barthélemy and Lecerf also benefit from clauses providing for payment in the event that the non-compete clauses in their respective employment agreements are triggered.

Mr. Giannuzzi will receive compensation for his non-compete clause in an amount equal to his gross base salary and bonus received during the twelve months prior to his departure from his position as Chairman of the Management Board, payable in 24 monthly payments

throughout the duration of his non-compete commitment. This compensation will be payable in 24 monthly payments for the duration of the non-compete clause and will be deducted from Mr. Giannuzzi's severance payment, such that the total amount received in severance and non-compete payments will not exceed two years of gross base salary and bonus received during the twelve months preceding his departure. The Company has the right to waive the non-compete clause.

Based on the non-compete clause in his contract, Mr. Barthélemy would receive, each month for twelve months, a payment equal to (i) 50% of his average monthly salary during the twelve months preceding the termination of his employment contract (assuming termination at the Company's initiative) or (ii) one-third of his average monthly salary during the twelve months preceding the termination of his employment contract (assuming termination at his own initiative). The Company has the right to waive the non-compete clause.

Based on the non-compete clause in his contract, Mr. Lecerf would receive, each month for twelve months, a payment equal to 40% of his average monthly salary during the twelve months preceding the termination of his employment contract. The Company has the right to waive the non-compete clause.

## **2.3.10 AMOUNT OF PROVISIONS MADE OR RECORDED BY THE COMPANY OR BY ITS SUBSIDIARIES FOR THE PAYMENT OF PENSIONS, RETIREMENT PLANS OR OTHER BENEFITS**

Members of the Management Board do not receive any specific pension benefits. Mr. Giannuzzi, as a Company officer, and Messrs. Barthélemy and Lecerf, pursuant to their employment agreements with the Company, benefit from the same retirement benefits as other employees of

the Company. The Company has therefore not set aside any amounts for the payment of pension, retirements or other similar benefits for the members of the Management Board.

## 2.4 OTHER INFORMATION ABOUT THE COMPANY OFFICERS

### 2.4.1 DIRECT AND INDIRECT SHAREHOLDING OF THE MEMBERS OF THE MANAGEMENT BOARD AND MEMBERS OF THE SUPERVISORY BOARD IN THE COMPANY'S SHARE CAPITAL

As of December 31, 2015, direct and indirect shareholding of the members of the Management Board and Supervisory Board in the Company's share capital is as follows:

Company Officers	Number of ordinary shares	Percentage of share capital	Number of voting rights	Percentage of voting rights	Number of shares granted under plans		
					LTIP 2015-2018 <sup>(2)</sup>	LTIP 2014-2017 <sup>(2)</sup>	LTIP 2013-2016 <sup>(2)</sup>

<sup>(1)</sup> Shares held by the executive and related persons.

<sup>(2)</sup> The number of free shares that will be definitively granted pursuant to the LTIP 2013-2016, 2014-2017 and 2015-2018 may vary between 0.5 and 1.5 times the number of shares initially granted as shown in this table, based on the Company's performance. Moreover, the Company may opt to pay beneficiaries of the LTIP 2013-2016, 2014-2017 and 2015-2018 in cash in lieu of the shares due to them (see Section 2.5, "Free Shares").

<sup>(3)</sup> Messrs. Didier, Eric, and Bernard-André Deconinck are direct and indirect shareholders of Société Investissement Deconinck - SID, which itself holds 31,975,071 shares of the Company. In addition, Didier Deconinck is a shareholder of DDA Bis, which holds 20,787 Tarkett shares.

### 2.4.2 STOCK SUBSCRIPTION OR PURCHASE OPTIONS

As of December 31 2015, no members of the Management Board or the Supervisory Board held stock subscription or purchase options.

## 2.5 FREE SHARES (LTIP)

In connection with its policy to motivate and encourage the loyalty of its management teams, the Company has implemented annual long-term incentive plans ("LTIPs") since 2011.

The LTIPs are based on the principle that shares (or their equivalent in cash) will be granted if the Company achieves its performance objectives and the beneficiary remains with the Company throughout the three-year duration of the plan.

As of December 31, 2015, three incentive plans could give rise to the grant of free shares of the Company. These are the LTIP 2013-2016, 2014-2017, and 2015-2018, corresponding to the year in which the plan was implemented and the year in which the grant takes place.

	Plan No. 3 LTIP 2013-2016	Plan No. 4 LTIP 2014-2017	Plan No. 5 LTIP 2015-2018
Date of Shareholders' Meeting .....	N/A	N/A	N/A
Date of Management Board's decision .....	October 9, 2013	February 3, 2015	December 21, 2015
Number of shares potentially granted <sup>(1)</sup> .....	406,000	275,000	375,000
Number of shares granted to:			
- Michel Giannuzzi .....	61,290	27,200	60,000
- Fabrice Barthélemy .....	15,512	8,800	16,000
- Vincent Lecerf.....	15,481	8,800	16,000
Date on which shares will vest <sup>(2)</sup> .....	July 1, 2016	July 1, 2017	July 1, 2018
End date of retention period .....	July 1, 2016	July 1, 2017	July 1, 2018
Performance conditions .....	<sup>(3)</sup>	<sup>(3)</sup>	<sup>(3)</sup>
Number of shares vested as of the date of the visa on this Registration Document.....	0	0	0
Number of shares canceled or expired.....	40,817	5,200	0
Number of shares remaining as of the date of the visa on this Registration Document.....	365,183	269,800	375,000

(1) The total number of shares delivered will be between 0.5 and 1.5 times the number of shares originally granted, depending on the degree to which the Company achieves its performance objectives.

(2) Under certain circumstances, in the event employment is terminated prior to the end of the vesting period shares may be granted on a pro rata basis.

(3) The performance conditions are set forth in Sections 2.5.1, 2.5.2 and 2.5.3 below.

### Retention Period

As from the date of the Company's initial public offering, Mr. Michel Giannuzzi is required to retain, throughout his term as Chairman of the Management Board, a number of shares of the Company corresponding to **50%** of the shares granted (after payment of taxes on the granted free shares which corresponds in the current state of taxation to about 50% of value of the shares allocated or their equivalent in cash) in connection with the Long Term Incentive Plan (LTIP). Furthermore, members of the Management Board and of the Executive Committee must retain a number of shares of the Company corresponding to **33%** of the Company shares granted (after payment of taxes on the granted free shares) in connection with this plan for the duration of their terms in office.

#### 2.5.1 LTIP 2013-2016

The LTIP 2013-2016 is an incentive plan that does not come within the scope of Articles L.225-197-1 et seq. of the French Commercial Code, which gives the right to the grant of free shares or, at the Company's option and depending on applicable law, the equivalent amount in exceptional compensation. These shares or cash payments will be vested or paid in July 2016, subject to presence and performance conditions relating to the achievement of the Group's strategic objectives. These share grants or cash payments will be effective in July 2016, with no retention period.

The number of free shares that will be vested pursuant to the LTIP 2013-2016 may vary between 0.5 and 1.5 times the number of shares initially granted, based on the Company's performance and the beneficiary remaining with the Group on the grant date.

In addition to the October 2013 grant, an exceptional grant of rights to receive 192,600 shares was made on the date of the Company's initial public offering to 34 MEP

beneficiaries who were also eligible for the LTIP 2013-2016 plan. The total number of shares granted under the LTIP 2013-2016 may not exceed 609,000 shares (the annual grant, to which the exceptional grant may be added), representing approximately 0.96% of the Company's share capital.

With respect to members of the Management Board, the LTIP 2013-2016 provides for an overall limit of 16.2% of the October 2013 grant and 37% of the additional exceptional grant for MEP shareholders.

#### 2.5.2 LTIP 2014-2017

The LTIP 2014-2017 is also an incentive plan that does not come within the scope of Articles L.225-197-1 et seq. of the French Commercial Code, which gives the right to the grant of free shares or, at the Company's option and depending on applicable law, the equivalent amount in exceptional compensation. These shares or cash payments will be vested or paid in July 2017, subject to presence and performance conditions relating to the achievement of the Group's strategic objectives. These share grants or cash payments will be effective in July 2017, with no retention period.

The number of free shares that will be vested pursuant to the LTIP 2014-2017 may vary between 0.5 and 1.5 times the number of shares initially granted as shown in this table, based on the Company's performance and the beneficiary remaining with the Group on the grant date.

With respect to the members of the Management Board, the LTIP 2014-2017 provides for an overall limit of 16.3%.

#### 2.5.3 LTIP 2015-2018

The LTIP 2015-2018 is also an incentive plan that does not come within the scope of Articles L.225-197-1 et seq. of the

French Commercial Code, which gives the right to the grant of free shares or, at the Company's option and depending on applicable law, the equivalent amount in exceptional compensation. These shares or cash payments will be vested or paid in July 2018, subject to presence and performance conditions relating to the achievement of the Group's strategic objectives. These share grants or cash payments will be effective in July 2018, with no retention period.

The number of free shares that will be vested pursuant to the LTIP 2014-2017 may vary between 0.5 and 1.5 times the

number of shares initially granted as shown in this table, based on the Company's performance and the beneficiary remaining with the Group on the grant date.

With respect to the members of the Management Board, the LTIP 2015-2018 provides for an overall limit of 24.5%.

## 2.6 CONSULTATION OF SHAREHOLDERS REGARDING COMPENSATION OF MANAGEMENT BOARD MEMBERS

### 2.6.1 COMPONENTS OF COMPENSATION DUE OR GRANTED TO MICHEL GIANNUZZI DURING THE FISCAL YEAR ENDED DECEMBER 31, 2015 (RESOLUTION NO. 5 FOR THE COMBINED GENERAL MEETING OF APRIL 26, 2016)

Components of compensation due or granted for the year ended December 31, 2015.	Amount or accounting value submitted for approval	Presentation
Fixed compensation	700,000	
Annual variable compensation	1,009,540	
Deferred variable compensation	N/A	
Multi-year variable compensation	N/A	
Exceptional compensation	N/A	
Stock options, performance shares and any other long-term compensation	Options = N/A	No option grants
	Shares = N/A Other = 1,644,000	Target amount of performance share grant, or equivalent in cash, in connection with the LTIP 2015-2018
Attendance Fees	N/A	Mr. Giannuzzi does not receive attendance fees.
Valuation of benefits of all kinds	6,056	Company car
Components of compensation due or granted during the fiscal year that are or were voted on by the General Shareholders' Meeting as related party agreements or commitments	Amount submitted for approval	Presentation
Retention bonus	300,000	A retention bonus in the amount of €300,000 will be paid to Mr. Giannuzzi on November 1, 2017 if he remains with Tarkett on such date.
Departure compensation <sup>(1)</sup>	0	Departure compensation subject to performance conditions specified in Section 2.3.9.2, of an amount equal to two years gross fixed and variable compensation received by Mr Michel Giannuzzi during the 12 months preceeding his departure from his position as Chairman of the Management Board and, if applicable, under his employment contract
Non-competition compensation <sup>(1)</sup>	0	Non-competition clause in an amount equal to his gross base salary and bonus received during the twelve months prior to his departure from his position as Chairman of the Management Board, payable in 24 monthly payments throughout the duration of his non-compete commitment. The Company has the right to waive the non-compete clause.
Supplemental Pension Plan	N/A	No supplemental retirement plan

<sup>(1)</sup> In the event that Mr. Giannuzzi is to receive both severance pay and the non-competition compensation described above, the total amount that he receives will be limited to two years of the gross base salary and bonus received during the twelve months prior to his departure.

### 2.6.2 COMPONENTS OF COMPENSATION DUE OR GRANTED TO FABRICE BARTHELEMY DURING THE FISCAL YEAR ENDED DECEMBER 31, 2015 (RESOLUTION NO. 6 FOR THE COMBINED GENERAL MEETING OF APRIL 26, 2016)

Components of compensation due or granted for the year ended December 31, 2015.	Amount or accounting value submitted for approval	Presentation
Fixed compensation	305,000	
Annual variable compensation	229,086	
Deferred variable compensation	N/A	
Multi-year variable compensation	N/A	
Exceptional compensation	N/A

Components of compensation due or granted during the fiscal year that are or were voted on by the General	Amount submitted for approval	Presentation

Shareholders' Meeting as related party agreements or commitments.		
Departure compensation	N/A	
Non-competition compensation	0	each month for twelve months, a payment equal to 40% of his average monthly salary during the twelve months preceding the termination of his employment contract. The Company has the right to waive the non-compete clause.
Supplemental Pension Plan	N/A	No supplemental retirement plan

## 2.7 PROFIT-SHARING AGREEMENTS AND INCENTIVE SCHEMES

### 2.7.1 PROFIT-SHARING AGREEMENTS

Pursuant to Articles L.3322-2 and L.3324-1 of the French Labor Code, profit-sharing agreements are required within companies with more than 50 employees that realize taxable income in an amount greater than 5% of shareholders' equity. As a result, a profit-sharing agreement was entered into in certain of the Group's French entities.

### 2.7.2 INCENTIVE SCHEMES

Pursuant to Article L. 3312-1 of the French Labor Code, an incentive scheme is an optional mechanism whose purpose is to give employees collectively a share in the business's success, and more specifically its performance and results, by using a formula to calculate immediately available bonuses. The Company maintains incentive schemes within certain of its French entities, each of which has a fixed term of three years. Each incentive scheme has its own formula for calculating bonus payments.

### 2.7.3 COMPANY SAVINGS PLANS AND SIMILAR PLANS

Pursuant to Article L. 3332-3 of the French Labor Code, companies with profit-sharing plans are required to maintain company savings plans. A group or company savings plan is a collective savings system that offers employees of the companies belonging to the plan the ability, with the help of their employers, to build investment portfolios. In particular, company savings plans can receive amounts under a profit-sharing or incentive agreement, as well as voluntary contributions. Amounts invested in a company savings plan cannot be withdrawn for five years, except in the early-withdrawal cases provided for by law. The Group created a company savings plan on June 29, 2004 for a term of one year, renewable automatically. This plan offers employees who have been with the Company for over three months the ability to allocate amounts paid to them immediately and in full to subscribe for shares in company investment funds (*fonds communs de placement d'entreprises*, or "FCPE").

## 2.8 TRANSACTIONS BY MEMBERS OF MANAGEMENT IN THE COMPANY'S SECURITIES

The table below shows, for the fiscal year ended December 31, 2015, the share acquisitions, disposals and exchanges, as well as transactions in related financial instruments, that

come within the scope of Articles L.621-18-2 and R.621-43-1 of the French Monetary and Financial Code and Article 223-26 of the AMF General Regulation:

Name of Reporting Person	Positions Held Within the Company	Nature of the transaction	Place	Description and Number of Financial Instruments	Date	Amount (in euros)
Michel Giannuzzi	Chairman of the Management Board	Acquisition	Euronext Paris	450 shares	8/24/2015	€8,935.59
Marie-Hélène Giannuzzi	Natural person related to the Chairman of the Management Board	Acquisition	Euronext Paris	450 shares	8/24/2015	€8,950.52
Guylaine Saucier	Member of the Supervisory Board	Acquisition	Euronext Paris	1,000 shares	7/30/2015	€21,048.50

## 2.9 PRINCIPAL RELATED PARTY TRANSACTIONS

Material transactions entered into or ongoing between the Company and related parties consist of the following.

### 2.9.1 GUARANTEES

The Company:

- granted a counter guarantee to Federal Insurance Company ("FIC") pursuant to a general indemnity agreement for a maximum amount of U.S. \$75.0 million to permit FIC to issue construction bonds on behalf of Fieldturf Tarkett Inc. As of the end of the fiscal year, outstanding commitments (, active or in the process of restitution) totaled USD 62 million;
- granted a guarantee to the retirement insurance company Pri-Pensions to insure Tarkett AB's employee benefit commitments in the amount of SEK 178.6 million;
- granted a guarantee covering 50% of the two credit lines, with a maximum amount of €5 million each, granted to its joint venture Laminate Park GmbH & Co KG;
- granted a guarantee for raw materials provided by a supplier of the Group's subsidiary Morton Extrusion Technik in order to secure its debt for an amount of up to €5 million;
- granted a guarantee to the lending bank under a line of credit by assignment of receivables for a maximum authorized amount of €55 million, which had not been drawn down as of the end of the fiscal year. In addition, Tarkett granted a parent-company guarantee to the banks of Tarkett Limited (GB), Desso Holding (Netherlands), and Poligras (Spain) to enable them to obtain overdraft and letter-of-credit arrangements in a total amount equivalent to €5.6 million as of the end of the fiscal year.
- Moreover, in the ordinary course of business, Tarkett and several subsidiaries of the Group granted payment guarantees to various suppliers, customers, governmental authorities, lessors, centralized cash pools, and financial operators, either directly or through bank guarantees. These guarantees are not significant at the individual or aggregate level.

### 2.9.2 SERVICE AGREEMENT WITH SOCIÉTÉ INVESTISSEMENT DECONINCK (SID)

Tarkett and SID have entered into a service agreement, effective as of January 1, 2014, pursuant to which Tarkett provides SID with administrative support including administrative, tax and accounting services, for an annual cost of €75,000, excluding taxes. In 2015, the services that Tarkett SA provided to SID were invoiced in the amount of €75,000, excluding taxes.

### 2.9.3 ASSISTANCE AGREEMENT WITH SOCIÉTÉ INVESTISSEMENT DECONINCK (SID)

Société Investissement Deconinck - SID and the Company entered into an assistance agreement pursuant to which SID assists in determining the Company's strategy. Under this agreement, SID receives an annual payment of €500,000 (excluding taxes), subject to revision based on an index chosen by SID and the Company, in exchange for its services, including the time spent by the members of its Management Board and its role in defining the Company's strategy.

### 2.9.4 CASH MANAGEMENT AGREEMENTS

The Company has cash management agreements in place with some of its subsidiaries to organize financing between the Group's entities and manage centralization of the Group's treasury.

### 2.9.5 SERVICE AGREEMENTS

The Company has entered into service agreements with some of its French and foreign manufacturing subsidiaries. The purpose of these agreements is to provide management, financial, legal, human resources, marketing and communication services. These agreements represented an aggregate amount of €10.7 million in 2015.

The Company has also entered into IT assistance agreements with certain of its subsidiaries. The purpose of these agreements is to provide IT, project management, development, IT licensing and consulting services (audit and SAP project preparation). These agreements represented an aggregate amount of €18.3 million in 2015.

<b>3.3 INFORMATION ON COMPANY COMMITMENTS TO SUSTAINABLE DEVELOPMENT ..... 86</b>	

Over the last several years, Tarkett has integrated sustainable development into the heart of its strategy, in order to ensure profitable and continuing growth while balancing environmental and social issues. It is an integral part of its responsibility, deeply anchored in its values and in the conduct of its business.

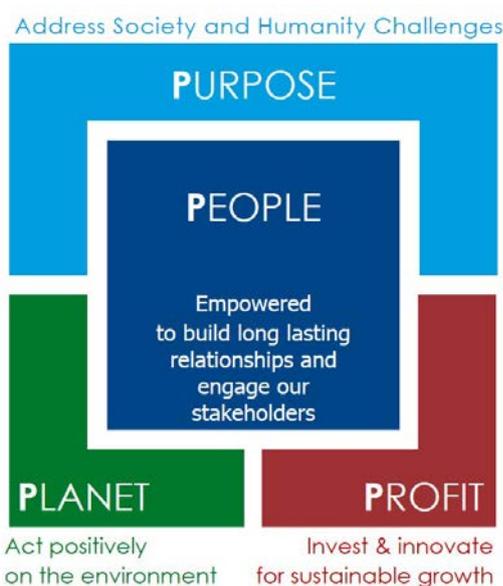

Tarkett's vision is to be the global leader in innovative solutions that generate value for customers in a sustainable way.

With our planet projected to reach nine billion inhabitants by 2050, resource constraints, customer expectations for quality-of-life and respect for health, as well as the requirements of confidence and transparency, are the challenges of tomorrow. Tarkett is convinced that we now need to begin to design economic growth differently.

The Group believes that sustainable development is not a constraint, but an opportunity that opens new perspectives. Tarkett has integrated sustainable development into all of its actions and also in its approach to customers, employees, suppliers, and shareholders, the communities within which Tarkett operates, and society at large.

Tarkett has a role to play in leading the market towards sustainable solutions that are able to meet economic and environmental challenges. The awards and certifications that Tarkett has obtained reward its efforts and show the value and worth of its commitment.

Tarkett's sustainable development strategy is based on four pillars (4P):

**"Purpose":** By offering solutions that contribute to solving the societal challenges of tomorrow, such as urbanization, an aging population and resource scarcity.

**"People": Corporate and Social Responsibility.** By making Tarkett a great place to work that is integrated into its local community and by motivating its employees to give the best of themselves and to build sustainable relationships with various stakeholders.

**"Planet": Environmental Responsibility.** By eco-designing its products to optimize the use of resources at each stage of their life cycle in accordance to Cradle to Cradle® principles and to make a positive contribution to the well-being of people, the environment, and development of the circular economy.

**"Profit": Economic Responsibility,** necessary to invest, innovate, and ensure continued growth.

Implementation of this "4P" strategy also rests on the **Group's fundamental values**, communicated to and shared by Tarkett employees:

- Positive attitude towards customers
- Team spirit
- Respect and integrity
- Autonomy and accountability
- Commitment to the environment

Review of Performance Indicators and 2020 Objectives

In 2013, Tarkett set environmental objectives (the "Planet" pillar) for 2020, approved by the Executive Committee. The performance indicators are monitored annually using a sustainable development dashboard, which covers three pillars: people (Social Responsibility), planet (Environmental Responsibility), and profit (Economic Responsibility).

The more specific indicators such as safety, water, energy and waste are shared each month with the Group's Executive Committee.

The main indicators are also monitored every month by the production plants and the Group's heads of WCM (World Class Manufacturing, the Group's program for continuous improvement).

## 3.1 EMPLOYMENT INFORMATION

### 3.1.1 EMPLOYMENT

Indicator	2014/2015 Evolution	2015	2014	2013	2012	2011	2010

### 3.1.2 HUMAN RESOURCES CHARTER AND POLICY

In 2014, Tarkett undertook to formalize its Human Resources management values and fundamental principles in the form of a Human Resources Charter and Policy. In 2015, the document was shared with all of the managers and with the Group HR network. It is based on the ten basic principles of the United Nations Global Compact, the principles of the Declaration of the Human Rights, and Tarkett's Code of Ethics.

The document is intended to frame the work of the human resources teams and the Group's managers, particularly in the following areas:

- To promote fundamental human rights:
  - through workplace health and safety measures;
  - by sharing common values, in particular with respect to diversity and non-discrimination, and ensuring the availability of an alert procedure (see page 7 of the Code of Ethics): "any question relating to ethics must be raised to managers or any other authorized person (internal audit departments and human resources),";
  - through compliance with the regulations and of the various countries and with international labor law, in particular with respect to child labor and forced labor.
- To build a learning organization, by encouraging team development, in particular by imparting good practices and training, promotion of entrepreneurial spirit and by talent development (career opportunities, mobility, employability, etc.)
- To implement a fair and equitable compensation and benefits policy, in particular by evaluating and rewarding performance, as well as by deploying transparent rules.
- To encourage dialogue within the Group, by promoting communication and conversations with the entire staff, by pursuing a continuing constructive dialogue with employee representatives, and by managing restructurings responsibly.

### 3.1.3 HEALTH AND SAFETY

Employee safety is the Group's top priority.

#### 3.1.3.1 Putting safety at the center of the business

Employee health and safety (including workstation ergonomics and illness-prevention campaigns such as against obesity) constitute one of the pillars of the World Class Manufacturing (WCM) program implemented at all of the Group's production plants (including sites that have not necessarily obtained OHSAS 18001 certification but that nevertheless apply the Group's safety principles).

This priority is grounded in the daily work and operations of the factories and is implemented through regular employee training, frequent audits of conduct and practices, ongoing dialogue between managers and their employees, analysis of incidents and action plans, and continuous improvement.

This guiding principle infuses all levels and positions within the business. Monthly meetings of the Group's Executive Committee and quarterly informational meetings of the Group's executives begin with a review of safety results. These results are also presented at meetings of Tarkett's Supervisory Board.

In addition, six collective bargaining agreements signed with employee representatives in four different countries also cover workplace safety.

In September 2015, Tarkett launched an awareness campaign, "SafeTember," in which it posted safety signs at all production sites reminding employees that safety is everyone's responsibility. In November, the awareness and communication campaign focused on safety during maintenance operations.

In 2015, Tarkett strengthened safety communication and training concerning forklifts. For example, in 2015, the Group's largest plant (Otradny in Russia) organized a contest to identify the best forklift drivers. Joining theory and practice, the contest aimed to put safety at the forefront of operators' daily concerns.

### 3.1.3.2 A steadily improving safety record

This unrelenting commitment has produced improvement in the principal safety indicators at Tarkett's industrial sites:

- Total accident frequency down slightly in 2015: 25.6 in 2014 vs. 22.1 in 2015.
- Severity rate: decreased by 1% in 2015 vs. 2014.
- Number of lost time accidents (excluding Beijing): decreased by 20% in 2015 vs. 2014.

In 2015, 17 of the Group's 38 plants had no accidents with lost time, including four that have had no accidents with lost time for at least the last two years. In addition, there were no deaths at any of Tarkett's factories in 2015.

For example, the Waterloo factory in Canada won the 2015 Canada's Safest Employer Award in recognition of the success of its workplace health and safety action plans and the daily commitment of its teams. The site has recorded no accidents for more than eight years.

Finally, the results of the internal survey distributed to all employees every two years (most recently in 2014) attest to their awareness of the policy: 85% of respondents believe that Tarkett is sufficiently attentive to employee safety, an increase of four points as compared with the 2012 survey.

### 3.1.3.3 Promoting a pleasant workplace

The Group's 2014 internal survey was also designed to identify areas that could present certain psycho-social risks and stresses, in particular through questions on how work is organized within the business: "The amount of work I am asked to do is reasonable" and "I am able to maintain balance between my work life and my personal life."

At the Group level, results improved by three points as compared with the 2012 survey. The detailed results are monitored by the subsidiaries' heads of HR, and entities that report worsening results are the subject of formal action plans.

In 2015, the Group moved three headquarters: in France (La Défense), the United States (Solon, Ohio), and China (Shanghai), significantly improving the work environment

(accessibility by rapid transit, surface area, collaborative work environment, living spaces, etc.).

To create a friendly atmosphere for its employees, Tarkett in Sweden offers activities such as foot races and fishing. Communities have also been created around employee interests. For example, at Tarkett's Paris-La Défense headquarters, employees took the initiative to participate in sports events to raise money for charitable organizations, such as the VertiGo (a vertical race to the top of Radio France's headquarters).

### 3.1.4 ORGANIZATION OF WORK

Tarkett complies with the provisions of the Labor Code or labor laws in each of the countries where the Group does business.

The organization of work within the Group entities varies depending on the legal and social environment and the individual needs of the organization. Certain rules are established through collective bargaining, such as variable weekly schedules, telecommuting, part-time work, flexible hours, and temporary reinforcement during busy periods. Depending on the site, there are between two and four eight-hour shifts (2x8, 3x8, 4x8 over a work week of five or six days).

In France, the Tarkett Group factories and its administrative and sales locations implemented the law on the 35-hour workweek through company-level or branch-level agreements. In Germany in 2015, a new agreement was signed on flexible working hours. In accordance with the law, 37.5-hour weeks may be extended to 40 hours with full transparency as to the hours worked.

In addition, through the World Class Manufacturing (WCM) program, a system has been implemented to develop operator versatility, thus enabling employees to develop new skills and increase their employability, facilitating replacements, and promoting internal mobility at the Group's production plants. The WCM program offers tools for continuous improvement and skill development to implement best manufacturing practices, in order to increase competitiveness, improve customer satisfaction and demonstrate excellence in safety and environmental matters. The WCM also promotes the active participation of operators and encourages them to make suggestions for improvements, thereby making them stakeholders in the development of their work environment.

Working conditions and work organization are also incorporated into the various collective bargaining agreements signed by the Group's subsidiaries, as well as into the deployment of the WCM program, which covers best safety practices, among other subjects.

In Tarkett's 2014 internal survey to all employees (which had an 82% response rate), 73% of respondents believed that their workload was "reasonable," a slight increase as compared with 2010 (+3%), and 63% of respondents believed that they were able to maintain a "good balance" between their work life and their personal life, as compared with 60% in 2012. In addition, 85% of respondents were satisfied with communication about workplace safety, as

compared with 81% in 2010. For more details on the internal survey, see 3.1.5.2 "Listening to Employees".

In addition, pursuant to the principles of the United Nations Global Compact, the Group's Code of Ethics and its Human Resources Charter and Policy, Tarkett is committed to the fight against forced or mandatory labor.

### 3.1.5 EMPLOYEE RELATIONS

#### Listening and Commitment to Dialogue with Employees

- Internal employee-satisfaction survey: 82% response rate in 2014 (8,800 employees). Next survey in 2016.

- Listen to employees and engage in social dialogue: 59% ("In my department different opinions are openly discussed when making decisions" and "Sufficient effort is made to obtain the opinions and advice of people who work at Tarkett")

- Exchange and communication: 63.3% ("My manager keeps me informed," "Management explains the strategic plan," "I am well informed.")

- Experiences, a monthly internal newsletter distributed to all employees in 11 languages, complemented by a worldwide intranet.

- Tarkett Forum, the Group's European Works Council, which fosters communication (17 from 8 countries)

#### 3.1.5.1 Maintaining a dialogue with union representatives: the Tarkett Forum

The Tarkett Forum is the Group's European Works Council. Each year, it brings together union representatives from the principal European sites as well as Group management. The council reinforces collaboration and management-labor dialogue and focuses on the general operation of the business as well as human resources questions common to the various countries and sites in Europe.

The Forum is composed of the Group's Director of Human Resources, the EMEA (Europe, Middle East and Africa) Director of Human Resources, and a number of representatives that was increased to 17 people from eight countries, to take into account the recent acquisitions of Desso (in the Netherlands) and of Gamrat's flooring activities (in Poland): three representatives from Sweden, three from France, two from Germany, two from Luxembourg, two from Belgium, two from the Netherlands, one from Italy and two from Poland. In 2015, the Forum met once in plenary session, and the Forum's bureau – composed of one representative per country – met quarterly. Meetings are regularly held with the Chairman of the Group's Management Board.

The framework for relations with employee representatives varies widely from one country to the next. Tarkett promotes dialogue at all of its entities, complies with local labor legislation in each of the countries where it does business, and respects the fundamental principles of freedom of association, in particular for unions.

#### 3.1.5.2 Listening to employees: internal survey

Every other year, Tarkett holds a dialogue with its employees through an internal survey distributed in all of the Group's companies and available in 17 languages. The process is managed by a third-party organization to ensure confidentiality and participant anonymity.

In 2014, more than 8,800 employees, or 82% of the workforce, participated in the survey, which included 76 questions and evaluated the Group's performance in 13 categories: Communications, Corporate Image, Accountability, Leadership, Loyalty and Commitment, Management, Performance Management, Teamwork and Cooperation, Training and Professional Development, Work Organization, Comprehension of the World Class Manufacturing Program, Ethics and Integrity (a new category), and Entrepreneurial Leadership (also a new category).

The high rate of participation (which improved compared to earlier versions) shows the interest and confidence of Tarkett's employees in this program.

The 2014 results show progress in all dimensions measured and are superior to those of the manufacturing companies making up the reference peer group. This progress reflects the continuous improvement that Tarkett has achieved in numerous areas. Tarkett conducted four surveys between 2008 and 2014, and each time there has been an increase in positive opinions as compared with the previous survey.

85% of respondents believe that Tarkett is a company that respects the environment, as compared with 82% in 2012 and 80% in 2010. 70% believe that ethics and integrity are central to Tarkett's culture, and 76% believe that Tarkett's commercial practices and ethical values are clear. 71% of respondents think that Tarkett supports diversity in the workplace, an increase of 6% as compared with 2012. 78% are proud to work for Tarkett, as compared with 74% in 2012.

Finally, 66% of participants understand the purpose and objectives of the World Class Manufacturing method, as compared with 61% in 2012. The WCM program is intended to produce continuous improvement and training in best manufacturing practices, in order to increase competitiveness, improve customer satisfaction and demonstrate excellence in safety and environmental matters.

The internal survey is a valuable management tool, because it can identify the Group's strengths as well as areas in need of improvement. Each company in the Group is responsible for distributing and using the results at the local level (while ensuring anonymity and confidentiality). Action plans are also put in place at the Division level and the Group level to support the local initiatives and respond to Group-wide issues.

In addition to monitoring the results and action plans for improvement, certain criteria are integrated into the indicators used in the Group's sustainable development dashboard. These include the "Listening and Commitment to Dialogue" indicator, the "Respect and Integrity" indicator, and the "Proactive Employee Communication" indicator

(see dashboard in Section 3.5 "Social and environmental report: methodology"). The "Listening and Commitment to Dialogue" indicator, for example, improved from 56% in 2012 to 59% in 2014. It includes the following questions from the internal survey: "In my department, different views are openly discussed when making decisions," and "Sufficient effort is made to get the opinions and thinking of the people who work at Tarkett."

Following the 2012 and 2014 surveys, multiple action plans were prepared and deployed throughout the Group, and will continue in 2016.

### **3.1.5.3 Promoting listening and dialogue at the industrial sites**

In connection with the WCM program, the Group promotes dialogue at its industrial sites, in particular through daily update sessions between the team leaders. In addition, audit systems have been deployed at certain industrial sites to facilitate the transmission of messages to the teams: EMAT (Environmental Management Audits) to enable dialogue with employees to develop their knowledge about environmental topics and to detect any problems; and SMAT (Safety Management Audits) to enable management to transmit a clear message about safety to each employee, to inform employees of the site's results, and to identify critical points.

The WCM program also strongly encourages operators to propose solutions each month to improve work organization.

### **3.1.5.4 Collective bargaining agreements**

The Tarkett Group has 123 collective bargaining agreements, 94 of which are company agreements or site agreements. They apply to 31 entities in 21 main countries where Tarkett conducts industrial and/or sales activities. Sixty company agreements have been entered into over the last few years (including 9 in 2015), demonstrating the Group's momentum in negotiations. Most of these agreements cover various subjects such as compensation and employee benefits, working hours, work organization and job classification. The new agreements entered into in 2015 primarily address anti-discrimination, but also cover issues relating to workplace health, safety and well-being, career management and skill development, the organization of working hours, restructurings and the rights of employee and union representatives.

In addition, pursuant to the principles of the UN Global Compact, the Group's Code of Ethics and its Human Resources Charter and Policy, Tarkett is committed to respect freedom of association and the right to collective bargaining and employee representation. These principles apply equally in all of the countries where the Group does business, including Brazil, China, India, Russia, Serbia, Ukraine, Kazakhstan, and the United States.

### 3.1.6 TRAINING AND TALENT DEVELOPMENT

#### Training and talent development:

- Training: 58% of employees received training (at least one day during the year).
- Internal mobility: 49% of management positions filled by an internal candidate.
- Individualized annual review and skill development: 57% of employees have a performance review or the equivalent (the WCM "skills matrix"), and 85% of managers are also monitored through Talent Reviews.

#### 3.1.6.1 Develop talents through training programs

Training is a key element for motivating, developing and promoting the Group's employees; it also enriches the professional qualifications of Tarkett's business partners.

Training is essential for the development of skills in order to encourage people to develop their employability and to promote mobility. Formalized systems such as the annual Performance and Development Dialogue (PDD) enable the Group to listen to the career goals of all of its employees, evaluate their individual skills and offer them the necessary training to grow within the Group.

Training programs are developed in line with the Group's operational objectives and strategy and are open to a large number of employees.

Each year, the Group measures the number of employees having undergone training in the previous year, to ensure that the efforts to develop skills and employability benefit the maximum possible number of people.

In 2015, 58% of Tarkett employees benefited from at least one day of training.

In 2015, 272,501 hours of training were provided to Tarkett employees, or an increase of three hours as compared with 2014.

#### 3.1.6.2 Develop talents and mobility

The COACH program was introduced in Europe to develop the managerial skills of first-level management. The Tandus Centiva job application system for the Florence, Alabama site was deployed to retain talent and increase internal mobility by making a form available to employees that lists job opportunities.

The internal mobility process is reinforced through the internal mobility charter distributed to employees via the intranet and the mobility guide used by the Human Resources network. Tarkett created an International Mobility Committee, composed of the Directors of Human Resources for each of the Group's divisions, which has met on a regular basis since 2013. The committee, which meets annually, has the objective of reviewing employee desires for mobility, collected in particular through the "Development and Performance Review" and the "Talent Review," and identifying how they may correspond to the

needs of the business. The committee's proposals are shared with the Executive Committee.

In 2015, the Clervaux factory in Luxembourg continued to implement its action plans in three areas: training, skill assessment and development, and communication of the Group's objectives and vision to all employees. Training is particularly focused on preventive health and safety relating to movements and positions that are adapted to an employee's workstation, which are a priority for Tarkett. The results are convincing: in 2015, Clervaux had one of the lowest accident rates in the Group (both with and without lost work time and first aid). Skills management was particularly strengthened in 2015 through the expansion of the annual development review to all of the site's employees, including operators. Skill matrices for operators were defined by a working group and deployed with the support of the employee representatives. This allows the development of multiple skills both collectively and on an individual basis, employment management, and the development of the skills needed by the site (in terms of future retirements, ambitious training plans, and anticipation of needs). Finally, the dissemination of the Group's objectives, a key factor in the site's success, was improved in 2015 through site meetings integrated into managerial routines. All employees now have individual annual objectives that are directly tied to the objectives of the department and the site. The site's management was recognized for its actions in these matters with the prize for the best "People-Focused CEO" 2015, presented at the HR ONE gala in Luxembourg.

#### 3.1.6.3 Determine collective training needs in order to share common skills and values and to increase the Group's efficiency

In coordination with the Human Resources Network (Divisions and Countries), the Group defines common training needs, as well as programs for widely disseminating Tarkett's core values, key skills and best practices. A "Learning & Development" committee meets monthly to steer joint initiatives at the Group level and to share best practices among the divisions.

A Talent Resource Planning process was put in place to anticipate organizational and skills-management needs ("Talent Management") three to five years in advance based on the Group's strategic plan. With respect to management training, two major programs have been instituted in all of the Group's subsidiaries: Manager@Tarkett and ProjectManagement@Tarkett. Management@Tarkett trains managers in good management practices (such as listening and giving feedback, motivating teams, setting goals and evaluating performance) and imparting common values (such as positive customer attitude, team spirit, empowerment and accountability, respect and integrity, and commitment to the environment).

ProjectManagement@Tarkett trains people to lead or participate in projects (such as a research projects, putting a product into production, launching a product, etc.). The goal is to impart good practices and project management tools, to learn to mobilize teams for a common purpose, and thus to increase the project success rate. 946 employees have received training since 2009, including 86 in 2015.

In 2015, Tarkett introduced training in cross-functional management for teams involved in multi-disciplinary projects covering multiple entities, functions and countries.

The Group also wishes to promote and encourage entrepreneurial spirit by developing a new training program called "Entrepreneurial Leadership". Launched as a pilot program in 2014 for the EMEA Division, this program was deployed in 2015 with five sessions and 134 employees trained. The program helps to clarify and share the model for entrepreneurs and leaders within the Group. It also responds to the need to better engage the teams and make them accountable, an area identified as needing improvement in the 2014 internal Employee Feedback Survey. The Tarkett entrepreneurial model is based on five themes: Sharing Vision and Ambition, Exploring New Ways, Powering Up People, Being the Solution, and Making it Happen. These themes correspond to Tarkett's "GloCal" approach, intended to give employees accountability and decentralize decision making, while at the same time following and sharing the Group's common values and principles.

Two WCM trainings are also provided at all production plants: Problem Solving Methodology and COACH (management for shift leaders), intended to accelerate the deployment of good practices promoted by the WCM program. Since its creation, 154 people have taken COACH training at the Group's sites in Ronneby, Sweden; Sedan, France; Clervaux, Luxembourg; Konz, Germany; and Mytishchi, Russia.

E-learning programs have also been deployed for all employees with access to a computer:

- "Code of Ethics" (launched in 17 languages for 6,373 people, including 850 in 2015, which is intended to raise employees' awareness to Tarkett's values),
- "Competition" (training to principles and rules applicable on competition - 2,086 people trained in 2014 and 2015).
- Corruption: training on rules and principles applicable on corruption had also been launched end of 2015, which has been completed by 2201 employees out of the 2,408 targeted.

Such interactive online trainings not only help employees understand the values and practices that the Group requires them to apply every day, but also puts them in situations through concrete examples and questionnaires.

Training on the same topics is also available in person, in every division. For example, in 2015, 402 employees in the EMEA division met over several sessions to be trained on the topics of competition, corruption, and, more generally, business ethics.

In Europe, a skills-development program for the sales forces, PowerUp, was initiated in 2014 and deployed in 2015. It includes a plan for training and full development for sales employees, based on a prior detailed analysis of needs that in turn is based on an evaluation of each manager. This program covers close to 500 people in all of the countries in

the EMEA zone, including the Desso sales force beginning in 2015.

An integration program for new hires was implemented throughout the Group, beginning in 2009, to facilitate integration and orientation. This program, established by the manager in coordination with the HR departments, includes a presentation of the Tarkett Group, safety rules, the employee's position and working environment, and the administrative rules. Additionally, each new hire is assigned a corporate mentor to facilitate integration and to welcome the employee. Thirty days after starting, the new employee writes a report on his first impressions and gives his opinion on his integration program.

The Live Campus training module complements this integration program in Europe. From one day to four days, depending on the position, it fosters the rapid integration of new hires through knowledge of the Group's projects, of the organization, etc. It is also a way of imparting the Group's rules and common values, including positive customer attitudes, team spirit, empowerment and accountability, respect and integrity, and commitment to the environment. Since 2011, 1,012 new hires in Europe have received this training, including 200 in 2014. In addition, since 2011 new employees have completed online training using the E-Campus program.

### **3.1.6.4 Identify individual needs in connection with skills development and a personalized development and training plan**

In order to anticipate skills and development needs, Tarkett uses the Performance & Development Dialog reviews (PDD) conducted each year between employees and their managers, as well as the Talent Review and the WCM versatility program.

In France, for example, the process of determining needs is carried out in two stages:

- In October, each manager informs human resources of the training needs of each member of his team. A reply to these requests is sent in December, and a preliminary outline for the following year's program is created (80% of the training budget allocated).
- Then, from January until March, following the Performance & Development Dialog review, additional individual training requests are collected. Human Resources replies in March, when the remaining 20% of the budget is allocated.

The individual trainings cover the following themes: Languages, Management, Personal Development, Information Technology, and Technical Skills.

Development and training needs are collected each year at the Performance & Development Dialog (PDD), which is widely deployed within the Group.

In addition, for a certain category of the population, targeted as a priority (managers, supervisors, engineers, and technicians), development needs are also analyzed through the Talent Review, which integrates a longer-term career management dimension into the determination of these

needs. In 2015, 2,600 people were covered by the Talent Review, including 85% of managers.

The Versatility program, part of the World Class Manufacturing program for operational excellence, is intended to identify opportunities and prepare each production plant employee for potential professional growth based on available jobs and skills training. This individualized approach helps operators grow their skill sets, anticipate change and strengthen their employability. Since its creation, more than 3200 people have been trained in connection with the WCM.

### 3.1.6.5 Promote the development of a learning company and build on skills and success

Tarkett aims to develop its employees' skills and to share best practices and expertise within the Group. The challenge is not only to increase the employability and satisfaction of the Group's employees, but also to reinforce and ensure the Group's continued expertise and to increase its operational efficiency.

Tarkett encourages the use of multidisciplinary teams with different professional profiles through the implementation of cross-Group projects. The deployment of the collaborative intranet, with the ability to create communities of interest and projects, is also part of this process of sharing knowledge and good practices. In addition, a program for the management of experts is in the process of being deployed.

In connection with the WCM program, meetings are organized each year at one of Tarkett's industrial sites to improve the skills of factory experts and leverage the Group's expertise and know-how in operational excellence.

The Group has implemented various initiatives and programs to promote skill sharing and knowledge enrichment and to reward good practices and successes internally:

- Tarkett Awards: The Tarkett Awards recognize initiatives in eight categories: the Chairman's Award, Share a Vision and an Ambition, Explore New Horizons, Create a Solution, Act Concretely, Commit to Sustainability, Accountability and Delegation, and the Employees' Award. One hundred eighty-six applications were submitted in 2015 (as compared with 120 in 2014 and 80 in 2013), involving more than a thousand employees worldwide. Of the eight winning applications, five included a sustainable development component (environment, Cradle to Cradle® deployment, safety, etc.)

- Network of experts: In 2015, Tarkett launched a program designed to better identify technical expertise in Research & Innovation and Operations, and to better leverage the contribution of technical experts, recognize their contributions, share their knowledge know-how, and to support their career development.

### 3.1.6.6 Train our partners and provide diploma programs through Tarkett Academy

#### Commitment to our communities:

- Tarkett Academy : 15 centers in 8 countries.
- Number of young professionals or experienced installers trained to install and maintain flooring: 3,974, +6% vs. 2014.

Tarkett also implements training programs for its partners. Through its 15 Tarkett Academy centers, located in eight of the principal countries where Tarkett has industrial sites (Australia, Brazil, China, France, Russia, Serbia, Sweden and Ukraine), Tarkett trained close to 4,000 people in 2015 in flooring installation and maintenance, an increase of 6% as compared with 2014. The courses are aimed at young professionals as well as experienced installers. Sessions may run from two days to one week.

In France, three training centers issue diplomas that are accredited by the Ministry of National Education (Level 5 Flooring and Carpeting CAP [professional certification]) and by the Ministry of Employment (Level IV Flooring certification). In 2013, Tarkett Academy of Sedan celebrated its twentieth anniversary. Finally, Tarkett now provides training to its customers in Serbia in installation techniques, with the opening of its fifteenth Tarkett Academy in Bačka Palanka.

In the United States, architects and designers who are members of professional organizations (IDCEC, AIA, USGBC, ADIS, etc.) are required to earn a certain number of continuing education credits to maintain their licenses and/or certifications. Tarkett is accredited to offer continuing education courses and training sessions.

### 3.1.7 CODE OF ETHICS, RESPECT AND EQUALITY OF TREATMENT

#### 3.1.7.1 Deploy the Code of Ethics and put it into everyday practice

Tarkett's Code of Ethics defines the fundamental principles that govern the Group and through which it makes a commitment to its customers, its employees, its suppliers, its partners, and all other stakeholders. It is a major tool for encouraging employees to respect Tarkett's core values, the 10 principles of the UN Global Compact, and the principles of the Declaration of Human Rights.

With regard to equality of treatment, "Tarkett is committed to respect individuals, avoid discrimination, and promote health and safety in the workplace, in accordance with local laws and regulations."

Since 2009, the Code of Ethics has been distributed to all new hires, who are required to adhere to its principles, including compliance with competition law and anti-corruption law, where applicable (executives, managers, salespeople, buyers, etc.). Beginning in 2014, new hires throughout the Group have been required to complete mandatory online training and attest that they have read the Code of Ethics. In-person training is provided for employees

without access to computers. For more information, see Sections 3.1.6.2 and 3.1.7.2 and Chapter 6, "Risk Factors and Internal Control."

### 3.1.7.2 Promote equality between women and men

An equality indicator was defined at the Group level and included in the Sustainable Development/CSR dashboard. Since 2010 Tarkett has been monitoring the growth in the number of women "Top Managers" (Chairman of the Management Board and the first two hierarchical levels of the organization).

#### Diversity:

- Women on the Board of Directors: 20%, in accordance with the AFEP-MEDEF principles
- Percentage of executives one and two levels below the Chairman who are women: 18% vs. 16% in 2014
- Percentage of management positions occupied by women: 25%

Tarkett's Code of Ethics and Human Resources Charter and Policy mandate non-discrimination between women and men.

Michel Giannuzzi, Chairman of Tarkett's Management Board, organized meetings with female employees at Tarkett's headquarters in France, in order to begin a dialogue and converse on several subjects, including professional development, respect and equality of treatment, and work-life balance. At a meeting open to all of the headquarters' employees, the Chairman continued the dialogue and shared the subjects being thought about and the actions to be put in place in 2016. The Chairman also emphasized his commitment to compliance with the Group's value and its Code of Ethics.

For example, in Sweden, an equality-of-opportunity plan was deployed at six different sites in order to reduce the risk of discrimination based on gender, ethnic origin, disability, etc. The programs will be implemented in 2016.

### 3.1.7.3 Promote employment and integration of people with disabilities

Tarkett is committed to developing a policy to integrate workers with disabilities and has put in place local initiatives for that purpose. For example, since 2009 Tarkett's headquarters in France has worked with a disability-friendly company (entreprise adaptée) to package and ship some of its marketing materials. The Tarkett factory in Sedan has also made workstation accommodations to limit the need for disabled workers to handle materials. It should be noted that it is difficult to use the same indicator worldwide, since regulations differ widely from one country to the next as to whether they authorize the identification and monitoring of disabled workers within a company.

In 2015, in countries in which disability is defined by law, 1.4% of Tarkett's employees were disabled, as compared with 1.6% in 2014. It is difficult to measure the disability indicator at the worldwide level, since the laws are not

identical in different countries with respect to the definition of disability or whether there is a requirement to monitor this indicator, for example.

### 3.1.7.4 Fight against discrimination

The fight against discrimination is included in the Code of Ethics, through the values of respect and non-discrimination as well as in the application of the principles of the UN Global Compact. Within the Human Resources network, anti-discrimination is also a particular focus and is formally included in the Human Resources Charter and Policy. Human resources departments are asked to give a copy of the Code of Ethics to each new hire.

Forty-six policies or rules in favor of diversity and non-discrimination are in force at the Tarkett Group entities. These procedures include measures relating to equality between men and women, disability, age, protection of pregnant women, sexual orientation, ethnic or national origin and religious diversity. For example, since 2013 the Group has been putting "generation contracts" in place (a mechanism to encourage the recruitment of young workers and the retention of older workers).

In addition, pursuant to the principles of the UN Global Compact, the Group's Code of Ethics and its Human Resources Charter and Policy, Tarkett strives to eliminate job and professional discrimination.

For example, in the United Kingdom, each new hire receives the equality policy, providing that the company has undertaken to respect equality in job opportunities and not to discriminate in its hiring practices or with respect to its customers.

Beyond the fight against discrimination, Tarkett emphasizes that it wants each employee to practice its values of respect and integrity. For example, Michel Giannuzzi, Chairman of the Management Board, wrote to all of Tarkett's employees, in his editorial in the internal newsletter "Experiences" (translated into 11 languages) his dedication to the Group's values, his desire to see everyone practice respect and integrity, and his vision of inclusion. Beyond respect for diversity -- diversity of ethnicity, education, nationality, age, gender, and sexual orientation -- the Chairman encouraged inclusion of all within a single community of work, enabling each person to express the best of himself.

### 3.1.7.5 Implement restructuring or layoff plans with respect

The Group has a medium and long-term vision of its business plan and seeks to ensure profitable and sustainable growth. The Group wants to develop the skills and employability of its workforce, first to enable each employee to contribute and to develop fully within the business, but also to anticipate the possible consequences of changes in the organization.

The Group also endeavors to anticipate the consequences of business fluctuations to the extent possible. In the event of a decline in a particular activity, an activity that cannot be turned around and/or a difficult or volatile economic environment, the Group may be forced to reduce its workforce on a one-off or structural basis. Adapting the work organization to the level of activity, reducing the size of the workforce or implementing a restructuring plan must be done in compliance with local regulations and the principles of Tarkett's Code of Ethics and in cooperation with employee representatives. In connection with these measures to adapt to declines in activity, Tarkett seeks above all to adapt the organization of work (paid vacations, reorganization of working hours, temporary layoffs, etc.), to reduce the number of temporary workers (those with short-term employment agreements), to promote internal transfers, and to take social criteria into consideration depending on departure measures (retirement, age, professional or personal projects, etc.).

For example, the necessary workforce adjustment carried out in Russia, Ukraine, Sweden, the United States and Canada in 2014 and 2015 were implemented pursuant to agreements with the Group's labor partners. In order to support its employees, Tarkett offered measures such as severance pay, prior notice, training, and support in searching for and returning to work, that complied with and in many cases exceeded the legal requirements in force in the countries in question.

In 2014 and 2015, the Group faced a deteriorating and volatile economic situation in Russia and Ukraine and was therefore forced to adapt its cost structure and workforce to the decrease in activity and production. In a very seasonal industry, the number of temporary workers was reduced and temporary contracts were either terminated or not renewed.

In 2015 in Russia, the vinyl floor production plant in Otradny was forced to terminate 38 short-term employment agreements that had been entered into in early 2014 based on annual sales and production forecasts that were revised downward during the year. Tarkett did not lay off any employees but encouraged voluntary departures. The sales force also eliminated 10 positions.

In an extremely difficult political and economic context in Ukraine, Tarkett was forced to adapt the size of the workforce at his production plant at Backa Palanka in 2015 and eliminate 35 positions. In France, Tarkett had announced in 2014 a contemplated project to stop the Marty wood floor plant activity in Cuzorn (Lot-et-Garonne) due to structural losses incurred over several years and the steep decline in the wood floor market in France, which showed no prospect of recovery. Tarkett had acquired this site in 2011 when it was in bankruptcy proceedings. Tarkett searched for more than a year for potential buyers for all or part of the business and/or the site. Out of more than 200 contacts and/or files studied in 2014, only seven offers had been submitted, none of which were economically and socially viable as of the end of 2014. In 2015, an offer was made that is still being considered. Tarkett Bois put in place a procedure to inform and consult with employee representatives and entered into an agreement with those representatives, signed by the majority union, in order to define the procedures and the schedule of discussions. During these discussions and in the context of a constructive dialogue with labor, Tarkett continually and significantly adapted and improved the various measures in its Redundancy Plan. Tarkett undertook to act in a responsible manner by proposing a variety of measures for internal and external redeployment and support tailored to the 119 affected employees in order to reinforce their employability and support their professional plans. The Redundancy Plan was implemented in 2015 and production ceased. By the end of December 2015, a professional transition plan (whether through professional reassignment, personal plans, or otherwise) had been identified for more than two-thirds of the employees affected by the Redundancy Plan.

## 3.2 ENVIRONMENTAL INFORMATION

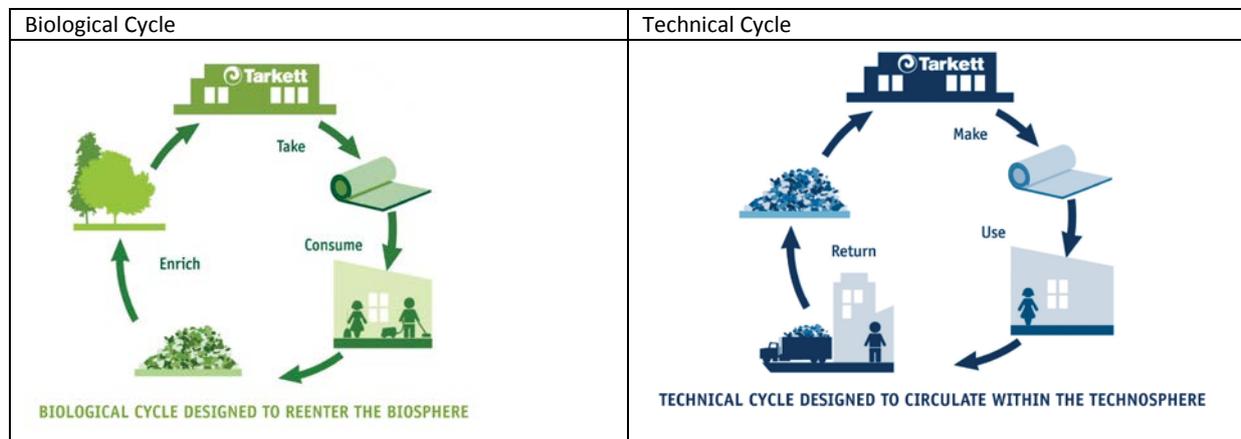

### 3.2.1 GENERAL ENVIRONMENTAL POLICY

In connection with its Sustainable Development policy (the "4Ps" -- Purpose, People, Planet, and Profit -- see the introduction to this section), over the last several years Tarkett has put in place a voluntary and ambitious strategy for the protection of the "Planet".

Based on its closed-loop circular design and respect for human health and the environment at every stage of a product's lifecycle (design, production, use, and recycling), Tarkett applies Cradle to Cradle® principles and is committed to the development of the Circular Economy. Tarkett was one of the first French companies to join the Ellen MacArthur Foundation's Circular Economy 100 Circular Economy:

program in February 2013, and has been applying Cradle to Cradle® principles since 2011.<sup>1</sup>

Tarkett is committed to the transition from a linear economy to a circular economy, while at the same time ensuring profitable and continued growth. The concept is to replace the linear approach, which consists of extracting resources, using them for manufacturing, and eventually throwing them away, with the design of products that reuse resources in a loop from the beginning to the end of the products' use phase. Thus, the ingredients or components of a product at end of use goes back to the biosphere (biodegradable products that enter a biological cycle), or raw materials for the production of quality products (the technical cycle.)

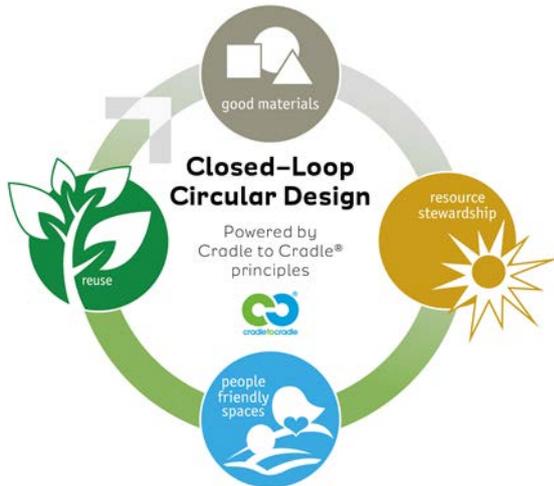

Furthermore, the Group believes that it has a responsibility to meet the values and expectations of customers and users, without having to choose between quality of life, protection of the planet, performance and design. That is the challenge of the closed-loop circular design powered by the Cradle to Cradle® principles: choosing materials at the very beginning that respect the health and the environment and that can be recycled in a technical or biological cycle ("doing the right things from the very beginning").

To apply the Cradle to Cradle® principles at each step of the product's life cycle, Tarkett has worked over the last several years in close collaboration with the Environmental Protection and Encouragement Agency (EPEA), a scientific research institute, to evaluate and select materials that respect human health and the environment. The objective is to design products that no longer have an end of life, but rather an end of use that enables them to be recycled several times and to be incorporated into new quality products, all while offering comfort and respect for health.

Tarkett puts the Cradle to Cradle® principles into practice through its closed-loop circular design organized around four key steps:

<sup>1</sup> Cradle to Cradle® is a trademark of McDonough Braungart Design Chemistry, LLC.

- "Good Materials": Quality of materials: Choosing materials that respect both health and the environment and can be recycled.
- "Resource Stewardship": The responsible use of resources: Optimizing the use of resources such as water and energy and limiting greenhouse gas emissions and waste during the production phase of our manufacturing activities.
- "People Friendly Spaces": Wellbeing and quality of life: Contributing to the health and wellbeing of people during the product's use.
- "Reuse": Recycling and Re-use: Recycling products at end of use to eliminate waste and close the loop.

In recent years Tarkett has obtained several Cradle to Cradle certifications (*Cradle to Cradle Certified™*)<sup>2</sup>, renewed in 2014 and 2015 based on the 3.0 and 3.1 versions, which guarantee a higher level of sustainable development: Basic level for artificial turf, Basic level in 2014 and Bronze level in 2015 for rubber tiles and sheets floors and rubber accessories (BaseWorks®), Silver level for linoleum, wood, and ethos® carpet tiles, hybrid grass, Gold level for the Veneto Essenza 100% Linen linoleum and the DESSO EcoBase® backing. Desso carpet products were also designed in accordance with Cradle to Cradle® principles. Today, 93% of Desso's commercial carpet tiles are certified Cradle to Cradle, representing 65% of Desso's commercial carpet business in EMEA. In 2014, Evolay, a new resilient flooring

that is an alternative to vinyl, was Cradle to Cradle Certified™ at the Bronze level. In 2015, the "Gold Collection" carpet line was Cradle to Cradle Certified™ Gold level.

Management and tracking of environmental policy

In 2010, Tarkett created a performance indicator dashboard to track environmental progress in four areas: Good Materials, Resource Stewardship, People Friendly Spaces and Reuse. In 2013, Tarkett set environmental objectives to be achieved by 2020. The objectives were approved by the Executive Committee, communicated internally and externally, and tracked through action plans.

**The 2020 Objectives concern the main environmental indicators:**

Pillars	Initiatives	2020 objectives
 <b>Materials that are safe for people &amp; the environment and that can enter into a technical or biological cycle</b>	<ul style="list-style-type: none"> <li>Choose good materials in terms of potential risk towards people and the environment</li> </ul>	1. 100% of materials used in our products are continuously assessed by a third party
	<ul style="list-style-type: none"> <li>Increase the share of abundant, renewable and recycled materials</li> </ul>	2. 75% of the materials at the source of our supply chain do not contribute to resource scarcity (incl. recycled materials)
 <b>The responsible use of natural and non-renewable resources in our operations</b>	<ul style="list-style-type: none"> <li>Reduce usage of fresh and potable water</li> </ul>	3. 100% of our manufacturing sites have implemented closed-loop water circuits
	<ul style="list-style-type: none"> <li>Decrease energy consumption and greenhouse gas emissions</li> </ul>	4. 20% reduction of GHG emissions against a 2010 baseline
 <b>Well-being of people during product use and maintenance</b>	<ul style="list-style-type: none"> <li>Design solutions ensuring indoor air quality, health and well-being</li> </ul>	5. 100% of flooring products are phthalate-free and have low emissions
	<ul style="list-style-type: none"> <li>Design solutions that are eco-effective to install and maintain</li> </ul>	6. 100% of our flooring solutions offer maintenance and installation procedures following Cradle to Cradle principles
 <b>All waste and products at end-of-use enter into a biological or technical cycle</b>	<ul style="list-style-type: none"> <li>Ensure that all manufacturing waste enter into a biological or technical cycle</li> </ul>	7. 0 industrial waste going to landfill
	<ul style="list-style-type: none"> <li>Develop take-back programs for our flooring solutions, allowing to close the loop</li> </ul>	8. Double volume of collected post-installation or post-consumer flooring and sports surface products, compared to 2010

<sup>2</sup> Cradle to Cradle Certified™ is a certification trademark filed by the Cradle to Cradle Products Innovation Institute.

### 3.2.2 "GOOD MATERIALS": QUALITY OF MATERIALS

#### Good Materials:

- Assessment of materials using Cradle to Cradle® principles: 80% vs. 75% in 2014 and 7% in 2011.
- 2,535 materials assessed using Cradle to Cradle® principles since 2010 (materials used by Tarkett and Desso as well as materials related to flooring such as adhesives, glues and detergents)
- Materials that respect our natural resources (that do not contribute to using up resources: mineral materials that are abundant, renewable, or recyclable): 67%.

The objective is to eco-design products that respect human health and the environment and that are recyclable in a production / technical cycle or in a biological cycle. Products are evaluated in partnership with the German scientific institute EPEA (for Tarkett and Desso ingredients), and the ingredients are selected according to strict criteria. Tarkett also uses Life Cycle Assessment for the majority of its products. "Good materials" means choosing materials that respect human health and the environment and do not contribute to the depletion of natural resources. Materials should be abundant, rapidly renewable, and recycled as well as recyclable.

The percentage of non resource-depleting materials used by the Group decreased from 71% in 2011 to 67% in 2015, due to the sales volumes decrease in wood and laminates (which are renewable categories) and to the integration of the Tandus and Desso carpet flooring businesses, which use synthetic materials. However, significant progress has been made in the use of recycled materials (either scraps or post-production waste obtained internally, or from other industries or the recycling of installation scraps or used floors), which represented close to 5% in 2015 (as compared with 3.6% in 2011). (For more information, see Section 3.2.5, "Reuse: Recycling and Re-use.")

For example, linoleum is made from renewable materials such as pine resin and cork. Certain formulations for manufacturing vinyl products are designed to be able to contain up to 60% of recycled materials, and some carpet tile backing may be up to 100% recycled.

In collaboration with local drinking water companies, Desso, a Tarkett group brand, has found a way to upcycle re-engineered calcium carbonate (chalk). The drinking water process leaves a residual of calcium carbonate after it has softened groundwater, a necessary step to make it suitable for drinking. Chalk is positively defined in accordance with C2C criteria and is used for the production of Desso's carpet tiles with EcoBase™ backing. This backing is C2C Gold certified and 100% recyclable in Desso's own production process. Over 50 % of Desso's carpettile range is available with ECONYL® yarn, also including post-consumer yarn waste from DESSO's Refinity® plant.

In 2015, Desso reached a major new milestone in its Cradle to Cradle® journey in becoming the first carpet tile manufacturer in the world to achieve Cradle to Cradle® Gold level certification for a new carpet tile collection. The new 'Gold Collection' comes standard with an EcoBase™ backing and 100% regenerated ECONYL® yarn. To reach this golden milestone, Desso has had to fulfil a broad range of tough environmental and human health criteria, as defined within the Cradle to Cradle Certified™ Product Standard.

In addition, in North America, Tandus Centiva perfected a sub-layer for ethos® modular carpet tiles composed of recycled film from windshields and safety glass. This product achieved a Cradle to Cradle® version 3 Silver level certification.

For the manufacture of wood flooring, Tarkett selects wood types based on respect for their natural cycle and their availability in nature. For example, for multi-layer wood floors, Tarkett prioritizes the use of species of wood that grow fast and are therefore rapidly renewable, such as spruce. All unused wood (sawdust, shavings and scraps) that is not reused during the production process is used to generate energy, either internally at Tarkett or through resale to external energy producers.

The Group has also partnered primarily with wood suppliers that are certified by the Forest Stewardship Council™ (FSC™) or the Programme for the Endorsement of Forest Certification (PEFC™), thus ensuring ethical practices and sustainable forest management that are respectful of the environment and of human rights, pursuant to the principles of the "Chain of Custody" standards. Again, in 2015 Tarkett also renewed its multisite "Chain of Custody" certificate not only for PEFC™ but also to FSC™ where a total of 12 production sites and sales companies are covered.

In addition, in 2013-2014, a program for internal training, evaluation of our wood suppliers, and traceability of our wood sources was put in place. In 2015, the number of supplier audits was increased, as a result of which Tarkett is in full compliance with the European Union's EU Timber regulations, issued in March 2013.

As a result of these actions, since 2012 Tarkett has been certified Cradle to Cradle™ Silver, version 3.1, for all of the wood floor product lines manufactured at its four production sites.

### 3.2.3 "RESOURCE STEWARDSHIP": OPTIMIZED RESOURCE MANAGEMENT DURING THE PRODUCTION PHASE.

The objective is to reduce and optimize the use of resources during manufacturing operations, in order to prevent the depletion of resources and to address the challenges of climate change. The goal is to reduce consumption of drinking water, to optimize energy consumption and to minimize greenhouse gas emissions.

#### 3.2.3.1 Water

##### Resource Stewardship: WATER

- Significant decrease in water consumption since 2010 : 3.32 liters per square meter of manufactured products as compared with 5.16 in 2010, - 7% vs 2014.
- 73% of our plants that produce final products have reduced their water consumption per square meter of product manufactured.
- Total amounts: 995,618 m<sup>3</sup> of water used, -9% as compared with 2014 and -38% as compared with 2010.
- Industrial sites equipped with closed-loop water circuits (or that do not use water in their manufacturing processes): 57%

In 2014, the Sedan site used 3.48 liters of water per square meter of manufactured products, or a decrease of more than 30% as compared with 2010. This significant improvement resulted primarily from the installation of a water-cooling system for the production lines' smoke purifiers. In 2014 this action plan was recognized at the Group level by nomination for the Tarkett Awards, an internal prize. This decrease was also the result of a modification in the ink used to print patterns on vinyl floors. Thanks to the use of biodegradable components, the water used to clean the printing cylinders can be recycled.

In 2014, the Konz site in Germany also reduced its water consumption, using 4.51 liters of water per square meter of manufactured product, a reduction of more than 64% as compared with the previous year. The production site installed a closed-loop water circuit and renovated its pipe system.

In 2014, the Waterloo site in Canada installed a closed-circuit water recovery system on its cooling equipment. An old reservoir was repaired and put back into service to store the water used in the cooling system; this water is then reused and recycled continuously in the production process. Thanks to this installation, the factory reduced its water consumption, in cubic meters, used during the cooling process by more than 30% (May to December 2014 as compared with May to December 2013).

Since 2010, three closed-loop water circuits have been installed at the Narni, Italy site. The 2015 year was dedicated to team-training and prevention.

The Group has not to date identified any local constraints with respect to water supply. Nevertheless, the factories are

taking measures to limit their use of municipal water and ground water, such as installing closed-loop water circuits in 20 factories and collecting rain water at Otradny.

Tarkett does not publish information concerning the quality of its water emissions (suspended solids or heavy metals), because these indicators are not significant for the Group's industrial activity. However, the factories monitor these items in connection with local regulations, the WCM program and the prevention of environmental risks (see Section 3.2.3.8, "Evaluation and tracking of sites' progress in environmental matters and in the prevention of environmental risks").

#### 3.2.3.2 Energy

##### Resource Stewardship: ENERGY

- Energy consumption per square meter of manufactured products has decreased since 2010: 4.21 kWh per square meter as compared with 4.34 in 2010 (-3% vs 2010 and -4% vs 2014)
- 67% of our plants have improved their energy efficiency, reducing their energy consumption per square meter of manufactured product.
- Total: 1,263 GigaWatt-hours (GWh), or a decrease of 6% as compared with 2014 and 6% as compared with 2010.

The wood floor production plants have made significant progress in recent years in improving their manufacturing processes and installing energy production systems using biomass, a renewable energy source. These factories use sawdust as a raw material for generating their own energy.

The wood and laminate floor production plants in Hanaskog, Sweden; Mytishi, Russia; Orzechowo, Poland; Kalush, Ukraine; and Backa Palanka, Serbia now use this renewable energy system.

Since 2012, the wood floor production plant in Orzechowo, Poland, has produced wood bricks, which are sent to a nearby power plant to be transformed into electricity. The sawdust produced during the manufacturing process is used to make the bricks. When a wood plank is sawed, sawdust is generated, as well as pieces of wood that are not used in the final product. Previously, the sawdust was sent to an outside recycling center.

The industrial site in Kalush, Ukraine, which produces both vinyl and wood flooring, has been recovering its wood dust since 2014. The dust is used in the boilers for the vinyl and wood floor production lines, which previously used gas.

The laminate flooring production site in Mytishchi, Russia, can reach temperatures of up to 45°C. The factory now recovers its wood shavings post-production to be used as fuel for the air conditioning system. These wood shavings may also be transformed into bricks to be sold to other businesses, resulting in a significant decrease in waste.

As another example, the Otradny production plant in Russia significantly reduced its energy consumption in kWh, by 22%

as compared with 2014. This decrease was achieved primarily by modernizing the boiler burners to improve efficiency, changing the distribution of the two lines over the coolers to improve electrical efficiency, and the introduction of a consumption oversight system.

In recent years, the production site of Backa Palanka in Serbia has invested in new equipment to increase the use of renewable energies in manufacturing, heating and cooling. For example, a wood-burning boiler was installed that uses shavings from the production of wood floors. The energy produced by the boiler is used in the manufacturing of vinyl. The site also invested in an absorption chiller that uses thermal energy to produce 2.4 MW of cooling power in its production of vinyl, thus avoiding the use of electricity in the spring and summer.

The Narni, Italy site installed a thermal insulation system in the linoleum-drying zone, which reduced the time needed for drying to two days per cycle and per oven. Burlap, used in manufacturing linoleum, is also used in the biomass boiler that heats the oven. The burlap is separated from the linoleum and recycled in the factory recycling center.

### 3.2.3.3 Greenhouse gas emissions

#### Resource Stewardship: Greenhouse Gas Emissions

- Greenhouse gas emissions per square meter of manufactured products: 1.02 kgCO<sub>2</sub>e, a decrease of 2% from 2014 and an increase of 1% from 2010.

- 73% of our plants have reduced their greenhouse gas emissions per square meter of manufactured product.

- Total: 305,944 metric tons equivalent of CO<sub>2</sub>, or a decrease of 4% as compared with 2014 and 3% as compared with 2010.

- Renewable energies: In 2015, 11.4% of energy consumption (in GWh) came from biomass, thus without any greenhouse gas emissions. Other renewable energies such as geothermal and solar are being developed, in particular for administrative buildings.

Since 2010, Tarkett has made progress in reducing its overall energy consumption while at the same time increasing the proportion of renewable sources in its energy mix, by using biomass and choosing green electricity suppliers, for example. Geothermal and solar energy are also being used for some administrative buildings, including the Narni, Italy linoleum site and Desso's carpet site in Dendermonde, Belgium.

Greenhouse gas emissions have remained essentially stable since 2010, despite improved energy efficiency (energy consumption per square meter of manufactured products of 4.21 kWh/m<sup>2</sup> in 2015 as compared with 4.34 kWh/m<sup>2</sup> in 2010). This is due in part to the increased share of manufacturing that has moved to countries where electricity production emits higher levels of greenhouse gases, such as the United States, Germany, Poland and China. Second, since 2010 production has significantly decreased at the Group's wood- and laminate-producing

factories, resulting in a decrease in the percentage of biomass (wood bricks and shavings) in the total energy mix.

Tarkett has put action plans in place at its production sites in order to reduce greenhouse gas emissions.

Since 2013, the Narni industrial site in Italy has improved its oven isolation systems in order to decrease its greenhouse gas emissions.

In December 2013, the Farnham site in Canada obtained authorization from the local authorities to process atmospheric emissions without using a regenerative thermal oxidizer. This has permitted a reduction in the use of natural gas and in greenhouse gas emissions beginning in 2015.

In addition, although the indicator that monitors greenhouse gas emissions does not currently take into account emissions relating to transportation (which are difficult to measure), Tarkett nevertheless strives continually to make improvements.

For example, in Northern Europe several years ago trucks were replaced with ferries for certain destinations, since ferries emit fewer greenhouse gases. Local purchasing and local supply chains, where possible, are favored, to avoid unnecessary transport and support the development of the local economy.

In North America, Tarkett optimized its logistics system for transporting finished products to reduce the distances travelled each day, thus reducing greenhouse gas emissions.

In Brazil, the Jacarei production site had been sourcing its mineral filler for the production of vinyl flooring from a distance of more than 700 kilometers. The plant switched to a supplier located 60 kilometers from the site, reducing the number of kilometers of transport and thus reducing its transport-related greenhouse gas emissions.

Tarkett has also undertaken to support initiatives to combat climate change (see Section 3.2.6).

### 3.2.3.4 Waste prevention, recycling and elimination

In connection with the World Class Manufacturing program, operational efficiency and cost-reduction action plans have been identified and implemented at the production sites. Their goal is to limit waste production and to optimize the use of raw materials. For example, Tarkett has put in place systems to recover waste, defective products and production scraps and reincorporate them into its manufacturing process.

The Clervaux site in Luxembourg owns a recycling center for both post-production waste and clean post-installation flooring, which is used to produce sub-layers for vinyl flooring lines produced at its production site, as well as for the Sedan, France and Kalush, Ukraine sites. Another portion of the waste will be transformed for use in the LVT product line.

The Dalton, Georgia Environmental Center recovers post-industrial scrap as well as post-use commercial carpet and

incorporates it into the production of ER3 backing. In addition, all of Tandus Centiva's manufacturing sites in North America have a robust program for recycling raw material packaging and household waste from offices and employee breakrooms.

Tarkett also uses waste from post-installation or post-use flooring as a raw material, as well as scraps from other industries (such as medication packaging in Brazil), as described in Section 3.2.5, "Reuse: recycling and re-use". Tarkett in North America recycles post-use resilient flooring from retail outlet, as well as soft surface flooring into new products.

### 3.2.3.5 Adaptation to Climate Change

In connection with its program to evaluate industrial and environmental risks, the Group has identified sites that may be subject to risks relating to climate change, such as floods and storms. Emergency plans have been put in place at those sites in order to anticipate and limit the potential impact of these risks.

In addition, Tarkett participates in climate-change adaptation and water management through its product offerings, with its line of synthetic grass used for sports fields and gardens. The use of synthetic grass reduces water consumption (estimated at 2 million liters of water per year to maintain a sports field made of natural grass), a major issue in arid zones.

### 3.2.3.6 Noise pollution and other forms of pollution specific to an activity

Noise pollution is monitored through environmental audits performed by an independent organization. Action plans are put in place depending on the results. For example, the Ronneby site in Sweden, which is located near a residential zone, has implemented a system to measure and analyze noise at critical points inside and outside the site. The results are shared with the local authorities.

In an audit for the prevention of environmental risks performed in 2010 by a third-party independent organization (see Section 3.2.3.8), the Orzechowo site in Poland recorded unsatisfactory results with respect to noise pollution. The site conducted a study, identified the origin of the problem, and replaced its filtering station for the department manufacturing the vinyl wear-layers. The level of noise pollution at 4 meters was reduced by more than 30%, from 89 dB to under 60 dB.

### 3.2.3.7 Air emissions and other types of local pollution

Tarkett does not publish specific information about the quality of its air emissions, dust emissions or any other type of pollution not already covered by the Group's indicators, because these items are not significant in its industrial activity. However, the factories monitor these items in connection with local regulations, the WCM program and the prevention of environmental risks (see below).

### 3.2.3.8 Evaluation and tracking of sites' progress in environmental matters and in the prevention of environmental risks

Since 2008, Tarkett has conducted an annual audit, performed by a third-party organization, at all of the Group's sites. The audits identify areas of progress and monitor corrective actions taken based on a number of environmental and health criteria including air emissions, energy consumption and climate change, water consumption, waste management, noise pollution and ground pollution. Tarkett's Executive Committee monitors the action plans. In five years, 80% of the issues identified were dealt with, including 100% of the priority subjects. In 2014, audits were also performed at Tandus Centiva's textile plant in the United States (which was acquired in late 2012) and at the Eiweiler site in Germany.

Tarkett regularly audits its production plants to monitor compliance with each pillar of the WCM program, one of which is the environment. It takes place over two days, in the presence of the central team and the site manager responsible for each pillar. In 2015, nine sites were audited: Ronneby (Sweden), Orzechowo (Poland), Clervaux (Luxembourg), Backa Palanka (Serbia), Sedan (France), Mytishchi (Russia), Otradny (Russia), Konz (Germany), and Kalush (Ukraine). The audit team then grades each site according to a strict scale. Depending on the number of points earned, the factories are labeled Bronze, Silver or Gold. In 2015, Ronneby joined Narni in reaching the Silver level, with Clervaux and Sedan obtaining the Bronze level.

The vinyl site in Sedan, France, is classified as subject to authorization by a Prefectoral Order dated July 2008, in particular for categories relating to the transformation and storage of plastics.

For example, the site is subject to authorization for the following categories:

- 2450-2-a rotogravure printing works;
- 2663-2-b storage of polymers (for its final products)
- 2662-2 storage of polymers (for its raw materials)

The Sedan site entrusted its regulatory monitoring to a specialized firm, which helped it identify changes in the regulations applicable to classified installations. In particular, the site provided all information to authorities concerning the new categories 3000 and 4000. The site has an Internal Operation Plan to be used in the event of major damage from fire or pollution, and an internal team of firefighters that is able to respond 24 hours a day, seven days a week. In that regard, a departmental exercise with firefighters was organized in November 2014 in order to train the Sedan workforce for any eventuality. The site's organization was recognized as meeting the highest standards. For example, the site is certified ISO 9001 (Quality), ISO 14001 (Environment), ISO 50001 (Energy) and OHSAS 18001 (Health and Safety), and received WCM Bronze level in September 2015.

Thanks to a policy of voluntary action, the site has considerably reduced its environmental impact since 2011. Since that year, industrial VOCs have been cut by two-thirds. Water consumption was cut in half between 2012 and 2014, and non-recyclable waste is more than 4.5 times lower. To

accomplish this, the site uses a structured method for analyzing and reducing environmental concerns.

Finally, in order to protect the surroundings from any accidental pollution, the site has put in place hydrocarbon separators on wastewater as well as a continuous pollution scanner on industrial wastewater.

The application for authorization to operate the Auchel site was filed with the Prefecture in January 2016 and was prepared by the Enviro'Conseil firm. The Auchel site's facilities are subject to a registration requirement. Version 27.01 (October 2015) of the nomenclature was used for this classification.

Thus, the site is subject to registration in category 2661. And 2661.2 – Transformation of Polymers.

The following categories are subject to a reporting requirement:

- 2662 – Storage of Polymers
- 2663.2 – Storage of tires and products of which at least 50% of the total unit mass is composed of polymers
- 4719 – Storage of Acetylene

Category 2910.A – Combustion, excluding facilities covered under categories 2770 and 2771 – was classified as subject to reporting with periodic verification.

As of December 31, 2015, the provision for environmental risks recorded in Tarkett's financial statements totaled €152,000, a 20% decrease from 2014.

### 3.2.3.9 ISO Certifications

Several years ago Tarkett put in place an ISO 9000 (Quality), ISO 14001 (Environment) and OHSAS 18001 (Health and Safety) certification program. As of year-end 2015, 91% of the Group's sites were ISO 9001 certified, 91% were ISO 14001 certified and 70% were OHSAS 18001 certified.

A new certification is now required in Europe for businesses with more than 250 employees: ISO 50001, for energy efficiency. In 2015, all of Tarkett's European sites subject to this requirement were ISO 50001 certified.

These certifications are audited by an external accredited body (SGS) for all of the Group's production sites. Tarkett and the certifying body conduct quarterly monitoring.

### 3.2.3.10 Use of floor space

Tarkett seeks to use already-existing space when it expands. In 2014, the Group expanded its business in various forms that optimized the use of floor space:

- The addition of production lines, such as in Otradny (Russia) and Florence (United States), using existing indoor space; and
- An increase in capacity through the purchase of already-existing industrial units, such as in Jaslo, Poland and Beijing, China.

### 3.2.4 "PEOPLE FRIENDLY SPACES": WELL-BEING AND QUALITY OF LIFE

- Non-phthalate products: 54% of vinyl flooring produced, as compared with 38% in 2014 and 0% in 2010 (excluding recycled content)

- Products with low VOC (volatile organic compound) emissions (<100 µgr/m<sup>3</sup> after 28 days): 92%, as compared with 90% in 2014 and 21% in 2010

According to research, people spend on average 90% of their time indoors, where air quality may be worse than outdoor air quality, due to poor ventilation as a result of improvements in the insulation of buildings. Therefore, it has become a key issue to improve indoor air quality for all users, and in particular for the growing population of asthma and allergy sufferers. Users are looking for a healthy, comfortable and pleasant environment.

Tarkett's eco-innovations respond to this health and wellbeing challenge by contributing to improved indoor air quality and indoor environment.

Since 2011, Tarkett has been a pioneer in developing flooring products with low or extremely low Total Volatile Organic Compounds (TVOC) emissions in nearly all of its product lines. Tarkett offers products with TVOC emissions of 10 to 100 times lower than the strictest standards in the world (TVOC emissions lower than 100 (low) to 10 (very low) µg/m<sup>3</sup> - at 28 days or fewer).

In connection with its commitment to sustainable development and continual progress, Tarkett is developing responsible PVC flooring applications by designing products with materials that respect human health and the environment, and making it possible to recycle quality vinyl at its end of use.

In 2009, Tarkett developed its first vinyl flooring line, iQ Natural, which has a bio-based plasticizer, is 100% recyclable and is composed of 16% renewable natural materials (castor oil).

In 2010, Tarkett used a new technology in Sweden and North America, a non-phthalate vinyl flooring plasticizer for both commercial and residential use. Phthalates are the subject of scientific debate about their potential negative impacts on human health, as potential endocrine disruptors and/or carcinogens. Tarkett sought alternatives and invested significantly in research and development to select non-phthalate plasticizers. It then adapted its floor manufacturing formulations and processes. The non-phthalate plasticizers that Tarkett selected are approved for use as plastics that come in contact with food and for use in toys that children may put in their mouths.

In 2013 and 2014, Tarkett put in place an ambitious program to deploy this technology at all of its vinyl flooring production plants (excluding recycled materials). Through this major eco-innovation and its broad deployment, Tarkett is reaffirming its leadership in sustainable development.

In 2014 and 2015, Tarkett progressively deployed this non-phthalate plasticizer technology (excluding recycled

materials) in all of its production plants in Europe. In North America, the use of non-phthalate technology also continued to expand, in particular at the carpet sides for production of vinyl sub-layers, as well as at the LVT site in Florence.

Its deployment in the remaining regions of the world is in progress, in particular at the vinyl sites in Serbia, Brazil, and China, depending on the quantity and quality of local technologies available (in particular in Russia).

In addition, Tarkett seeks to develop products that contribute to solving health problems, in particular for asthma and allergy sufferers. In 2013, the Asthma and Allergy Foundation of America (AAFA) awarded asthma and allergy friendly™ certification to several vinyl floors for hotels, stores (I.D. Inspiration™), hospitals (the vinyl floor iQ™) and for indoor sports (Omnisports 6.5mm and 8.3mm). FiberFloor® received the same certification in 2012. In 2015, the vinyl product Starfloor Click was recommended by the Swedish Asthma and Allergies Association -- the first time that a flooring solution had been included on its list.

The DESSO AirMaster® carpet tile collection also contributes to improving indoor air quality with its patented technology that captures four times more fine dust than standard carpet solutions, and up to eight times more than smooth flooring solutions. In 2015, this product became the first in the world to receive Gold Plus certification from the German testing institute GUI.

Tarkett also seeks to design complete and modular solutions that take into account installation, removal, maintenance and cleaning. Examples include the modular, loose-lay or locking Luxury Vinyl Tile line that avoids the use of adhesive; the Quick-Fix system carpet tiles (made in partnership with Velcro®) and Tandus Tape+ that make it possible to install and re-install the carpet easily without damaging the flooring, thus facilitating easier recycling; and the "dry-buffing" system for vinyl floors, which reduces the use of water and detergents. For example, dry buffing of the iQ Natural vinyl floor use 18% less water, 2.3 times less detergent and 20% less electricity. On the basis of a 20-year life cycle, it is estimated that this floor can reduce impact on resources and climate change by close to 40%.

### 3.2.5 "REUSE": RECYCLING AND RE-USE

- Industrial waste going to landfill, including hazardous waste: 125 g/m<sup>2</sup>
- 58% of plants have reduced the amount of industrial waste going to landfill (in g/m<sup>2</sup>)
- Recycled materials that reduce the use of virgin resources: 4.9% in 2015 (as compared with 3.6% in 2011) of volumes of materials purchased, for a total of 55,000 metric tons (an increase of 47% from 2010)
- Collection of flooring: 9,900 metric tons of installation scraps and used products recovered

At this stage, the challenge is to transform waste and products at end of use into resources and new, high-quality products. Tarkett no longer thinks in terms of a product's end of life but of its end of use, after which it is collected and then reincorporated into a new production cycle or a new biological cycle. (See diagram of the circular economy in Section 3.2, "Environmental Information").

For example, we have installed systems to recover production scraps and waste to be reincorporated into our manufacturing process. (See Section 3.2.3, "Resource Stewardship: Optimized Resource Management During the Production Phase").

At Tarkett's production sites, the discharge of non-recycled industrial waste increased significantly in 2015 (125 g/m<sup>2</sup> of manufactured product as compared with 64 g/m<sup>2</sup> in 2014), essentially due to the complex start-up of the vinyl tile (VCT) line in Florence, Alabama following its transfer from Houston, Texas. Excluding the Florence site, the indicator remained basically stable in 2015 (+3% from 2014), but it has significantly improved since 2010 (-10% excluding Florence).

Recovery programs such as ReStart in North America and in Europe have also been developed to collect and recycle leftover material from installation (post-installation flooring) as well as used flooring (post-consumer flooring), through our eight internal recycling centers and through partnerships with collection networks.

In connection with our circular economy and closed-loop design approach, our new products are eco-designed with "good materials" that can also be recycled at end of use. Certain vinyl products are designed to contain up to 60% recycled materials while maintaining the same level of quality and performance. For example, certain products in our iD Freedom line contain up to 53% recycled material, and others such as linoleum, wood, and certain carpet sub-layers are 100% recyclable.

In North America, Tarkett promotes circular economy and encourages its customers to collect and recycle flooring by giving the "ReStart" award to the customers that recycle the largest quantities of used flooring.

In connection with the ReStart program, Tarkett works closely with its customers to gather and sort clean carpet waste after installation on site, as well as used flooring in North America. The goal is to broaden its network of local partners in order to use these resources at Tarkett's eight

recycling centers throughout the world, including the European recycling site in Luxembourg at the Clervaux production plant. Any collected flooring materials that do not comply strictly with Tarkett's specifications for "quality materials" are transformed and put to use in other industries. Tarkett is a major player in this sector, implemented in France by the SFEC (Syndicat Français des Enducteurs Calandriers, the French Union of Coating and Calendaring Companies).

Desso also collects and recycles carpets post-use through its "ReStart program (formerly called Take Back™) to integrate recycled materials into new carpet products, or used in other recycling initiatives. Carpets are recycled using Desso's innovative separation technique called Refinity®, which separates the yarn and other fibres from the backing. Desso's Refinity® program is co-financed by the LIFE+ program and the European Union.

In Narni, Italy, certain waste from linoleum production is used to make packaging stoppers for rolls of flooring. The waste is processed in the internal recycling center, transformed into powder and sent to an external company.

Tarkett has launched various initiatives with its partners and customers that contribute to the development of the circular economy:

- In North America, Tarkett was a pioneer in the recycling of post-use flooring. Tandus Centiva began recycling postconsumer vinyl-backed carpet more than 20 years ago, in 1994 with more than 127,000 metric tons recycled between 1994 and 2015. As early as 2009, Tarkett had put in place a recycling program with a large retail chain, collecting used flooring to produce new VCT (Vinyl Composition Tiles) and sending them to stores to be reinstalled. In 2015 Tarkett deployed this program with its customer Academy. This program is a model of sustainable development for the circular economy, reducing the use of virgin resources, energy consumption, greenhouse gas emissions and waste.

- In the United States, the Chattanooga, Tennessee, airport decided to renovate the flooring in its terminal. Through the ReStart program, the Powerbond® hybrid resilient carpet installed more than 20 years ago was removed, sent to a Tandus Centiva recycling center used to make new ER3® Modular carpet tile and reinstalled at the airport.

- In the United States, Tandus Centiva uses recycled materials from the automotive industry as the basis of its soft surface ethos® backings. Polyvinyl butyral, or PVB, is the film layer found in windshields and safety glass. When the glass is recovered for recycling, the film waste is collected, pelletized and extruded as new backing for Tandus Centiva products. This recovery reduces the natural resources and embodied energy associated with virgin raw materials, it is lighter in weight which reduces transportation cost and fuel, and it provides significant performance advantages including high subfloor moisture tolerance.

- At Clairefontaine near Paris, France, the National Technical Center of Football decided to use the FieldTurf replacement program for its training fields, reusing or recycling the materials of the synthetic grass. In 2014, Tarkett replaced

three fields in this way. FieldTurf also offers the TotalCare program, which integrates consultation, recycling, maintenance and, in certain cases, financing (in North America). The goal is to reuse or recycle as much as possible of the material used in synthetic turf: the backing turf and the sand and rubber filling. This process is not only beneficial for the environment, reducing water and pesticide use, but also offers long-term financial advantages.

- In Europe, Tarkett launched a personalized program for the collection and recycling of post-installation flooring (clean scraps), ReStart (formerly called ReUse). These materials are sent to recycling centers in Clervaux (Luxembourg) and Ronneby (Sweden) to be transformed into granules that are then reincorporated into the manufacture of new vinyl flooring.

- In Brazil, Tarkett uses recycled materials from other industries to produce PVC floor tiles and planks. Tarkett recovers aggregates of medication packaging (blisters) and transforms it into granules used in the manufacture of modular vinyl products (LVT and VCT). The recovery of recycled material not far from the production site not only enables the factory to reduce energy consumption but also makes our products more competitive against low-price Asian products and contributes to the development of the local economy.

### **3.2.6 TRAINING AND INFORMATIONAL INITIATIVES FOR EMPLOYEES, CUSTOMERS AND OTHER STAKEHOLDERS WITH REGARD TO ENVIRONMENTAL PROTECTION**

Tarkett uses WCM training modules to educate and train operators to adopt good safety and environmental practices, such as handling of chemical products, prevention and management of spills, waste sorting, energy reduction, environmental impact, etc.

Tarkett also seeks to educate and involve its employees and customers in the challenges of sustainable development.

In 2015, Tarkett's Swedish marketing teams received online training to increase their knowledge and confidence on questions of sustainable development.

Tarkett has also trained 64 people in Cradle to Cradle and Life Cycle Assessment practices since 2010.

The Group maintains various communication tools, such as videos, activity and sustainability reports, customer brochures adapted to each country, general presentations, and websites, in order to share and explain its sustainable development strategy, including its performance indicators, as well as its 2020 objectives for certain environmental indicators and certain local labels and standards.

Meetings and seminars are also organized with customers and internally, in particular with the sales forces. In the United States, Tarkett held two events; one in New York City and another in San Francisco. More than thirty architects, designers and end-users participated in the sustainability summit. Experts were invited to share their vision and commitment to sustainable development. Additionally, 3 days of training were put together for Tarkett's distributor network to help distributors understand Tarkett's

sustainability strategy and the market drivers such as Cradle to Cradle®, transparency tools, circular economy.

At the C2C Products Symposium and Innovation Celebration in the United States, held in New York in November 2015, Tarkett presented its experience in the circular economy using C2C principles and participated in a round table on the responsible use of PVC in sustainable applications, along with Michael Braungart, EPEA and co-founder of C2C, and other experts from building and construction organizations, such as Healthy Building Network and StopWaste.

Tarkett announced in 2015 that it would join the World Economic Forum (WEF) in 2016 as an Industry Partner, participating in the annual meeting, in Davos, Switzerland, in January 2016, as well as other regional events throughout 2016. Tarkett contributed to the discussion at the World Economic Forum through a double partnership: the company participated in the "Global Challenge" on "Environment and Resource Security" and is also an Industry Partner in the area of "Infrastructure and Urban Development". The Group is also participating in the Project Mainstream, which aims to accelerate the development of the circular economy (initiated by the WEF and the Ellen MacArthur Foundation). Prior to Tarkett becoming a member of WEF, its subsidiary Desso contributed to Project Mainstream since 2014 and participated in various forums organized by the WEF at the global and regional levels (Davos, China, Latin America, Middle East and North Africa).

In 2015, Tarkett participated in debates about industrial and global challenges.

In October 2015, Michel Giannuzzi, the Chairman of Tarkett's Management Board, participated in the ICCM4 of the United Nations in Geneva, where he presented his vision of sustainable development and the importance of using quality materials to chemical industry leaders. Mr. Giannuzzi also shared Tarkett's experience at the C2C Congress in Germany. Anne-Christine Ayed, Tarkett's Vice President in charge of Research, Innovation and Environment, joined French governmental representatives in Berlin at the first G7 meeting dedicated to the efficient use of resources. At the meeting, she shared Tarkett's experience in moving from a linear economic model towards a circular one. While governments have the regulatory tools needed to impose change, Tarkett has showed that businesses are often in favor of change, proposing new solutions to preserve resources and build sustainable growth.

Tarkett also shared its experience at the stakeholders' conference organized in 2015 by the European Commission in connection with the launch of its public consultation to solicit input on its Circular Economy Package, as well as at the conference on its financing organized jointly by the Luxembourg Presidency, the European Investment Bank, and the European Commission.

At COP 21 (the Conference of the Parties of the United Nations on climate change) in France, in connection with an initiative organized by the WEF, Tarkett undertook alongside 77 multinationals to take concrete actions to combat

climate change and reduce environmental impact and our carbon footprint. In connection with this worldwide coalition of businesses, Tarkett also joined the Paris Pledge, in which "businesses, cities, civil society groups, investors, regions, trade unions and other signatories promise to ensure that the ambition set out by the Paris Agreement is met or exceeded to limit global temperature rise to less than two degrees Celsius."

In Australia, Tarkett (through Desso) joined the "Sustainable Business Australia" network on the circular economy, under the aegis of the World Business Council Sustainable Development (WBCSD).

#### Recognition, Prizes, Awards and Certifications

Tarkett has obtained certifications or awards for several product lines, thus illustrating its commitment to offering products that improve human wellbeing and contribute to a healthier indoor environment. For example:

- The Asthma and Allergy Foundation of America (AAFA) awarded asthma and allergy friendly™ certification to several vinyl floors for hotels, stores (I.D. Inspiration™), hospitals (the vinyl floor iQ™) and for indoor sports (Omnisports 6.5mm and 8.3mm), and for residential use (FiberFloor®)
- All of the heterogeneous products manufactured in Serbia have received the eco-label "Vitality Leaf," certifying the use of materials that respect health and the environment as well as management of resources (2013)
- For its Beynon athletic tracks, Tarkett received "US Greenguard Gold" certification (for PolyTurf®, PolyTurf Plus®, PolyTurf Pad & Pour®, and BSS 1000®), following rigorous testing of ingredients and TVOC emissions. (2013)

Tarkett has been recognized twice for its eco-innovation strategy:

- Prize for responsible innovation at the 6th "Trophées du Management de l'Innovation" awards in France. (2013)
- Special Jury Prize at the 7th "Best Innovator 2013" awards in France

The characteristics of certain products also enable the Group's customers to obtain very strict and rigorous building certifications, such as USGBC LEED.

In Russia in 2015, Tarkett was the only vinyl-flooring manufacturer to be approved and included in the Green Book. The Green Book lists quality materials (for both structural work and finishing work) recommended by the Russian government for construction projects. The Green Book is maintained in Russia by the Ministry of the Environment and Natural Resources, the Ministry of Construction and Residential Services, and the EcoStandard group.

Tarkett also received a prize in 2015 for its linoleum production plant in Narni, Italy, recognizing the site's sustainable development strategy and good practices.

In Australia, Tarkett also obtained "Best Practice PVC" certification for its homogeneous vinyl products, in

accordance with the directives of the GBCA (Green Building Council Australia).

Anne-Christine Ayed, Tarkett's Executive Vice President in charge of Research, Innovation and Environment, won the "Woman of Sustainable Development 2014" prize at the Women in Industry Awards organized by the French magazine *Usine Nouvelle* (New Factory) for the third consecutive year. This prize not only recognizes Ms. Ayed's commitment and ability to transform Tarkett, but also demonstrates the Group's proactive sustainable development strategy. This trophy honors concrete initiatives: eco-design, the use of non-phthalate plasticizers in vinyl flooring, and the reduction of TVOC emissions to levels of 10 to 100 times less than the strictest regulations for resilient flooring.

### 3.3 INFORMATION ON COMPANY DEVELOPMENT COMMITMENTS TO SUSTAINABLE

#### 3.3.1 TERRITORIAL, ECONOMIC AND SOCIAL IMPACT OF THE COMPANY'S BUSINESS

##### 3.3.1.1 Employment, regional development and integration of local communities

The flooring industry is closely linked to local characteristics and constraints in order to:

- adapt product design to local tastes;
- regularly visit our customers;
- deliver voluminous and heavy products rapidly, to their installation sites or distributors.

For these reasons, manufacturing and sales activities are located as closely as possible to our customers, which contributes to the development of the local economic fabric. In rare cases, Tarkett serves markets from a more distant industrial base.

For example, in 2014 Tarkett developed its LVT production capacities in Brazil, whereas that product line had previously been manufactured in Europe. Similarly, Tarkett acquired in 2014 (and developed in 2015) a site and a production plant for the manufacture of commercial vinyl flooring in Beijing, China in order to better serve its local customers and reduce delivery time. This site complements Tarkett's industrial presence in China with a carpet plant (formerly Tandus) serving the local market.

In addition, certain Tarkett sites open their doors to students or to employees' families for open houses or for the site's anniversary. In 2013, the factory in Clervaux, Luxembourg welcomed its neighbors and the families of its employees (about 900 people) on the occasion of its twentieth anniversary. In September 2014, the Tarkett International Center for Research and Innovation in Wiltz, Luxembourg also welcomed 170 people to celebrate its tenth anniversary. Employees' families and the mayor of the city were invited to visit the center.

In 2015, Tarkett received the "Business in Transition" prize at the *Trophées de l'Economie Circulaire* in France. The Group was also selected in December 2015 as a finalist for the Multinational Circular Economy Prize, the "2016 Circularity," organized in connection with the Worldwide Economic Forum in Davos, in cooperation with Accenture. Tarkett's subsidiary, Desso, had also been a finalist for the 2015 Circularity.

In 2015, the Cranfield School of Management (ranked among the top five university programs in the United Kingdom) published a case study on Desso's Cradle to Cradle strategy.

##### 3.3.1.2 Commitment and aid to local communities

Tarkett employees in many countries are engaged in their local communities, through product and financial donations and also through volunteer work, offering a portion of their time and offering their expertise.

Beginning in 2014 and continuing in 2015, Tarkett in North America has supported the "SeriousFun Children's Network," which provides free summer camp and leisure and personal development programs to seriously ill children. SeriousFun Children's Network runs 30 programs and camps throughout the world. For their first collaboration, Tarkett is helping the North Star Reach center in Pinckney, Michigan (United States), for which construction began in July 2014, by equipping the premises with residential and commercial flooring. The center welcomed its first visitors during the last quarter of 2015. In addition to flooring, Tarkett North America donated \$25,000 to finance stays at the center for at least 10 children.

Since 2009, at the annual sales meeting, the U.S. and Canadian Tandus Centiva teams have devoted one day to a Community Service Day for the local community. Each year Tandus Centiva partners with non-profit organizations to repaint, install flooring, or install playground equipment in various locations. In total, more than 200 employees of Tandus Centiva North America participated in the Community Service Days as volunteers.

In 2015, the Beynon teams in North America participated in a race sponsored by Susan G. Komen Race for the Cure, a breast cancer organization. Fifteen participants were able to raise \$1,735.

Through Desso, Tarkett also worked alongside several Dutch companies, through the "Holland Water Goes Africa" foundation, to finance a well drill for the Gambian population, thus offering access to water for farming and animal agriculture.

Tarkett, through its subsidiary Desso, joined one of the initiatives of the REDD+ Business Program (Reducing

Emissions from Deforestation and Forest Degradation) organized by the United Nations. Desso is supporting a project in the Madre de Dios region in Peru, addressing deforestation, supporting biodiversity, and aiding the local economy,

At the end of 2015, Tarkett announced that in 2016 it would introduce the program Tarkett Cares, to formalize and promote employee involvement in initiatives to provide aid and support to local communities. Depending on the decision of each Division or Country, it will be possible for each employee to volunteer up to two days per year out of their work time for a charity initiative and thus to share their time and expertise. A guide to the principles and rules of this program will be distributed in 2016 to the Human Resources network to be deployed progressively in each Tarkett entity.

### **3.3.2 RELATIONS WITH PEOPLE AND ORGANIZATIONS AFFECTED BY THE COMPANY'S ACTIVITY, INCLUDING NON-PROFIT BACK-TO-WORK ORGANIZATIONS, EDUCATIONAL INSTITUTIONS, ENVIRONMENTAL DEFENSE ORGANIZATIONS, CONSUMER ORGANIZATIONS AND LOCAL POPULATIONS**

#### **3.3.2.1 Customer dialogue and transparency**

Tarkett has developed expertise in the health sector, working in close collaboration with health institutions such as hospitals, retirement homes and nursing homes. The Group has carried out in-depth studies on the problem of the aging population and on Alzheimer's Disease. Through its knowledge of the market and of the needs of caregivers, institutional directors, and patients and residents of healthcare institutions, in 2014 Tarkett was the first to launch an intelligent, connected floor linked to an alarm and monitoring system, called FloorInMotion, which detects falls and monitors unusual behaviors in senior citizens or residents of healthcare facilities.

Every other year, Tarkett carries out a customer satisfaction survey worldwide (alternating with an internal survey distributed to all of its employees). In 2015, 6,259 customers participated in the survey, which covered 18 countries in Europe, North America and Latin America, CIS, Asia, and Australia. The survey helps evaluate product and customer service satisfaction in several areas, including customer service, product quality, advice, and delivery times. In 2015, 97% of customers who responded expressed a positive opinion as to their level of satisfaction (good, very good, or excellent). The results of the survey are analyzed in detail by each entity in order to put action plans in place to improve the level of service and offer a better customer experience.

In 2015, Tarkett's subsidiary Desso carried out a materiality survey in connection with the Global Reporting Initiative (GRI) with various parties to identify the most relevant subjects in sustainable development. The significant themes were customer health and safety, environmental impact of the products, and design for recycling. The survey thus confirmed the relevance and the priorities of the sustainable development strategy led by Desso and Tarkett, applying the Cradle to Cradle® principles, selecting materials that respect the environment and human health, and developing circular economy initiatives.

In accordance with its values of respect and transparency, Tarkett seeks to provide the necessary information to its customers to enable them to make their selection.

For this reason, since 2011 Tarkett has implemented an environmental tag system, the Tarkett Sustainability Tag, which provides the following information for each product: the percentage of recycled materials, the product's recyclability, non-phthalate technology and total VOC emissions (in µg/m<sup>3</sup> at 28 days or fewer).

In North America, in 2013 Tarkett developed a new tool for transparency on the composition of its products: the Environmental & Health Statement (EHS). The tool complements the Environmental Product Declaration (EPD), integrating the health risk associated with the product. These documents present a set of characteristics to provide assurance that the products are respectful of the environment. The deployment began in North America with linoleum and rubber products. In 2014, Tarkett extended this tool to carpet products (ethos®), and in 2015 to homogeneous vinyl products and rubber accessories.

Tarkett regularly conducts focus groups bringing together customers, architects and designers to discuss their needs and to show them product prototypes and hear their reactions. This collaborative work enables the marketing and design teams to adapt products to local needs.

#### **3.3.2.2 Collaborations and Sponsorship**

The Group has numerous arrangements with private and public laboratories, universities and professional schools.

For example, Tarkett signed a long-term (six-year) collaboration with a team of students and professors from the ENSAD (Ecole Nationale Supérieure des Arts Décoratifs) in Paris, France, to imagine the floors of tomorrow, through a process of "Design Thinking".

In the environmental sector, Tarkett works in collaboration with the EPEA, a German scientific institute, to implement Cradle to Cradle® practices (see Section 3.2.1, General Environmental Policy). Tarkett also collaborates with the scientific laboratory Centre Henri Tudor in Luxembourg on product life-cycle assessment (LCA), to evaluate the impact of products on health and the environment throughout their life cycle and use.

In addition, Tarkett is a member of professional associations such as the SFEF "Syndicat Français des Enducteurs, Calandriers et Fabricants de Revêtements de Sol et Mur" (French Union of Coating and Calendaring Companies and Manufacturers of Flooring and Wall Coverings) and ERFMI (European Resilient Flooring Manufacturers' Institute).

A major player in the healthcare sector, Tarkett collaborates with various organizations to promote the comfort, healing and wellbeing of people staying in healthcare establishments.

In France, Tarkett has been a member of "Clubster Santé" (Health Cluster) since 2012, a cluster of healthcare professionals in the region of Nord Pas de Calais. Tarkett actively participates in Concept Room projects, providing flooring for projects such as a "bedroom of the future" and an outpatient surgery department.

In North America, Tarkett has undertaken to create innovative flooring solutions to provide an important part of the patient's healing and care environment. To do so, in 2014 Tarkett entered into a collaboration with Planetree, a non-profit organization that works to promote the needs of individuals undergoing medical treatment.

Tarkett is also committed to developing skills and transmitting know-how to its partners and to future flooring experts. In 2014, Tarkett signed a collaboration with WorldSkills France, an organization that promotes careers for young people by organizing the "Olympiades des Métiers" (Career Olympiad), to incorporate the career of floor-laying into the competition. Through this collaboration, Tarkett works to support the young French people selected for the career of floor-laying at the regional and national level, by providing them with the necessary materials for their competition, and also by helping them prepare to the best of their ability for the national competition, in particular by taking courses at Tarkett Academy in France.

In the artistic and cultural arena, Tarkett supports certain artists, such as Franck Loret, a French artist who creates sculpture, until 2015, and other artwork from vinyl floors. Tarkett supported Mr. Loret by housing his workshop at the Tarkett Studio of Paris (Aubervilliers), by providing him with flooring and by transmitting its know-how as a floor-layer.

In 2014, through its subsidiary Tandus Centiva in North America, Tarkett began supporting the Publicolor Summer Design Studio project in the United States in collaboration with designer Suzanne Tick and Antron® Carpet Fiber. The Publicolor Summer Design Studio is a design-related training and activity summer program for underprivileged young people. Students participate in a variety of activities, including product production. In addition, Tarkett contributes a portion of its proceeds on sales of a flooring line co-created with Suzanne Tick and Antron® Carpet Fiber. In 2015, the partnership raised USD 289,000 for the Publicolor Summer Design Studio.

### 3.3.3 SUBCONTRACTING AND SUPPLIERS

Tarkett requires its main suppliers to comply with the principles of the UN Global Compact by including a specific clause on those subjects in its contracts. The principles of the Global Compact cover topics including respect for human rights, working conditions, environmental protection, the fight against child labor and forced labor, non-discrimination, the rights of free association and collective bargaining.

In 2015, suppliers representing 72% of the Group's raw materials purchases signed the clause.

Moreover, each supplier is evaluated for compliance with CSR criteria: environment, safety, and training policy. Thus, the choice of a supplier is not based solely on quality and cost, but also on whether the supplier works in a manner that is respectful of people and of the environment.

In 2015, Desso began working with Sedex, a platform for the evaluation and management of ethical practices throughout the supply chain. A pilot program was launched to evaluate Desso's more than 3,500 suppliers by reference to the the United Nations Global Compact.

Tarkett is especially involved in working with its suppliers in the wood-flooring sector to make progress on workplace safety, by purchasing protective equipment and investing in safer, more modern machines.

With respect to subcontracting, the Group uses very few subcontractors, as the large majority of finished products are manufactured in the Group's factories. Certain subcontractors are managed directly by the Group. Most of these are in modular vinyl production; they represent an insignificant percentage of the Group's purchases of raw materials. The agreements with the principal subcontractor used in that product category contains a clause requiring compliance with the 10 principles of the UN Global Compact.

## 3.4 GOVERNANCE

### Governance and Ethics:

- Adherence to the United Nations Global Compact, Advanced Level.
- The Group's five core values: positive customer attitude, entrepreneurial and team spirit, empowerment and accountability, respect and integrity, commitment to the environment
- Sharing and respecting the Group's values: 63% of employees who responded to the 2014 internal survey agreed that "Tarkett's values give clear guidance" and that "managers conduct themselves in accordance with Tarkett's values"
  - Code of Ethics training online (in 17 languages): 73% of targeted employees took this online training. The e-learning module is supplemented by group training for factory employees without computer access
  - Anti-corruption practices: 91% of targeted employees took this monitored online training
  - Trade practices and compliance with competition rules: 89% of targeted employees took this online training module
  - Suppliers adhering to the UN Global Compact principles: 72% of direct purchases (in value), +13 points in 2014
  - Internal audit: 92% of activities audited (in four years)

### 3.4.1 PROMOTING PROFITABLE, SUSTAINABLE AND RESPONSIBLE GROWTH

In connection with its corporate governance, Tarkett created and deployed a Code of Ethics, as well as fair competition practices and anti-corruption compliance policies, through the use of e-learning or in-person training.

The Group also uses an internal control software package called TRACE - Tarkett Risks & Control Evaluation, which sets the common standards and references to be applied by the Group's various entities and used by the Audit and Internal Control Department in its work. Between 2012 and 2015, 92% of the value of operational assets were the subject of an internal audit (see the indicators on the sustainable development dashboard in Section 3.5.).

Governance practices cover the information presented in the report of the Chairman of the Supervisory Board on the composition of the Supervisory Board, the application of the principle of balanced representation of women and men on the Supervisory Board, and the conditions under which the Supervisory Board's work is prepared and organized, as well as the internal control and risk management procedures put in place by the Company. The report also includes provisions applicable to the determination of the compensation and benefits of any nature granted to the company officers. The Company's governance practices are described in Chapter 2.

Tarkett demonstrates its commitment by implementing and monitoring the good practices defined by the UN Global Compact, adhering to the AFEP/MEDEF Code, by the Grenelle Principles of Corporate Social Responsibility, and by the principles established by the Mouvement des Entreprises de France (MEDEF) for the presentation of its public CSR reports.

### 3.4.2 THE UNITED NATIONS GLOBAL COMPACT

Tarkett has adhered to the UN Global Compact and its ten principles since 2010.

#### Human rights

1. Businesses should support and respect the protection of internationally proclaimed human rights; and
2. Make sure that they are not complicit in human rights abuses.

#### Labor

3. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
4. The elimination of all forms of forced and compulsory labor;
5. The effective abolition of child labor; and
6. The elimination of discrimination in respect of employment and occupation.

#### Environment

7. Businesses should support a precautionary approach to environmental challenges;
8. Undertake initiatives to promote greater environmental responsibility; and
9. Encourage the development and diffusion of environmentally friendly technologies.

#### Anti-corruption

10. Businesses should work against corruption in all its forms, including extortion and bribery.

This commitment requires adopting strong policies and setting up robust procedures and processes in the areas of human rights, working conditions, the environment and the fight against corruption. In adhering to the UN Global Compact, Tarkett undertakes, in particular, to respect

freedom of association and the right to collective bargaining, to eliminate employment and professional discrimination, to eliminate forced and compulsory work, and to abolish child labor. Each year, Tarkett communicates its commitments and actions at an "advanced" level, in particular through the Activity Report.

According to Michel Giannuzzi, CEO of Tarkett: "*Tarkett is building its commitment to sustainable and responsible development by incorporating into its strategy and its operations not only the three dimensions, "People, Planet and Profit," but also "Purpose," in order to contribute to society challenges including urbanization, the aging of the population and resource scarcity. At the heart of this "4P" approach, we motivate our teams to build long lasting relationships and gain the confidence of our customers, our suppliers, our investors and local communities so that together we can build a better world, for today and for tomorrow.*

*In accordance with the Tarkett Code of Ethics, we are also committed to respecting and promoting fundamental social rights, the ten principles of the UN Global Compact, and the principles of the Declaration of Human Rights to our various stakeholders."*

### **3.4.3 THE GRENELLE PRINCIPLES OF CORPORATE SOCIAL RESPONSIBILITY**

These principles, which are mandatory for public companies in France, measure businesses' social and environmental responsibility. The Grenelle law requires companies to publish a report each year on forty-two themes, divided into three general categories:

1. Labor information, including employment, work organization, working relationships, health and safety, education and training, equality of treatment and respect for the conventions of the International Labor Organization.

2. Environmental information, including the company's general policy, anti-pollution and waste-management measures, sustainable resource use, climate change, and the protection of biodiversity.

3. Sustainable development, including the impact of the company's business on the communities in which it operates, its economic and social commitments, its relationships with its partners and third parties such as suppliers and subcontractors, and compliance with its own principles.

These principles are included in the recommendations of the Mouvement des Entreprises de France (MEDEF) with respect to the social and environmental responsibility information that companies must regularly provide to all stakeholders, including the Company in general.

The Group's Code of Ethics and anti-corruption practices are also described in Sections 3.1.17, "Code of Ethics, Respect and Equality of Treatment" and 3.4, "Governance".

### **3.4.4 TARKETT, MEMBER OF THE KKR GREEN PORTFOLIO**

Tarkett has been a member of the KKR Green Portfolio since 2010. This program, designed by KKR in collaboration with the Environmental Defense Fund, promotes the sharing and application of good practices for sustainable and responsible development.

In connection with this program, each year Tarkett publishes its progress in terms of water consumption, greenhouse gas emissions and waste generation. This information is available on the KKR website: <http://green.kkr.com/results/tarkett>

## 3.5 SOCIAL AND ENVIRONMENTAL REPORT: SUSTAINABLE DEVELOPMENT DASHBOARD

### Social indicators

Indicator	2014/2015 Evolution	2015	2014	2013	2012	2011	2010
<b>Safety, Respect, and Integrity</b>							
Frequency of accidents	Lost time accident frequency rate	+1%	2.32	2.30	2.52	3.40	4.30

## 3.6 SOCIAL AND ENVIRONMENTAL REPORT: METHODOLOGY

The Tarkett Group's sustainable development dashboard is an essential tool for monitoring and guiding performance. Its principal objective is to provide the Group with relevant indicators to evaluate the deployment of its strategy and fulfill its regulatory obligations. The reference year against which change is measured is 2010.

Tarkett is subject to the French law known as "Grenelle 2," and in accordance with that law, its corporate, environmental and social information has been verified by an independent third-party organization. (The report on corporate, environmental and social information by one of the statutory auditors, appointed as an independent third-party organization, is attached as an annex.)

### Indicator Reference

Our sustainable development dashboard was constructed based on the three following frameworks:

- The Group's sustainable development strategy: each strategic initiative relies on one or more quantified indicators, certain of which are the subject of long-term objectives.
- The Grenelle 2 law: the corporate and environmental information required by Article L.225-102-1 of the French Commercial Code is included in the form of indicators or quantified statistics in the dashboard (the qualitative information is presented in other sections of the management report).
- The UN Global Compact: in connection with the Group's voluntary commitment, the dashboard is a tool for managing performance in every dimension of the Global Compact.

The dashboard is built around three dimensions: social responsibility, environmental responsibility, and corporate governance.

### Methodological Procedures

Each of the indicators was defined in a separate file for collection and/or consolidation. The reporting procedure is summarized in a single file that consolidates the separate files and reports the synthesis in a single dashboard.

This procedure also appoints the individuals responsible for each indicator, as well as the scope, definitions, units, sources and consistency checks. The reporting period for published information is the same as the one for financial reporting (January 1, 2015 through December 31, 2015). The source of data and the frequency of monitoring vary depending on the indicator:

- Indicators on water, energy, waste, safety and absenteeism: collected and monitored monthly at Group level by the World Class Manufacturing organization, through a dedicated scorecard for each manufacturing site.
- Indicators on social statistics: collected annually under the responsibility of the local Human Resources

departments on a special form and consolidated at the Group level.

- Indicators on materials ("Good materials"): put together annually under the responsibility of the Research and Innovation Group (R&I), on the basis of purchasing data and classification of materials.
- Indicators on products ("People-friendly spaces"): put together annually under the responsibility of the R&I Group, on the basis of volume data by site and of the production mix of the various product types.
  - Indicators on employee satisfaction: measured every two years through the internal employee satisfaction survey
  - Other indicators (Tarkett Academy, financial indicators, external recycling, audit, suppliers): collected annually, with each indicator having a single responsible party and a dedicated collection format.

The reference year is 2010 for the majority of the progress indicators. For certain progress indicators and for most of the labor statistics, the reference year is 2011. Certain new indicators may also have a later reference year (see dashboard in Section 3.5 for detail).

### Scope of reporting and methods of consolidation

The scope of reporting is Group-wide, covering all activities of which the Group has operational control, except for Renner and Ambiente, which are recent acquisitions, and Cuzorn, where production ceased in the fourth quarter of 2014. In all, these sites represent less than 0.3% of the Group's total headcount.

In addition, the Eiweiler site (a 50/50 joint venture) is:

- 100% consolidated with respect to safety and absenteeism indicators, but excluded for other social indicators;
- included pursuant to the rule explained below with respect to environmental indicators.

However, the scope may vary by indicator as a function of the relevance of the subjects and the maturity of the entities:

- Safety indicator: all industrial sites within the scope of reporting
- Absenteeism indicator: all of the industrial sites within the scope of reporting, with the exception of Beijing, where WCM methods are in the process of being deployed. The Group's plans to extend monitoring of the safety and absenteeism indicators is currently limited by the constraints of the information systems in about one third of the locations.
- Water, energy, greenhouse gas emissions, and waste indicators: all industrial sites within the scope of reporting, except for:
  - The Beijing site, where WCM methods are currently in the process of being deployed.
  - For the three sites that manufacture only semi-finished products (Kalush Bois, Calhoun/Tandus, and Absteinach), production volumes are

- excluded from the indicator. However, water and energy consumption and waste tonnage are included.
- For the Clervaux site, which produces both finished products and semi-finished products; only the latter are excluded. All consumption is included.
    - .
  - Consumption for the MDF line at the Eiweiler site, is included in the performance indicators pro rata (below 50%) to the production of semi-finished products for the .laminate flooring line at the same site.
    - .
  - Indicators on materials: purchases of raw materials only (excluding indirect purchases and finished products).
  - Indicators on products: sites that manufacture finished products for which the characteristic measured by the indicator is relevant (for example: wood sites are excluded from the indicator on the percentage of products without phthalates), as well as subcontracted flooring products.
  - Indicator on suppliers: purchases of raw materials and finished products only (excluding indirect purchases).
  - For the other indicators and in order to specify certain specific cases, details on scope by indicator is indicated in the table of definitions and methodological comments below.

### Review of historical data

Historical data for the four environmental indicators relating to water consumption, energy consumption, greenhouse gas emissions and waste generation have been restated.

Environmental data and production volumes prior to the acquisition of a given entity by Tarkett were including into the calculation of indicators in order to maintain a constant scope for measuring progress between 2010 and 2015. The restatement was necessitated by the Group's significant external growth since [2010]: only 27 of 39 production sites were in the scope of CSR reporting in 2010.

In the case of the three Desso factories and the two Tandus factories (Dalton and Truro), data prior to the acquisition was already reported by the previous management.

In the other cases, the first data reported by Tarkett was reported by default for the previous years. For example, the environmental indicators for Kalush Bois were monitored in 2012; this data was used to restate the 2010 and 2011 data.

## Indicator definitions

Indicator	Scope	Definition
<b>Environmental</b>		
Share of raw materials for which material assessment has been performed (% of purchase volume)	All raw materials	Share of materials purchased (in metric tons), for which an impact study was carried out pursuant to Cradle-to-Cradle principles. Tarkett uses ABC-X classification, which evaluates risks related to the impact of chemical substances on the environment and the recyclability of those substances
Share of materials at the start of supply chain which do not contribute to resource scarcity (% of purchase volume)		Materials characterized based on resources used in their production process (fossil, limited minerals, abundant minerals, renewable, recycled)
Fresh water consumption (liters/m <sup>2</sup> )	Manufacturing sites*	All consumptions (except captured rain water)
Share of manufacturing sites that have implemented closed-loop water circuits (or do not use water in their process)		Share of sites with closed-loop water circuit or that do not use water in their production process
Energy Consumption (kWh/m <sup>2</sup> )		Energy consumptions: electricity, gas, fuel, biomass
Greenhouse gas emissions (kgCO <sub>2</sub> e/m <sup>2</sup> )		Estimate of greenhouse gases emissions (reported as CO <sub>2</sub> equivalent) per unit of production. - Scope 1: calculated for industrial sites based on measure of energy consumption by type of energy (gas, fuel, biomass, other) - Scope 2: calculated for industrial sites based on measure of electricity consumption - Scope 3: not reported Calculation based on conversion factors GWh/tCO <sub>2</sub> e published by DEFRA in 2015
Non-phthalate products (% of m <sup>2</sup> produced, vinyl flooring only)	Vinyl flooring and accessories, rubber, carpet (semi-finished products not included)	products "without added phthalates" mean that no phthalate plasticizers (DOP or DINP) are contained in virgin raw material in the product composition, but recycled material content could contain some residual phthalates
Low VOC emission products (% of m <sup>2</sup> produced, flooring)	Indoor flooring (semi-finished products not included)	TVOC emissions ≤ 100 µg/m <sup>3</sup> according to ISO 16000-9 guidelines (emission chamber) and local test methods (wood floorings: excluding natural emissions)
Non detectable VOC emissions products (% of m <sup>2</sup> produced, flooring only)		Non quantifiable VOC: TVOC, SVOC and formaldehyde emissions ≤ 10 µg/m <sup>3</sup> according to ISO 16000-9 guidelines (emission chamber) and local test methods.
Industrial waste going to landfill (g/m <sup>2</sup> ), including hazardous waste	Manufacturing sites*	Waste sent to landfill or external incineration: amount of waste produced by the site and removed from the site to be sent to landfill or external incineration (i.e. hazardous waste) and for which Tarkett pays. The waste included in the KPI can be directly sent to landfill/incineration or first go through a treatment process outside the company.
Post-installation or post-consumer products collected (metric tons)	Group	Quantity of post-consumer (= post-installation and post-use) waste collected to be recycled into our products, excluding Tarkett internal post-manufacturing waste (even from a different entity)

Indicator	Scope	Definition
<b>Social</b>		
Lost time accident frequency rate (FR0t)	Manufacturing sites* (~75% of workforce)	Lost time accident: accident leading to an employee's absence >24h Lost Time Accident Frequency Rate (FR0t) = (# Lost Time Accidents x 1,000,000) / Hours Worked
Total accident frequency rate (FR2t)		Lost time accident: accident leading to an employee's absence >24h Total Accident Frequency Rate (FR2t) = (# ALL Accidents x 1,000,000) / Hours Worked
Severity rate (TG0t)		Severity Rate (TG0t) = # of working days lost / Hours Worked
Progress on Tarkett values adhesion in employee feedback	Group	2 questions in the biannual satisfaction survey: "I believe that Tarkett's values provide employees with clear guidance" and "I believe that manager conduct is consistent with Tarkett's values"
Share of women in top 100 positions		Senior management = Chairman of the Management Board and the first two hierarchical levels of the organization
Share of employees trained		An employee is considered to have been trained if he or she has received at least 8 hours of training over the course of the year
Share of management positions filled with internal candidates		A management position has at least one direct report
Share of people who benefited from an annual appraisal and development plan		The annual appraisal ("Performance and Development Dialogue" and "Polyvalence Matrix") is an annual exchange between the employee and his/her manager to discuss achievements, skills, opportunity for improvement, and development program
Listen to employees and engage in social dialogue		2 questions in the biannual satisfaction survey: "In my department, different opinions are discussed openly when decisions are made", and "Sufficient effort is made to obtain the opinions and advice of the people who work at Tarkett"
Communicate proactively towards all employees		3 questions in the biannual satisfaction survey: "My manager keeps me sufficiently informed on questions that affect me", "Management sufficiently explains strategic plans", and "Overall, I am well informed at Tarkett"
Number of people who received Tarkett Academy training		Number of people outside of Tarkett having received training at one of the centers of the Tarkett Academy (technical training in flooring installation and maintenance)
Number of employees		Total workforce as of December 31, 2015 and temporary workforce in equivalent full time, according to the methodology of the financial report
Terminations		Terminations of short and long term contracts (at the employer's initiative, as well as the employee's one)
Workforce turnover	Number of contract terminations reported over the average number of employees for the year	
Absenteeism	Manufacturing sites*	Absenteeism = lost hours / expected hours Lost hours are hours of absence for illness, work-related accident, strikes or other unforeseen absences. Hours of absence greater than 30 days are not included.

Indicator	Scope	Definition
<b>Corporate Governance</b>		
Percentage of employees who completed the e-learning on Code of Ethics (cumulative)	All employees with access to a computer	E-learning campaign to promote and raise awareness of employees to the Group Code of Ethics
Raw material purchased with suppliers committing to Global Compact (% of purchase value)	Direct purchases	Share of direct purchases from suppliers that are contractually committed to comply with the principles of the UN Global Compact
Audited entities	Group	Share of assets of entities audited over the course of the last 4 years

\*Exceptions listed in methodological note

## 3.7 REPORT OF ONE OF THE STATUTORY AUDITORS, APPOINTED AS AN INDEPENDENT THIRD-PARTY ORGANIZATION

To the Shareholders,

In our capacity as Statutory Auditor of the company Tarkett S.A., (the "Company"), appointed as independent third party and certified by COFRAC under number 3-1049<sup>3</sup>, we hereby report to you on the consolidated human resources, environmental and social information for the year ended December 31st, 2015, included in the management report (hereinafter named "CSR Information"), pursuant to article L.225-102-1 of the French Commercial Code (Code de commerce).

### Company's responsibility

The Board of Directors is responsible for preparing a company's management report including the CSR Information required by article R.225-105-1 of the French Commercial Code in accordance with the procedures used by the Company (hereinafter the "Guidelines"), summarized in the management report and available on request from the company's head office.

### Independence and quality control

Our independence is defined by regulatory texts, the French Code of ethics (*Code de déontologie*) of our profession and the requirements of article L.822-11 of the French Commercial Code. In addition, we have implemented a system of quality control including documented policies and procedures regarding compliance with the ethical requirements, French professional standards and applicable legal and regulatory requirements.

### Statutory Auditor's responsibility

On the basis of our work, our responsibility is to:

- attest that the required CSR Information is included in the management report or, in the event of non-disclosure of a part or all of the CSR Information, that an explanation is provided in accordance with the third paragraph of article R.225-105 of the French Commercial Code (Attestation regarding the completeness of CSR Information);
- express a limited assurance conclusion that the CSR Information taken as a whole is, in all material respects, fairly presented in accordance with the Guidelines (Conclusion on the fairness of CSR Information).

Our work involved six persons and was conducted between July 2015 and February 2016 during a nine weeks intervention period. We were assisted in our work by our CSR experts.

We performed our work in accordance with the French professional standards and with the order dated 13 May 2013 defining the conditions under which the independent third party performs its engagement, and with International Standard ISAE 3000<sup>4</sup> concerning our conclusion on the fairness of CSR Information.

### **1. Attestation regarding the completeness of CSR information**

#### Nature and scope of our work

On the basis of interviews with the individuals in charge of the relevant departments, we obtained an understanding of the Company's sustainability strategy regarding human resources and environmental impacts of its activities and its social commitments and, where applicable, any actions or programmes arising from them.

We compared the CSR Information presented in the management report with the list provided in article R.225-105-1 of the French Commercial Code.

For any consolidated information that is not disclosed, we verified that explanations were provided in accordance with article R.225-105, paragraph 3 of the French Commercial Code.

We verified that the CSR Information covers the scope of consolidation, i.e., the Company, its subsidiaries as defined by article L.233-1 and the controlled entities as defined by article L.233-3 of the French Commercial Code within the limitations set out in the methodological note, presented in the section 3 of the registration document which contains the CSR Information of the management report.

#### Conclusion

Based on the work performed and given the limitations mentioned above, we attest that the required CSR Information has been disclosed in the management report.

### **2. Conclusion on the fairness of CSR Information**

#### Nature and scope of our work

We conducted approximately twenty interviews with the persons responsible for preparing the CSR Information in the departments in charge of collecting the information and, where appropriate, responsible for internal control and risk management procedures, in order to:

- assess the suitability of the Guidelines in terms of their relevance, completeness, reliability, neutrality and understandability, and taking into account industry best practices where appropriate ;

<sup>3</sup> whose scope is available at [www.cofrac.fr](http://www.cofrac.fr)

<sup>4</sup> ISAE 3000 – Assurance engagements other than audits or reviews of historical financial information

- verify the implementation of data-collection, compilation, processing and control process to reach completeness and consistency of the CSR Information and obtain an understanding of the internal control and risk management procedures used to prepare the CSR Information.

We determined the nature and scope of our tests and procedures based on the nature and importance of the CSR Information with respect to the characteristics of the Company, the human resources and environmental challenges of its activities, its sustainability strategy and industry best practices.

Regarding the CSR Information that we considered to be the most important<sup>5</sup>:

- at parent entity level, we referred to documentary sources and conducted interviews to corroborate the qualitative information (organization, policies, actions), performed analytical procedures on the quantitative information and verified, using sampling techniques, the calculations and the consolidation of the data. We also verified that the information was consistent and in agreement with the other information in the management report;
- at the level of a representative sample of sites selected by us<sup>6</sup> on the basis of their activity, their contribution to the consolidated indicators, their location and a risk analysis, we conducted interviews to verify that procedures are properly applied and to identify potential undisclosed data, and we performed tests of details, using sampling techniques, in order to verify the calculations and reconcile the data with the supporting documents. The selected sample represents on average 18% of headcount and between 15% and 30% of quantitative environmental data disclosed.

For the remaining consolidated CSR Information, we assessed its consistency based on our understanding of the company.

We also assessed the relevance of explanations provided for any information that was not disclosed, either in whole or in part.

<sup>5</sup> Quantitative social information: Total headcount (split by gender, age and geographical region); Recruitments; Departures; Training hours; Absenteeism rate; Frequency rate of work-related accidents and Severity rate of work-related accidents.

Quantitative environmental information: Energy consumption; Water consumption; Quantity of non-recycled waste; Quantity of waste collected post-installation (tons of used flooring, collected in order to be reintegrated in new products) and Quantity of phthalate-free products.

Qualitative social information: Summary of collective agreements; Working time organization; Policies implemented regarding training; Occupational health and safety conditions.

Qualitative environmental information: The organization of the company to integrate environmental issues and, if appropriate, the assessments and certification process regarding environmental issues; Energy consumption and measures implemented to improve energy efficiency and renewable energy use; Measures regarding waste prevention, recycling and disposal.

We believe that the sampling methods and sample sizes we have used, based on our professional judgment, are sufficient to provide a basis for our limited assurance conclusion; a higher level of assurance would have required us to carry out more extensive procedures. Due to the use of sampling techniques and other limitations inherent to information and internal control systems, the risk of not detecting a material misstatement in the CSR information cannot be totally eliminated.

#### Conclusion

Based on the work performed, no material misstatement has come to our attention that causes us to believe that the CSR Information, taken as a whole, is not presented fairly in accordance with the Guidelines.

KPMG S.A.

Philippe Grandclerc

Philippe Arnaud

Partner

Partner

Climate Change and Sustainability Services

Qualitative societal information: Conditions of the dialogue with stakeholders; Measures implemented to promote consumers health and safety; Integration of social and environmental issues into the company procurement policy.

<sup>6</sup> Social and environmental information: Chagrin Falls (USA), Middlefield (USA), Narni (Italy), Clervaux (Luxembourg), Sedan (France) and Tarkett Polska (Poland). The verification work was done remotely for the information of the Poland site.

Social information only: Waterloo (Canada), Tarkett Alabama (USA) and Diamond W (USA). The verification work was done remotely for the information of the two USA sites.

Environmental information only: Florence (USA) and Ronneby (Sweden). The verification work was done remotely for these sites and refers exclusively to water consumption and quantity of waste collected post-installation for the USA site and to energy consumption for the Sweden site.

## 4.1 ANALYSIS OF ACTIVITY IN 2015

The following information concerning the Group's financial condition and results of operations should be read in conjunction with the consolidated financial statements as of and for the year ended December 31, 2015 and the notes thereto, free English language translations of which are included in Sections 5.1 and 5.2

The consolidated financial statements were prepared in accordance with IFRS as adopted by the European Union for the fiscal years in question. The consolidated financial statements as of and for the year ended December 31, 2015 have been audited by the Company's statutory auditors. The report of the Company's statutory auditors is presented in Section 5.9, "Statutory Auditors' Report on the Consolidated Financial Statements".

### 4.1.1 OVERVIEW

#### 4.1.1.1 Introduction

The Group is a global leader in flooring and sports surfaces offering the most extensive geographical base and one of the most comprehensive product lines in the industry. The Group's business is organized into four segments: three

geographical segments for flooring (EMEA, North America and CIS, APAC and Latin America) and one global segment for sports surfaces.

#### Key figures

(in millions of euros)	Dec. 31, 2015	Dec. 31, 2014
<b>CONSOLIDATED RESULTS OF OPERATIONS</b>		
<b>Net revenue</b>	<b>2,714.8</b>	<b>2,414.4</b>
<i>Organic growth</i>	-0.3%	-2.3%
<b>Adjusted EBITDA <sup>(1)</sup></b>	<b>285.2</b>	<b>275.0</b>
<i>% of net sales</i>	10.5%	11.4%
<b>Adjusted EBIT</b>	<b>161.4</b>	<b>175.5</b>
<i>% of net sales</i>	5.9%	7.3%
<b>EBIT</b>	<b>164.6</b>	<b>136.6</b>
<i>% of net sales</i>	6.1%	5.7%
<b>Net result for the period - Group Share</b>	<b>83.3</b>	<b>61.2</b>
<b>Dividends per share (in euros)</b>	<b>0.52</b>	<b>0.38</b>
<b>Return on capital employed (ROCE) <sup>(2)</sup></b>	<b>11.2%</b>	<b>13.9%</b>
<b>CONSOLIDATED FINANCIAL POSITION</b>		
Shareholders' Equity	836.7	725.8
Net debt <sup>(3)</sup>	482.3	595.5
Total Balance Sheet	2,121.0	2,157.3
<b>CONSOLIDATED CASH FLOWS</b>		
Cash generated from operations	271.4	250.0
Capital expenditures	(79.3)	(77.6)
Cash flow from operations <sup>(4)</sup>	192.2	172.4
Free cash flow <sup>(5)</sup>	173.4	102.5
<b>Market capitalization as of December 31</b>	<b>1,831</b>	<b>1,141</b>
<b>Workforce at December 31 <sup>(6)</sup></b>	<b>12,367</b>	<b>12,177</b>

(1) Adjusted EBITDA – See Definition in Section 4.1.1.8

(2) ROCE – See Definition in Section 4.3.8

(3) Net Debt – See section 4.3.3 and section 5.2, Note 7 « Financing and financial instruments »

(4) Operating cash flow corresponds to cash flow from operations minus investments.

(5) Free cash flow corresponds to operating cash flow minus interest paid, other items and taxes paid, plus the proceeds from sales of fixed assets.

(6) The Group's headcount as of the end of 2014 includes the headcount of Desso, which was acquired on December 31, 2014.

#### 4.1.1.2 Principal Factors Affecting the Group's Results of Operations

##### ■ Revenue Recognition

Consolidated net revenues are equal to revenues, excluding taxes on sales of the Group's products and services, as well as transportation costs and customs duties that are invoiced to customers, net of rebates, discounts, returns and intragroup sales.

The countries and regions where the Group operates have different demand trends, primarily as a result of local economic conditions, which affect the renovation and construction markets. The choice of flooring solutions in each market is influenced by local lifestyles, end-user tastes, climate and the condition of existing flooring, among other factors.

The Group estimates that the large majority of its revenues for the financial years under review were generated by renovation projects. The construction of new housing and commercial buildings represented a small percentage of revenues during this period.

The Group's organic revenue growth (i.e. the positive or negative variation of sales due to changes in sales volumes and prices, excluding the effects of changes in scope of consolidation and exchange rates) depends mainly on the following factors:

- The Group's competitive advantage in its principal markets, which in turn depends primarily on its ability to offer a wide range of residential products that satisfy consumer trends and tastes in each country; its offer of commercial products that comply with the specifications of renovation projects and applicable regulatory standards; maintaining close relationships with customers, such as distributors and DIY stores and specifiers, such as architects and installers; the quality of the Group's products and services; and the competitiveness of its prices.
- The growth potential and structure of each of the Group's markets. For example, in the European Union, demand for the Group's products is mostly concentrated within the northern countries (the Nordic countries, Germany, the United Kingdom, and Poland), with consumers in the southern countries tending to prefer ceramic floors. In addition, in North America and Europe, public spending policies have a significant impact on the commercial flooring market in public hospitals, schools and universities, as well as on the Sports Surfaces market.
- The Group's product promotion strategy is different in each market. In certain markets, the Group concentrates its sales efforts on products with high added value and strong margins, while in other markets it may pursue a volume-maximizing strategy in order to gain or retain market share. These strategic decisions have an impact on the mix of products sold and, as a result, on revenues and margins.

- Economic conditions more generally, as buyers tend to carry out renovation and construction projects during periods of economic growth.

##### ■ Cost of sales

The Group's cost of sales is composed primarily of variable costs, due to the large effect of the cost of raw materials, and, to a lesser extent, transportation and logistics costs. The primary components of cost of sales include the following:

- Raw materials used in the Group's manufacturing processes. The Group primarily uses PVC and plasticizers, the cost of which is related in part to the price of crude oil. Wood is another raw material that the Group uses. In 2015, the Group's raw materials costs consisted primarily of PVC and plasticizers (approximately 40%), wood (approximately 6%), fiberglass (approximately 4%) and packaging (approximately 2%). For a discussion of recent trends in the prices of raw materials used by the Group, see Section 1.6.2.1, "Raw Materials and Suppliers".
- Labor costs, consisting principally of salaries and benefits of production personnel. These costs vary depending on the number of employees and average level of salaries and benefits. In order to control labor costs, the Group uses temporary workers in certain factories to handle the seasonality of certain of its activities. Labor costs increased by 0.5 point as a percentage of net sales from 2014 to 2015 (excluding restructuring costs).

Transportation and logistics costs, which depend on fuel prices and the Group's operational efficiency (including, for example, its ability to ship products in fully loaded trucks, the location of production sites and the distance from the points of delivery to final customers).

Other costs, including energy costs such as electricity and gas, maintenance costs associated with the Group's various factories and depreciation and amortization of production and logistics assets.

Purchases of raw materials and similar products, labor costs and transportation and logistics costs represented 58%, 16% and 10%, respectively, of the Group's 2015 cost of sales.

Several years ago the Group launched its WCM (World Class Manufacturing) program, whose main objectives are the following:

- reinforcing quality and customer service;
- reducing work-related accidents and the impact of the Group's operations on the environment; and
- improving the productivity and performance of the Group's production sites.

The success of this program depends on systematically applying best practices at the Group's 34 production sites, actively managing purchases (particularly PVC and

plasticizer purchases) and optimizing the Group's raw material supply chain. The Group believes that this program has enabled it to realize cumulative savings of €207 million over the 2011-2015 period (more than 2% of cost of sales each year).

#### ■ **Selling, General and Administrative Expenses**

Selling expenses include compensation of the Group's sales force, advertising and marketing costs and the cost of providing samples to customers and decision-makers such as architects and installation companies. The level of selling expenses is tied in part to the number of product or collection launches, which require specific sales efforts.

General and administrative expenses include administrative personnel costs at the central and division levels, which are managed through a decentralized model. Expenses relating to the management of information systems as well as amortization and depreciation of related investments are also included in administrative expenses.

#### ■ **Research and development**

Innovation is critical to the Group's success, ensuring product quality, compliance with regulatory standards and reduced environmental impact. The Group seeks to maintain the highest level of excellence while controlling Research and Development costs, which are small as compared with other operational expenses. These costs include compensation of Research and Development personnel as well as amortization and depreciation of patent-related expenses. Research and development costs represented 1% of the Group's consolidated net revenue in 2015.

#### ■ **Financial income and expense**

Net financial costs include interest expense incurred on borrowings, interest income on investments of cash balances, discounting charges relating to retirement commitments, and gains and losses on financial and hedging instruments, to the extent recognized in the Group's income statement.

#### ■ **Total income tax**

Income tax expense includes corporate income taxes payable by the Group's entities, as well as withholding taxes on dividends paid (in particular, dividends paid by the Group's Russian and Serbian entities), as well as changes in the deferred tax assets on the Group's balance sheet.

### 4.1.1.3 Segment Information

The Group's four segments are as follows:

- EMEA (Europe, Middle East and Africa; 34% of 2015 revenue). The EMEA flooring segment produces and distributes vinyl resilient flooring, carpet (primarily in carpet tiles for commercial use), wood flooring, and laminate flooring. Resilient flooring represents the large majority of revenues (more than 60% in 2015), followed by carpet, whose share within the segment was increased by the consolidation of Desso. These products are used in the residential and commercial

markets, with commercial market sales higher in 2015. France was the largest country in the segment, with about 15% of revenue (or approximately 5% of the Group's total revenue). The Nordic countries (Sweden, Norway, Finland and Denmark) together represented slightly more revenue than France and slightly less than a quarter of the segment's consolidated net revenues, with the principal contributors being Sweden and Norway. The other significant countries are Germany and, to a lesser extent, the United Kingdom. The countries of southern Europe (including primarily Spain and Italy) represented less than 3% of the Group's 2015 consolidated net revenues (8% of the EMEA segment's consolidated net revenues).

- North America (28.4% of revenues in 2015). The North American flooring segment offers products to both commercial end-users (representing about 80% of the segment's 2015 consolidated net revenues) and residential end-users. Historically, the Group's products in this market have been primarily rubber flooring and accessories (sold under the Johnsonite brand name) and resilient flooring, including vinyl flooring for the residential market and VCT flooring, the Group's lower cost homogenous vinyl product for the commercial market. More recently, the Group introduced additional lines of resilient flooring for the commercial market, supplied by its European factories. It complemented its resilient flooring lines in 2010 with the acquisition of Centiva, which manufactures LVT for the commercial market. Finally, with its Tandus projects, the Group is a major supplier of commercial carpeting.
- CIS, APAC and Latin America (21.6% of revenues in 2015). The CIS countries (primarily Russia, Ukraine and Kazakhstan) represent the large majority of this segment's revenues—about 80% in 2015. Residential vinyl flooring is the primary product sold in these countries. The Group also has substantial wood flooring and laminate flooring products in these markets. Sales in Latin America are mainly in Brazil, and activity in the Asia Pacific region is concentrated in Australia and China.
- Sports Surfaces (16.2% of revenues in 2015). The Group's sports surface segment includes the production, distribution and installation of artificial turf, primarily for sports fields, and athletic tracks, as well as other products (such as artificial grass for residential landscaping purposes and indoor sports flooring). The Group sells sports surfaces primarily to public establishments, elementary schools, high schools and universities, mainly in North America (80% of the segment's consolidated net revenues in 2015) and, to a lesser extent, in Europe. Most of the Group's sales in this segment consist of "turnkey" solutions, including both sale and installation.

#### 4.1.1.4 Exchange Rate Fluctuations

Exchange rate fluctuations have a direct impact on the Group's consolidated financial statements, due to the conversion into euros of income statement and balance sheet items of the Group's foreign subsidiaries located

outside the euro zone. The principal currencies for which the Group bears this risk are the U.S. dollar (39.5% of consolidated net revenues in 2015), the Swedish krona (7.1%), the Canadian dollar (2.0%), the pound sterling (1.9%), the Brazilian real (1.4%) and the Australian dollar (1.5%).

The Group seeks to develop production capacity in the geographic regions where it distributes its products, thereby creating a natural hedge for a significant portion (although not all) of its gross margin and operating income against exchange rate fluctuations. It enters into derivative contracts to manage the remaining exchange rate risk (especially the risk related to the lag between the time customers are invoiced and the time the Group is paid) with respect to certain currencies (see Note 7.5, "Financial Risks and Financial Instruments," in Section 5.2).

The functional currency of the Group's entities in Russia and the other CIS countries is the euro. Products are sold in rubles, but the Group's policy is to reflect exchange rate fluctuations between the ruble and the euro in its product prices. Only the impact of the lag between the exchange rate fluctuation and the price increase is treated as an exchange rate effect in the analysis at constant scope of consolidation and exchange rates presented in the analysis below. Although a significant portion of the Group's Russian operating expenses are in euros (since PVC and plasticizers are for the most part imported from the European Union), labor, logistics and transportation costs, as well as other production costs such as energy and maintenance, are almost entirely in rubles.

#### 4.1.1.5 Seasonality

The Group's activities are to some extent seasonal, with an increase in sales generally occurring in the second and third quarters of the year, whereas its working capital requirements are generally higher in the first two quarters of the year. Sales of sports surfaces are particularly influenced by seasonality, as installation work is mainly done between May and October, with a peak in activity during the summer. Moreover, in certain geographic regions, winter climate conditions can affect work sites and, therefore, flooring installation. In the educational sector, demand is generally higher during school vacation.

In 2015, 56.0% of the Group's consolidated net revenues were generated in the second and third quarters, as compared with 44.0% in the first and fourth quarters.

#### 4.1.1.6 Turnaround of Certain Businesses

Despite an overall growth in recent years, the Group has encountered isolated situations in which certain businesses have required specific actions to return to profitability. Recent turnaround programs include the following:

- Sports Surfaces segment. Beginning in 2009, the Sports Surfaces segment was affected by a reduction in public spending as a result of the financial crisis. At the same time, the Group's principal supplier of the fibers used in manufacturing artificial turf decided to pursue a strategy of downstream vertical integration, thereby becoming a competitor. The Group's artificial turf

products also had certain defects (relating to the UV protection of the fibers supplied by that competitor), resulting in warranty claims against the Group. In order to return the sports surfaces business to profitability, the Group pursued a turnaround strategy that included: moving production of fibers for artificial turf in-house through setting up in 2010 of the joint-venture Morton Extrusionstechnik (MET) GmbH, in which the Group holds a majority interest, with the remainder held by Morton Extrusion, which specializes in the extrusion of fibers; pursuing significant reductions in selling, general and administrative expenses; adapting the Group's Spanish subsidiary's marketing and production activities to the local economic climate; making changes to the corporate structure of the segment, including merging two athletic track production companies; developing artificial turf production capacity in the Group's Serbian factories; and reorganizing the Group's research and innovation team. The sports surfaces segment's adjusted EBITDA became positive in that year and has increased steadily since then, showing the success of the turnaround strategy.

- Wood flooring in Western Europe. The European market for wood flooring was affected by reduced levels of activity as a result of the economic climate, as well as by a particularly competitive environment. The Group therefore launched several initiatives in order to reduce production costs. The Group transferred a portion of its engineered multi-layer wood flooring production from Hanaskog, Sweden to sites in Poland and Ukraine, thereby bringing the manufacturing sites closer to the sources of wood and enabling the Group to reduce transportation and manufacturing costs. In 2014, the Group also announced a plan to sell or close Tarkett Bois's production plant in France, in order to rightsize its production capacity and improve the profitability of its wood flooring business. The site, which the Group still owns, ceased all production activity at the end of 2014.

VCT business in the United States. The Group decided to consolidate its VCT production at its Florence, Alabama site and close its Houston, Texas site. Realized in July 2014, this transfer of production allows to generate significant savings, particularly with respect to factory indirect costs, as well as a reduction in working capital requirements. The temporary difficulties encountered during the starting phase of the new line in Florence have been resolved and production is now back to normal.

#### 4.1.1.7 Acquisitions

The Group has completed 13 acquisitions in the last five years in connection with its growth strategy. Most of the companies the Group acquired were of a moderate size and had product lines or activities in markets that complement those of the Group. For more information, see Section 4.2.1, "Main Investments".

The Group completed a significant external growth transaction with the acquisition of the Dutch group Desso

on December 31, 2014. Desso specializes in the design, production and sale of commercial carpets, primarily in Europe. On the sports surfaces market, it also sells artificial turf as well as a unique semi-natural reinforced lawn system.

Based in the Netherlands, the Desso group had revenue of approximately €200 million in 2014, has about 820 employees and has three production plants in Europe. The Desso group comprises 24 legal entities, including two production entities located in Belgium and the Netherlands and distribution entities located primarily in Europe.

The consideration paid totaled €154.3 million and included the repayment of the Desso group's debt in the amount of €52.4 million.

Acquisition costs, reported in "General and administrative expenses," amounted to €0.5 million.

The acquisition impact on the consolidated cash flow statement is presented in the line item "Acquisitions of subsidiaries net of cash on acquired", broken down as follows:

Consideration paid	(154.3)
Cash and cash equivalents acquired	4.1
<b>Acquisition of subsidiaries net of cash acquired</b>	<b>(150.2)</b>

As of December 31, 2014, goodwill from the Desso group was calculated at €(60.0) million.

Consideration paid	(154.3)
Repayment of Desso debt	52.4
Purchase and sale of assets	10.8
Net assets acquired	31.0
<b>Total goodwill recognized</b>	<b>(60.0)</b>

As of December 31, 2015, Tarkett identified and valued its acquired assets and assumed liabilities, resulting in a goodwill adjustment that now totals €31.3 million (See

Note 5.2 in Section 5.2 «Notes to the consolidated financial statements»).

In August 2015, the Group also acquired the shares held by the minority shareholders of its subsidiary EasyTurf, which markets artificial grass for landscaping applications in the United States.

#### 4.1.1.8 Presentation of Accounting and Financial Information

##### ■ Adjusted EBITDA

To evaluate its business performance, the Group uses an indicator that it calls "adjusted EBITDA", which is equal to operating income before depreciation, amortization and before certain revenues or expenses considered as unusual or non-recurring, such as:

- restructuring costs intended to grow the Group's future profits;
  - gains or losses on significant asset sales;
  - costs relating to corporate and legal restructuring, including legal fees and acquisition costs as well as the impact on margins of recording inventory of acquired companies in the Group's balance sheet at fair value;
  - management fees invoiced by the shareholders of the Company; and
  - expenses relating to share-based payments without any related cash payment.
- Management believes that adjusted EBITDA is a useful indicator because it measures the performance of the Group's activities without taking into effect past expenditures (depreciation and amortization) or unusual costs that are not representative of trends in the Group's results of operations. EBITDA and adjusted EBITDA are not standardized accounting terms with generally accepted definitions. They should not be taken as a substitute for operating income, net income or cash flows, nor should they be treated as a measure of liquidity. Other issuers may calculate EBITDA and adjusted EBITDA differently.

The following table reconciles adjusted EBITDA to operating income for the 2014 and 2015 fiscal years.

Adjusted EBITDA (in millions of euros)	Fiscal year ended December 31,		
	2015	2014	Change
<b>Result from operating activities</b>	<b>164.6</b>	<b>136.6</b>	<b>+20.5%</b>
Depreciation and amortization	125.5	100.8	+19.7%
<b>EBITDA</b>	<b>290.1</b>	<b>237.4</b>	<b>+22.2%</b>
<b>Adjustments</b>			
Restructuring costs	9	26.7	
Gains/losses on asset sales	(28.2)		
Costs related to business combinations	10.9	3.9	
IFRS costs relating to share-based payments	2.0	2.7	
Costs relating to the initial public offering			
Other <sup>(1)</sup>	1.5	4.6	
<b>Adjusted EBITDA</b>	<b>285.3</b>	<b>275.0</b>	<b>+3.7%</b>

(1) "Other" includes management fees invoiced by the shareholders of the Company.

The adjustments used in determining adjusted EBITDA for each fiscal year are described in the comparative analyses of the Group's results of operations presented below.

#### ■ **Estimates and assumptions used in preparing financial statements**

The preparation of the Group's consolidated financial statements in accordance with IFRS requires it to make a number of estimates and assumptions that have an effect on the amounts of its assets and liabilities, as well as on its income and expenses. Management continually revisits these estimates and assumptions based on its experience and other reasonable factors used in its evaluation. Actual results may differ significantly from these estimates.

These estimates and assumptions relate primarily to the following:

- impairment of goodwill;
- provisions for retirement and other employee benefit obligations;
- other provisions for litigation, warranties and potential liabilities;
- deferred tax assets (tax loss carryforwards, in particular);
- the fair value of consideration paid, acquisitions of minority interests, and acquired assets and liabilities; and
- accounting treatment of financial instruments.

The management estimates used in connection with the preparation of the Group's financial statements, particularly those relating to the application of accounting techniques and the inclusion of uncertainties, are described in more detail in Note 1.2, "Significant Accounting Principles" to the Group's consolidated financial statements included in Section 5.2, "Notes to the Group's Consolidated Financial Statements".

#### ■ **Goodwill**

Goodwill represents the difference between the cost of a business combination and the Group's share of the fair value of the identifiable assets acquired and liabilities assumed on the date control is transferred, corresponding, for example, to the value that the Group assigns to expected synergies and profits. Therefore, evaluation of goodwill may rely on assumptions relating to future cash flows (see Notes 5.1, 5.2, and 5.4 to the Group's consolidated financial statements included in Section 5.2, "Notes to the Group's Consolidated Financial Statements").

Goodwill is allocated to cash-generating units ("CGUs"), whose accounting value is tested for impairment annually or whenever there is any indication of an impairment loss. Impairment tests seek to determine whether the net recoverable value of an asset or CGU is less than its net book value. If the net recoverable value is lower than the net book value, an impairment charge is recorded in the income statement in the amount of the difference, allocated first to reduce goodwill of such CGU.

The recoverable value of an asset or a CGU is equal to the higher of the market value minus cost to sell, or the value in use. Value in use is determined by discounting estimated future cash flows for each CGU using certain assumptions and estimates of management. Market value is the price that could be obtained under normal competitive conditions from an informed buyer minus the cost to sell.

The calculations used to determine value in use are subject to management's judgment. Cash flows used to calculate value in use are derived from the Group's budgets and business plans, which are in turn based on assumptions relating to revenues, adjusted EBITDA, working capital requirements and investments. If other assumptions or projections were to be used, impairment testing would produce different values in use.

Management conducts impairment testing using its best estimate of the future activity of the CGU in question over the next three years, discounted to present value. After-tax discount rates vary depending on the risk premium used for each geographic market, which were 8.6% for EMEA and North America, 9.2% for APAC, 10.6% for Latin America and

12.2% for the CIS. The primary assumptions for sales growth through 2018 range from 2% (for certain CGUs in Europe) to 4% (essentially in emerging markets). The value in use calculation also includes the CGU's end value, which projects standard cash flows to infinity with an annual growth rate of between 2% and 4%, depending on the geographic market.

For more information, see Note 5.4 to the Group's consolidated financial statements, included in Section 5.2, "Notes to the Consolidated Financial Statements".

- Provisions for retirement and similar obligations

In accordance with the laws and practices of each country where the Group operates, it maintains retirement, health and disability plans and retirement packages for eligible employees and former employees, as well as for their beneficiaries who meet required conditions. As of December 31, 2015 the Group had such retirement commitments in the United States, Canada, the United Kingdom and Germany, as well as in France, Italy, Sweden, Serbia and Russia.

In accordance with IAS 19, these commitments are valued or updated every six months by independent actuaries. Accounting for actuarial values is based on predicted changes in salaries, medical costs, long-term interest rates, average seniority and life expectancy. An expected rate of return on funds invested is calculated for each plan in accordance with its composition and the projected return of comparable markets. Actuarial values and rates of return are sensitive to changes in predictions and estimates, which are based on assumptions. For more information, see Note 4.1 to the Group's consolidated financial statements for the fiscal year ended December 31, 2015 included in Section 5.2, "Notes to the Consolidated Financial Statements". As of December 31, 2015, the Group had €236.8 million in liabilities relating to employee benefit commitments, of which €94.5 million are covered by funds invested pursuant to the Group's various plans, and the remaining €142.3 million relate to unfunded or partially funded plans for which provisions have been recorded. The most significant of these liabilities are in the United States, Canada, the United Kingdom and Germany; the entities in these countries maintain sufficient externally-managed investments to cover nearly 50% of their liabilities.

For more information on provisions for retirement and similar obligations, see Note 4.1 to the Group's consolidated financial statements included in Section 5.2, "Notes to the Consolidated Financial Statements".

- Provisions for Litigation, Product Warranties and Restructuring Costs

In accordance with IAS 37 (Provisions, Contingent Liabilities and Contingent Assets), provisions for litigation, warranties and other potential liabilities are recorded when, at the close of the fiscal year, there exists a legal or implicit obligation resulting from a past event that is more likely than not to result in a cash outflow to a third party, and whose amount can be reliably estimated. The amount recorded as a provision is management's best estimate of the

expenditure required to settle the current obligation as of the closing date. Where the time value of money has a significant effect, future outflows are discounted to present value. These provisions relate to environmental, legal, tax and other risks.

The probability of an outflow is calculated based on management's analysis and assumptions and estimates that depend, in turn, on the nature of the risk. For example, in determining the amount of provisions for litigation, the Group's management must evaluate the probability of an unfavorable decision, as well as the amount of potential damages. These items are by their nature uncertain. On the other hand, a warranty provision is recorded at the time a given product is sold, with the amount based on historical data on warranty payments. An additional provision is recorded when an event occurs that may give rise to warranty claims for greater amounts than the hypothetical provision. A restructuring provision is recorded when management approves a detailed restructuring plan and the restructuring is announced publicly or implemented. The provision may prove higher or lower than the amount actually incurred. Provisions may also be reversed, if necessary.

As of December 31, 2015, the Group had €49.5 million in provisions for warranties, restructurings, claims and litigation. For more information on estimation of and accounting for provisions or their impact on the Group's results of operations, see Note 6.1 to the Group's consolidated financial statements, included in Section 5.2, "Notes to the Consolidated Financial Statements".

- Deferred tax assets

In accordance with IAS 12 (Income Taxes), the Group recognizes deferred tax assets and liabilities on its balance sheet. A deferred tax asset must be recognized for all temporary differences deductible in the future, unused tax loss carryforwards or income tax credits if it is probable that the Group will have future taxable profits that will allow these future tax savings to be utilized.

A deferred tax asset is recognized when it is probable that the Group will use it in the future. Management must use its judgment in determining the amount of the net tax asset to recognize. Projected net taxable profits are estimated on the basis of Management's budget and assumptions, as well as models relating to market conditions. These assumptions and models may have a significant impact on the amounts of deferred tax assets recognized on the Group's balance sheet.

The Group has €56.7 million in deferred tax assets relating to tax loss carryforwards and unused tax credits, of which €32.4 million relate to the Group's North American tax consolidation group (United States), €8.4 million related to the Serbian subsidiaries and €5.0 million to a Canadian subsidiary.

For more information, see Note 8.2 to the Group's consolidated financial statements, included in Section 5.2, "Notes to the Consolidated Financial Statements".

#### 4.1.2 COMPARISON OF RESULTS OF OPERATIONS FOR THE YEARS ENDED DECEMBER 31, 2014 AND DECEMBER 31, 2015

The analysis below discusses the Group's results of operations for the fiscal year ended December 31, 2015.

##### 4.1.2.1 Overview

The key figures of the consolidated financial statement are presented in the table below and commented in sections 4.1.2.2 to 4.1.1.8:

Tarkett Consolidated Results of Operations <i>(in millions of euros, except percentages)</i>	Fiscal year ended December 31,		
	2015	2014	Change
<b>Net revenue</b>	2,714.8	2,414.4	+12.4%
<b>Gross profit</b>	669.4	571.6	+17.1 %
<i>As a percentage of consolidated net revenue</i>	24.7%	23.7 %	
<b>Adjusted EBITDA</b>	285.3	275.0	+3.7 %
<i>As a percentage of consolidated net revenue</i>	10.5 %	11.4 %	
<b>Result from operating activities</b>	164.6	136.6	+20.5%
<i>As a percentage of consolidated net revenue</i>	6.1 %	5.7%	
<b>Net Profit Attributable to Owners of the Parent Company</b>	83.3	61.2	+36.1 %

The tables below show the breakdown of the Group's principal performance indicators by segment. Changes in these indicators as compared with the previous year are discussed in Sections 4.1.2.2 through 4.1.2.8.

Dec. 31, 2015 <i>(in millions of euros)</i>	Flooring			Sports surfaces	Corporate Costs	Group
	EMEA	North America	CIS, APAC and Latin America			
<b>Net revenue</b>	<b>917.6</b>	<b>771.2</b>	<b>586.7</b>	<b>439.3</b>	<b>-</b>	<b>2,714.8</b>
<b>Gross profit</b>	<b>285.7</b>	<b>209.0</b>	<b>89.2</b>	<b>85.0</b>	<b>0.5</b>	<b>669.4</b>
<i>% of net sales</i>	<i>31.1%</i>	<i>27.1%</i>	<i>15.2%</i>	<i>19.3%</i>		<i>24.7%</i>
<b>Adjusted EBITDA</b>	<b>137.5</b>	<b>84.0</b>	<b>66.9</b>	<b>41.4</b>	<b>(44.5)</b>	<b>285.3</b>
<i>% of net sales</i>	<i>14.9%</i>	<i>10.9%</i>	<i>11.4%</i>	<i>9.4%</i>		<i>10.5%</i>
<b>Adjustments</b>	<b>(12.6)</b>	<b>24.6</b>	<b>(2.8)</b>	<b>(0.9)</b>	<b>(3.6)</b>	<b>4.7</b>
<b>EBITDA</b>	<b>125.1</b>	<b>108.6</b>	<b>64.1</b>	<b>40.4</b>	<b>(48.1)</b>	<b>290.1</b>
<i>% of net sales</i>	<i>13.6%</i>	<i>14.1%</i>	<i>10.9%</i>	<i>9.2%</i>		<i>10.7%</i>
<b>EBIT</b>	<b>85.5</b>	<b>62.0</b>	<b>19.6</b>	<b>23.1</b>	<b>(25.6)</b>	<b>164.6</b>
<i>% of net sales</i>	<i>9.3%</i>	<i>8.0%</i>	<i>3.3%</i>	<i>5.3%</i>		<i>6.1%</i>
<b>Capital expenditures</b>	<b>29.6</b>	<b>14.6</b>	<b>20.8</b>	<b>8.4</b>	<b>5.9</b>	<b>79.3</b>

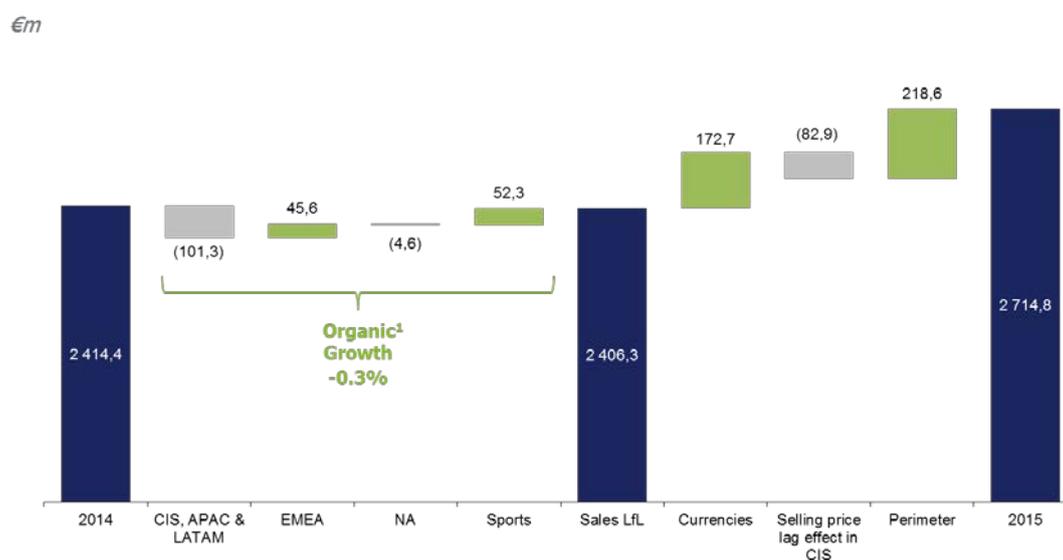

Dec. 31, 2014 (in millions of euros)	Flooring			Sports surfaces	Corporate Costs	Group
	EMEA	North America	CIS, APAC and Latin America

<b>Capital expenditures</b>	<b>19.3</b>	<b>27.5</b>	<b>20.6</b>	<b>4.6</b>	<b>5.6</b>	<b>77.6</b>

#### 4.1.2.2 Net revenue

In 2015, the Group's revenues totaled **€2,715 million**, as compared with €2,414 million in 2014, an increase of 12.4%.

The Group recorded an **organic growth of -0.3%**, excluding the positive contribution of acquisitions (+€219 million) and fluctuations in exchange rates, (+€90 million, including -€83 million resulting from the lag between changes in exchange rates and the corresponding price increases in Russia). The Group succeeded in offsetting the decrease in volumes and in the mix of products in the CIS region, which was due in particular to the very difficult economic circumstances in Russia, by significantly increasing sales in the EMEA and Sport Surfaces segments.

The chart below presents the key factors explaining the evolution of net revenue between 2014 and 2015:

Note: (1) Organic growth: At same perimeter and exchange rates (NB: In the CIS, price increases implemented to offset currency fluctuations are not included in the organic growth. Organic growth in the CIS therefore reflects volume and mix variances only. Including price increases in the CIS, the organic growth reached 0.9%).

##### ▪ EMEA

In the **EMEA region**, Tarkett recorded **sustained organic growth** of 6.7%. Scandinavia, Germany and Central Europe performed well, as did Southern Europe. The French market continued to shrink, affected by the downturn in construction and renovation. The consolidation of Desso contributed 34.7% to the increase in reported sales.

##### ▪ North America

In **North America**, sales decreased slightly, by 0.7%, largely due to difficulties encountered in the first half of the year in supplying VCT vinyl tiles, the production of which was transferred to the Florence, Alabama site. During the second half, the segment returned to positive organic growth of 1.4%.

- CIS, APAC and Latin America

The **CIS, APAC and Latin America segment** saw a 13.1% decrease in organic sales, reflecting only volumes and the mix of products. Market conditions in Russia were difficult throughout the year, and household purchasing power was particularly affected amid the decline in the ruble and strong inflation.

In Asia-Pacific, Australia had a good year, and China continued to grow, in particular in the vinyl flooring segment. Latin America had strong organic growth despite the difficult economic situation in Brazil.

- Sports Surfaces

The **Sports Surfaces segment** continued its strong growth, with sales up 17.2% on a comparable basis in 2015, owing to continued growth in artificial turf sales in North America, as well as improvement in Europe, despite disparities from one country to the next.

#### 4.1.2.3 Gross profit

The Group's gross profit increased by 17.1% from €571.6 million in 2014 to €669.4 million in 2015. Gross profit represented 24.7% of revenues in 2015, or a decrease of 1.1 points as compared with 2014.

This improvement is primarily the result of:

- the favorable change in raw materials costs

- the continued effort to increase productivity through the WCM program, which generated net production cost savings
- the consolidation and strong performance of Desso

#### 4.1.2.4 Result from operating activities

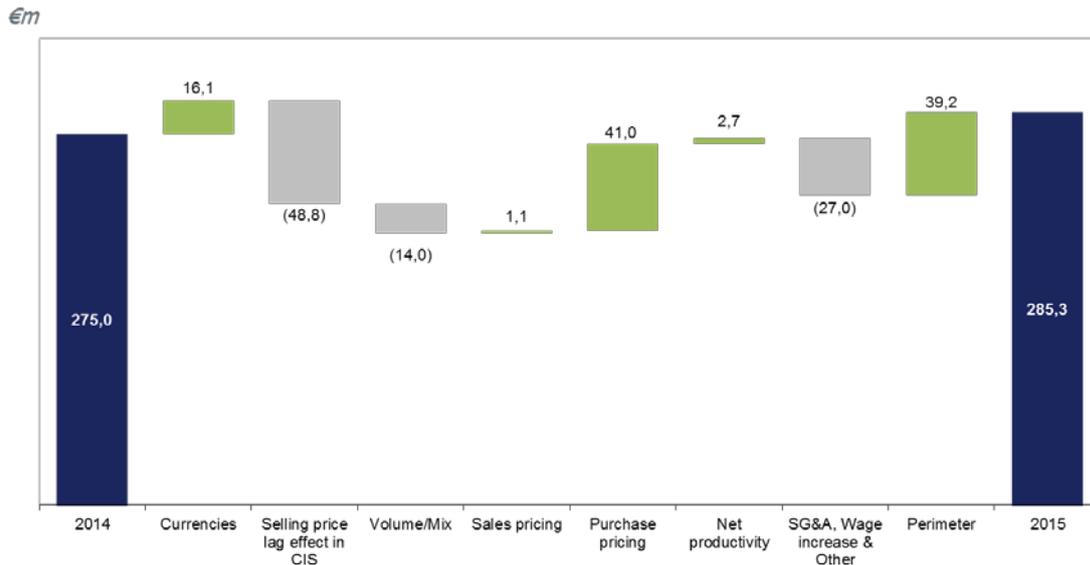

The Group's 2015 operating income was €164.6 million, an increase of 20.5% compared with €136.6 million in 2014. Operating income represented 6.1% of revenues in 2015 compared with 5.7% of revenues in 2014.

In addition to the factors that contributed to the improvement in gross profit, result from operating activities benefited from the €28 million gain generated by the sale of the Houston, Texas site.

#### 4.1.2.5 Adjusted EBITDA

Adjusted EBITDA was €285.3 million in 2015—an increase of 3.7% as compared with €275.0 million in 2014. The ratio of adjusted EBITDA to consolidated net revenues went from 11.4% in 2014 to 10.5% in 2015.

The main factors explaining the change in the Group's adjusted EBITDA in 2015 are the ones described in the improvement in gross profit, as presented in the chart below:

Note: (1) Adjusted EBITDA: Adjustments include expenses related to restructuring, acquisitions and certain other non-recurring items.

The decrease in the ratio of adjusted EBITDA to consolidated net revenues results from the decreased activity in the CIS region and the net impact of foreign exchange fluctuations and price adjustments in the same region.

The main factors in the per-segment changes in adjusted EBITDA are as follows:

- **EMEA:** Adjusted EBITDA margin improved to 14.9%, as compared with 11.3% in 2014, sustained by sales growth, lower raw materials costs, improvements in manufacturing efficiency and the consolidation of Desso.
- **North America:** Adjusted EBITDA margin increased to 10.9% from 9.7% in 2014, due to the favorable evolution of raw materials costs, a better product mix, and recovery of manufacturing performance.
- **CIS, APAC and Latin America:** Adjusted EBITDA margin for this segment was 11.4% (as compared with 18.9% in 2013). Adjusted EBITDA margin was affected by the deterioration in economic conditions in the CIS region, which led to a significant decrease in sales. In addition, the net impact of foreign exchange fluctuations and price adjustments was strongly negative, as a result of the ruble's rapid fluctuation.
- **Sports Surfaces:** Adjusted EBITDA margin improved, reaching 9.4% in 2015, as compared with 8.8% of revenue in 2014, due to the growth in volumes in North America and Europe.

**Centralized costs** not allocated among segments increased by €6.0 million, as a result of the increased centralization of IT costs and the launch of projects at the Group level.

#### 4.1.2.6 Financial income and expense

The Group's financial result was -€31.0 million in 2014 and -€31.9 million in 2015. Negative foreign exchange impacts, mainly related to monetary assets in CIS currencies, were

offset by a decrease in interest paid, due to the general decline in interest rates.

#### 4.1.2.7 Income Tax Expense

Income tax expense for 2015 was €48.9 million, a 20.1% increase as compared with €40.7 million in 2014.

This increase is essentially due to the increase in the Group's operating income, as well as the gain from the sale of the Houston, Texas site. In addition, applying IAS 12.41 on the recognition of deferred tax assets for temporary differences between the assets' tax basis (calculated at the rate on the balance sheet date) and their book value in the financial statements (calculated at the historical rate) led to the recognition of deferred income tax expense of €4.3 million, as compared with €11.6 million in 2014). This expense was due to foreign currency translation on the non-monetary assets and liabilities of entities whose functional currency is not the local currency, in the context of significant devaluation of the Russian and Ukrainian currencies (see Note 8, "Income Tax," in Section 5.2, "Notes to the Consolidated Financial Statements").

#### 4.1.2.8 Net Profit

The Group's net profit was €83.5 million in 2015, as compared with €63.2 million in 2014. Net profit attributable to non-controlling interests was €0.3 million in 2015 as compared with €2.0 million in 2014. This significant decrease was due to the acquisition of the minority interests in EasyTurf, with the result that EasyTurf is now reported in full net profit attributable to owners of the parent company.

As a result, net profit attributable to owners of the Company was €83.3 million in 2015 and €61.2 million in 2014.

## 4.2 INVESTMENTS

### 4.2.1 MAIN INVESTMENTS IN 2014 AND 2015

Cash used in investing activities was €46.3 million in 2015, as compared with €262.9 million in 2014.

The level of investment in tangible and intangible fixed assets remained relatively stable over the period. Investments in property, plant and equipment include acquiring and constructing new factories as well as purchasing new equipment following the acquisition or creation of new entities. They also include "ongoing

investments," which consist of all investments in property, plant and equipment other than those relating to new factories and acquisitions. The Group's objective is to maintain its ongoing investments in the order of approximately 3.5% of annual consolidated net revenues.

The table below shows the Group's main investments in 2015 and 2014.

<i>(in millions of euros)</i>	For the year ended December 31,	
	2015	2014
Acquisition of subsidiaries net of cash acquired	2.3	176.7
Acquisition of property, plant and equipment	80.6	87.7
Proceeds of disposals and dividends received	(36.2)	(1.5)
Impact of change in the scope of consolidation	0.4	-
<b>Cash flows from investing activities</b>	<b>46.3</b>	<b>262.9</b>

#### 4.2.1.1 Main Investments in 2015

The Group's main investments in 2015 were as follows:

- *EMEA*: installation of a new LVT production line in Jaslo, Poland; deployment of new SAP-platform logistics modules at the industrial sites and warehouses;
- *North America*: roll-out of the SAP IT platform to all of the vinyl-flooring production and storage sites;
- *Asia-Pacific*: installation of a new homogeneous-flooring production line at the Beijing site; and
- *Sport Surfaces*: increased fiber production capacities for artificial turf.

#### 4.2.1.2 Main Investments in 2014

The Group's main investments in 2014 were as follows:

- *EMEA*: successive acquisitions of Gamrat, in Poland, and of the Desso group, based in the Netherlands (see Section 4.1.1.7, "Acquisitions");
- *North America*: In 2014, the Group completed its consolidation of the manufacture of vinyl tile flooring (VCT and LVT) at its Florence, Alabama site in order to optimize the use of its production capacity, improve efficiency and reduce costs. This led to the closure of the Houston, Texas plant. In addition, the Group acquired the building that houses the division's support services;
- *Deployment and standardization of SAP*: In 2014, the Group continued to roll out its standardized SAP platform in North America, in the CIS countries and in APAC; and

- *Asia Pacific*: acquisition of industrial assets for the production of heterogeneous resilient flooring in Beijing, China.

### 4.2.2 PRINCIPLE INVESTMENTS UNDERWAY

The principal investments underway in 2016 are continuations of the previous year's projects, in particular the launch of the LVT production line in Poland and of the homogeneous vinyl flooring production line in China. The roll-out of SAP to the recently acquired companies (Desso and Tandus) is also planned in the coming years.

These investments are financed by available cash as well as by drawdowns from the Group's credit facilities. For more information on the Group's credit facilities, see Section 4.3, "Liquidity and Capital Resources".

### 4.2.3 PRINCIPLE FUTURE INVESTMENTS

The Group continually seeks new investment opportunities, rigorously analyzing the potential for a strong return on its investment. With respect to investments, the Group's main objectives are to continually improve competitiveness, reinforce operational excellence, and acquire and modernize equipment in order to support the Group's expected growth.

The Group intends to pursue a strategy of external growth based on two main objectives: geographical development and the expansion of its product lines. For more information, see Section 1.3, "Strategy".

### 4.3 LIQUIDITY AND CAPITAL RESOURCES

For a description of the Company's share capital and financial structure, see Notes 7.2, "Net Debt," 7.3, "Other Financial Liabilities," and 9.1, "Share Capital" to the Group's consolidated financial statements included in Section 5.2, "Notes to the Consolidated Financial Statements."

#### 4.3.1 OVERVIEW

The Group generates significant net cash from its operating activities. This cash flow represents the Group's principal source of liquidity and is more than sufficient to finance its ongoing investments.

The Group's objective is to maintain its ongoing investments in the order of approximately 3.5% of consolidated net revenues. Current investments are defined as investments in tangible and intangible assets other than acquisitions and factory construction.

Investments in the Group's growth (primarily factory construction and acquisitions) are financed through debt and the Group's own financial resources, in line with its policy of maintaining a sound financial structure. The Group's most recent significant acquisition, the purchase of Desso in December 2014, was financed through a drawdown from its syndicated credit line.

As of December 31, 2015, the Group's net debt was €482.2 million, a decrease of €113.2 million from net debt of €595.4 million as of December 31, 2014. The Group's

shareholders' equity attributable to equity holders of the parent totaled €834.8 million as of December 31, 2015, as compared with €720.6 million as of December 31, 2014, resulting in a ratio of net debt to shareholders' equity of 0.58x (as compared with 0.83x as of December 31, 2014) and a ratio of net debt to adjusted EBITDA for the 12-month period ended December 31, 2015 of 1.7x (as compared with 2.2x for the 12-month period ended December 31, 2014).

As of December 31, 2015, cash and cash equivalents totaled €67.9 million, as compared with €135.1 million as of December 31, 2014. In addition, the total amount available under the Group's bank loans as of December 31, 2015 was €710.1 million.

In 2015, the Group decided to distribute a dividend of €24.1 million to its shareholders based on 2014 net profit.

The Group believes its available credit lines are sufficient to cover its liquidity needs for the next fiscal year.

#### 4.3.2 ANALYSIS OF CASH FLOW

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
<b>Cash flows from operating activities</b>		
Net profit before tax	132.4	103.9
Adjustments for:		
Depreciation and amortization	125.5	100.8
(Gain) loss on sale of fixed assets	(27.2)	(0.8)
Net finance costs	31.9	31.0
Change in provisions and other non-cash items	(0.2)	3.1
Share of profit of equity accounted investees (net of tax)	0.3	1.7
<b>Operating cash flow before working capital changes</b>	<b>262.7</b>	<b>239.7</b>
<b>Changes in working capital</b>	<b>8.7</b>	<b>10.3</b>
<b>Cash generated from operations</b>	<b>271.4</b>	<b>250.0</b>
<b>Other operating items (tax and financial items)</b>	<b>(54.9)</b>	<b>(71.4)</b>
<b>NET CASH (USED IN) / FROM OPERATING ACTIVITIES</b>	<b>216.5</b>	<b>178.6</b>
<b>NET CASH FROM / (USED IN) INVESTMENT ACTIVITIES</b>	<b>(46.3)</b>	<b>(262.9)</b>
<b>NET CASH FROM / (USED IN) FINANCING ACTIVITIES</b>	<b>(240.4)</b>	<b>119.2</b>
<b>NET INCREASE / (DECREASE) IN CASH AND CASH EQUIVALENTS</b>	<b>(70.2)</b>	<b>34.9</b>
Cash and cash equivalents, beginning of period	135.1	96.7
Effect of exchange rate fluctuations on cash held	3.0	3.5
<b>CASH AND CASH EQUIVALENTS, END OF PERIOD</b>	<b>67.9</b>	<b>135.1</b>

#### 4.3.2.1 Cash flows from operating activities

Net cash from operating activities was €262.7 million in 2015, an increase of €23 million as compared with 2014. This increase was primarily due to the improvement in adjusted EBITDA, as discussed in Section 4.1.1.8, "Presentation of Accounting and Financial Information."

Changes in the Company's working capital requirements had a positive effect on net cash flow from operating activities of €8.7 million in 2015, as compared with €10.3 million in 2014. This change is explained mainly by the slowdown in business in the CIS countries, leading to a reduction in working capital requirements, as well as by improvements seen in certain divisions in the number of selling days in the trade receivables line item.

### 4.3.3 FINANCIAL DEBT

#### 4.3.3.1 Summary of Net Financial Debt

As of December 31, 2015, the Group's net debt was €482.3 million. The Group's gross debt as of the same date was €550.2 million. Net financial debt decreased in 2015, principally due to cash flows from operating activities.

#### 4.3.3.3 Gross Financial Debt

As of December 31, 2015, the Group's gross debt was composed principally of a fully drawn term loan of €450 million and a syndicated revolving credit facility with a maximum amount of €650 million, of which €81.7 million had been drawn down as of December 31, 2015. The table below presents the Group's total gross debt as of the dates indicated.

	Dec. 31, 2015		Dec. 31, 2014	
	Long term	Short term	Long term	Short term
Unsecured bank loans	536.6	4.5	689.0	36.9
Other unsecured loans	-	0.2	0.1	0.2
Unsecured bank overdrafts	-	4.0	-	2.8
Obligations under financial leases	4.0	0.9	1.3	0.3
<b>Interest-bearing loans and debts</b>	<b>540.6</b>	<b>9.6</b>	<b>690.4</b>	<b>40.2</b>
<b>Total interest-bearing loans and debts</b>	<b>550.2</b>		<b>730.6</b>	

On June 22, 2015, Tarkett refinanced its €450 million revolving credit facility ("RCF") dated June 27, 2011 and expiring in June 2016 and its €85.0 million and USD 34.0 million amortizing term loan expiring in May 2016. The new financing consists of a €650 million multi-currency revolving credit facility expiring in June 2020.

As of December 31, 2015, the Group's principal sources of debt were the following:

- **Revolving Credit Facility ("RCF"):** The Group has a €650 million floating rate revolving multi-currency credit facility, referred to above, that includes two swingline loans in euros and US dollars for a total amount of €60 million. Under this loan, the Group is required to comply with the financial covenants described in Section 4.3.4, "Revolving Syndicated Multi-Currency Credit Facility".
- **October 2013 Term Loan:** The Group subscribed a €450 million five-year syndicated loan agreement, which includes a €360 million tranche and a €90 million tranche, in order to grow its capacity and to increase the average maturity of the Group's borrowings. Under this loan, the Group is required to comply with the financial covenants described in Section 4.3.5, "October 2013 Term Loan."

#### 4.3.2.2 Cash Flow Used in Investing Activities

Cash flow used in investing activities decreased from €262.9 million in 2014 to €46.2 million in 2015. Both the acquisition of Desso for €150.2 million and the sale of the Houston, Texas site for €35.7 million took place in 2014. The Group's main investments during the period are described in Section 4.2, "Investments."

#### 4.3.2.3 Cash from Financing Activities

Net cash flows coming from financing activities represented a net surplus of €240.4 million in 2015. This surplus resulted primarily from cash flows from operating activities, which were sufficient to repay certain drawdowns on the Revolving Credit Facility.

#### 4.3.3.2 Cash and cash equivalents

As of December 31, 2015 and December 31, 2014, cash and cash equivalents totaled €67.9 million and €135.1 million, respectively. As of December 31, 2015, available cash was located primarily in Serbia (€17.0 million) and in Canada (€10.6 million). As of December 31, 2014, available cash was located primarily in Serbia (€23.7 million), in Canada (€21.7 million), in China (€14.7 million) and in the Group's holding company (€37.3 million).

- **Factoring agreement:** This revolving financing arrangement is the Group's only significant source of secured financing. It takes the form of a pledge of special purpose bank accounts dedicated to recovery of assigned receivables. These receivables (*créances Dailly*) are recorded in accounts receivable for purposes of calculating working capital requirements (with an offsetting liability being recorded on the Group's balance sheet). The Group can borrow up to €55 million

under this facility at a floating rate of one-month Euribor plus 0.55%, but uses the facility only to supplement its other sources of funds. As a result, there were no amounts outstanding under the facility as of December 31, 2015 or December 31, 2014. The factoring agreement was amended on March 11, 2015 to permit the assignment of certain Spanish-law and German-law receivables.

The following table provides a summary of the maturities and interest rates applicable to the Group's debt as of December 31, 2015:

Dec. 31, 2015	Drawdown currency	Interest rate	Total	12 months or less until 12/31/2016	2 years until 12/31/2017	3 to 5 years until 12/31/2020	More than 5 years
<b>Unsecured loans</b>							
European Term Loan	EUR	0.4% -2.0%	457.0	2.3	2.3	452.4	-
European Revolving Credit Facility	EUR	0.0%	-	-	-	-	-
European Revolving Credit Facility	USD	0.9%	81.7	-	-	81.7	-
Other bank loans	EUR-BRL	1.7%-4.8%	2.4	2.2	0.2	-	-
<b>Sub-total bank loans</b>			<b>541.1</b>	<b>4.5</b>	<b>2.5</b>	<b>534.1</b>	<b>-</b>
Other loans	EUR	0.5%	0.2	0.2	-	-	-
Bank overdrafts	EUR-USD-SEK	0.5% -5.5%	4.0	4.0	-	-	-
Obligations under financial leases			4.9	0.9	1.1	2.9	-
<b>Interest-bearing loans</b>			<b>550.2</b>	<b>9.6</b>	<b>3.6</b>	<b>537.0</b>	<b>-</b>

#### 4.3.4 REVOLVING SYNDICATED MULTI-CURRENCY CREDIT FACILITY

The Group's principal source of financing is the RCF, which is available for a term of five years as from June 22, 2015, under which Tarkett is the borrower. This credit line had USD 89 million (€81.7 million) outstanding as of December 31, 2015, as compared with €156.3 million as of December

31, 2014. The RCF includes a €650 million floating-rate credit line that can be drawn in several currencies for periods of between two weeks and six months, and two swinglines in an aggregate amount of €60 million, which can be drawn for periods of one to five days.

##### Interest Rates under the RCF

The effective interest rate for each drawdown under the RCF is composed of a base rate plus an applicable margin. The base rate is Euribor for drawdowns in Euro and Libor

for drawdowns in US dollar. The applicable margin is determined based on the Group's leverage ratio (as defined below) at the end of the most recent half-year period. The relationship between the leverage ratio and the applicable margin is summarized in the table below.

Leverage Ratio	Applicable Margin
≤1.00x	0.45%
1.00x<1.50x	0.55%
1.50x<2.00x	0.60%
2.00x<2.50x	0.75%
2.50x<3.00x	0.90%
3.00x<3.50x	1.25 %

The last tranche, from 3.00 to 3.50, applies only under certain conditions, described below. *Financial Covenants*

The RCF requires the Group to comply with several financial covenants so long as the funds remain available. The same ratios are applicable to the Group's October 2013 term loan agreement. Failure to comply with these covenants could result in the loan's repayment being accelerated.

##### Leverage Ratio

The first financial covenant limits the Group's indebtedness and leverage. Under this covenant, known as the "leverage ratio", the Group's net debt as of the end of each half-year must be less than three times its adjusted EBITDA (as defined in the loan agreement) over the twelve months preceding the end of the relevant half-year. However, under the RCF, net debt of up to three and a half times adjusted EBITDA is permitted for a limited time if the ratio is the result of an acquisition or investment of more than

€50 million. As of December 31, 2015 and December 31, 2014, the Group was in compliance with this covenant, with leverage ratios of, respectively, 1.7x and 2.2x adjusted EBITDA over the period.

#### Net Interest Cover

The second financial covenant concerns the Group's "net interest cover", which is the ratio of adjusted EBIT to net

interest expense. This covenant requires the Group to maintain gross operating income (adjusted EBIT) of at least 2.5 times its total net interest on financial debt and cash. As of the end of 2015 and the end of 2014, the Group was in compliance with this covenant, with a ratio of net interest cover to adjusted gross operating income ("adjusted EBIT") of, respectively, 13.1x and 13.9x.

The table below presents the status of the Group's financial covenants as of December 31, 2015 and December 31, 2014.

<i>(in millions of euros)</i>		Required ratio	As of December 31,	
Definition <sup>(1)</sup>			2015	2014
Actual Ratio				
Leverage Ratio	Net Debt to Adjusted EBITDA	<i>Ratio &lt;3.0x</i>	1.7x	2.2x
Net Interest Cover	Adjusted EBIT to net interest expense	<i>Ratio &gt;2.5x</i>	13.1x	13.9x

#### Change of Control Provisions

The RCF syndicated credit facility contains a change of control clause in the event that the Deconinck family ceases to control the Company. For this purpose, the Deconinck family is defined as "Ms. Catherine la Bonnardière (née Deconinck), Mr. Bernard-André Deconinck, Mr. Didier Deconinck, Mr. Eric Deconinck and their children and

spouses, acting individually or collectively and directly or indirectly through a company held exclusively by them." If the Group were to fail to reach an agreement with its banks in such case, each lender would have the right to demand immediate repayment of its portion of the loan. The word "control" as used in this clause is defined by the French Commercial Code and includes actions "in concert", as defined in such Code.

#### 4.3.5 OCTOBER 2013 TERM LOAN

The Company signed a term loan (the "Euro Term Loan Facility" or "ETLF") with a group of banks on October 16, 2013, with respect to Tranche A, and on December 6, 2013, with respect to Tranche B. The total amount of the facility is €450 million, of which €360 million is in Tranche A and €90 million is in Tranche B. Tranche A was used in 2013 and Tranche B was used in 2014.

The ETLF's maturity date is five years as from the signature date of Tranche A.

The agreement contains, in all material respects, the same covenants as the RCF. However, the leverage ratio is strictly limited to a maximum of 3.0x.

The base interest rate is fixed in accordance with the interest period chosen by the borrower (three-month or six-month Euribor). The effective interest rate is equal to Euribor plus an applicable margin based on the Group's leverage ratio for the most recent half-year period. The relationship between the leverage ratio and the margin applicable to the ETLF is summarized in the table below.

Leverage Ratio	Applicable Margin
$\leq 1.00x$	1.25 %
$1.00x < 1.50x$	1.50 %
$1.50x < 2.00x$	1.75 %
$2.00x < 2.50x$	2.00 %
2.50x and above	2.25 %

The ETLF agreement contains a change of control clause that can result in acceleration of repayment. The change of control provision will apply only in the event that the Company is controlled by a person or "group in concert" other than the Deconinck family. The mere loss of control by the Deconinck family, without acquisition of control by a third party, will not trigger the provision.

#### 4.3.6 OTHER LIABILITIES

The minority shareholders of Morton Extrusionstechnik (MET) and FieldTurf Benelux BV (formerly AA SportSystems) hold put options that enable them to require the Group to acquire their respective shares. The Group fully consolidates these companies in its financial statements, as if the minority shares had been acquired by

Tarkett. The Group records the present value of the estimated exercise price of the put options under "other liabilities" in its balance sheet. As of December 31, 2015, the total amount of other liabilities corresponding to these options was €4.4 million.

### 4.3.7 SHAREHOLDERS' EQUITY

Shareholders' equity was €836.7 million and €725.8 million as of December 31, 2015 and December 31, 2014, respectively. Changes in shareholders' equity in 2015 resulted primarily from changes in the Group's net income, as described in Section 4.1.2.8, "Net Income".

### 4.3.8 RETURN ON CAPITAL EMPLOYED

In order to monitor its profitability, the Group uses an indicator known as return on capital employed, or "ROCE", which measures the Group's ability to provide a return on funds made available to it by its shareholders and lenders.

Operating income before financial items and taxes is calculated as follows:

<i>(in millions of euros)</i>	For the year ended December 31,	
	2015	2014
<b>Result from operating activities</b>	<b>164.6</b>	<b>136.6</b>
<b>Exceptional items</b>		
Restructuring costs	8.9	26.8
Gains/losses on asset sales/impairment	(26.6)	1.3
Unusual items from business combination	10.9	3.9
Share-based payment	2.0	2.7
Consulting fees and other provisions	1.6	4.3
<b>Operating income before financial items and taxes (A)</b>	<b>161.4</b>	<b>175.5</b>

Capital employed is calculated as follows:

<i>(in millions of euros)</i>	For the year ended December 31,	
	2015	2014*
Property, Plant and Equipment	499.4	435.6
Intangible Assets	124.2	115.5
Goodwill	538.4	472.6
Working capital	276.6	240.8
<b>Total capital employed (B)</b>	<b>1,438.6</b>	<b>1,264.5</b>

\*Restated for the property, plant and equipment of the Desso group, acquired on December 31, 2014

The Group's ROCE is as follows:

<i>(in millions of euros)</i>	For the year ended December 31,	
	2015	2014
Return on capital employed (ROCE) (A/B)	11.2 %	13.9 %

### 4.3.9 OFF-BALANCE SHEET COMMITMENTS

#### ■ Lease commitments

The Group's lease commitments mainly relate to buildings, vehicles, computer equipment and software, as well as offices. Total future minimum lease payments pursuant to the Group's operating leases totaled €51.4 million as of December 31, 2015, and included the following:

Operating leases	Dec. 31, 2015	Dec. 31, 2014
<b>Future minimum lease payments</b>		
Less than 1 year	22.1	20.9
1 to 5 years	26.4	32.2
More than 5 years	2.9	3.5
<b>Total future minimum lease payments</b>	<b>51.4</b>	<b>56.4</b>

The total net carrying amounts of assets under financial leases included in the Group's consolidated balance sheet totaled €4.0 million as of December 31, 2015, and the present value of future minimum payments was €4.9 million.

■ *Guarantees and Off-Balance Sheet Commitments*

The following table presents guarantees given by the Company as of December 31, 2015 (including those relating to financial debt already included on the balance sheet), as well as guarantees received from customers:

<b>Group Off-Balance Sheet Commitments</b> <i>(in millions of euros)</i>	<b>Year ended</b> <b>December 31, 2015</b>	<b>Year ended</b> <b>December 31, 2014</b>
Federal Insurance Company	(57.0)	(62.3)
Factoring	-	-
Swedish retirement insurance company (Pri-Pensionsgaranti)	(19.4)	(18.4)
Other	(11.0)	(7.3)
Tarkett SA parent company guarantees	(87.4)	(88.1)
Commitments given	(107.8) <sup>(1)</sup>	(102.4) <sup>(1)</sup>
Corporate or personal guarantees from clients or other debtors	5.2	6.1
Commitments received	5.2	6.1

<sup>(1)</sup>Includes a parent company guarantee given by Tarkett Inc.

The foregoing commitments include the following:

- a counter guarantee provided to Federal Insurance Company ("FIC") pursuant to a general indemnity agreement for a maximum amount of USD 75.0 million to permit FIC to issue bonds on behalf of FieldTurf Tarkett Inc. As of the end of the fiscal year, the amount outstanding subject to this guarantee was the dollar equivalent of €57.0 million;
- a guarantee covering 50% of two credit lines for a maximum €5 million each granted to the Group's Laminate Park joint venture;
- a guarantee given to the retirement insurance company Pri-Pensions to insure Tarkett AB's employee benefit commitments in the amount of SEK 178.6 million;
- a guarantee for raw materials provided by a supplier of the Group's subsidiary MET in order to secure its debt for an amount of up to €5 million, of which €2.8 million was used as of December 31, 2015;
- a security on special purpose accounts given by Tarkett S.A. to a lending bank under an assignment of receivables credit line for a maximum of €55.0 million. However, no drawdowns under this guarantee were outstanding as of year-end; and
- a guarantee provided by Tarkett S.A. to certain lenders to Tarkett Limited (United Kingdom), Desso Holding (Netherlands), and FieldTurf Poligras (Spain) in order to

enable them to obtain financing in an amount of €5.6 million, as of year-end 2015.

■ *Other*

One of the Group's subsidiaries is a defendant in a group of cases in the United States relating to injuries allegedly caused by asbestos. In addition to provisions recorded, the Group maintains two funds (for a total amount of USD 22.5 million as of December 31, 2015) as well as insurance policies in respect of this litigation and the possibility of additional cases being brought. For more information, see Section 4.5, "Legal Proceedings."

In addition, the Group is currently engaged in a proceeding to rectify the terms of a 2008 sale of a preferred share of FieldTurf Tarkett Inc. by Tarkett France to Tarkett Inc. for a total of USD 36.2 million. Pursuant to Canadian tax legislation, the capital gains realized in connection with the Tarkett France transaction should have been treated by Tarkett Inc. as a distribution of dividends subject to withholding tax. Tarkett Inc. and Tarkett France filed a motion for rectification of documents and declaratory judgment before the Quebec courts in order to reduce the price of the sale by USD 21.3 million. Given the timeframe and the uncertainty as to whether the requested rectification will be granted, the Group's financial statements as of December 31, 2015 include a provision for CAD 6 million.

## 4.4 MATERIAL CONTRACTS

See Section 4.3.4, "Revolving Syndicated Multi-Currency Credit Facility" and Section 4.3.5, "October 2013 Term Loan."

## 4.5 LEGAL PROCEEDINGS

The Group may be involved in legal, administrative or regulatory proceedings in the ordinary course of its business. The Group sets aside a provision for the cases that it considers likely to result in financial loss for Tarkett or one of its subsidiaries.

The aggregate amount of provisions relating to legal proceedings was €14.3 million as of December 31, 2015.

As of the date of this Registration Document, apart from the matters described below, the Group is not aware of any governmental, legal or arbitration proceedings (including any threatened or suspended proceedings) that could have or have had in the past 12 months a material effect on the Group's financial condition or the profitability of Tarkett or the Group.

### **Germany**

#### *Appraisal Procedure Relating to Valuation of Tarkett Holding GmbH Shares*

In August 2006, a former minority shareholder of Tarkett AG (now known as Tarkett Holding GmbH) initiated an appraisal procedure relating to the valuation of Tarkett Holding GmbH shares before the Court of Frankenthal in Germany. The purpose of the procedure is to determine whether the share price paid by Tarkett S.A. to former minority shareholders of Tarkett AG in connection with the privatization of Tarkett AG in 2005 was appropriate. Fifty-five shareholders are currently party to the procedure. According to the initial opinion of a court-appointed expert in October 2011, the share price paid was insufficient. After objections by the parties, the expert submitted a supplemental report in August 2012, in which the value of the shares was determined to be higher than the value initially presented in the October 2011 report. Following further objections, the court ruled on July 1, 2013 that the share price paid by Tarkett should have been €1.62 higher than the share price of €19.50 that was actually paid. As the procedure covers 1,150,000 shares, the potential impact of this decision is approximately €1.9 million, excluding interest. Tarkett has filed an appeal, pending which the judgment cannot be executed.

### **France**

#### *French Competition Authority Investigation*

In late March 2013, the French Competition Authority initiated an investigation of several flooring manufacturers, including Tarkett, in relation to potentially anti-competitive practices in the French vinyl flooring market. To date, the investigation is continuing, and it is currently unclear when it will be concluded. It is too early for the Group to evaluate the potential consequences of the investigation. In the event the Group were to be found liable, the financial consequences could be significant.

### **United States**

#### *Asbestos Litigation*

Domco Products Texas Inc. ("Domco"), a subsidiary that Tarkett acquired in 1991 (then known as Azrock Industries ("Azrock")), is subject to several lawsuits related to its production of vinyl floor tiles containing asbestos between 1940 and 1982. As of December 31, 2015, there were 1,024 pending lawsuits filed against Domco in multiple U.S. jurisdictions. Of the 1,024 lawsuits pending, 51 are cases involving both an identification of Azrock products and a diagnosis of mesothelioma. Among all of the claims filed over approximately the last 15 years, three reached the verdict stage—two of which were granted in favor of Domco, and one of which was granted to a plaintiff in the State of Washington, requiring Domco to pay an amount of USD 1,071,705 (USD 371,000 after offsets).

As of December 31, 2015, Domco had succeeded in obtaining dismissal of 1,002 cases since

2010, and had entered into approximately 15 to 42 settlements per year since 2010 for an aggregate amount of USD 12.5 million (or an average of USD 2.1 million per year). Domco maintains insurance (including cost-sharing policies) to cover the liabilities associated with these claims. Domco also covers a portion of these expenses itself. Domco is currently involved in a dispute with an insurer that has refused coverage. For further information on the Group's management of these cases, see Section 4.3.9, "Off-Balance Sheet Commitments".

## 4.6 FUTURE PROSPECTS

For purposes of preparing its internal budgets and planning its operations and investments, the Group makes estimations regarding outlook and sets certain objectives relating to its results of operations. These estimations and the Group's goals, summarized below, are based on information, assumptions and estimates that the Group's management considers to be reasonable as of the filing date of this Registration Document. These estimations and objectives are not projections or profit forecasts, but result from the Group's strategic orientation and action plan.

### 4.6.1 MARKET TRENDS

For a detailed analysis of the Group's results of operations in 2014 and 2015, see Section 4.1.2, "Comparison of Results of Operations for the Years Ended December 31, 2015 and 2014".

### 4.6.2 MEDIUM-TERM OUTLOOK

#### 4.6.2.1 Macro-Economic Climate

The Group expects its growth to depend to a certain extent on increases in gross domestic product ("GDP") in the main geographic regions in which it operates.

According to IMF estimates from January 2016:

In the EMEA segment, GDP in Western Europe is expected to grow moderately, by 1.7%, in 2016. This trend is expected to continue in 2017, with an increase of approximately 1.7%.

The IMF estimates that the average annual GDP growth rate for North America during the 2015-2018 period should be slightly over 2.5%.

In the CIS, APAC and Latin America segment, the average annual GDP growth rate is expected to be different in each region. In Russia, in an unfavorable macroeconomic environment, the IMF estimated that GDP will shrink by approximately 1.0% in 2016, with an expected return to moderate growth of 1% in 2017. In China, growth is expected to continue, although the estimates were revised downward: growth of 6.3% for 2016 and 6.0% for 2017 is predicted. The Brazilian economy is expected to shrink significantly (3.5%) in 2016, for the second consecutive year, and to stabilize in 2017 (with 0% growth).

#### 4.6.2.2 Outlook for the Group

Thanks to the quality of the Group's products, its broad geographic footprint and its exposure to diversified markets, the Group believes that it is well positioned to continue to grow over the coming years. The Group's medium-term objective is to grow its average annual revenues at a higher rate than the average annual GDP growth of the regions in which it operates. In the macroeconomic environment of early 2016, characterized by rapid and significant changes in key external variables, the Group believes that this goal may be difficult to achieve

in the short term in all regions, in particular in the CIS countries.

- EMEA segment: given the IMF's forecasts of moderate GDP growth in the European region and the continuing efforts by governments to control public spending, the growth outlook for the flooring market is modest, in particular for the commercial sector. As a result, organic growth is expected to be weaker in 2016 than in 2015. However, since the Group is well positioned in the high-end vinyl tile (LVT) market, and since it strengthened its offerings of commercial carpet with the acquisition of the Desso group, it could see moderate growth in sales volumes.
- In the North America segment, the Group distinguishes between the residential and commercial markets. In 2015, residential activity did not reflect the improvement in the new construction market, but instead shrank as compared with the previous year. Therefore, short-term perspectives for growth in sales remain modest, but favorable overall. On the commercial market, the Group believes that it will continue to capitalize on the synergies generated by combining the Tandus and Centiva sales forces to jointly offer carpet tiles and LVT to a large customer base. The normalization of vinyl tile (VCT) production, which was transferred from Houston, Texas to Florence, Alabama in 2014, could result in recovery of lost sales volumes on this product line. The Group also expects to consolidate its position in the commercial market as a result of its wide geographic exposure across the United States, its significant capacity for innovation, its environmental leadership as well as its close relationships with customers.
- In the CIS, APAC and Latin America segment, as indicated above, growth in GDP is expected to vary widely by region.
  - The Group believes that it is very well positioned in the CIS countries despite the uncertain short-term prospects resulting from the economic situation, in particular due to its product offerings, which are tailored to the expectations of local customers, its close relationships with the principal distributors in these countries, its unique local production capacities as compared with its competitors, and its significant logistics resources (i.e., its distribution platforms). Furthermore, in Russia, two-thirds of residential flooring surfaces are in need of substantial renovation, translating into roughly two billion square meters of potential demand (source: Rosstat - the Russian government statistics agency), which should enable the Group in the future to take advantage of significant growth opportunities. Moreover, the Group pursues its policy to systematically adjust prices to compensate for the exchange rate fluctuations between the Euro / Russian ruble. For example, in December 2015, price increases of 5% to 8%

were applied in reaction to the decline in the ruble. These increases were in addition to four other price adjustments over the course of 2015. Based on activity levels during the first quarter of 2016, the Group will continue to adjust sale prices and production and distribution costs.

- In addition, in Latin America, due to the condition of the Brazilian market the Group remains quite prudent with respect to growth potential. Nevertheless, the Group is well positioned, due to its local production of luxury vinyl tiles (LVT), which is a growing segment of this market.
- With respect to Asia Pacific, the reinforcement of its local manufacturing presence should enable the Group to take advantage of this region's growth potential by continuing to promote the use of resilient flooring, and in particular products for commercial users. These offerings are complemented by carpet tiles for offices, which are produced locally.
- The Sports Surfaces segment, which mainly comprises sales in North America, should continue to benefit from growth in this region, as well as from the continued replacement of installed fields. Thanks to the expansion of its product offering following the successive acquisitions of Renner (an athletic track installation company), of the assets of California Tracks (also an athletic track installation company), and of the Desso Group, the Group's sales of sports surfaces should continue their favorable development, after recording dynamic 17.2% growth in 2015.

See Chapter 1, "Presentation of the Group," for a discussion of the flooring industry and its competitive environment, as well as for a more detailed analysis of the structural factors discussed above. For a detailed discussion and analysis of the factors affecting the Group's results, including macro-economic conditions, variations in raw material prices, exchange rate fluctuations and changes in the scope of consolidation, see Section 4.1.1.2, "Principal Factors Affecting the Group's Results of Operations".

In 2015, the Group maintained a solid adjusted EBITDA margin of 10.5%. The continuation of the World Class Manufacturing ("WCM") program launched in 2009 generates continued productivity gains, which offset the evolution of inflation and salaries and keep production costs competitive (see Section 1.6.2, "Manufacture of the Group's Products"). In addition, specific restructuring and industrial reorganization plans were implemented to reinforce the competitiveness of certain product lines, in particular the wood flooring business in Western Europe and the production of VCT tiles in the United States. Lastly, in 2015 the Sports Surfaces segment cemented the turnaround begun in 2014 and now shows favorable growth prospects (see Section 4.1.2, "Comparison of Results of Operations for the Years Ended December 31, 2015 and December 31, 2014"). Due to the above factors, the Group's objective is to maintain a solid EBITDA margin.

During the presentation of 2015 results, the Management indicated that the achievement of its medium-term

objective of 12%, communicated at the end of 2013, has been rendered more difficult in the short-term given the changing economic condition of the CIS countries.

The Group's external growth strategy should also contribute to an increase in revenues. Although it is always difficult to assess the impact of future acquisitions given the importance of identifying targets and partners and successfully executing transactions, the Group's objective over the 2013-2016 period is to complete acquisitions that will allow it to broaden and complement its existing product lines while consolidating its presence in certain markets and expanding into new regions. The acquisitions of Gamrat, Renner (LER) and Desso in 2014, in addition to the acquisition of the assets of California Tracks, added the equivalent of €240 million in revenue, or 80% of the Group's objective for the 2013-2016 period.

Through its strong cash generation capacity as well as its disciplined approach to external growth, the Group seeks to keep its level of debt below two times its adjusted EBITDA over the 2013-2016 period, excluding transformational acquisitions and after taking into account the Group's dividend distribution policy (see Section 5.7, "Dividend Policy").

Ongoing investments represented 2.9% of consolidated net revenues in 2015 and 3.2% in 2014. The Group defines "ongoing investments" as investments in tangible and intangible assets, other than those relating to new factories and acquisitions. In order to address increased demand and improve manufacturing processes, the Group aims to maintain its annual ongoing investments in the order of 3.5% of consolidated net revenues during the 2016-2017 period.

*The data, assumptions and estimates set forth herein may change as a result of uncertainties related to, among other things, the Group's economic, financial, competitive or regulatory environment or as a result of other factors of which the Group may be unaware as of the filing date of this Registration Document. In addition, the occurrence of one or more of the risks described in Chapter 6, "Risk Factors," could negatively affect the Group's business, income, financial situation or prospects, and hence undermine its ability to meet the objectives set forth in this section. Furthermore, the estimates expressed above are based on the assumed success of the Group's strategy as presented in Section 1.3, "Strategy". Therefore, the Group can give no assurances or provide any guarantee that the objectives set forth above will be met, and does not undertake to publish corrections or communicate updates to this information in the future.*

5.6	TABLE OF SUBSIDIARIES AND EQUITY INVESTMENTS.....	189			

## 5.1 CONSOLIDATED FINANCIAL STATEMENTS AS OF DECEMBER 31, 2015

The Group's Consolidated Financial Statements as of December 31, 2015, prepared in accordance with the IFRS as adopted by the European Union, appear in the section below. The related statutory auditors' report is presented in Section 5.9 "Statutory Auditors' report on the Group's financial statements".

The Consolidated Financial Statements and Annual accounts of the Group as of December 31, 2014 and the related statutory auditors' reports appear respectively on pages 118 and 182 (for the Consolidated Financial Statements) and pages 163 and 183 (for the Annual accounts) of the April 2, 2015 Reference Document filed with the AMF under the number R.15-016 and are incorporated by reference in the present Reference Document.

The Consolidated Financial Statements and Annual accounts of the Group as of December 31, 2013 and the related statutory auditors' reports appear respectively in pages 206 and 265 (for the Consolidated Financial Statements) and on pages 296 and 319 (for the Annual accounts) of the April 17, 2014 Reference Document filed with the AMF under the number R.14-018 and are incorporated by reference in the present Reference Document.

## NOTE 1 - BASIS OF PREPARATION

### 1.1 GENERAL INFORMATION

Tarkett's consolidated financial statements as of and for the year ended December 31, 2015 comprise the Company and its subsidiaries (hereafter the "Group") as well as its interests in associates and joint ventures.

The Group is a leading global flooring company, providing a large range of flooring and sports surface solutions to business and residential end-users.

The Group completed its initial public offering on November 21, 2013, and is listed on Compartment A of Euronext Paris, ISIN code: FR00004188670 - Stock symbol: TKTT.

The Group's registered office is located at *1 Terrasse Bellini - Tour Initiale - 92919 Paris La Défense, France.*

The Group's consolidated financial statements as of and for the year ended December 31, 2015 were finalized by the Management Board on February 16, 2016 and reviewed by the Supervisory Board on February 18, 2016. They will be submitted for shareholder approval on April 26, 2016.

### 1.2 SIGNIFICANT ACCOUNTING PRINCIPLES

*The Group has modified the presentation of its consolidated financial statements as compared with the presentation used for the year ended December 31, 2014. The principal modification is that the notes to the financial statements are organized by theme. This should increase the readability and relevance of the financial statements. Most of the accounting principles previously grouped together in Note 2 are now included within the relevant note to help the reader more easily understand the data presented.*

#### 1.2.1. STATEMENT OF COMPLIANCE AND APPLICABLE STANDARD

The Group's consolidated financial statements as of and for the year ended December 31, 2015 have been prepared in accordance with IFRS (International Financial Reporting Standards) as adopted by the European Union as of such date, which are available at [http://ec.europa.eu/internal\\_market/accounting/ias/index\\_fr.htm](http://ec.europa.eu/internal_market/accounting/ias/index_fr.htm). These standards have been applied consistently for the fiscal years presented.

##### a) AMENDMENTS OR REVISIONS TO EXISTING STANDARDS AND INTERPRETATIONS APPLIED DURING THE PERIOD

In preparing its consolidated financial statements, the Group has taken into account the following amendments and revisions to existing standards and interpretations. These amendments and interpretations were approved by the European Union and their application was mandatory:

- IFRIC 21, "Levies"

##### b) EARLY ADOPTION OF NEW STANDARDS OR INTERPRETATIONS DURING THE PERIOD

The Group has not implemented early application of any new standards or interpretations during the period.

##### c) NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED

The Group is currently analyzing the impact of applying IFRS 15, "Revenue from Contracts with Customers," which will apply to the Group beginning in the fiscal year beginning January 1, 2018 if adopted by the European Union.

The Group is not aware of any other recent changes to IFRS standards that may be adopted early but have not yet been implemented by the Group.

#### 1.2.2. ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the Group's consolidated financial statements requires it to make a number of estimates and assumptions that have an effect on the amounts recorded on its balance sheet and income statement.

These judgments and estimates relate principally to:

	Notes
Measurement of the fair value of the consideration transferred, NCI and assets acquired and liabilities assumed	2
Impairment testing of assets	5.4
Accounting treatment of financial instruments	7.5
Provisions for employee benefits	4.1
Valuation of deferred tax assets	8.2
Determination of other provisions (warranties and disputes)	6

Management reviews these estimates and assumptions on an ongoing basis, by reference to past experience and information deemed significant given the current environment. Actual results may differ significantly from these estimates.

The Group's consolidated financial statements have been prepared on the basis of historical cost with the exception of the following assets and liabilities, which have been measured at fair value: derivatives, investments held for trading, available-for-sale financial assets, pension plan

assets and other assets when required. The carrying amount of assets and liabilities subject to fair value hedging has been adjusted in line with the changes in fair value attributable to the hedged risks.

## NOTE 2 - CHANGES IN SCOPE OF CONSOLIDATION

### 2.1 CONSOLIDATION METHODS

#### 2.1.1. Fully consolidated

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has the right to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Losses applicable to non-controlling interests in a subsidiary are allocated to the non-controlling interests, even if doing so causes the non-controlling interests to have a deficit balance.

#### 2.1.2. Joint ventures and associates accounted for by the equity method

A joint venture, for purposes of IFRS 11, is an arrangement in which the Group has joint control, whereby the Group has right to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. The Group's interests in equity-accounted joint ventures comprise only the joint venture Laminat Park GmbH & Co.

They are recognized initially at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of the profit or loss and OCI of equity accounted investees, until the date on which significant influence or joint control ceases.

#### Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

The accounting policies described hereafter have been applied to all the periods presented in the consolidated financial statements and have been uniformly applied by all Group entities acquired prior to December 31, 2015 (see Note 2.4, Changes in Scope of Consolidation).

### 2.2 BUSINESS COMBINATIONS

Business combinations are accounted for using the acquisition method on the acquisition date – i.e. when control is transferred to the Group.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognized amount of any non-controlling interests in the acquiree; plus
- if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognized immediately in profit or loss.

Transactions costs, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognized in profit or loss.

#### Acquisition of NCI without a change in control

For each business combination, the Group elects to measure any non-controlling interests in the acquiree either:

- at fair value; or
- at their proportionate share of the acquiree's identifiable net assets, which are generally at fair value.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as transactions with owners in their capacity as owners. Adjustments to non-controlling interests are based on a proportionate amount of the net assets of the subsidiary. No adjustments are made to goodwill and no gain or loss is recognized in profit or loss.

#### Share put options granted by the Group

The Group may write a put option or enter into a forward purchase agreement with the non-controlling shareholders in an existing subsidiary on their equity interests in that subsidiary. The Group consolidates the entity as though the non-controlling interests had already been acquired. This

position leads to recognizing a liability for the present value of the price payable in the event that the non-controlling interests exercise their option. This liability is discounted over the option or forward period and any change in its valuation is accounted for through equity.

## 2.3 FOREIGN CURRENCY TRANSLATION

These financial statements are presented in Euro and the functional currency of Tarkett and its subsidiaries located in the Euro zone is Euro. Group entities operate on an autonomous basis and therefore the functional currency of entities operating outside the Euro zone is generally their local currency.

The functional currency of the Commonwealth of Independent States ("CIS") is the euro. After analyzing the primary and secondary indicators set forth in IAS 21.9, the Group has confirmed this choice for the 2015 financial statements.

The Group presents its financial statements in euros.

### Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of the Group entities at the foreign exchange rate as of the date of the transaction. Foreign exchange rate differences arising on these transactions are recognized either in the operating profit for

operational transactions or in the financial result for financing transactions.

Some items are covered by hedging transactions; the accounting treatment for those transactions is described in Note 7.5.1.

Non-monetary items are translated using the historical exchange rates, while monetary items are translated using the foreign exchange rates ruling at the balance sheet date.

### Financial statements of foreign operations

On the balance sheet date, assets and liabilities of foreign operations are translated at the closing rate, and income and expenses are translated at the average exchange rate for the period.

Foreign currency differences are recognized in other comprehensive income (OCI), and presented in the translation reserve in equity.

### Net investment in foreign operations

When the settlement of a monetary item receivable or payable to a foreign operation is neither planned nor likely in the foreseeable future, foreign exchange gains and losses arising from such monetary item are considered to form part of a net investment in a foreign operation and are recognized in other comprehensive income (OCI) and presented in the translation reserve.

## 2.4 CHANGES IN THE SCOPE OF CONSOLIDATION

The Tarkett Group's scope of consolidation is as follows. Note 12 provides a list of principal consolidated entities.

Number of companies	Dec. 31, 2014	Mergers	Acquisitions	Liquidations	Dec. 31, 2015
Fully consolidated companies	95	(6)	1	(2)	88
Equity-accounted companies	1	-	-	-	1
<b>TOTAL</b>	<b>96</b>	<b>(6)</b>	<b>1</b>	<b>(2)</b>	<b>89</b>

### 2.4.1. Transactions completed in 2015

#### a) MERGERS

In April 2015, Tarkett Jaslo Sp z.o.o. was merged into Tarkett Polska Sp z.o.o.

In June 2015, Desso Holding BV was merged into STAP B BV. Following the merger, STAP B BV was renamed Desso Holding BV.

In July 2015, Desso Asia Ltd and Desso Trading Asia Ltd were merged into Tarkett Hong Kong.

In September 2015, Desso GmbH was merged into Tarkett GmbH.

In November 2015, Desso SA was merged into Tarkett Floors, SL.

#### b) ACQUISITIONS

On April 30, 2015, through its subsidiary Beynon Sports Surfaces Inc., Tarkett acquired certain assets of California Track and Engineering ("CTE"), a company specialized in the sale and installation of athletic tracks. Certain key employees of the company joined the Group following the transaction. In addition, CTE has since ceased all commercial installation activity.

On December 31, 2015, Tarkett acquired Ambiente Textil Handelsgesellschaft m.b.h. ("Ambiente"), Desso's exclusive distributor in Austria.

Ambiente has been fully consolidated and held at 100% since its acquisition by Tarkett.

Information relating to goodwill generated by these acquisitions is included in Note 5.1.

**c) LIQUIDATIONS**

In July 2015, Desso Pty Ltd. was removed from the trade register.

In December 2015, Desso Masland Hospitality LLC was liquidated.

**d) ACQUISITION OPTION**

In August 2015, Tarkett exercised its option to acquire the 49% minority interest in Easyturf. Easyturf, which was already fully consolidated, is now 100% owned by the Group.

**2.4.2. Transactions completed in 2014****a) MERGERS**

In February 2014, Caf Extrusion Llc was merged into Tandus Centiva Inc.

Also in February 2014, Johnsonite Inc. was merged into Tarkett USA Inc.

In March 2014, Tarkett IFA Inc. was merged into Tarkett Enterprises Inc.

In September 2014, Tarkett Asia Pacific Ltd was merged into Tarkett Hong Kong Ltd.

**b) ACQUISITIONS**

On April 30, 2014, the Group acquired the Polish company Gamrat Flooring in order to reinforce its business on the

vinyl flooring market in Central Europe in growing, high value-added market segments such as health and education. Gamrat Flooring entered the Group as a new legal entity, Tarkett Jaslo Sp.z.o.o.

On October 24, 2014, the Group acquired Renner, a leading manufacturer of athletic tracks and tennis courts located in the Rocky Mountain region of the United States. This acquisition enables the group to enrich its product offerings in the Sports Surfaces segment and to expand its geographical footprint, thus reinforcing its leadership position in North America.

On December 31, 2014, the Group acquired Desso, a leader in commercial carpeting and athletic fields in Europe, in order to reinforce its presence in the EMEA zone. This acquisition, along with the Group's acquisition of Tandus in North America in 2012, enables the Group to offer commercial carpeting solutions throughout the world. This Group comprises 24 companies.

**c) CREATIONS**

In January 2014, Tarkett Belux was formed.

In April 2014, the Group created Tarkett Industrial (Beijing) Co, Ltd., and through that entity acquired a vinyl flooring production plant located near Beijing.

In September 2014, Tarkett Flooring Mexico S. de R.L. de C.V. was created.

**2.5 JOINT VENTURES**

Laminate Park GmbH & Co KG, jointly held with the Sonae Group in Germany, is the Group's only remaining jointly controlled entity.

The joint venture produces laminate and board for the EMEA market.

## NOTE 3 - OPERATING DATA

### 3.1 COMPONENTS OF THE INCOME STATEMENT

#### 3.1.1. REVENUE RECOGNITION

Revenue from the sale of goods is recognized in profit or loss when the significant risks and rewards of ownership have been transferred to the buyer, payment is likely, the associated costs and potential return of the merchandise can be reliably assessed, the Group is no longer involved in managing the merchandise, and the revenue from the merchandise can be reliably assessed. Revenue is recognized net of returns, rebates, commercial discounts and bulk discounts.

Revenue from services rendered or from construction contracts is recognized in profit or loss in proportion to the stage of completion of the transaction at the balance sheet date. The stage of completion is assessed by reference to surveys of work performed. An expected loss on a contract is recognized immediately in profit or loss.

Net sales comprise revenue from the sale of goods and services net of price reductions and taxes, and after elimination of intragroup sales.

#### 3.1.2. OPERATING RESULT

##### a) GRANTS

Grants relating to assets are deducted from the carrying amount of the property, plant and equipment. The grants are thus recognized as income over the lives of the assets by way of a reduced depreciation charge.

Grants are recognized when there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received. Other grants are recognized as income on a systematic basis over the periods necessary to match them with the related costs which they are intended to compensate.

##### b) EXPENSES

#### Cost of sales

Cost of sales comprises the cost of manufactured products, the acquisition cost of purchased goods which have been sold, and the supply chain costs for logistic and freight.

#### Selling and distribution expenses

Selling and distribution expenses comprise the expenses of the marketing department and the sales force, as well as

advertising expenses, distribution expenses, sales commissions and bad debts.

#### Research and development

Research and development costs are recognized as expenses when incurred, unless the criteria are met for them to be capitalized, as per note 5.3.1.

#### General and administrative expenses

General and administrative expenses comprise the remuneration and overhead expenses associated with management and administrative personnel with the exception of amounts charged to other cost centers.

##### c) OTHER OPERATING INCOME AND EXPENSES

This category includes all operating income and expenses that cannot be directly attributed to business functions, including operating expense related to retirement commitments and costs with respect to certain disputes.

#### 3.1.3. ADJUSTED EBITDA

**Adjusted EBITDA is a key indicator permitting the Group to measure its operating and recurring performance.**

It is calculated by taking operating income before depreciation and amortization and removing the following revenues and expenses:

- restructuring costs to improve the future profitability of the Group;
- gains or losses on disposals of significant assets;
- impairment and reversal of impairment based on Group impairment testing only;
- costs related to business combinations and legal reorganizations, including legal fees, transactions costs, advisory fees and other adjustments;
- expenses related to share-based payments due to their non-cash nature; and
- other one-off expenses considered exceptional by their nature.

### 3.2 SEGMENT INFORMATION

In accordance with IFRS 8, "Operating Segments," the Group's activities have been segmented based on the organization of its internal management structure and of its products. The Group is organized in four segments:

- Europe, Middle East and Africa ("EMEA");
- North America;
- Commonwealth of Independent States ("CIS"), APAC and Latin America; and
- Sports Surfaces.

**By operating segment**

Dec. 31, 2015 <i>(in millions of euros)</i>	Flooring			Sports Surfaces	Central	Group

<sup>(1)</sup> including inter-segment revenue

**Information on activity in France and in other significant countries**

The Group's activity in France represented less than 10% of revenue in 2015 and in 2014.

Non-current assets in France, excluding the non-affected goodwill arising out of the merger between Tarkett and Sommer in the early 2000's, also represent less than 10% of the Group's total non-current assets in 2015 and in 2014.

Tarkett considers the threshold for significance to be 25% of revenue. Only the United States is above that threshold,

with 38.6% of the Group's consolidated revenue (32.6% in 2014).

The United States represents 42.0% of the Group's total non-current assets as of December 31, 2015 and (40.5% on December 31, 2014).

None of Tarkett's customers represents more than 10% of its sales. In 2015, the largest customer represented approximately 3% the Group's consolidated net revenues, as compared with approximately 5% in 2014 and previous years.

### 3.3 OTHER OPERATING INCOME - OTHER OPERATING EXPENSES

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Losses on disposal of fixed assets	28.3	1.1
Other operating income	11.8	6.1
<b>Other operating income</b>	<b>40.1</b>	<b>7.2</b>
Losses on disposal of fixed assets	(1.1)	(0.3)
Other operating expenses	(19.2)	(14.6)
<b>Other operating expenses</b>	<b>(20.3)</b>	<b>(14.9)</b>
<b>Total other operating income and expenses</b>	<b>19.8</b>	<b>(7.7)</b>

Gains on disposal of fixed assets primarily comprises capital gains on the €28 million sale of the Houston site in the United States.

### 3.4 BREAKDOWN OF WORKING CAPITAL REQUIREMENTS

#### 3.4.1. INVENTORIES

Inventories are stated on a FIFO (first in, first out) basis, at the lower of manufacturing/acquisition costs and net realizable value. Manufacturing costs of self-produced inventories comprise all costs which are directly attributable and a systematic allocation of production overhead and

depreciation of production facilities based on normal operating capacity. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Raw materials and supplies	124.0	107.6
Work in progress	60.5	60.0
Finished goods	238.3	212.0
Samples	1.4	3.2
Consumables and spare parts	22.4	22.0
<b>Total Gross Value</b>	<b>446.6</b>	<b>404.8</b>
Provision for inventory depreciation	(70.1)	(56.6)
<b>Total net inventory</b>	<b>376.5</b>	<b>348.2</b>

#### Detail of the provision for inventory depreciation

<i>(in millions of euros)</i>	Dec. 31, 2014	Allowance	Decrease	Foreign exchange gain & loss	Dec. 31, 2015
Raw materials and supplies	(10.7)	(5.4)	0.5	(0.6)	(16.2)
Work in progress	(10.7)	(1.3)	1.6	(0.5)	(10.9)
Finished goods	(28.9)	(11.0)	4.4	(1.3)	(36.8)
Samples	(1.0)	0.6	-	-	(0.4)
Consumables and spare parts	(5.3)	(0.5)	-	-	(5.8)
<b>Total provision for inventory depreciation</b>	<b>(56.6)</b>	<b>(17.6)</b>	<b>6.5</b>	<b>(2.4)</b>	<b>(70.1)</b>

The rate of inventory provisions is applied in a similar way for the different periods.

Cost of raw materials was €1,185.0 million in 2015, as compared with €1,105.9 million in 2014.

**3.4.2. TRADE RECEIVABLE**

Accounts receivable are stated at their invoiced value converted at the closing rate, less any allowance for doubtful accounts.

The allowance for doubtful accounts is based on the management's assessment of the recoverability of specific customer accounts and the aging of the accounts receivable.

**Provision for doubtful receivables**

Provisions for doubtful receivables are constituted as follows:

- Bad debts identified and provisioned at 100%;
- A statistical provision, based on the age of the outstanding receivables, defined as follows :

Overdue receivables	Impairment (as a percentage of the gross amount)
From 61 to 180 days	25%
From 181 to 270 days	50%
From 271 to 360 days	75%
More than 360 days	100%

- An additional provision on a case-by-case basis based on an application of professional judgment

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Related party receivables	8.8	7.8
Third party receivables	336.1	328.6
<b>Total Gross Value</b>	<b>344.9</b>	<b>336.4</b>
Provisions for doubtful receivables	(22.9)	(24.5)
<b>Total Trade Receivables</b>	<b>322.0</b>	<b>312.0</b>

The variation of the provision for doubtful receivables amounts to €1.6m and is mainly explained as follows:

- €(4.3) million of allowance;
- €6.2 million of reversals;
- €(0.1) million of foreign exchange impact.

**Detail of unimpaired overdue receivables**

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Receivables, trade overdue 0-180 days	33.9	34.0
Receivables, trade overdue 181-270 days	0.3	0.3
Receivables, trade overdue 271-360 days	0.4	0.2
Receivables, trade overdue >360 days	-	1.7
Receivables, bankruptcy procedure / legal cases	1.2	1.4
<b>Unimpaired Overdue Receivables</b>	<b>35.8</b>	<b>37.6</b>

**3.4.3. OTHER RECEIVABLES**

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
<b>Total Other receivables non-current</b>	<b>0.3</b>	<b>0.5</b>
Prepaid expenses current	17.8	19.6
Income tax receivable current	12.3	19.4
VAT and other taxes	12.4	17.3
Other accounts receivable and other assets current	18.0	16.5
<b>Total Other receivables current</b>	<b>60.5</b>	<b>72.9</b>

**3.4.4. TRADE PAYABLES**

Trade payables are stated at their repayment amounts.

Payables due more than a year in the future are discounted to net present value.

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Trade payables	243.3	221.3
Trade notes payable	4.4	3.1
<b>Trade payables</b>	<b>247.7</b>	<b>224.4</b>

**3.4.5. OTHER LIABILITIES**

<i>(in millions of euros)</i>	<b>Dec. 31, 2015</b>	<b>Dec. 31, 2014</b>
Liabilities related to employees	101.7	83.0
Current tax	16.8	15.9
VAT and other taxes	13.8	16.4
Sales rebates	36.0	39.8
Other liabilities	23.6	25.4
<b>Total other liabilities</b>	<b>191.9</b>	<b>180.5</b>

**Written put options or forward contracts granted to non-controlling shareholders**

As of December 31, 2014 and December 31, 2015, the amount of debt booked in the Group's consolidated financial statements relative to share put options on non-controlling shareholders was €3.1 million.

As of December 31, 2015, this debt is composed of two options, granted to non-controlling shareholders of:

- Morton Extrusionstechnik (MET) for €3.1 million, corresponding to 49% of residual shares held by non-controlling interests;
- Fieldturf Benelux BV for €0.05 million, corresponding to 49% of residual shares held by non-controlling interests.

## NOTE 4 - EMPLOYEE BENEFITS

### 4.1 POST-EMPLOYMENT BENEFITS

Within the Tarkett Group, various systems for providing for retirement benefits depending on the legal, economic and tax environment of each country exist. In accordance with the laws and uses applied in each country, the Group participates in pension, welfare, health and retirement benefit plans whose benefits are dependent on various factors such as length of service, salary and the contributions paid to institutions.

#### **Defined contribution plans**

Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

These contributions, based on services rendered by employees, are recognized as an expense in profit or loss as incurred.

#### **Defined benefit plans**

Defined benefit plans are post-employment benefit plans under which the Group assumes the obligation of providing employees with future benefits and thus also assumes the related actuarial and investment risks. The defined benefit liability is calculated using the projected unit credit method and is discounted to its present value from which the amount of past service cost for the period may also be deducted.

The detailed actuarial calculation requires the use of actuarial hypotheses for demographic variables (mortality, employee turnover) and economic variables (future increases in salaries and medical costs, discount rate).

When defined benefit plans are totally or partially funded by contributions paid to a separate fund or insurance company, those entities' assets are measured at their fair value.

Their amount is then deducted from the obligation to define net liability disclosed in the Group's balance sheet.

The Group's obligation in respect of such arrangements is calculated by independent actuaries, in accordance with IAS 19, "Employee Benefits".

#### **Description of plans**

As of December 31, 2015, the Group's largest retirement plans were in the United States, Germany, Sweden, Canada

and the United Kingdom. Those five countries represent more than 90% of total commitments under defined benefits plans.

In the United States and the United Kingdom, the Group's retirement plans have been closed to new participants and to the accrual of rights for several years. Most of the Group's plans in Canada are now closed. These plans are prefinanced in accordance with local legislation. Additionally, the Group operates medical and life-insurance benefit plans for certain employees in the United States. These plans are not covered by financing assets and are now closed.

In Sweden, defined benefit retirement plans are mandatory for employees born prior to 1979 under the applicable collective bargaining agreement. Employees born after that date participate in the mandatory defined contribution plan. In Germany, the Group offers a pension plan, service awards and early retirement.

The Group also offers lump-sum retirement payments as provided for by applicable legislation or collective bargaining agreements in certain countries, including France and Italy.

The weighted average duration of defined benefit obligation is 14 years.

#### **Special Events**

In the United States, the Group completed the early settlement of two retirement plans, which was fully covered by assets. The net impact of making the payments and reversing the provision was an income of €1.5 million, recorded in the income statement.

**Assumptions:**

Accounting for actuarial values is based on long-term interest rates, predicted future increases in salaries and inflation rates. The main assumptions are presented below:

Amounts recognized in the statement of financial position (in millions of euros)	Dec. 31, 2015			Dec. 31, 2014		
	Pensions	Post-employment healthcare benefits	TOTAL	Pensions	Post-employment healthcare benefits	TOTAL
Defined benefit obligations	228.9	11.1	240.0	247.9	6.3	254.2

	Dec. 31, 2015		Dec. 31, 2014	
	Pensions	Post-employment healthcare benefits	Pensions	Post-employment healthcare benefits
Discount rate	3.70%		3.30%	
Including:				
United States	4.50%	4.50%	4.25%	4.50%
Germany	2.00%		1.50%	
Sweden	3.50%		2.75%	
United Kingdom	3.60%		3.50%	
Canada	4.20%		4.00%	
Salary increases	2.62%		2.55%	
Inflation	2.28%		2.02%	

Discount rates are determined by reference to the yield on high-quality bonds. They are calculated on the basis of external indices commonly used as references:

- United States: iBoxx \$ 15+ year AA
- Euro zone: iBoxx € Corporate AA 10+
- Sweden: bonds of Swedish companies
- United Kingdom: iBoxx £ 15+ year AA
- Canada: Canadian AA "Mercer Yield Curve Canada" bonds

#### Allocation of plan assets by type of investment:

	Dec. 31, 2015	Dec. 31, 2014
Shares	48.4%	49.6%
Bonds	29.5%	29.5%
Real Estate	3.8%	3.3%
Other	18.3%	17.6%

#### Sensitivity to discount rate assumptions

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
<b>Increase of 50 basis points</b>		
Increase/(Decrease) in Defined Benefit Obligation	(15.0)	(16.9)
<b>Decrease of 50 basis points</b>		
Increase/(Decrease) in Defined Benefit Obligation	16.6	18.0

#### Benefits to be paid in the next five years

Benefits to be paid in the next five years under retirement and similar plans are estimated as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
2015		11.9
2016	11.8	8.1
2017	10.5	8.4
2018	11.2	9.7
2019	11.8	9.0
2020	12.0	
<b>Total</b>	<b>57.3</b>	<b>47.1</b>

## 4.2 PERSONNEL COSTS AND COMPENSATION OF SENIOR MANAGEMENT

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Wages and salaries	(618.2)	(514.8)
Pension costs	(6.7)	(6.3)
<b>Total Personnel costs</b>	<b>(624.9)</b>	<b>(521.1)</b>
Employees (average number)	12,624	11,660

### Key management personnel compensation

The key management personnel includes the members of the Executive Management Committee and the members of the Supervisory Board.

Key management personnel received the following compensation:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Short-term employee benefits	6.8	7.7
Retirement benefits	-	-
Other long-term benefits	-	-
Lump-sum retirement payments	-	-
Share-based payments	1.2	1.5
<b>Total</b>	<b>8.0</b>	<b>9.2</b>

Compensation of the Group's key management personnel includes salaries, attendance fees and non-cash benefits.

## 4.3 SHARE-BASED PAYMENT TRANSACTIONS

The Group regularly implements share grant plans. The grant-date fair value of equity-settled share-based payment awards granted to employees is generally recognized as an expense, with a corresponding increase in equity, over the vesting period of the shares awarded. At the end of each fiscal year, the amount recognized as an expense is adjusted such that amount ultimately recognized is based on the number of shares awarded that meet the related service and non-market performance conditions at the vesting date.

For the three plans in effect, ordinary shares will be granted to the beneficiaries at the end of a two-year vesting period.

The grant will be subject to satisfying an economic performance condition (based on the Group's 3-year plan) and the beneficiaries' continuous employment through the end of the vesting period. The Group may decide to grant, instead of shares, the equivalent value in cash calculated at the market price.

In 2015, the LTI 2012 plan resulted in a cash payment of €3.1 million.

	LTIP 2013	LTIP 2014	LTIP 2015
Grant date	Oct. 9, 2013	April 1, 2015	Dec. 21, 2015
End of the vesting period	June 30, 2016	June 30, 2017	June 30, 2018
Number of shares	372,783	269,800	364,850
Estimated value as of the plan's start date <i>(in euros)</i>	29.00	21.01	27.38
Estimate of number of shares to be delivered as of December 31, 2015	186,392	134,900	364,850
Form of settlement	The Group may distribute either shares or the equivalent value in cash calculated at the market price.		
Expenses 2015 <i>(in millions of euros)</i>	(1.6)	(1.1)	(0.1)
Expenses 2014 <i>(in millions of euros)</i>	(2.9)	-	-
Expenses 2013 <i>(in millions of euros)</i>	(1.0)	-	-

## NOTE 5 - TANGIBLE AND INTANGIBLE ASSETS

### 5.1 GOODWILL

For the measurement of goodwill at initial recognition, Tarkett applies IFRS 3 Revised (see 2.2), except for acquisitions accounted for before December 31, 2009, for which IFRS 3 (2004) was applied.

Negative goodwill (badwill) is recognized directly in profit or loss.

Goodwill is allocated to cash-generating units and is not amortized, but instead is tested at least annually for

impairment on the basis described in note 5.4, or following any event that could lead to a loss of value.

Subsequently, goodwill is measured at cost less accumulated impairment losses.

In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment.

The changes in goodwill can be analyzed as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Opening carrying amount	532.6	425.6
New goodwill	1.5	72.5
Adjustment to initial purchase price allocation	(28.7)	0.1
Foreign exchange gain & loss	33.0	34.4
<b>Closing carrying amount</b>	<b>538.4</b>	<b>532.6</b>

The most significant variations are due to the adjustment of goodwill following acquisition of the Desso group and the recording of goodwill following the acquisition of Ambiente.

### 5.2 PRINCIPAL CHANGES

#### 5.2.1. PURCHASE ACCOUNTING OF DESSO ACQUISITION

As of December 31, 2014, goodwill resulting from the integration of the Desso group had been valued at €60.0 million.

As of June 30, 2015, Tarkett identified and valued its acquired assets and assumed liabilities, resulting in a goodwill adjustment that now totals €31.3 million.

This goodwill is explained primarily by the following:

- Specific technology and know-how; and
- Expected commercial synergies from the cross-marketing of Desso and Tarkett products.

Fair value adjustments and the definitive calculation of Desso goodwill is as follows:

<i>(in millions of euros)</i>	Carrying amount	Adjustment of fair value	Assets acquired and liabilities assumed at fair value
Fixed Assets	67.6	39.3	106.9
Current Assets	74.4	3.7	78.1
Short Term Liabilities and Short Term Provisions	(102.1)	(3.0)	(105.1)
Deferred Taxes	(8.9)	(11.3)	(20.2)
<b>Net assets acquired (B)</b>	<b>31.0</b>	<b>28.7</b>	<b>59.7</b>
<b>Cost of business combinations (A)</b>	<b>91.0</b>	-	<b>91.0</b>
<b>Change in consolidated goodwill (A) - (B)</b>	<b>60.0</b>	<b>(28.7)</b>	<b>31.3</b>

### 5.2.2. DETERMINATION OF GOODWILL FROM CALIFORNIA TRACK AND ENGINEERING

The amount of the CTE acquisition was €1.6 million (USD 1.8 million). The fair value of the assets acquired was estimated at €0.5 million (USD 0.6 million), creating goodwill of €1.1 million (USD 1.2 million).

This goodwill is explained primarily by the following:

- California Tracks Engineering's technical expertise and specific know-how with respect to the installation of athletic tracks;
- Commercial experience and knowledge of the market in the Western region of the United States.

### 5.2.4 ALLOCATION OF GOODWILL BETWEEN THE VARIOUS CGU'S

The allocation of goodwill between the various CGU's is as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015		Dec. 31, 2014	
	Gross value	Net value	Gross value	Net value
Resilient and miscellaneous	71.1	70.5	71.2	70.7
Carpet	31.8	31.8	60.0	60.0
Wood	-	-	-	-
Laminate	-	-	-	-
<b>EMEA</b>	<b>102.9</b>	<b>102.3</b>	<b>131.2</b>	<b>130.7</b>
Commercial	75.5	58.5	69.9	52.9
Tandus & Centiva	194.0	194.0	173.5	173.5
Residential	-	-	-	-
<b>North America</b>	<b>269.5</b>	<b>252.5</b>	<b>243.4</b>	<b>226.4</b>
CIS	96.5	95.5	96.5	95.5
APAC	-	-	-	-
Latin America	0.1	0.1	0.2	0.2
<b>CIS, APAC and Latin America</b>	<b>96.6</b>	<b>95.6</b>	<b>96.7</b>	<b>95.7</b>
Athletic tracks	39.1	33.5	35.2	29.4
Synthetic grass & other	54.8	54.5	50.6	50.3
<b>Sports Surfaces</b>	<b>93.9</b>	<b>88.0</b>	<b>85.8</b>	<b>79.8</b>
<b>TOTAL GOODWILL</b>	<b>562.9</b>	<b>538.4</b>	<b>557.1</b>	<b>532.6</b>

## 5.3 TANGIBLE AND INTANGIBLE ASSETS

### 5.3.1 INTANGIBLE ASSETS

#### Research and development

In accordance with IAS 38, expenditures on research and development are expensed as incurred except when the criteria for capitalization are met.

#### Patents

Patents obtained by the Group are stated at cost less accumulated amortization and impairment losses.

### 5.2.3. PURCHASE ACCOUNTING OF AMBIENTE ACQUISITION

Ambiente was acquired for €0.7 million. Resulting goodwill was €0.5 million, before price adjustment based on the 2015 financial statements. Net assets acquired are valued at €0.2 million.

The goodwill €0.5 million is explained primarily by the following:

- Ambiente's current market share in Austria in the commercial carpet segment;
- The company's relationships with a significant network of architects and designers in Austria; and
- Ambiente's logistics efficiency and service quality.

Capitalized costs for internally generated patents principally relate to the costs of legal counsel. Patents capitalized are amortized on a straight-line basis over the shorter of the length of the patent or estimated length of use.

#### Software

Software is stated at cost less accumulated amortization and impairment losses. Software is amortized on a straight-line basis from the date it is available for use.

**Depreciation**

Other intangible assets are amortized from the date that they are available for use. The estimated useful lives are as follows:

- Patents and trademarks: the shorter of the length of the patent or its length of use
- Development costs: 3 - 6<sup>2/3</sup> years
- IT Software: 3 to 5 years

**5.3.2. PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

**Acquisition cost**

Acquisition cost includes purchase cost or production cost plus the other costs incurred for bringing the items to their operating location and condition. The cost of a self-constructed asset includes the costs of raw materials and direct labor, the initially estimated cost of any obligation for dismantling, removing and restoring the site on which the asset is located, and an appropriate allocation for directly attributable production overhead.

When an item of property, plant and equipment includes material components with different useful lives, each major component is accounted for separately.

**Subsequent costs**

Replacements and improvements are capitalized and recorded as a separate asset if it is probable that the Group will derive economic advantages from the item, while general repairs, day to day servicing and maintenance are charged to expenses as incurred.

**Depreciation**

Assets are depreciated and charged to profit or loss over their expected useful lives using the straight-line method. The estimated useful lives are as follows:

- Buildings: 20 - 30 years
- Industrial plant and equipment: 6<sup>2/3</sup> - 10 years
- Printing cylinders: 2 years
- Other equipment and supplies: 3 - 5 years

**Finance leases**

At inception of an arrangement, the Group determines whether the arrangement is or contains a lease.

Leases in terms of which the Group assumes substantially all of the risks and rewards of ownership are classified as finance leases.

Assets acquired under finance leases are recognized as items of property, plant and equipment at an amount equal to the lower of their fair value and the present value of the minimum lease payments at inception of the lease.

Lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

The bases of depreciation and subsequent measurement of the related assets are similar to those applying to other tangible fixed assets, except in the case where the lease period is shorter than the asset's estimated useful life and it is not reasonably certain that transfer of title will take place at the end of the lease.

Leases for which a significant portion of the risks and rewards incidental to ownership of the leased assets remains with the lessor are classified as operating leases, with lease payments recognized as an expense on a straight-line basis over the lease term.

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Research and development	4.0	4.8
Patents	32.8	39.7
Trademarks	40.8	18.5
Software	37.3	30.6
Other intangible assets	4.4	5.9

\* Impact relating to adjustments of fair value following the acquisition of the Desso Group

## 5.4 Impairment testing of assets

### 5.4.1 NON-FINANCIAL ASSETS

#### Annual impairment testing

Goodwill and other intangible assets with indefinite useful lives are systematically tested for impairment once a year.

The carrying amounts of the Group's assets, other than financial and deferred tax assets and liabilities, are reviewed to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

The recoverable amount of assets is the greater of their fair value less costs of disposal and value in use.

Value in use is calculated by discounting estimated future cash flows for each cash-generating unit, excluding borrowing costs and tax.

#### Cash generating units

In carrying out impairment testing, assets are tested at the level of cash-generating units ("CGU") that reflect the segment organization of the Group and its products. For this purpose, goodwill was allocated over the cash-generating units.

#### Impairment process

The Group analyzes future cash flows over a period of three years based on the most recent forecasts, corresponding to the best estimate of a full business cycle. The forecasts have been established taking into account variations affecting selling prices, volumes and raw material costs. Beyond three years, the Group determines a standard year calculated by

extending the third year on the assumption of a stable revenue and margin, a need for working capital and investments determined on normative renewal based on historical observations. This standard year is then projected to infinity according to the Gordon Shapiro method.

Future cash flows are discounted to present value at a weighted average cost of capital (WACC) discount rate that reflects current market assessments of the time value of money and the risks specific to each financing means.

The discount rate is an after-tax rate applied to after-tax cash flows. The following assumptions were used for 2015:

	Discount rate after tax	Perpetual growth rate
EMEA	8.6%	2%
North America	8.6%	2%
CIS	12.2%	4%
APAC	9.2%	4%
Latin America	10.6%	4%
Sports surfaces	8.6%	2%

#### Operating assumptions

For each CGU, operational assumptions that were considered key by the Group are as follows:

- Evolution of the markets in which these CGU are involved on the basis of internal estimates, supported if possible by external forecasts on the concerned segments or products;
- Evolution of the Group in its various markets;
- General hypothesis of stability of inflation balance (purchase prices stable, or if changes are considered,

full offset by changes in selling prices to balance the impact on value);

- Continual implementation of productivity plans for factories working on these CGU to improve profitability; and
- EBITDA, resulting from the combination of factors listed above.

#### **Sensitivity analysis**

The sensitivity analysis was carried out on three assumptions:

- the discount rate (WACC);
- the perpetual growth rate; and
- EBITDA.

Changes of 50 basis points in the discount rate and growth rate are reasonably possible variations for the Group. Tarkett operates in a large number of countries, with a balance between three main areas (EMEA; North America; and CIS, APAC and Latin America). The Group believes that economic developments in these geographic areas can offset each other, as has been demonstrated in the past.

In 2015, the combination of an increase in the discount rate of 50 basis points and a decrease in the growth rate of 50 basis points would not result in additional impairment.

Furthermore, a decrease of 100 basis points in EBITDA margin, a key hypothesis for the Group, would lead to impairment of €(4.4) million for the North America - Residential CGU.

#### **Impairment testing**

Impairment losses recognized during 2015 and 2014 can be broken down as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
EMEA CGU - Laminate	(0.5)	-
<b>Total</b>	<b>(0.5)</b>	<b>-</b>

Since the entity in question is consolidated through the equity method, the charge is recorded in the income statement in "Share in profit of equity-accounted investees," and its counterpart is recorded in "Other financial assets" in the consolidated statement of financial position.

#### **Impairment losses**

An impairment loss is recognized whenever the carrying amount of a cash-generating unit exceeds its recoverable amount. Impairment losses are recognized in profit or loss.

Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit and then, to reduce the carrying amount of the other assets in the unit.

An impairment loss in respect of goodwill cannot be reversed. In respect of other assets, an impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

#### **5.4.2 NON-DERIVATIVE FINANCIAL ASSETS**

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired.

For financial assets held for sale, a significant or prolonged decline in fair value as compared with cost is results in recognition of impairment on the income statement. Impairment loss on an available-for-sale financial asset is measured as the difference between its carrying amount and its fair value, less any impairment loss previously recognized in profit or loss.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate.

## 5.5 LEASE COMMITMENTS

The Group's operating lease commitments are mainly commitments for buildings, vehicles, computer hardware and software, and offices.

### **Operating lease payments**

Payments made under operating leases are recognized in profit or loss on a straight-line basis over the term of the

lease. Please refer to note 5.3.2 for more detail on lease contract classification.

### **Capital lease payments**

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. Please refer to note 5.3.2 for more detail on lease contract classification.

Future minimum rental commitments under operating leases with initial or remaining non-cancellable terms in excess of one year, are summarized below:

<i>(in millions of euros)</i>	<b>Dec. 31, 2015</b>	<b>Dec. 31, 2014</b>
Less than 1 year	22.1	20.9
1 to 5 years	26.4	32.2
More than 5 years	2.9	3.5
<b>Total future minimum lease payments</b>	<b>51.4</b>	<b>56.5</b>

## NOTE 6 - PROVISIONS

### 6.1 PROVISIONS

Provisions are recorded in liabilities where the amount or the timing of a liability is uncertain. They arise from environmental risks, legal and tax risks, litigation and other risks.

A provision is recognized when the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows.

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date. Provisions are reversed when they are no longer required.

A provision for warranties is recognized when the underlying products are sold. The provision is based on historical warranty data and a weighting of all possible outcomes against their associated probabilities.

A provision for restructuring is recognized when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced. Future operating losses are not provisioned.

<i>(in millions of euros)</i>	Dec. 31, 2014	Allowance	Decrease	Change in scope	Transfer	Foreign exchange gain & loss	Dec. 31, 2015

\* Variations in provisions for financial liabilities relate to the provision for asbestos litigation recorded by Domco Products Texas Inc.

## 6.2 POTENTIAL LIABILITIES

### Asbestos

In the United States, the Group has been a defendant in lawsuits by third parties relating to personal injury from asbestos. Expected costs of the current or future cases are covered by Group's insurances, sellers' guarantees granted by third-parties and by provisions that management, based on the advice and information provided by its legal counsel, considers to be sufficient.

### Other

In late March 2013, the "Autorité de la concurrence" (French Competition Authority) began investigations against several flooring manufacturers, including Tarkett, in relation to possible anti-competitive practices in the French market for vinyl flooring.

The investigations are still ongoing. Their timeline is currently not known and it is not yet possible to evaluate their possible consequences.

## NOTE 7 - FINANCING AND FINANCIAL INSTRUMENTS

### 7.1 FINANCIAL RESULT

Financial expense includes bank fees and interest payable on borrowings accounted for at amortized cost using the effective interest method.

Other financial income and expense includes the income and expenses associated with loans and receivables accounted for at amortized cost, the gains recognized in respect of investment of cash and cash equivalents, impairment losses relating to financial assets, and dividends,

which are recorded in net income when the right to payment vests.

Foreign exchange gains and losses on financial items are presented net, since those gains and losses are neutralized by the related impacts of the FX hedging instruments or they are hedged or arise from non-significant individual transactions, by interpretation of IAS 1, "Presentation of Financial Statements".

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Interest income on loan assets & cash equivalents	1.4	1.5
Other financial income	0.7	0.3

Other financial liabilities	(0.2)	(1.3)
<b>Total financial expenses</b>	<b>(34.0)</b>	<b>(32.8)</b>
<b>FINANCIAL RESULT</b>	<b>(31.9)</b>	<b>(31.0)</b>

### 7.2 NET DEBT – INTEREST-BEARING LOANS AND BORROWINGS

#### 7.2.1 SIGNIFICANT ACCOUNTING POLICIES

##### *Non-derivative financial assets*

Financial assets are initially recognized at their fair value plus any applicable transaction costs except for financial assets at fair value through profit or loss for which transactions costs are recognized in profit or loss as incurred.

At the date of acquisition the Group classifies its financial assets in one of the four categories provided for by IAS 39, "Recognition and Measurement". The classification determines the basis of measurement of each financial asset at the subsequent balance sheet dates, whether at amortized cost or at fair value.

Held-to-maturity investments are exclusively securities with fixed or determinable payments (other than items defined as loans and receivables) acquired with the intention of holding them to maturity. They are accounted for at amortized cost using the effective interest method. The net income recognized in respect of such assets comprises the aggregate of interest receivable and any impairment losses.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, they are accounted for at amortized cost, using the effective interest method, less any impairment losses reflecting the risk of non-recovery. The category includes trade and other loans and receivables. The net income recognized in respect of such assets comprises the aggregate of interest receivable and any impairment losses.

Available for sale financial assets are measured at fair value, and changes therein, other than impairment losses, are recognized in other comprehensive income. In the event of significant or lasting impairment of these assets, the cumulative loss is recorded on the income statement (see Section 5.4.2).

The category mainly comprises non-consolidated long-term investments, which are measured in the balance sheet at their acquisition cost assuming the absence of an active market for the securities held. The net income recognized in respect of such assets comprises the aggregate of dividends receivable, any impairment losses and the gains or losses arising on disposal.

Financial assets and liabilities at fair value through profit or loss include both items held for trading, i.e. that the Group has from the outset the intention to sell in the near future (including derivatives not qualified as hedging instruments), and assets specifically designated as at fair value through profit or loss. These assets are adjusted to their fair value at each balance sheet date and the resulting gains and losses are recognized in profit or loss.

This category includes cash and cash equivalents. The net income recognized in respect of such assets comprises the aggregate of interest receivable, changes in fair value and the gains or losses arising on disposal.

Cash and cash equivalents comprise cash at bank and on hand, term deposits and other monetary investments with initial maturities not exceeding three months and subject to an insignificant risk of changes in value. The Group has opted to classify cash equivalents as assets measured at fair value through profit or loss.

### 7.2.2 Net Debt

Net debt is defined as the sum of interest bearing loans, borrowings and bank overdrafts, minus cash and cash equivalents.

### Non-derivative financial liabilities

Financial liabilities comprise financial debt and trade and other operating payables.

With the exception of items classified as financial liabilities at fair value through profit or loss, loans payable and other financial liabilities are initially recognized at their fair value less any applicable transaction costs. They are subsequently measured at amortized cost using the effective interest rate method.

Given their short maturities, trade and other operating payables are measured at historical cost since use of the amortized cost basis would produce very similar results.

Interest-bearing loans and borrowings refer to any obligation for the repayment of funds received or raised which are subject to repayment terms and interest charges. They also include liabilities on finance lease.

(in millions of euros)	Dec. 31, 2015		Dec. 31, 2014	
	Long-term	Short-term	Long-term	Short-term
Bank loans (unsecured)	536.6	4.5	689.0	36.9

<b>Net debt</b>	<b>482.3</b>		<b>595.5</b>	

On June 22, 2015, Tarkett closed the early refinancing of its June 27, 2011 €450.0 million revolving credit facility (RCF) maturing in June 2016, as well as of the €60.0 million and USD 24.0 million amortized term loan maturing in May 2016. The new financing is a €650.0 million multicurrency revolving syndicated credit facility maturing in June 2020

Unsecured bank loans include mainly:

- A €450.0 million syndicated term facility drawn down in two tranches in October 2013 and January 2014, and maturing in full in October 2018.

- A €650.0 million multicurrency revolving syndicated credit facility entered into in June 2015. As of December 31, 2015, USD 650.0 million had been drawn down under this credit facility.
- On March 11, 2015, the €55.0 million "Daily Law" line of credit by assignment of receivables was converted into a line of credit by assignment of European receivables with the same maximum amount. This line of credit had not been drawn down as of December 31, 2015.

## 7.5 FINANCIAL RISKS AND FINANCIAL INSTRUMENTS

### 7.5.1 DERIVATIVE INSTRUMENTS

The Group uses derivative financial instruments to hedge some of its exposure to foreign currency risk and interest rate risk associated with its purchases and sales

denominated in foreign currencies and with its financing and investment transactions.

The derivatives employed include interest rate options, other forward contracts and foreign currency options.

In accordance with its policy in respect of financial instruments, the Group neither uses nor issues derivative financial instruments for trading purposes.

Derivatives are recognized in the balance sheet at their fair value (whether positive or negative) with changes in fair value immediately recognized in profit or loss.

However, derivative instruments that qualify for hedge accounting and meet the applicable effectiveness tests are classified either as fair value hedges (when their purpose is to hedge an existing asset or liability's exposure to the risk of changes in its fair value) or cash flow hedges (when their purpose is to hedge the exposure to changes in the cash flows associated with highly probable future transactions).

Changes in the fair value of fair value hedges of exposure to foreign currency and interest rate risk are recognized as part of financial income or expense. The hedged assets and liabilities are also adjusted to their fair value and the changes in fair value attributable to the hedged risk(s) are equally recognized as part of financial income or expense.

Changes in the fair value of cash flow hedges of exposure to foreign currency and interest rate risk are recognized within other comprehensive income with the exception of any ineffective portion, which is recognized in financial income or expense.

If a derivative instrument ceases to meet the criteria for hedge accounting, the cumulative amount recognized in other comprehensive income at that date remains in other comprehensive income until the date of occurrence of the transaction initially hedged. but if the transaction is no longer expected to occur then the amount is immediately transferred in full to profit or loss.

### 7.5.2 FINANCIAL MARKET RISKS

Exposure to interest rate, currency, liquidity and credit risk arises in the normal course of Tarkett's activities.

Derivative financial instruments are used to reduce the exposure to fluctuations in both foreign exchange and interest rates.

Liquidity and credit risk are managed following risk management policies approved by the Group's executive board.

### Fair value of derivative financial instruments

The totals are as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Currency swaps	(0.5)	0.2
Forward exchange contracts	-	(0.5)
Options	1.6	0.1
<b>Total currency derivatives</b>	<b>1.1</b>	<b>(0.2)</b>
Cash flow hedges	0.6	(0.9)
<b>Total interest rate derivatives</b>	<b>0.6</b>	<b>(0.9)</b>

#### a) INTEREST RATE RISK

The Group manages its exposure to interest rate risk centrally. The Group's general debt strategy is to give preference to variable interest rate debt over fixed interest rate debt, but also to use interest rate derivatives to protect a part of the debt over a period of three to five years against a rate increase that could result in extensive damage. The hedging tools used are mainly cap or tunnel type derivatives. The cost of the cap may be offset in part or in full by a tunnel. The interest rate derivatives outstanding at closing are all purposed for cash flow hedging and none is purposed for fair value hedging.

Following is the interest rate structure of the Group's net debt before and after application of interest rate hedges.

Before interest rate hedge:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Fixed rate debt	0.5	1.5
Floating rate debt	549.7	729.0
Cash and cash equivalents	(67.9)	(135.1)
<b>Net Debt</b>	<b>482.3</b>	<b>595.4</b>

After interest rate hedge:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Fixed rate debt	0.5	1.5
Capped floating rate debt	101.0	178.8
Floating rate debt	448.7	550.2
Cash and cash equivalents	(67.9)	(135.1)
<b>Net debt</b>	<b>482.3</b>	<b>595.4</b>

### Sensitivity analysis

Sensitivity to interest-rate fluctuations is calculated on the basis of interest-bearing non-derivatives and derivative financial instruments. Non-derivative financial instruments are the interest-bearing borrowings net of cash and cash equivalents, and net of interest-bearing loans granted to third parties or joint-ventures. The analysis is based on the assumptions of constant debt and constant debt management policy over one year, using indebtedness and market rates as of December 31, 2015.

#### Sensitivity to interest rates based on the market index in effect at year-end

	Dec. 31, 2015	Dec. 31, 2014
<i>(in millions of euros)</i>		
<b>Increase of 100 basis points</b>		
Increase/(Decrease) in financial expense	4.8	5.2
<b>Decrease of 100 basis points (*)</b>		
Increase/(Decrease) in financial expense	(0.4)	(0.8)

(\*) with a floor of 0%

#### b) EXCHANGE RATE RISK

##### Transaction risk

Exchange rate fluctuations have a direct impact on the Group's consolidated financial statements, derived from transactions regarding the Group entities that incur revenues and expenses in currencies other than their functional currency.

The Group has attempted to develop its production capacities in the same geographic and monetary areas

where it distributes its products. Moreover, through the choice of the invoicing currency for certain intra-Group transactions, the Group aims to offset revenues with costs in the same currency. In certain unstable currency countries, the Group may also offset the local currencies fluctuations with price indexations. Therefore the remaining exposure on cross-border transactions is moderate. The currencies to which the Group is most exposed are the US dollar, the British pound, the Norwegian crown, the Polish zloty, the Australian dollar, the Russian ruble and the euro as a foreign currency for some Swedish, Russian, and Serbian subsidiaries.

The Group has attempted to reduce the impact of short-term fluctuations of currencies on its revenue through centralized management of exchange risks and the use of derivatives. Nevertheless, in the long-term, significant and long lasting variations in exchange rates could affect the Group's competitive position in foreign markets, as well as its results of operations.

The Group's policy is to hedge certain significant residual exposure, decided upon periodically by the finance department. This exposure includes exposure recorded on the balance sheet, namely all recognized trade receivables, trade payables and borrowings denominated in a foreign currency, and unrecorded exposure, which consists of forecast sales and purchases over a six-month period.

##### Foreign exchange exposures and derivatives

As at closing date, the exposure recorded in the balance sheet over the main currencies hedged with derivatives, and the nominal amount of the derivatives hedging such recorded exposures, are as follows:

Currency of Exposure <i>(in millions of euros)</i>	Dec. 31, 2015				Dec. 31, 2014			
	USD	GBP	AUD	EUR	USD	GBP	AUD	EUR
Financial receivables and liabilities	66.1	(5.2)	3.3	19.5	66.3	(5.3)	1.0	(9.6)
Trade receivables and payables	(3.9)	4.2	2.6	6.6	0.2	1.2	2.6	3.7
Nominal amount of derivatives	(66.1)	5.2	(3.3)	(19.5)	(64.7)	4.5	(3.0)	9.6
<b>Net recorded exposure to main currencies</b>	<b>(3.9)</b>	<b>4.2</b>	<b>2.6</b>	<b>6.6</b>	<b>1.9</b>	<b>0.4</b>	<b>0.6</b>	<b>3.8</b>

The balance sheet exposure of the CIS countries remains limited, since receivables and payables in local currencies are roughly equal.

Tarkett uses forward exchange contracts and options when hedging with derivatives its exposure to foreign currency risk for periods of from six to twelve months of future cash flows.

Tarkett classifies the currency hedging contracts covering operating transactions as cash flow hedges and records them at fair value in the balance sheet. The fair value of these contracts at the balance sheet date is to an unrealized liability of €1.6 million (as compared with an unrealized liability of €0.5 million in 2014). The amount of fair value directly recorded in equity is to an unrealized liability of €0.3 million (as compared with an unrealized liability of €0.6 million in 2014). The difference is recorded in the income

statement and represents the change in the time value of currency options hedging forecast transactions and in the fair value of forward contracts or options hedging recognized transactions.

The effect on the income statement of the change in value of these contracts is income of €0.1 million (as compared with income of €0.2 million in 2014), and all the potential gains and losses reported directly in equity are expected to enter into the determination of profit and loss of the coming 12 months.

#### Monetary items denominated in foreign currencies

When financing its foreign subsidiaries, the Group incurs exposure to foreign currency risk on intra-group loans and borrowings denominated in foreign currencies. The Group minimizes this risk either (i) by borrowing in the same currency or (ii) by entering into currency swaps or forwards

reflecting the maturity of the hedged item. At December 31, 2015, the main financial exposures so covered are the euro against the US dollar for €66.1 million, against the Polish zloty for €29.3 million, against the British pound for €5.2 million and against the Swedish crown for €19.5 million. The fair value of these contracts at the balance sheet date amounted to an unrealized liability of €0.5 million.

#### 7.5.3 LIQUIDITY RISKS

##### a) FUTURE CASH FLOWS ON FINANCIAL INSTRUMENTS

The following figures show the estimated future cash flows on interest-bearing loans and borrowings recorded as liabilities on the balance sheet.

The estimate of future cash flows on interest is based on the debt amortization table and on the assumption of a crystallization of the interest rates outstanding as of the closing date, unless a better estimate is available.

Interest-bearing loans (in millions of euros)	Dec. 31, 2015		Less than 12 months		2 years		3 to 5 years		More than 5 years	
	Carrying amount	Total future cash flows	Carrying amount	Interest	Carrying amount	Interest	Carrying amount	Interest	Carrying amount	Interest

#### b) LIQUIDITY POSITION

As of the balance sheet date, net debt totals €482.3 million. The Group's debt capacity is €1,260.3, of which €550.2 million has been used (See Note 7.2.2). Including cash and cash equivalents, the liquidity position of the Group amounts to €778.0 million, which is enough to cover the financial obligations related to the current net debt.

(in millions of euros)	Dec. 31, 2015	Dec. 31, 2014
Amount available on credit facilities	710.1	420.3
Cash and cash equivalents	67.9	135.1
<b>Total</b>	<b>778.0</b>	<b>555.4</b>

#### 7.5.4 CREDIT RISK

Credit risk represents the risk of financial loss for the Group in the event that a counterparty to a financial instrument defaults in paying its contractual obligations.

The financial assets potentially bearing this risk are mainly:

- cash deposits;
- financial derivatives;
- accounts receivable;
- loans granted.

The maximum potential credit risk on the financial assets is equal to their net accounting value less the indemnification receivable from credit insurance.

#### a) CUSTOMER CREDIT RISK

The Group believes that its exposure to counterparty risk is limited, because of its large number of customers, its dispersion in many geographical areas, and its follow-up policy. The Group has established a credit policy which includes, among other things, a credit limit for each customer, collections processes, and a computer-aided credit scoring and customer payment behavior follow-up.

The total of receivables overdue over 60 days amounts to 9.0% of the total amount of accounts receivables as of December 31, 2015 (9.3% of the total amount of accounts receivables as of December 31, 2014).

The Group believes that there is no need to assume that there is risk on outstanding receivables less than 60 days overdue.

With respect to outstanding receivables that are more than 60 days overdue, the Group believes that risks are limited given existing procedures for customer risk management (as detailed above).

#### b) CREDIT RISK MANAGEMENT ON EQUITIES AND DERIVATIVES

The counterparties to the Group's financial derivatives are leading banks or state-owned banks, all of which have business relationships with the Group for debt or cash management. The Group's policy with regard to investments and cash deposits is to only invest in liquid securities and only with the leading credit institutions in the countries where the investments are made.

The Group is not exposed to a material risk due to any significant concentration, and does not anticipate any counterparty default.

#### **7.5.5 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES**

##### ***Fair value method***

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible.

Fair values are categorized into three levels in a fair value hierarchy based on the inputs used in the valuation techniques, as follows:

- Level 1: quoted prices (unadjusted) on active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or the liability, either directly (prices) or indirectly (derived from prices).
- Level 3: inputs relating to the asset or liability that are not based on observable market data (unobservable inputs).

However, if the fair value of an equity instrument cannot be reasonably estimated, it is measured at cost.

The fair value of interest rate swaps and of interest rate and foreign currency options is the estimated amount that the Group would expect to receive or have to pay in order to cancel each derivative instrument at the balance sheet date, taking into account the current level of interest rates and the credit risk associated with these instruments' counterparties.

The derivative financial instruments (swaps, caps, floors etc.) entered into by the Group are entered into by private

The effect of Credit and Debit Valuation Adjustments (CVA/DVA) on the measurement of the fair value of the derivative financial instruments was not material as at the closing date and was therefore not booked.

arrangement and are thus not subject to quoted prices. They are therefore measured using the valuation models commonly employed by operators in the market.

In particular:

- Interest rate swaps are measured on the basis of the present value of the contractual future cash flows;
- Options are measured using Black and Scholes type valuation models based on published market quotations and/or on quotations provided by third party financial institutions;
- Other foreign currency and interest rate derivative instruments are measured on the basis of the present value of the associated interest rate differentials.

Derivative instruments are entered into exclusively with first class banks or other financial institutions, and with the sole purpose of providing security for the Group's current operations and for the financing thereof.

The fair value of non-quoted borrowings is calculated on the basis of the present value of the contractual cash flows discounted at the market rate of interest, including the applicable risk premium.

In the case of receivables and payables with maturities of less than a year and certain floating rate receivables and payables, historical cost is considered as a reasonable approximation of their fair value given the limited credit periods granted and received within the Group.

<b>Dec. 31, 2015</b> <i>(in millions of euros)</i>	<b>Fair Value Category</b>	<b>Hedging Derivatives</b>	<b>Assets designated at fair value through profit and loss</b>	<b>Loans and receivables</b>	<b>Liabilities at amortized cost</b>	<b>Carrying amount</b>	<b>Fair value</b>

## 7.6 GUARANTEES

Tarkett:

- has granted a General Indemnity Agreement of a maximum amount up to USD 75.0 million in favor of Federal Insurance Company in consideration of an agreement to execute security bonds in favor of Fieldturf Tarkett Inc. As of the closing date, outstanding security bonds, either active or in the process of restitution, total USD 62.0 million;
- has granted a guarantee given to the Swedish retirement insurance company Pri-Pensionsgaranti to insure Tarkett AB's employee benefit commitments in the amount of SEK 178.6 million;
- has granted a guarantee covering 50% of two lines of credit for a maximum amount of €5.0 million, each granted to its joint venture Laminate Park GmbH & Co KG;
- has granted a guarantee to a raw materials supplier of its subsidiary Morton Extrusion Technik to secure its payables up to €5.0 million;
- has granted sureties on special purpose bank accounts to the bank operating a credit line by factoring of European receivables with a maximum amount of €55.0 million, of which none was drawn down at year end. In addition, Tarkett has granted its guarantee as parent company to the lenders of Tarkett Limited (GB), Desso Holding (Netherlands) and Poligras (Spain) to obtain overdraft facilities or letters of credit for a total amount equal to €5.6 million as of the balance sheet date.

Furthermore, in the ordinary course of business, Tarkett and several of the Group's subsidiaries have given payment guarantees to various suppliers, customers, government offices, lessors, and cash pooling or trade finance operators, either directly or through bank guarantees. These guarantees are not material either individually or in the aggregate.

## NOTE 8 - INCOME TAX EXPENSE

### 8.1 INCOME TAX

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognized in the income statement except to the extent that it relates to items in equity or in other comprehensive income, in which case it is recognized in those items.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable with respect to previous years. Income tax expense/income are defined in Note 8.2 Deferred Taxes.

Income tax (current and deferred) is detailed as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Current tax	(40.8)	(38.9)
Deferred tax	(8.1)	(1.8)
<b>Total income tax</b>	<b>(48.9)</b>	<b>(40.7)</b>

Income tax is calculated based on the rules applicable in each country where the Group operates.

The "Cotisation sur la Valeur Ajoutée des Entreprises (C.V.A.E.)" tax contribution due in France on the basis of the value added as determined based on the statutory accounts of French entities the statutory accounts meets the definition of income tax under IAS 12, "Income Taxes," and is classified on the current income tax line. Similar treatment has been adopted for similar other tax contributions based on a net of products and costs, even though that amount may differ from accounting net income.

Theoretical income taxes determined using the French corporate income tax rate of 34.43% for 2015 and 2014 can be reconciled as follows to the actual income tax charge:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Income tax at French income tax rate	(45.6)	(35.8)
Effect of:		
Taxation of foreign companies at different rates	9.0	18.7
Exchange rate effects on tax bases	(4.3)	(11.6)
Recognition of deferred tax assets relating to previous years	5.7	22.4
Changes in unrecognized deferred tax assets	(4.4)	(14.0)
Permanent differences - non-deductible items	2.3	(7.1)
Tax effects relating to distributions	(8.9)	(14.4)
Other items	(2.7)	1.1
<b>Income tax expenses</b>	<b>(48.9)</b>	<b>(40.7)</b>
<b>Effective rate</b>	<b>36.9%</b>	<b>39.2%</b>

#### Taxation of foreign companies at different rates:

The main contributing countries are Russia, with a local income tax rate of 20%, Sweden, with a local tax rate of 22%, and the Netherlands, with a local tax rate of 25%.

#### Exchange rate effects on tax bases

The deferred income tax expense of €(4.3) million is due to the effect of changes in the exchange rate on non-monetary assets and liabilities of entities whose functional currency is different from the local currency. Recognition of this expense is required by IFRS, even if the revalued tax basis does not generate any tax obligation in the future.

#### Tax effects relating to distributions:

Tax effects related to distributions primarily relate to withholding tax, the portion of dividends taxable in France ("Quote-part de Frais et Charges") and the French 3% contribution.

## 8.2 DEFERRED TAX

Deferred tax is calculated using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the balance sheet date.

The following temporary differences are not provided for:

- i. Goodwill not deducted for tax purposes;
- ii. The initial recognition of assets or liabilities, other than in the context of transactions involving business combinations, that affect neither accounting nor taxable profit;

Deferred taxation is shown on the balance sheet separately from current tax assets and liabilities and is categorized in non-current items.

- iii. Differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future.

A deferred income tax asset is recognized only to the extent that it is probable that there will be future taxable profits over the next five years against which this asset can be utilized. Deferred income tax assets are reduced to the extent that it is no longer likely that a sufficient taxable benefit will support the asset recovery.

In accordance with IAS 12, where an entity's tax return is prepared in a currency other than its functional currency, changes in the exchange rate between the two currencies generate temporary differences with respect to the valuation of non-monetary assets and liabilities. As a result, deferred tax is recognized in profit or loss.

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
Deferred tax on tax loss carryforwards	56.7	71.0
DTA for pensions and healthcare benefits	42.8	44.8
Other items temporarily non deductible	53.6	60.1
Change in unrecognized deferred tax assets	(14.8)	(15.6)
Internal profit eliminations	5.6	4.4
Netted against deferred tax assets	(40.8)	(55.3)
<b>Total Deferred tax assets</b>	<b>103.1</b>	<b>109.3</b>
Fixed assets revaluation	68.9	57.3
Other deferred tax liabilities	19.8	34.5
Netted against deferred tax assets	(40.8)	(55.3)
<b>Total Deferred tax liabilities</b>	<b>47.9</b>	<b>36.5</b>

The Group had €56.7 million in deferred tax assets relating to tax loss carryforwards and unused tax credits, of which €32.4 million related to the Group's North American tax consolidation group, €8.4 million related to the Serbian subsidiaries, and €5.0 million related to a Canadian subsidiary.

The €56.7 million comprises: €35.1 million of net deferred tax assets for tax loss carryforwards, and €21.6 million of net unused tax credits.

## NOTE 9 - SHAREHOLDERS' EQUITY AND EARNINGS PER SHARE

### 9.1 SHARE CAPITAL

Share capital comprises the par value of the ordinary shares minus incremental costs directly attributable to the issue of ordinary shares and share options, net of any tax effects. When share capital recognized as equity is repurchased, the amount of consideration paid, which includes directly attributable costs, is net of any tax effects, and is recognized as a deduction from equity classified as own shares. When

own shares are sold or reissued subsequently, the amount received is recognized as an increase in equity, and the resulting surplus or deficit on the transaction is transferred to/from retained earnings.

	Dec. 31, 2015	Dec. 31, 2014
Share capital (in €)	318,613,480	318,613,480
Number of shares	63,722,696	63,722,696
Par value (in €)	5.0	5.0

### 9.2 EARNINGS PER SHARE & DIVIDENDS

#### Weighted average number of shares outstanding (basic earnings)

(in thousands of shares)	Dec. 31, 2015	Dec. 31, 2014
Weighted average number of shares during the period	63,723	63,723
Weighted average number of treasury shares held by Tarkett	(224)	(233)
<b>Weighted average number of shares outstanding (undiluted)</b>	<b>63,499</b>	<b>63,490</b>

#### Basic earnings per share

Basic earnings per share as of December 31, 2015 are calculated on the basis of the Group's share of net profit and on the weighted average number of shares outstanding during the period (and after deduction of the weighted average number of treasury shares).

	Dec. 31, 2015	Dec. 31, 2014
Profit for the period attributable to Tarkett shareholders (in m€)	83.3	61.2
Weighted average number of shares outstanding (undiluted)	63,499	63,490
<b>Basic earnings per share (in €)</b>	<b>1.31</b>	<b>0.96</b>

#### Weighted average number of shares outstanding (diluted earnings)

(in thousands of shares)	Dec. 31, 2015	Dec. 31, 2014
Weighted average number of shares during the period	63,723	63,723
Weighted average number of treasury shares held by Tarkett	(224)	(233)
Impact of share-based payment plans	183*	216*
<b>Number of shares potentially outstanding at the end of the period (diluted)</b>	<b>63,682</b>	<b>63,706</b>

\*free share grant plans provide only for the grant of existing shares and not for issuance of new shares.

#### Diluted earnings per share

Diluted earnings per share as of December 31, 2015 are calculated on the basis of the Group's share of net profit and on the weighted average number of shares outstanding during the period and the weighted average number of potential shares outstanding (and after deduction of the weighted average number of treasury shares).

	Dec. 31, 2015	Dec. 31, 2014
Profit for the period attributable to Tarkett shareholders (in m€)	83.3	61.2
Number of shares potentially outstanding at the end of the period (diluted)	63,682	63,706
<b>Diluted earnings per share (in €)</b>	<b>1.31</b>	<b>0.96</b>

#### Dividends

Tarkett paid dividends in the amount of €0.38 per share to its shareholders on July 8, 2015, in accordance with the decision of the General Shareholders' meeting of April 24, 2015. In 2014, the Group had paid a dividend of €0.62 per share.

## NOTE 10 - RELATED PARTIES

In accordance with IAS 24, "Related Party Disclosures," the Group has identified the following related parties:

1. Joint ventures;
2. The Group's principal shareholders, the Société d'Investissement Deconinck ("SID") and KKR International Flooring 2 SARL;
3. The members of Tarkett's Management Board and Supervisory Board.

Transactions entered into during the first half of the year with the Group's joint ventures and principal shareholders are detailed below.

### 10.1 Joint ventures

All transactions between fully consolidated entities are eliminated in consolidation.

Transactions with related entities and jointly held entities are entered into on arm's length terms.

The Group has only one joint venture, Laminate Park GmbH & Co KG, jointly controlled with the group Sonae in Germany.

The Group's transactions with its joint venture may be summarized as follows:

<i>(in millions of euros)</i>	Dec. 31, 2015	Dec. 31, 2014
<b>Joint ventures</b>		
Sale of goods to Tarkett	25.8	29.7
Purchase of services from Tarkett	(1.2)	(1.7)
Loans from Tarkett	9.2	9.2

### 10.2 Principal shareholders

Société d'Investissement Deconinck holds 50.18% of Tarkett's share capital and as such controls and coordinates the Group's activities.

As of December 31, 2015, SID had invoiced a total of €500 thousand in fees under the Assistance Agreement (as compared with €500 thousand as of December 31, 2014).

Tarkett is a party to a Service Agreement with SID providing for a lump-sum annual payment of €75.0 million.

As of December 31, 2015, Tarkett had invoiced a total of €75.0 thousand in fees under the Service Agreement (as compared with €75.0 thousand as of December 31, 2014).

KKR International Flooring 2 SARL (KKR) holds 21.5% of Tarkett's share capital and as such, has significant influence. SID and KKR are parties to a shareholders' agreement.

### 10.3 Members of Tarkett's Management Board and Supervisory Board

None.

## NOTE 11 - SUBSEQUENT EVENTS

As of the date hereof, there are no material subsequent events to be disclosed.

## 5.4 NOTES TO COMPANY FINANCIAL STATEMENTS

### NOTE 1 - ACCOUNTING PRINCIPLES

The annual financial statements were prepared in accordance with Regulation 2014-03 of the Autorité des Normes Comptables (French accounting standards

authority) approved by ministerial decree dated September 8, 2014 with respect to the Plan Général Comptable (General Accounting Code).

#### 1.1 ACCOUNTING PRINCIPLES

General accounting conventions were applied in compliance with the principle of prudence and in accordance with the following assumptions:

- continuity of operations;
- maintenance of accounting principles from one fiscal year to the next;
- independence of fiscal years;

and in accordance with the general rules concerning preparation and presentation of annual accounts.

The primary method used to value recorded items is the historical cost method.

The main methods used are detailed below.

#### 1.2 TANGIBLE AND INTANGIBLE ASSETS

The primary method used to value recorded items is the historical cost method.

The main methods used are as follows:

##### 1.2.1 INTANGIBLE ASSETS

Intangible assets primarily comprise licenses, software and capitalization of external costs for implementing software within the Group's subsidiaries, grouped together under the item "concessions and patents".

Gross value consists of acquisition cost.

Software and software licenses are depreciated on a straight-line basis over a period of 1 to 5 years.

For tax purposes, software licenses are depreciated over a period of 1 year. Accelerated tax depreciation is recorded in that regard.

##### 1.2.2 PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment primarily constitute office equipment, computer equipment, fixtures and facilities.

The gross value of these items corresponds to their initial value upon acquisition, taking into account the costs required to make them usable.

Depreciation is calculated on a linear basis over the expected useful life of the items.

Depreciation for impairment is calculated on a linear or declining balance basis depending on the expected useful life:

Office and computer equipment and other property, plant and equipment are depreciated on a straight-line basis over a period of 3 years.

#### 1.3 FINANCIAL ASSETS AND MARKETABLE SECURITIES

Financial assets primarily comprise equity securities and guarantees paid.

Gross value consists of acquisition cost, excluding fees.

Where the use value is lower than the gross value, an impairment provision is recorded for the difference. The

use value is calculated based on criteria such as the net condition, changes in profitability and value in use of the subsidiary. The following items may also be taken into consideration for this valuation: expertise, profitability, shareholders' equity.

## 1.4 RECEIVABLES AND LIABILITIES

Receivables and liabilities are valued at their nominal value. Receivables, where necessary, have been impaired

by provision to take into account likely difficulties in recovery.

## 1.5 FOREIGN CURRENCY TRANSACTIONS

Transactions in foreign currencies are recorded at the exchange rate as of the date of the transaction.

Assets and liabilities denominated in foreign currency as of the balance sheet date are converted into euros using the exchange rate on such date. Exchange differences resulting from the conversion are recorded in conversion rate adjustments. Unrealized exchange losses that are not offset and not covered by hedging instruments are the subject of provisions for risk.

## 1.6 PROVISIONS

### 1.6.1 Provisions for pensions and similar obligations

Provisions have been calculated by an outside actuary on the basis of data as of December 31, 2015, in accordance with the main assumptions described below:

- inflation rate: 2%
- discount rate: 1.3%
- salary indexation rate: 3%
- retirement age: 65 years

### 1.6.2 Other provisions for risks and expenses

Provisions are recorded at the end of the fiscal year to cover risks and expenses relating to the following:

- exchange rate risks
- obligation of the Company to a third party likely or certain to result in an outflow of resources without expected consideration.

## 1.7 PROVISION FOR LONG-TERM EMPLOYEE INCENTIVE PLANS (LTIP)

The Tarkett Group, for which Tarkett is the holding company, regularly implements share grant plans.

For the three plans in effect, ordinary shares will be granted to the beneficiaries at the end of a two-year vesting period. The grant will be subject to satisfying an economic performance condition (based on the Group's 3-year plan) and the beneficiaries' continuous employment through the end of the vesting period. The Group may decide to grant, instead of shares, the equivalent value in cash calculated at the market price.

In accordance with CNC (the French accounting regulation agency) Notice No. 2008-17 dated November 6, 2008 on

the accounting treatment of free share grant plans for employees, a provision of €18,975,698 was recorded as of December 31, 2015 (€7,825,835 on December 31, 2014) to cover Tarkett's obligation to deliver shares to the beneficiaries at the time of the definitive share grant.

The provision relating to shares not distributed at the balance sheet date in connection with the LTIP 2011 is valued at a price of €24, the buyback price of these shares in July 2014.

In 2015, the vesting of the LTIP2012 resulting in a cash payment of €933,341.

	LTIP 2013	LTIP 2014	LTIP 2015
Grant date	9 Oct. 2013	1 April 2015	21 Dec. 2015
End of vesting period	30 June 2016	30 June 2017	30 June 2018
Number of shares	372,783	269,800	364,850
Stock price as of 12/31/2015	28.8	28.8	28.8
Provision recorded as of 12/31/2015	(6,793,503)	(3,454,039)	(7,248,068)

## 1.8 SIGNIFICANT EVENTS

### 1.8.1 Capital increase of Fieldturf Tarkett SAS and Impairment of Shares

In accordance with the resolutions adopted on December 21, 2015, Fieldturf Tarkett SAS carried out a capital decrease by imputation of previous years' losses (carried forward) for a total of €4,562,000. On the same day and for the same amount, Tarkett carried out a capital increase of its subsidiary Fieldturf Tarkett SAS by issuance of new shares, fully paid in cash exclusively by offset of receivables.

Thus, Fieldturf Tarkett SAS's share capital remained unchanged at €8,639,000 and Tarkett remained the only shareholder following the transaction.

In addition, on December 31, 2015, the shares of Fieldturf Tarkett SAS were impaired in the amount of €21,734,000, bringing their net value on Tarkett's books to €8,639,000, the value of Fieldturf Tarkett SAS's share capital.

### 1.8.2 Renewal of Credit Facility

On June 22, 2015, Tarkett closed the early refinancing of its June 27, 2011 €450.0 million revolving credit facility (RCF) maturing in June 2016, as well as of the €60.0 million and USD 24.0 million amortized term loan maturing in May

2016. The new financing is a €650.0 million multicurrency revolving syndicated credit facility maturing in June 2020.

### 1.8.3 Change of address of registered office

As of March 1, 2015, the Group relocated its registered office to 1 Terrasse Bellini - Tour Initiale - 92919 Paris La Défense.

Tarkett France and Fieldturf Tarkett SAS, which are also located on the premises.

This relocation resulted in a total cost (excluding acquisition of property, plant and equipment) of approximately €900,000 including all costs relating to the move from Nanterre, setting up at La Défense, some double taxation, and a portion of the construction work received from Icade for €780,000. These costs were partially re-invoiced to

In addition, Tarkett was involved in a dispute with SETEPP, the lessor of Tarkett's former registered office in Nanterre. In December 2015, the parties entered into a settlement agreement pursuant to which Tarkett paid €100,000.

## 1.9 SUBSEQUENT EVENTS

In January 2016, Tarkett received an audit notice for fiscal years 2013 and 2014.

## 2.3 STATEMENT OF PROVISIONS

PROVISIONS	Beginning of the fiscal year	Increases	Decreases Reversals	End of fiscal year
For reconstruction of deposits				
For investments				
For price increases				
Accelerated depreciation	704,336	478,905	380,110	803,131
Exceptional 30% increases				
For setting up abroad prior to Jan. 1, 1992				
For setting up abroad after Jan. 1, 1992				
For start-up loans				
Other regulated provisions				
<b>TOTAL</b>	<b>704,336</b>	<b>478,905</b>	<b>380,110</b>	<b>803,131</b>
For litigation				
For customer warranties				
For losses on futures contracts				
For fines and penalties				
For foreign exchange losses				
For provisions for pensions and obligations	498,590	72,211		570,801
For taxes				
For replacement of fixed assets				
For major repairs				
For paid vacation expenses				
Other provisions	10,007,518	14,435,997	4,089,144	20,354,371
<b>TOTAL</b>	<b>10,506,108</b>	<b>14,508,208</b>	<b>4,089,144</b>	<b>20,925,172</b>
On intangible assets				
On tangible assets				
On investments accounted for by the equity method				
On equity securities		21,373,900		21,373,900
On other financial assets				
On inventories and work in progress				
On customer accounts				
Other impairment				
<b>TOTAL Impairment</b>		<b>21,373,900</b>		<b>21,373,900</b>
<b>TOTAL GENERAL</b>	<b>11,210,444</b>	<b>36,361,013</b>	<b>4,469,254</b>	<b>43,102,203</b>
Additions and reversals:				
o operational		14,435,997	981,247	
o financial		21,373,900		
o exceptional		551,116	3,488,007	

The change in Other Provisions was essentially due to 2015 LTIP transactions, the reversal of a provision recorded in 2014 in connection with the relocation of the registered office from Nanterre to La Défense, as well as the impairment of the shares of Fieldturf Tarkett SAS to adjust their net accounting value on Tarkett's books to be equal to Fieldturf Tarkett SAS's share capital.

## 2.4 STATEMENT OF MATURITIES OF RECEIVABLES AND DEBTS

STATEMENT OF RECEIVABLES	Gross amount	Up to one year	More than 1 year

Other	(3,134)	
<b>Total</b>	<b>2,332,793</b>	<b>2,795,870</b>

## 2.15 TAX CONSOLIDATION

Tarkett opted for the tax consolidation regime as from January 1, 2009 for calculation of the corporate income tax as well as for the additional contribution on this tax.

In 2009, Tarkett put in place a tax consolidation group with its French subsidiaries: Fieldturf Tarkett and Tarkett France SAS. In 2012, Tarkett Bois entered the tax consolidation group, as did Desso SAS in 2015.

Under the principle of neutrality, income tax expense is borne by each of the consolidated companies as it would be in the absence of a tax consolidation option

Any tax savings resulting from the consolidation are recorded on Tarkett's accounts.

## 2.16 DEFERRED AND UNREALIZED TAX POSITION

	12/31/2015 (in thousands of euros)		12/31/2014 (in thousands of euros)	
	Basis	Corresponding Tax	Basis	Corresponding Tax

## 5.6 TABLE OF SUBSIDIARIES AND EQUITY INVESTMENTS

### 5.6.1 PRINCIPAL SUBSIDIARIES

The Group consists of Tarkett and its subsidiaries (See Section 1.7 “Simplified Organizational Chart”).

Tarkett is the Group’s parent company and the head of the French tax consolidation group that has been in place since January 1, 2009.

The Company’s principal direct and indirect subsidiaries as of December 31, 2015 are described below. None of the Group’s subsidiaries is a listed company.

**Tarkett GDL S.A.** is a Luxembourg limited liability corporation (*société anonyme*) with share capital of €274,123,080, the registered office of which is located at 2, Op der Sang, L-9779, Lentzweiler, Luxembourg. It is registered with the Trade and Companies Register of Luxembourg under number B 92.165. Tarkett holds all of the share capital and voting rights of Tarkett GDL S.A., the principal activity of which is the manufacture of resilient flooring, primarily for the residential market. Tarkett GDL S.A. is the head of the group of subsidiaries making up the EMEA segment, and also houses the Group’s research and development activities.

**Tandus Centiva Inc.** (formerly Tandus Flooring Inc.) is a U.S. company with share capital of USD 10, the registered office of which is located at Corporate Trust Center, 1209 Orange Street, Wilmington, DE, 19801, County of New Castle, United States of America. It is incorporated in Delaware under number 58 2151061. Tarkett Enterprises Inc. directly holds all of the share capital and voting rights of Tandus Centiva Inc., the principal activity of which is the design, manufacture and sale of carpet flooring and the sale of LVT manufactured by another subsidiary of the Group, mainly in the United States.

**ZAO Tarkett** is a Russian non-listed stock company with share capital of RUB 376,000,000, the registered office of which is located at 1, Promishlennaya zona, Otradny, Samara Oblast 446300, Russia. It is registered under number 1026303207226. Tarkett directly and indirectly holds all of the share capital and voting rights of ZAO Tarkett, the principal activity of which is the manufacture of vinyl flooring, primarily for residential customers in the CIS region.

**ZAO Tarkett RUS** is a Russian non-listed stock company with share capital of RUB 10,000, the registered office of which is located at prospekt Andropova, d. 18, korp. 7, 115432, Moscow, Russia. It is registered under number 1027739892730. Tarkett indirectly holds all of the share capital and voting rights of ZAO Tarkett RUS, the principal activity of which is the distribution of flooring (primarily vinyl, wood and laminate) throughout Russia.

**Tarkett AB** is a Swedish limited liability company with share capital of SEK 43,000,000, the registered office of which is located at 10 Blekingelän 372 81 Ronneby, Sweden. It is

registered with the Ronneby Trade Register under number 556003-9967. Tarkett indirectly holds all of the share capital and voting rights of Tarkett AB, the principal activity of which is the manufacture of vinyl flooring, primarily for residential customers in the CIS region. This company also carries out the distribution in Sweden of flooring products manufactured at the EMEA segment’s other sites.

**Tarkett France** is a French simplified stock company (*société par actions simplifiée*) with share capital of €7,700,000, the registered office of which is located at 1 Terrasse Bellini – Tour Iniale – 92919 Paris La Defense, France. It is registered with the Nanterre Trade and Companies Register under number 410 081 640. Tarkett indirectly holds all of the share capital and voting rights of Tarkett France, the principal activity of which is the manufacture and marketing of vinyl flooring for the commercial market and the marketing of flooring products manufactured by other EMEA segment sites in France.

**FieldTurf Tarkett SAS** is a French simplified stock company (*société par actions simplifiée*) with share capital of €8,639,050, the registered office of which is located at 1 Terrasse Bellini – Tour Iniale – 92919 Paris La Defense,, France. It is registered with the Nanterre Trade and Companies Register under number 452 835 242. Tarkett indirectly holds all of the share capital and voting rights of Fieldturf Tarkett SAS, the principal activity of which is the manufacture, marketing and installation of sports surfaces.

See Note 12 in Section 5.2, “Notes to the Consolidated Financial Statements”, for a list of consolidated subsidiaries. A breakdown of the Group’s 2015 consolidated net revenues by geographic zone is set forth in Section 4.1.2, “Comparaison of Results of Operations for the Years Ended December 31, 2014 and December 31, 2015”.

### 5.6.2 RECENT ACQUISITIONS AND DISPOSALS

#### Acquisitions

The Group’s 2015 acquisitions are described in Section 4.1.1.7, “Acquisitions”.

#### Simplification Transactions

The simplification transactions carried out by the Group are described in Section 5.2, “Notes to the Consolidated Financial Statements” - Note 2.4.1, “Transactions Completed in 2015”.

## 5.7 DIVIDEND DISTRIBUTION POLICY

The following table presents total dividends and net dividends per share distributed by the Company during the last three fiscal years.

	Year distributed		
	2015	2014 <sup>(3)</sup>	2013
Total dividends ( <i>in millions of euros</i> )	24.1 <sup>(1)</sup>	39.5 <sup>(1)</sup>	124.80 <sup>(1)(2)</sup>
Net dividends per share ( <i>in euros</i> )	0.38	0.62	2.00 <sup>(3)</sup>

(1) The amounts presented in the table represent total dividends after deduction of the dividend on treasury shares held by the Company.

(2) The total amount of the dividend was €130.0 million. The amount shown in the table represents the total amount after deduction of the share of the dividend paid to Partholdi, which merged into Tarkett in November 2013.

(3) The net dividend per share is shown before division of the par value by four in connection with the pre-IPO reorganization on November 21, 2013, which had the effect of multiplying the number of existing ordinary shares of the Company by four.

In accordance with French law and the Company's Bylaws adopted on November 21, 2013, the General Shareholders' meeting may decide to distribute a dividend upon a proposal of the Management Board and in view of the Supervisory Board's report.

The Company's dividend distribution policy reflects the Company's results of operations and financial condition, the realization of its objectives and the dividend distribution policies of its principal subsidiaries. Assuming no major acquisitions, the Company's goal is to distribute annual dividends representing approximately 40% of the

Group's consolidated net profit attributable to owners of the Company. The Company can give no assurance, however, that this objective will be met. Future dividends will depend on the general condition of the Group's business and other factors deemed relevant by the Management Board.

For 2016, the Management Board will propose a dividend of €0.52 per share, corresponding to 40% of the Group's consolidated net profit attributable to owners of the Company.

## 5.9 STATUTORY AUDITORS' REPORT ON THE GROUP'S CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders,

In compliance with the assignment entrusted to us by your annual general meeting, we hereby report to you, for the year ended 31 December 2015, on:

- the audit of the accompanying consolidated financial statements of Tarkett;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Management Board ("Directoire"). Our role is to express an opinion on these consolidated financial statements based on our audit.

### OPINION ON THE CONSOLIDATED FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as at 31 December 2015 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

### JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirements of article L.823-9 of

the French Commercial Code ("Code de commerce"), we bring to your attention the following matters:

- Accounting estimates:
- Notes "1.2.2 Accounting estimates and judgments" and "6.2 Potential liabilities" to the consolidated financial statements disclose the assessments and significant estimates made by Tarkett's management.
- In connection with our audit, we considered that those assessments and estimates related mainly to tangible and intangible assets (note 5), deferred tax (note 8.2), provisions (notes 6) and post-employment benefits (note 4.1).
- For these accounts, our work consisted in assessing the data and assumptions underlying the assessments and estimates, reviewing on a sample basis, the calculations performed by the Company, comparing prior years accounting estimates with the corresponding actual results, reviewing management's approval procedures for such estimates and reviewing that the disclosures relating to these estimates in the notes to the financial statements are appropriate.

These assessments were made as part of our audit of the consolidated financial statements taken as a whole, and therefore contributed to the opinion we formed which is expressed in the first part of this report.

### SPECIFIC VERIFICATION

As required by law we have also verified, in accordance with professional standards applicable in France, the information relative to the Group, given in the parent company's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

## 5.10 STATUTORY AUDITORS' REPORT ON THE COMPANY FINANCIAL STATEMENTS

To the Shareholders,

In compliance with the assignment entrusted to us by your annual general meeting, we hereby report to you, for the year ended 31 December 2015, on:

- the audit of the accompanying annual financial statements of Tarkett;
- the justification of our assessments;
- the specific verifications required by law.

These company financial statements have been approved by the Management Board. Our role is to express an opinion on these financial statements based on our audit.

### OPINION ON THE ANNUAL FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; these standards require that we plan and perform the audit to obtain reasonable assurance about whether the company financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the company financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the Company financial statements give a true and fair view of the assets and liabilities and of the financial position of the Company and of the results of its operations at the end of the fiscal year.

### JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirements of article L.823-9 of the French Commercial Code ("Code de commerce"), we bring to your attention the following matter:

- Asset value of marketable securities

Your Company carries out an annual asset valuation of its marketable securities, as described in the "Financial Assets" section of the Note "Accounting Rules and Principles". We reviewed the approach used by the Company, and, on the basis of the information available to us at that time, we believe that the estimates used by the company as at 31 December 2015 are reasonable.

These assessments were made as part of our audit of the Company financial statements taken as a whole, and therefore contributed to the opinion we formed which is expressed in the first part of this report.

### SPECIFIC VERIFICATIONS AND INFORMATION

In accordance with professional standards applicable in France, we have also carried out the specific verifications required by law.

We have no matters to report with respect to the fair presentation and consistency with the Company financial statements of the information given in the Management Board's management report and the documents provided to the shareholders on the financial condition and Company financial statements.

With respect to information provided pursuant to Article L.225-102-1 of the French Commercial Code on the compensation and benefits paid to the company officers, as well as on the commitments given for their benefit, we have verified their consistency with the financial statements or with the data used to prepare such financial statements and, where applicable, with the information gathered by your company from the companies that control your company or are controlled by it. On the basis of that work, we attest to the accuracy and fair presentation of such information.

Pursuant to the law, we ensured that the various information with respect to the identities of your shareholders were provided to you in the management report.

## 6.1 MAIN RISKS

The Company has conducted a review of risks that could have a material adverse impact on its business, financial condition, financial results and prospects (or ability to attain its objectives) and is not aware of other significant risks except those set out in this Registration Document.

### 6.1.1 RISKS RELATING TO THE GROUP AND ITS INDUSTRY

#### 6.1.1.1 Risks Relating to Economic Cycles

The flooring industry depends heavily on the commercial and residential renovation market, and, to a lesser extent, on the new construction market. These markets can be affected by the cyclical nature of the general economy. The renovation business tends to be influenced, in particular, by changes in consumer confidence and disposable income, commercial and office occupancy rates, interest rates and the availability of credit. These factors can cause fluctuations in demand, and, as a result, in the Group's sales volumes and margins.

Global and regional economic cycles may have a negative impact on demand for flooring and sports surfaces and therefore on the Group's business, financial condition, financial results and future prospects. In particular, the Group has a strong presence in Russia and in the other countries of the Commonwealth of Independent States (CIS). These countries represent less than 20% of the Group's consolidated net revenue. Economic forecasts for this region were recently downgraded: in January 2016, the IMF forecasted a 1.0% contraction in Russian GDP in 2016.

To reduce this risk, the Group's policy is to diversify in order to achieve balance among the various markets where it does business. Thus, the Group does business in:

- Several geographic regions;
- Several product categories;
- Both the commercial and the residential markets; and
- Primarily in the renovation market, which is less sensitive to economic cycles than the new construction market.

#### 6.1.1.2 Risks Relating to Public Spending

A significant portion of the Group's business consists of sales to public sector end-users, in particular educational and health care institutions and sports facilities. Public spending levels significantly affect the Group's activities in these sectors. In a context of important budgetary constraints, certain expenses may not be considered as a priority, for example, construction and renovation of sports infrastructure were significantly affected by the contraction of governmental budgets in Europe over the last few years. Moreover, public institutions may decide to postpone certain renovation projects in order to concentrate on other budgetary priorities. A decrease in public spending could have a negative effect on demand for the Group's products and thus have a material adverse effect on its business, financial condition, financial results and prospects.

The Group tries to reduce the effects of this risk by diversifying its activities, as described in Section 6.1.1.1 "Risks Relating to Economic Cycles".

#### 6.1.1.3 Risks Relating to Fluctuations in Prices of Raw Materials and Energy

The Group's manufacturing processes use large quantities of raw materials and energy resources, which are a significant expense (see Section 1.6.2.1 "Raw Materials and Suppliers").

In 2015, raw material costs represented 58% of the Group's cost of sales. 53% of the cost of these raw materials is indirectly tied to crude oil prices and is affected by the volatility of these prices including polyvinyl chloride ("PVC") and plasticizers. Energy consumption and transportation expense, is also tied to crude oil prices. The Group is also exposed to fluctuations in the prices of other raw materials essential to its business, such as wood.

A future increase in raw material prices could materially impact the Group's business, financial condition and financial results if it is unable to quickly and completely pass these additional costs on to customers, in particular as a result of the magnitude of the cost increase, delays resulting from backlogs, competitive pressures or market conditions.

In order to manage this risk, the Group implements the following actions:

- The Group develops preferred and sustainable relationships with its suppliers;
- The Group develops production processes that give it flexibility and reduce its dependence on certain types of suppliers;
- The Group tries to reflect increases in the price of raw materials in its product prices as rapidly as possible.

#### 6.1.1.4 Risks Relating to the International Nature of the Group's Business and to Political Risks

The Group does business and maintains production capacity throughout the world, including in countries outside of the European Union and the United States. In particular, it is present in Russia and in the other countries of the CIS. Furthermore, the Group is developing its business in Asia Pacific (in particular, in China), and in Latin America (in particular, in Brazil). These countries have greater financial and political instability, as well as greater exposure to social unrest and infrastructure complications, than more mature markets.

The Group's commercial and financial results may be directly or indirectly affected by any unfavorable change in the economic, political or regulatory environment in the countries where it manufactures or sells its products. Thus, the direct and indirect consequences of civil conflicts, terrorist activity, political instability, or instability in the economic and regulatory framework in countries where the Group does business could have a material adverse effect on the level of investment in renovation and new construction

in such countries and, as a result, on the Group's business, financial condition, financial results and prospects. Such events could lead, for example, to delays or losses in the delivery of the Group's products or the supply of raw materials, to a significant decrease in sales, or to an increase in security costs, insurance premiums or other costs necessary to ensure continuity of operations.

The Group is especially exposed to the risk of deterioration in the economic, political or regulatory environment of Russia and the other CIS countries. These countries represented less than 20% of the Group's consolidated net revenue in 2015. As a result, a material adverse change in the CIS countries could have a significant adverse effect on the Group's revenues, financial results and prospects. The Group does business in Ukraine, which represented less than 1% of the Group's revenue in 2015. However, the Group's Ukrainian plants are located in the western part of the country and are therefore not directly affected by the conflict.

The Group's international business exposes it to a multitude of local political and commercial risks, and its success depends on its capacity to adapt to economic, social and political changes in each of the countries where it is present. In addition, legislative or regulatory changes (including changes in tax law, capital controls, customs duties, import and export rules, employment law, intellectual property protection and health, safety and environmental rules) could significantly increase the Group's costs in the various countries where it is present or limit its capacity to freely transfer capital and could, as a result, adversely affect the Group's business, financial condition, financial results and prospects.

The Group's strategy for managing political risk, described below, is intended to cover the various consequences of such risk:

- Increasing sale prices and working continuously to reduce production costs;
- Accelerating the substitutability process for raw materials; and
- Analyzing crisis scenarios and preparing appropriate plans.

Because one consequence of political instability is an impact on exchange rates, the actions taken with respect to foreign exchange risk also apply to risks relating to political instability.

#### **6.1.1.5 Risks Relating to External Growth**

The Group's strategy relies in part on external growth. Such growth may include acquisitions of companies or assets, equity investments or the creation of partnerships in its sector and in the geographic regions in which the Group hopes either to increase or reinforce its presence. See Note 2, "Changes in scope of Consolidation," in Section 5.2, "Notes to the Consolidated Financial Statements". However, the Group may be unable to identify attractive targets or enter into transactions at an opportune time or on satisfactory terms. Moreover, given the competitive environment, the Group may be unable to complete external growth transactions that meet its investment criteria, which could have a material adverse effect on the implementation of its strategy.

Furthermore, to obtain the necessary authorizations for acquisitions from competition authorities in one or more countries, the Group could be forced to accept certain conditions, such as the sale of certain assets or segments and/or undertakings restricting the conduct of its business.

External growth creates risks that include the following: (i) the business plan underlying the acquisition valuations may be based on assumptions that turn out not to be true, particularly with respect to synergies, expected savings and the evolution of the markets in question; (ii) the Group may fail to effectively integrate the acquired companies, their technologies, their product lines or their employees; (iii) the Group may be unable to retain certain key employees or customers of the acquired companies; (iv) the Group may increase its indebtedness in order to finance such acquisitions and (v) it may carry out acquisitions at a time that proves inopportune in the market in question. The anticipated benefits from future or past acquisitions may not materialize within the expected time periods or at the expected levels, which could affect the Group's financial condition, financial results and prospects.

In order to minimize this risk, the Group chooses targets in line with its strategy, conducts careful due diligence, negotiates detailed agreements, and implements business and consolidation plans developed in advance.

#### **6.1.1.6 Risks Relating to the Quality of the Group's Products**

The success of the Group's business depends on the quality and reliability of its products and customer relations. In the event that the Group's products repeatedly fail to satisfy customer requirements, its reputation and sales volumes could suffer. If there is a problem with respect to product quality or product certification, the Group does everything possible to respond appropriately to react to the needs of its customers. Nevertheless, it is possible that customers will encounter quality or reliability problems with the Group's products that are significant enough to have a material adverse effect on its financial results, reputation, business, financial condition or prospects.

In addition, in the event that the Group markets defective products, the relevant subsidiaries could incur tort or contract liability, which could lead to adverse effects on the Group's financial results, business, financial condition and prospects.

To market its products, the Group is required to obtain and maintain certifications in certain markets. These may be required by law or by industry standards that the Group must meet under the terms and conditions applicable to its renovation or construction projects.

The process of obtaining product certification can be long and costly. There can be no assurance as to the Group's ability to obtain or maintain certifications, or as to the length of time it will take to obtain them. Moreover, certification requirements change continually and require constant monitoring. If the product certifications were delayed, refused, suspended or withdrawn, the marketing of these products could be delayed or prohibited in the relevant countries. The Group could then run the risk of losing sales in important markets.

Finally, it is possible that one or more substances used in manufacturing the Group's finished products could be banned in one or more jurisdictions in which the Group's products are sold or manufactured. In that case, the Group might be forced to stop selling the affected products.

In order to manage this risk, the Group implements the following actions:

- The Group has put in place a testing and approval process for developing new products and changing the formulation of existing products, as well as a process for the approval of new components.

#### **6.1.1.7 Risks Relating to Strong Competition in the Regions Where the Group Does Business**

The flooring industry is highly competitive. The Group faces significant competition from a few large competitors, numerous local manufacturers and independent distributors (see Section 1.5.1, "General Presentation of the Flooring Market"). The arrival of new competitors, new products or new technologies developed by competitors could also affect the Group's competitive position.

The Group can provide no assurance that it will be able to maintain its margins in the face of competition, particularly if new entrants gain access to one or more of its markets, or if competition intensifies for any other reason. Maintaining the Group's competitive position could require additional investments in new products, new manufacturing facilities or the development of the Group's distribution network, marketing and sales activities. These competitive pressures could lead to reduced demand for the Group's products or force it to lower its prices. Such events could have a material adverse effect on the Group's business, financial condition, financial results and prospects.

#### **6.1.1.8 Risks Relating to the Group's Dependence on Certain Suppliers**

The Group relies on a limited number of suppliers for certain essential raw materials (see Section 1.6.2.1 "Raw Materials and Suppliers"). This is particularly the case for the manufacture of resilient flooring, for which the Group uses primarily raw materials derived from crude oil, such as PVC and plasticizers, which represent 53% of raw materials and for which the suppliers are large chemical companies, which are limited in number. Supply contracts are periodically renewed or renegotiated. An adverse change in the Group's relationship with one of its suppliers, non-compliance with undertakings under the contracts, the insolvency of a supplier or any increased concentration of suppliers could have a material adverse effect on the Group's business, financial condition, financial results and prospects.

With respect to the machines and equipment necessary for the Group's business, if one of the Group's suppliers breaches or terminates a supply contract, the Group might be unable to rapidly find a substitute supplier under satisfactory terms, which could have an adverse effect on the Group's business, financial condition, financial results or future prospects.

The Group seeks to reduce this risk by implementing the actions described in Section 6.1.1.3 "Risks relating to fluctuations in prices of raw materials and energy".

#### **6.1.1.9 Risks Relating to Interruption or Security Breach of Information**

The Group uses complex information systems including for production management, sales, logistics, accounting and reporting, which are essential for conducting its commercial and industrial activities. Although the Group has a policy of reinforcement of the security program of its information systems infrastructure and prevention against pirating, a failure of one of them could have a material adverse effect on the Group's business, financial condition, financial results and prospects.

#### **6.1.1.10 Risks Relating to the Group's Retirement and Other Employee Benefit Commitments**

The Group incurs significant obligations in connection with its retirement and health plans and other employee benefits, primarily in North America and Western Europe (in particular in Germany, the United Kingdom and Sweden). As of December 31, 2015, these retirement, health and other obligations totaled €240 million, of which €94.5 million were covered by dedicated assets.

The Group's financing requirements for these obligations depends on the future performance of the dedicated assets, the discount rates used to measure future obligations, actuarial forecasts, changes affecting retirement plans and applicable regulations. As a result of the large number of parameters that determine the Group's financial obligations for retirement and other employee benefits and the difficulty in predicting them, its future requirements to finance retirement, health and other employee benefit obligations could be larger than the amounts estimated as of December 31, 2015. In that event, these financial obligations could have a material adverse effect on the Group's financial condition and financial results. For more information, see Note 4, "Employee Benefits", included in Section 5.2 "Notes to the Consolidated Financial Statements", as well as Section 4.1.1.8, "Presentation of Accounting and Financial Information".

#### **6.1.1.11 Risks Relating to Goodwill**

As of December 31, 2015, the Group's goodwill totaled €538.4 million. Future events could lead to an impairment of intangible fixed assets and/or goodwill. As a result of the substantial amount of intangible fixed assets and goodwill on the Group's balance sheet, any significant impairment or depreciation charges could have an adverse effect on its financial condition and financial results for the fiscal year in which such charges were recorded.

## 6.1.2 INDUSTRIAL RISKS

For a description of the principal safety and environmental regulations applicable to the Group, see Sections 1.6.4.3, "Standards Applicable to the Group's Products" and 3.2, "Environmental Information".

### 6.1.2.1 Risks Relating to Compliance with Environmental and Safety Regulations

The environmental, health, hygiene and safety regulations with which the Group must comply relate primarily to industrial safety, emissions or discharge of chemicals or dangerous substances (including industrial waste); their use, production, traceability, handling, transport, storage and elimination or exposure to such substances; and the remediation of industrial sites and environmental cleanup. The Group is subject to strict requirements with respect to safety, particularly concerning the fire-prevention standards applied to its products and manufacturing sites, as well as standards relating to the slip-resistance of the flooring it produces.

Complying with these regulations requires the Group to regularly incur significant expense. A violation of these rules could lead to fines or other civil, administrative or criminal sanctions, including the withdrawal of permits and licenses necessary to continue doing business. Changes to these laws and regulations or to their interpretation could lead to significant expense and/or investment, or could lead the Group to use more expensive substitute substances, to change its formulas and therefore to reduce the profitability of its products, which could adversely affect the Group's business, financial results and prospects.

### 6.1.2.2 Risks Relating to Industrial Accidents

Due to the toxicity and flammability of certain raw materials, the Group's finished products and manufacturing or supply processes, the Group's facilities present a number of safety, fire and pollution risks. In particular, manufacturing processes using flammable materials (chemical products and wood, for example) can create a significant risk of fire or explosion. In that event, the adverse consequences for the Group's business, financial condition, financial results or prospects could be significant.

The Group tries to minimize this risk through a long-standing industrial risk prevention program in partnership with its insurer.

### 6.1.2.3 Risks Relating to Exposure to Toxic or Dangerous Substances

In the past, the Group has used significant quantities of chemical, toxic or hazardous substances in manufacturing its products and has used various insulation materials (such as asbestos) in its industrial facilities. Some employees of the Group and, on occasion, third parties may have been exposed to these substances or to equipment containing toxic or hazardous substances prior to their progressive removal and replacement with substitute products. This could result in specific illnesses for which the Group's liability might be sought.

Moreover, some of the Group's products contain chemical substances that produce emissions during at least part of

the product's life cycle. Although these emissions are lower than applicable thresholds under current regulations, they may be proven to have harmful effects on human health at lower levels than those currently believed to be safe.

If the Group is held liable in legal proceedings, this liability may have a material adverse effect on its financial condition and financial results.

In the United States, the Group has been sued by third parties alleging past exposure to the asbestos contained in certain products manufactured at some of its sites until 1982. In the event that current or future lawsuits require the Group to pay amounts greater than those covered by the provisions it has recorded on its balance sheet, its insurance and the indemnification commitments provided by third parties, these proceedings could have a material adverse effect on the Group's financial condition and financial results (see Section 4.5, "Legal Proceedings").

## 6.1.3 MARKET RISKS

### 6.1.3.1 Exchange Rate Risk

As a result of the international nature of the Group's business, foreign exchange fluctuations have a direct accounting impact on its consolidated financial statements, which results in transaction risk impacting income and expenses incurred in foreign currencies and risks relating to the conversion into euros of the balance sheets and income statements of the Group's subsidiaries outside the euro zone.

In 2015, a significant portion of the Group's revenue was earned in currencies other than the euro, in particular the U.S. dollar (approximately 40% of consolidated net revenues in 2015). The Group seeks to reduce the impact of exchange rate fluctuations on its results of operations by developing its production capacities in the monetary zones where it sells its products. However, significant and sustained movements in exchange rates could adversely affect the Group's financial results, financial condition and prospects.

In Russia and the other CIS countries, although the Group locally manufactures almost all of the products it sells in the region, it imports some of the raw materials used in production from Western Europe. Because the suppliers invoice these raw materials in euros, the Group has significant exposure to foreign exchange risk with the local currencies, given that approximately 60% of the costs of the CIS countries are denominated in euros. In this region, the Group's policy is not to use hedging instruments, but rather to reflect exchange rate fluctuations between the ruble and the euro in its product prices. The effectiveness of this strategy depends on the Group's ability to maintain its pricing policy, which it may not be able to do systematically in the future. This could have a material adverse effect on the Group's financial results, financial condition and future prospects.

Tarkett works to reduce this risk in the following ways:

- The Group locates its production facilities close to the markets in which it sells its products, and it pays production costs in local currency;
- The Group regularly adjusts product prices in certain markets to account for changes in exchange rates, in particular with respect to the ruble.

For more information, see paragraph 5.2 of Note 7, “Financing and Financial Instruments”, included in Section 5.2, “Notes to the Consolidated Financial Statements” and Section 4.1.1.4, “Exchange Rate Fluctuations”.

### 6.1.3.2 Interest-Rate Risks

As of December 31, 2015, the Group’s consolidated net debt (which is the sum of non-current interest-bearing loans and borrowings and current interest-bearing loans and borrowings, minus cash and cash equivalents) totaled €482.3 million, and its gross debt was €550.2 million, including €459.7 million in floating-rate debt and €0.5 million in fixed-rate debt or capped debt after taking into account interest-rate hedges. The Group uses a hedging policy intended to limit the impact of an increase in interest rates on its financial expenses. However, as of December 31, 2015, after hedging, a simultaneous increase of 1% in all interest rates would translate into an increase in net financial expense of €4.8 million per year, before taxes, whereas a simultaneous decrease of 1%, or to zero, in interest rates would result in a decrease in net financial expense before taxes of €0.4 million.

For more information, see paragraph 5.2 of Note 7, “Financing and Financial Instruments”, included in Section 5.2 “Notes to the Consolidated Financial Statements”, and Section 4.3.3, “Financial debt”.

### 6.1.3.3 Liquidity Risks

As of December 31, 2015, the Group’s consolidated gross debt totaled €550.2 million and consolidated net debt totaled €482.3 million. In addition, the Group had €710.1 million in available credit lines as of the same date. The Group’s debt repayment schedule is included in Section 4.3.3, “Financial Debt”. The Group’s next significant maturity date is in the second half of 2018, when the €450 million syndicated credit facility will expire.

The Group’s credit agreements (primarily its syndicated credit lines with a maximum available amount of €650 million and its term loan with a maximum amount of €450 million) include certain covenants, including change of control provisions and financial ratios, in particular a net debt/EBITDA ratio not to exceed 3.0. These provisions are described in Section 4.3.4, “Revolving Syndicated Multi-Currency Credit Facility,” in which the 2014 and 2015 ratios are presented. Breach of these covenants or ratios could cause the Group’s creditors to accelerate the amounts due under the credit agreements. In that event, the Group could be unable to repay these amounts, or could be forced to refinance the debt on less favorable terms. Moreover, such a situation would make it difficult to put new financing in place, or could make such financing significantly more expensive, which could constitute an obstacle to the Group’s growth strategy and to its ability to finance investments.

For more information, see paragraph 5.3 of Note 7, “Financing and Financial Instruments”, included in Section 5.2 “Notes to the Consolidated Financial Statements”, and Section 4.3.4, “Revolving Syndicated Multi-Currency Credit Facility”.

## 6.1.4 LEGAL RISKS

### 6.1.4.1 Risks Relating to the Protection of Intellectual Property

The Group’s future growth depends on its ability to obtain, preserve and protect its patents, trademarks and other intellectual property rights.

Over the last several years, the Group has pursued an ambitious innovation policy, which necessitates protection to ensure that the Group retains the free use of its innovations and has the necessary legal tools to fight patent infringement and unfair competition.

As a result, the legal costs that the Group incurs to enforce compliance with its intellectual property rights could prove significant.

Conversely, the Group cannot guarantee that it will not infringe the rights of third parties. In that event, the Group could be ordered to pay significant damages, be forced to cease selling products that infringe the intellectual property rights in question and incur additional expenses to develop technology that respects the intellectual property rights of others, or be forced to enter into licenses permitting it to use the disputed technology. Since the Group conducts part of its business in countries where the protection of intellectual property rights is less developed than in Europe and North America, it cannot guarantee the level of protection that will be given to its portfolio of patents and trademarks nor can it avoid the risk of infringement, appropriation or illegal use of its intellectual property rights.

For more information on the Group’s intellectual property rights, see Section 1.6.4.4 “Intellectual Property Rights”.

### 6.1.4.2 Risks Relating to Legal and Administrative Proceedings

The Group’s entities are subject to national and regional laws and regulations that vary from country to country. In the ordinary course of business, the Group is exposed or liable to be exposed to legal, arbitral and administrative proceedings.

The Group is the subject of various legal proceedings described in Section 4.5, “Legal Proceedings”.

Moreover, in March 2013, the Autorité de la Concurrence (the French Competition Authority) launched investigations against several flooring manufacturers, including Tarkett, in relation to possible anti-competitive practices on the French market for vinyl flooring. Such litigation and investigations could have a material adverse effect on the Group’s business, financial results, financial condition and prospects.

### 6.1.4.3 Tax Risk

As an international group doing business in many countries, the Group is subject to multiple tax laws and various regulatory requirements, which affect its commercial, financial and tax objectives.

Because tax laws and regulations in effect in the various countries where the Group does business do not always provide clear or definitive guidelines, the Group’s structure, the conduct of its business and the relevant tax regime are based on its interpretation of applicable tax laws and regulations. The Group cannot guarantee that its

interpretations of tax laws and regulations will not be questioned by the tax authorities, or that applicable laws and regulations in certain of these countries will not change, be interpreted differently or be applied inconsistently. More generally, any violation of tax laws and regulations in the countries where the Group or its subsidiaries are located or do business could lead to tax assessments or the payment of late fees, interest, fines and penalties. Furthermore, the Group records deferred tax assets on its balance sheet to account for future tax savings resulting from differences

between the tax values and accounting values of its assets and liabilities or tax loss carry forwards of Group entities. The effective use of these assets in future years depends on tax laws and regulations, the outcome of current or future audits and litigation and the expected future financial results of the entities in question.

This could have a negative impact on the Group's effective tax rate, cash flow and financial results.

## 6.2 RISK MANAGEMENT

### 6.2.1 ORGANIZATION OF INTERNAL CONTROL AND RISK MANAGEMENT

The Company's risk management and internal control systems, under the responsibility of the head of internal audit, use a variety of methods, procedures and actions in order to:

- identify, analyze and control risks that could have a material effect on the assets, results, operations or objectives of the business, whether they are operational, commercial, legal or financial in nature or whether they relate to compliance with laws and regulations;
- ensure operational efficiency and the efficient use of resources; and
- ensure the reliability of financial information.

### 6.2.2 COMPLIANCE PROCEDURES

The Group has developed compliance procedures with respect to antitrust laws, corruption and fraud risk, whether external or internal, in order to comply with all applicable laws and regulations.

#### 6.2.2.1 Compliance with Antitrust Laws

The Group's goal is to preserve a dynamic, healthy and loyal competition.

To that effect, in 2011 the Group instituted a competition compliance program, piloted by the Group's Legal Department and outside experts. This program, under the responsibility of the Legal Department, is intended to ensure strict compliance by the Group's employees with competition laws, regulations and rules.

This program is deployed in a consistent and continuous manner, on a worldwide basis, through the distribution of the antitrust policy and through numerous events, both in person and online, promoting sensitivity to competition issues. It is applicable in all of the countries where the Group operates and covers all of its activities, including where such activities are carried out through joint ventures.

Local legal departments participate actively in verifying that local competition regulations are followed in each of the geographical regions where the Group operates.

#### 6.2.2.2 Prevention of Corruption

The prevention of corruption, under the responsibility of the Legal Department, is a major priority for the Group and its employees. Given the diversity of contexts in the geographic regions in which the Group operates and the significance of investments made, the Group is particularly vigilant against the risks of corruption. Although the large majority of the Group's customers in the most sensitive countries operate in the private sector, where corruption is less present than in the public sector, the Group is not immune from a potential instance of corruption.

In 2012, supervised by the Group's Legal Department and with the cooperation of the local legal departments, the Group launched a specific action plan to fight corruption.

In connection with this action plan, the Group has put in place anti-corruption policies, presented in-person and electronic anti-corruption training for targeted groups of employees, and issued guidelines covering the delivery and receipt of gifts and relationships with intermediaries.

#### 6.2.2.3 Prevention of Fraud

The prevention of and the fight against fraud, under the responsibility of the Internal Control and Audit Department, is a key element of the Group's internal control procedures. The fight against fraud is carried out as part of the Group's financial and internal control processes, and verifications are carried out by the Internal Control and Audit Department. The Group has used the following tools to raise awareness of fraud prevention and detection since 2011:

- publication of an internal fraud-prevention policy;
- publication of an article on so-called fraud, "To the Chairman," in the Group's internal newsletter;
- systematic internal reporting of any fraud that is discovered, in order to raise awareness and put in place additional controls, if necessary;
- in-person training of department heads and of the entire administrative staff of all of the Group's divisions;

### 6.2.3 INTERNAL CONTROL AND RISK MANAGEMENT SYSTEM

#### 6.2.3.1 Organizational Framework

Tarkett's organization is decentralized, relying on local executives, and set in a framework that reflects the Group's philosophy with respect to ethics, organization and control.

This organizational framework relies on the following:

- a set of values and principles disseminated throughout the Group whenever new employees arrive and relayed by recurring training and reminders. These principles are embedded in the Company's Code of Ethics and policies on anti-trust compliance, corruption, and fraud prevention under the responsibility of the Legal Department and the Internal Control Department;
- the founding principles at the heart of the Group's values, such as responsibility and exemplary behavior, which are relayed throughout the organization and the various areas of responsibility and support;
- the harmonization of financial processes through implementation of an integrated information system used by the majority of the Group's entities; and
- an internal control manual, Tarkett Risks And Controls Evaluation ("TRACE"), based on the principles of the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and intended to provide reasonable assurance as to the achievement of the Group's objectives and the reliability of its financial information; internal function-specific procedures used by all of the Group's subsidiaries; and rules for delegation of authority and division of duties.

The primary participants in this system are as follows:

- Senior Management, which is ultimately responsible for risk management and internal control and which relies on the following:
  - the Group and division finance departments, on the one hand; and
  - the operational departments (divisional presidents) and functional departments on the other;
- The Internal Control and Audit Department is part of the Finance Department and reports functionally to the Audit Committee. This department:
  - runs the internal control and risk management system; and
  - ensures compliance with Group rules at the entity level, evaluating risks in areas covered by its audits and recommending improvements relating to internal control.

The Internal Control and Audit Department also relies on a network of internal divisional auditors who manage these procedures within their areas.

The Audit Committee is responsible for monitoring the preparation and audit of accounting and financial information, as well as for ensuring the efficiency of risk-monitoring and internal control procedures to facilitate the Supervisory Board's review and approval thereof.

#### 6.2.3.2 Identification and Evaluation of Risks

##### ■ Risk Mapping

In 2010, Tarkett created a risk map that is updated every two years, or more frequently in the event of significant changes in the environment. The process for identifying risks uses a three-step method:

- the Internal Control and Audit Department, supported by outside experts, interviews members of the Executive Committee and key employees holding strategic positions at the Group level and in the divisions in order to identify risks within their areas;
- the Internal Control and Audit Department then creates a synthesis of the main risks, specifying their definition, potential causes, frequency, impacts (such as financial, human, legal or reputational) and the degree to which they are controlled; and
- the risk map and actions plans are then reviewed and approved by the Executive Committee and presented to the Audit Committee and to the Supervisory Board.

In 2013, the Group's risk map was sent to the operational divisions (geographic zones) in order to take regional or business specificities into account and to disseminate the Group's view of its risks more broadly throughout the Group.

In 2015, the risk map was fully updated through interviews with members of the Executive Committee and other key employees at the Group and divisional levels.

The relevant departments (whether operational divisions or cross-divisional functions) prepare actions plans based on the primary risks identified which are implemented by local managers under the responsibility of the division or functional managers.

##### ■ Ongoing Monitoring

Risk-awareness is updated on an ongoing basis through monitoring procedures relating to both competition and technology, as well as actions by specialized departments (such as Insurance and World Class Manufacturing) that participate in oversight of fire, security, and environmental risks, in particular.

Monthly activity reviews enable the Group's operational entities to rapidly report information to Group management, and facilitate the identification of risks, updating of the risk map and implementation of action plans to manage the risks.

### 6.2.3.3 Control Activities

Control activities are defined in the TRACE manual. For each principal process this manual presents the major risks and objectives, as well as a description of the related controls, applicable to the Group as a whole. This mechanism constitutes a common reference for the management of the local entities, which is responsible for supplementing it locally with additional control activities for dealing with specific risks.

#### ■ Self-Evaluations

The Group's subsidiaries are subject to an annual internal control self-evaluation intended to assess their compliance with the internal control manual. The self-evaluation is approved by the management of the relevant entities pursuant to their responsibility for implementing internal control and the quality of their self-evaluation. This self-evaluation is carried out using a dedicated software (e-TRACE from Enablon).

All of the Group subsidiaries are part of this process. In 2015, Desso and L.E.R. were integrated into the Tarkett internal control system.

The Internal Control and Audit Department analyses and distributes a synthesis of the results to the interested parties. The results of the self-evaluation are reviewed at the divisional level with the Group's chief financial officer, the chief financial officer and internal controller for the relevant divisions, and the Internal Control and Audit Department.

A review is also conducted for each process by the relevant Group-level department.

Action plans resulting from these reviews are implemented by local management under the responsibility of divisional or functional management.

#### ■ Internal Control Testing and Internal Audits

Self-evaluation is supplemented by testing of key controls under the TRACE manual, carried out by internal divisional controllers, as well as by internal audits carried out by the Internal Control and Audit Department.

### 6.2.3.4 Steering

On the basis of an audit plan approved in advance by the Audit Committee, the five-member internal audit team carried out 34 audits in 2015. The audit plan is composed of repeated audits of subsidiaries, primarily of a financial nature, as well as of "transverse" audits with respect to an operational process or particular risk at the divisional level.

Each audit is the subject of a report that includes a rating and an action plan prepared by the relevant entities in order to correct any weaknesses that are discovered. The report is sent to the Audit Committee, Group management, and management of the relevant division and entity. An action plan monitoring process ensures that the identified weaknesses are corrected, and relies on:

- quarterly reporting on the entities' progress in implementing the action plan;

- since the beginning of 2013, follow-up monitoring by the division's internal controllers within six months following the internal audit; and
- monitoring by internal audit, if necessary, with respect to critical matters.

### Internal Control Performance Indicators

The Internal Control and Audit Department has put in place and follows a series of quarterly internal control performance indicators, including the rate of compliance with 50 key controls identified by the manual, separation of duties risks, progress on action plans and coverage of tests carried out by the internal controllers.

### 6.2.4 PREPARATION AND PROCESSING OF ACCOUNTING AND FINANCIAL INFORMATION

Financial information is subject to a rigorous process relying on the following:

- A common reference: the financial statements are prepared in accordance with IFRS; this reference is communicated to the Group's subsidiaries through the Financial Manual, supplemented by monthly instructions. Moreover, the TRACE internal control manual described above includes various processes that affect the production of financial information (for example, with respect to closing, cash, payroll, procurement, sales, inventory, fixed assets, information technology, and consolidation);
- An integrated information system: most of the subsidiaries manage operational and financial flows using the Group's integrated SAP information system. The deployment of a single financial model within SAP ("One Finance") ensures homogenization and optimization of practices, as well as improved control.
- A unified reporting and consolidation software package. Financial information is reported through the SAP/Business Objects Financial Consolidation ("B.O.F.C.") tool, which is used for all financial reporting, including budget; forecasts; and monthly, quarterly, interim and annual reports. This all-in-one system ensures consistency between internal steering and external communications;
- Automated monitoring within the reporting tool; detailed activity reviews by the Group and divisional control teams; or specific analyses, such as with respect to changes in the scope of consolidation, currency effects or non-recurring operations, by the Group Consolidation teams ensure tight control of the financial information produced.

The principal participants in the process are as follows:

- The Finance Department, which relies on the central functional departments (Financial Control, which oversees Consolidation and Controlling, Treasury, Taxes, and Internal Control and Audit) and the divisional finance departments, which supervise the subsidiaries' financial controllers;
- The external auditors, who, through their work, contribute to improving the consolidated account preparation process. The combination of audits of the individual company accounts and audits of the consolidated accounts ensures a broad coverage of the Group. In 2015, 91% of the Group's revenues and EBITDA were covered by audits;

The reliability of the Group's accounting and financial information depends on the following:

- A strategic three-year plan, led by the Chairman of the Management Board and the Group Chief Financial Officer, in coordination with the operational divisions. This plan enables the Group to set annual strategic goals and the related annual financial objectives. This plan is approved annually by the Supervisory Board;
- An annual budgetary process. This process, led by the Group and divisional management teams, focuses on operational financial aggregates such as operating result, changes in working capital requirements and investment in tangible and intangible fixed assets. The financial items are consolidated month by month using the same tool that is used for consolidation of real results (B.O.F.C.) with a comparable level of granularity, permitting monthly and immediate comparison of monthly performance of operational financial

aggregates with monthly budget objectives. The annual budget, which is generally prepared during the fourth quarter for the following year, is reviewed and approved by the Supervisory Board in December;

- Two forecast processes per year: these forecasts focus on the same financial aggregates as the annual budget. These forecasts are generally performed in the second and third quarters, and are based on the real results for the months already ended. Their purpose is to estimate the remaining months' results through the end of the relevant fiscal year in order to compare the re-estimated year with the annual budgetary objectives. These forecasts are reviewed and approved by the Group's Management Board;
- Complete monthly closings, including a full balance sheet, income statement through net income, and cash flow, reported and consolidated in the same way as the annual and interim accounts in B.O.F.C.; and
- Monthly performance review meetings: these meetings, led by the Chairman of the Management Board, the Chief Financial Officer and the Group Financial Controller, are carried out for all operational divisions, which are generally represented by their president and their chief financial officer. Variance analyses (such as with respect to volume, product mix, currency effects, effect of cost of purchases and cost of sales, industrial productivity, effects of monthly payments, non-recurring items, etc.) are reviewed in order to understand the main drivers of the month's performance and to define action plans for future months.

### 6.3 INSURANCE AND COVERAGE OF RISKS

The Group's policy with respect to insurance is coordinated by the Legal Department, which is responsible for identifying the main insurable risks and quantifying their potential consequences, in order to:

- limit certain risks by recommending preventive measures in cooperation with the Group's other departments; or
- choose to cover risks of an exceptional nature through insurance, including risks with high potential magnitude but low frequency.

In connection with the insurance program, the Group actively mitigates industrial risks, by collaborating with FM Global, its property and casualty insurer, which provides expertise in engineering and fire prevention.

Each of the Group's subsidiaries is responsible for providing the Group's Legal Department with the necessary information to identify and quantify insured or insurable risks at the Group level, and for implementing the proper methods to ensure business continuity if an event occurs. On these bases, the Legal Department negotiates with the major insurance and reinsurance providers to put in place optimal insurance coverage for its risk-coverage needs.

The Group's local subsidiaries also enter into local insurance policies to cover risks suited to local coverage, such as automobile insurance.

The Group purchases insurance based on reasonable estimates of probable liability resulting from liability, property-casualty and other risks. This evaluation takes into account the analyses of insurance companies as the risk subscribers. The Group does not insure against risks for which there is no coverage available on the insurance market, for which the cost of insurance is disproportionately high compared with the potential benefit or for which it believes the risk does not require insurance covera

The Group's insurance programs generally take the form of master policies. These are complemented by local policies in certain countries where having only master policies is not permitted. The master insurance policies apply to the Group's overall operations, complementing local policies (difference-in-conditions/difference in limits, or "DIC DIL"), if the coverage in question proves insufficient or does not cover the event. The local policies are also entered into to take into account local legislative specificities or constraints in the country or countries in question. The Group also has captive insurance companies, enabling it to reduce the premiums paid to insurers and thus to reduce its insurance costs.

The Group's insurance policies contain exclusions, caps and deductibles that could expose it to unfavorable consequences in the event of a significant event or legal action against it. Moreover, it may be required to pay indemnification that is not covered by its insurance policies or to incur significant expenses that may not be covered, or may be insufficiently covered, under its insurance policies. The Group's primary insurance policies, entered into with insurance companies of international reputation, are the following:

- General liability insurance, which includes operational liability coverage and product liability coverage. The maximum coverage amount is €60 million. Professional liability insurance is also included in this policy, and is subject to a specific limit. General liability insurance covers all damages caused to third parties, such as bodily, tangible and intangible damages;
- Property-casualty and business interruption insurance (maximum combined coverage of €400 million). All of the Group's facilities are covered by this policy if and to the extent that values of local sites exceed the contract deductibles;
- Director and officer liability insurance;
- Environmental liability insurance; and
- Transport insurance, covering inventory and inventory in transit.

## 6.4 REPORT OF THE CHAIRMAN OF THE SUPERVISORY BOARD ON CORPORATE GOVERNANCE AND ON INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

The report of the Chairman of the Supervisory Board on corporate governance and on internal control and risk management procedures, prepared in accordance with Article L. 225-37 of the French Commercial Code, was approved by the Supervisory Board on February 18, 2016.

### 6.4.1 CORPORATE GOVERNANCE

Information relating to corporate governance is included in various sections of this Registration Document, as detailed in the table below.

Information required by Article L.225-37 of the French Commercial Code	Reference to sections of the Registration Document
Composition of the Supervisory Board and application of the principle of balanced representation of men and women	Section 2.1.1.2 <i>"Supervisory Board"</i>
Conditions pursuant to which the work of the Supervisory Board is prepared and organized	Section 2.2.2, <i>"Operation and Evaluation of the Supervisory Board"</i>
Limits on the powers of the Management Board	Section 7.6.2.1, <i>"Management Board"</i>
Provisions of the Afep-Medef Code that the Company does not apply and the reasons for not applying them	Section 2.2.2.2, <i>"Statement Relating to Corporate Governance"</i>
Place where the Afep-Medef Code may be consulted	Section 2.2.2.2, <i>"Statement Relating to Corporate Governance"</i>
Specific terms relative to the participation of shareholders in the General Shareholders' Meeting	Section 7.6.5, <i>"General Shareholders' Meeting (article 25 of the ByLaws)s"</i>
Principles and rules set by the Supervisory Board for determining the compensation and benefits of all kinds granted to the company officers	Section 2.3, <i>"Compensation and Benefits Granted to the Management and Supervisory Bodies"</i>
Items that could have an impact on a tender offer	Section 7.8, <i>"Events Likely to Have an Impact in the Event of a Tender Offer"</i>

### 6.4.2 INTERNAL CONTROL AND RISK MANAGEMENT SYSTEM

The Group's risk management and internal control system is discussed in Section 6.2, *"Risk Management"*.

## 6.5 REPORT OF THE STATUTORY AUDITORS ON THE REPORT OF THE CHAIRMAN OF THE SUPERVISORY BOARD

To the Shareholders,

In our capacity as Statutory Auditors of Tarkett and in accordance with article L.225-235 of the French commercial code, we hereby present our report dealing with the report prepared by the Chairman of your company in accordance with article L.225-68 of the French commercial code for the financial year ending on 31 December 2015.

The Chairman is responsible for preparing and submitting for the approval of the supervisory board, a report describing the internal control and risk management procedures implemented by the company and disclosing other information as required by article L.225-68 of the French commercial code dealing in particular with corporate governance.

Our own responsibility is to:

- communicate to you any observations we may have as to the information contained in the Chairman's report and relating to the company's internal control and risk management procedures in the area of the preparation and processing of financial and accounting information; and
- attest that the report includes the other disclosures required by article L.225-68 of the French commercial code. It should be noted that we are not responsible for verifying the fair presentation of those other disclosures.

We have performed our work in accordance with the professional standards applicable in France.

### Information relating to the company's internal control and risk management procedures in the area of the preparation and processing of financial and accounting information

Our professional standards require the application of procedures designed to assess the fair presentation of the information contained in the Chairman's report and

relating to the company's internal control and risk management procedures in the area of the preparation and processing of financial and accounting information.

Those procedures involve in particular:

- obtaining an understanding of the underlying internal control and risk management procedures in the area of the preparation and processing of financial and accounting information presented in the Chairman's report, and of the related documentation;
- obtaining an understanding of the work performed as a basis for preparing that information and the existing documentation;
- determining if any major internal control weaknesses in the area of the preparation and processing of financial and accounting information identified by us during the course of our engagement have been appropriately disclosed in the Chairman's report.

On the basis of the procedures performed, we have nothing to report on the information relating to the company's internal control and risk management procedures in the area of the preparation and processing of financial and accounting information contained in the report of the Chairman of the supervisory board prepared in accordance with article L.225-68 of the French commercial code.

### Other disclosures

We hereby attest that the report of the Chairman of the supervisory board includes the other disclosures required by article L.225-68 of the French commercial code.

## 7.1 INFORMATION ABOUT THE COMPANY

### 7.1.1 NAME, REGISTRATION AND CORPORATE FORM

Tarkett is a *société anonyme* with a Management Board and a Supervisory Board, registered with the Nanterre Trade and Companies Register under number 352 849 327 and with its registered office at 1 Terrasse Bellini - Tour Initiale - 92919 Paris La Défense, France. The telephone number of the registered office is +33 (0)1 41 20 40 40.

The Company is a French *société anonyme*, governed by applicable French laws and regulations, including the provisions of Book II of the French Commercial Code, as well as by the Company's Bylaws.

### 7.1.2 DATE OF INCORPORATION AND DURATION

The Company was incorporated on December 29, 1989 for a duration of ninety-nine years as from its registration

with the Trade and Companies Register, or until December 29, 2088, unless dissolved earlier or extended.

## 7.2 INFORMATION ABOUT THE SHARE CAPITAL

### 7.2.1 BREAKDOWN OF SHARE CAPITAL AND VOTING RIGHTS

The table below shows the Company's shareholders as of December 31, 2015:

Shareholders	Number of Shares	percent of share capital	Number of voting rights	percent of voting rights
Société Investissement Deconinck ("SID")	31,975,071	50.18 %	63,900,142	58.93 %
KKR International Flooring 2	13,703,462	21.50%	25,745,592	23.75 %
Tarkett GDL SA	81,726	0.13%	0	0.00%
Tarkett*	117,313	0.18 %	0	0.00%
Public float	17,845,124	28.01%	18,782,981	17.32 %
<b>Total</b>	<b>63,722,696</b>	<b>100.00%</b>	<b>108,428,715</b>	<b>100.00%</b>

\* Treasury shares held directly by Tarkett include 15,663 shares held in the name and on behalf of Tarkett in connection with its liquidity agreement.

### 7.2.2 SUBSCRIBED SHARE CAPITAL

The Company's share capital amounts to three hundred eighteen million six hundred thirteen thousand four hundred eighty euros (€318,613,480), divided into sixty-three million seven hundred twenty-two thousand six hundred ninety-six (63,722,696) shares of par value €5 each, all of the same class and fully paid up.

capital, with the exception of the free shares described in Section 2.5.

As of December 31 2015, the General Shareholders' Meeting had not delegated powers or authorized the Management Board to issue any shares or other securities except as described in Section 7.4.

As of December 31, 2015, Tarkett has not issued any non-equity securities or securities giving access to the share

### 7.2.3 SHARES CONTROLLED BY THE COMPANY, TREASURY SHARES AND PURCHASE BY THE COMPANY OF ITS OWN SHARES

As of December 31, 2015, the Company directly holds 117,313 of its own shares, or 0.18% of the share capital, including 15,663 shares treasury shares held in connection with the liquidity agreement (See Section 7.2.4 "Shares Buyback Program" for more information about the Company's share buyback program).

Tarkett GDL S.A., a wholly owned subsidiary of Tarkett, holds 81,726 shares of the Company, or 0.13% of the share capital.

## 7.2.4 SHARE BUYBACK PROGRAM

### 7.2.4.1 INFORMATION ON TRANSACTIONS CARRIED OUT IN CONNECTION WITH THE COMPANY'S SHARE BUYBACK PROGRAM DURING 2015 (EXCLUDING THE COMPANY'S LIQUIDITY AGREEMENT)

#### ■ Summary of share buyback program authorized in 2015

In accordance with Article L.225-209 of the French Commercial Code, the Annual Ordinary Shareholders' Meeting of April 24, 2015 authorized the Management Board, for a period of 18 months expiring on October 24, 2016, to purchase or cause the purchase of its own shares up to a maximum of 10% of the number of shares outstanding as of December 31, 2014, namely 6,372,269 ordinary shares, and up to a maximum global limit of €15 million. The Shareholders' Meeting also decided that the number of shares held directly or indirectly in connection with this program may at no time exceed 10% of the Company's share capital. The maximum purchase price per share was fixed at €60.

This authorization was intended to enable the Company to purchase its own shares in order to do the following:

- to grant free shares pursuant to Articles L.225-197-1 et seq. of the French Commercial Code;
- to grant free shares to employees or officers of the Company or of an affiliate of the Company (in particular the Company's direct and indirect subsidiaries) under any plan that is not subject to Articles L.225-197-1 et seq. of the French Commercial Code, and in particular under long term incentive plans ("LTIPs");
- to cancel shares that are bought back but not allocated; or
- to maintain a liquidity market in Tarkett's shares through an investment services provider in the framework of a liquidity agreement that complies with the market ethics charter recognized by the AMF.

#### ■ Share buybacks

In accordance with Article L.225-111 of the French Commercial Code, transactions carried out in connection with the Company's share buyback program in effect during the fiscal year are set forth below.

The Management Board did not buy back any of the Company's shares during the year ended December 31, 2015.

### 7.2.4.2 LIQUIDITY AGREEMENT

On August 1, 2014, the Company entered into a liquidity agreement for a 12-month, automatically renewable term with Exane BNP Paribas, in accordance with the AMAFI ethics code dated March 8, 2011 and approved by the AMF by decision dated March 21, 2011.

Under the liquidity agreement between Tarkett and Exane BNP Paribas, as of December 31, 2015, the following were in the liquidity account:

- €2,609,211
- 15,663 shares.

As of the liquidity agreement's entry into force on August 11, 2014, the account held €2,800,000.

In connection with the liquidity agreement, 269,441 shares were processed in 2015, for a total of €5,825,683. The capital loss realized under the liquidity agreement in 2015 was €220,087.

Liquidity agreement management commissions totaled €15,666.67, excluding tax, in 2015.

### 7.2.4.3 DESCRIPTION OF SHARE BUYBACK PROGRAM TO BE SUBMITTED FOR THE APPROVAL OF THE ANNUAL ORDINARY AND EXTRAORDINARY SHAREHOLDERS' MEETING ON APRIL 26, 2016 (11TH RESOLUTION)

This description of the program is intended, pursuant to Articles 241-1 et seq. of the AMF's General Regulation, to describe the terms of the Company's share buyback program, which will be submitted for the approval of the Annual Ordinary and Extraordinary Shareholders' Meeting on April 26, 2016.

#### ■ Breakdown by objective of shares held by Tarkett

As of December 31, 2015, the Company held 101,650 treasury shares (or 0.16% of its share capital, excluding its liquidity agreement), all of which were allocated to covering the LTIP 2011-2014.

As of December 31, 2015, 15,663 shares were held in the liquidity account maintained by Exane BNP Paribas.

#### ■ Purpose of the share buyback program

Tarkett intends to purchase or cause the purchase of its own shares to accomplish the following objectives:

- to grant free shares pursuant to Articles L.225-197-1 et seq. of the French Commercial Code;
- to grant free shares to employees or officers of the Company or an affiliate of the Company (in particular the Company's direct and indirect subsidiaries) under any plan that is not subject to Articles L.225-197-1 et seq. of the French Commercial Code, and in particular under long term incentive plans;
- to cancel shares that are bought back but not allocated; or
- to maintain a liquidity market in Tarkett's shares through an investment services provider in the framework of a liquidity agreement that complies with the market ethics charter recognized by the AMF.

■ **Maximum percentage of Tarkett's share capital that may be acquired and maximum number and characteristics of shares that may be acquired in connection with the share buyback program**

The maximum percentage of the share capital of which buyback is authorized in connection with the program is 10% of the total shares making up the Company's share capital, namely a number of shares not to exceed 6,372,269 shares as of April 26, 2016, the date of the Annual Ordinary and Extraordinary Shareholders' Meeting, provided, that where the shares are bought in order to maintain liquidity pursuant to the conditions defined by the AMF General Regulation, the number of shares taken into account for purposes of calculating the 10% limit provided for above is the number of shares bought less the number of shares resold during the period of the authorization. In addition, the number of shares that the Company holds may not at any time exceed 10% of the shares comprising the Company's share capital on the date in question.

The shares that the Company would be authorized to acquire would be Tarkett's ordinary shares exclusively, all of the same class, in bearer or registered form, listed for trading on Euronext Paris - Compartment A (ISIN Code FR0004188670).

■ **Maximum Purchase Price**

The maximum purchase price in connection with the share buyback program would be €60 per share.

In the event of a change in the shares' par value, a capital increase by incorporation of reserves, a grant of free shares, a stock split or a reverse stock split, a distribution of reserves or of any other assets, a capital redemption, or any other transaction affecting shareholders' equity, the maximum purchase price stated above would be adjusted in order to account for the effect of such transactions on the value of the shares.

■ **Maximum amount of funds available for the purposes of this program**

The total amount allocated to the share buyback program could not be greater than €15 million.

■ **Buyback terms**

Shares could be bought, sold or transferred at any time (other than during a tender offer for the Company's shares) up to the limits authorized under applicable laws and regulations, on regulated markets or multilateral trading facilities, through systematic internalizers or over the counter, including through block trades (without limiting the portion of the buyback program that may be carried out by this means), by tender or exchange offer, or through the use of options or other derivative financial instruments traded on regulated markets, multilateral trading facilities, through systematic internalizers or over the counter, or by delivery of shares following the issuance of securities giving access to the Company's share capital by conversion, exchange, reimbursement, exercise of a warrant or in any other manner, either directly or indirectly through an investment services provider acting pursuant to the conditions of Article L.225-206 II of the French Commercial Code.

■ **Duration of the program**

The share buyback authorization granted by the Annual Ordinary and Extraordinary Shareholders' Meeting on April 26, 2016 would be for a period of 18 months as from such Meeting, or until October 26, 2017.

This description will be sent to the AMF. It will be available free of charge at the Company's registered office, at 1 Terrasse Bellini, Tour Initiale, 92919 Paris La Défense Cedex, and on the Company's website ([www.tarkett.com](http://www.tarkett.com)).

## 7.2.5 SHARE CAPITAL OF ANY COMPANY OF THE GROUP THAT IS THE SUBJECT OF AN OPTION OR OF AN AGREEMENT TO PUT IT UNDER OPTION

### 7.2.5.1 MORTON EXTRUSIONSTECHNIK GMBH

On July 9, 2010, FieldTurf Tarkett S.A.S. and Morton Holding GmbH ("MHG") entered into a shareholders' agreement governing their relationship as shareholders of Morton Extrusionstechnik GmbH ("MET"). FieldTurf Tarkett S.A.S. and MHG hold 51% and 49% of MET's share capital, respectively. MET manufactures fibers for synthetic turf. It is fully consolidated in the Group's consolidated financial statements included in Section 5.1, "Group Consolidated Financial Statements".

The shareholders' agreement provides for put and call options on MET's shares, which were updated by notarized deed dated January 28, 2014.

As a result, as from December 31, 2018, or earlier in the event of a change of control of FieldTurf Tarkett S.A.S. (other than in connection with a change of control of the entire Sports Surfaces segment), MHG may exercise a put option requiring FieldTurf Tarkett S.A.S. to acquire its entire 49% stake in MET. The exercise price for the put option was fixed at a minimum total amount of €3,340,000 and a maximum total amount of €7,000,000, based on the achievement of performance criteria through December 31, 2018.

In the event of a change in the CEO of MET occurring before December 31, 2018, FieldTurf Tarkett S.A.S. may exercise a call option enabling it to acquire all of MHG's shares of MET. The exercise price for the call option is fixed according to the same terms as the exercise price for the put option

described above, with achievement of the performance criteria being assessed on the option exercise date.

### 7.2.5.2 AA SPORT SYSTEM BV

On August 4, 2011, Fieldturf Tarkett SAS and MarKno Beheer B.V. ("MarKno") entered into a shareholders' agreement governing their relationship as shareholders of AA sportsystems B.V., since renamed Fieldturf Benelux B.V. Fieldturf Tarkett SAS and MarKno hold 51.11% and 48.89% of the share capital of Fieldturf Benelux B.V., respectively. Fieldturf Benelux B.V. sells and distributes outdoor sports surfaces in the Netherlands. It is fully consolidated in the Group's consolidated financial statements included in Section 5.1, "Group Consolidated Financial Statements". The shareholders' agreement provides for put and call options on Fieldturf Benelux B.V.'s shares.

Beginning on August 5, 2016, MarKno may exercise a put option requiring Fieldturf Tarkett SAS to acquire all of its shares of Fieldturf Benelux B.V., and Fieldturf Tarkett SAS may exercise a call option to acquire all of such shares. The exercise price for these options will be calculated based on Fieldturf Benelux B.V.'s EBITDA and net indebtedness.

In the event of the departure of one of MarKno's shareholders as an employee of Fieldturf Benelux B.V. and of the other MarKno shareholder's failure to exercise its option to acquire the shares held by the departing shareholder, Fieldturf Tarkett SAS may exercise a call option to acquire half of MarKno's shares in Fieldturf Benelux B.V. The exercise price for these options will be calculated based on Fieldturf Benelux B.V.'s EBITDA and net indebtedness.

## 7.2.6 PLEDGES, GUARANTEES AND SURETIES

None.

## 7.2.7 HISTORY OF THE SHARE CAPITAL OVER THE PAST THREE FISCAL YEARS

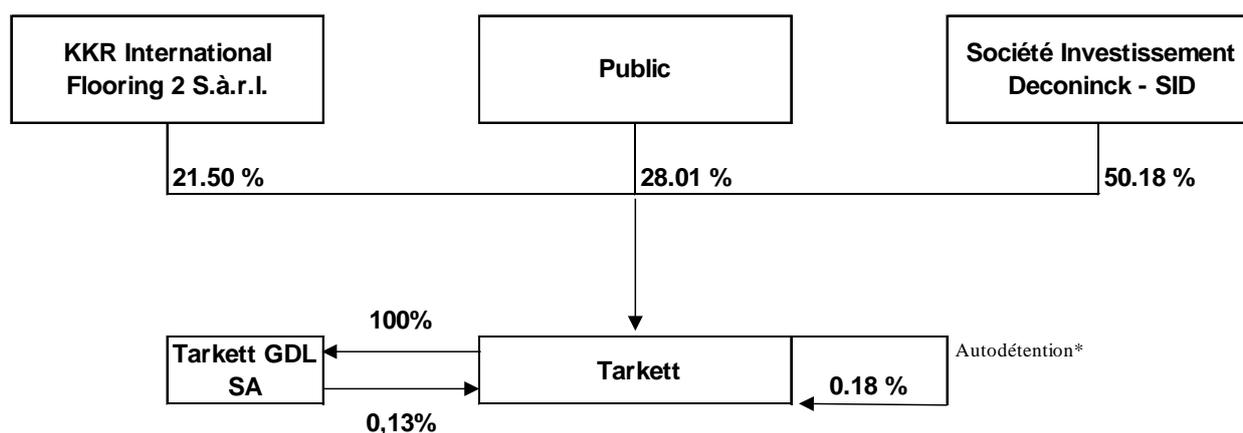

Date	Nature of the transaction	Share capital prior to transaction (in euros)	Issuance Premium (in euros)	Number of shares before transaction	Number of shares after transaction	Par value after transaction (in euros)	Share capital after transaction (in euros)
11/21/2013	Capital increase (SIF-Tarkett merger)	316,108,260	383,641,536	15,805,413	31,066,703	20	621,334,060
11/21/2013	Capital decrease (SIF-Tarkett merger)	621,334,060	(359,648,645)	31,066,073	16,253,564	20	325,071,280
11/21/2013	Capital increase (Partholdi-Tarkett merger)	325,071,280	6,285,465	16,253,564	16,413,906	20	328,278,120

11/21/2013	Capital increase	316,878,120	0	15,873,906	15,930,674	20	318,613,480
11/21/2013	Division of par value	318,613,480	0	15,843,906	63,722,696	5	318,613,480

## 7.3 SHAREHOLDER INFORMATION

### 7.3.1 SIMPLIFIED SHAREHOLDER CHART

The following simplified organizational chart shows the Group's ownership structure as of December 31, 2015.

Percentages represent percentages of the share capital.

\* Treasury shares held directly by Tarkett do not include shares acquired in the name and on behalf of Tarkett in connection with its liquidity agreement.

### 7.3.2 PRINCIPAL DIRECT AND INDIRECT SHAREHOLDERS

As of December 31, 2015, to the Company's knowledge, the only shareholders directly or indirectly holding more than 5% of the Company's share capital or voting rights are Société Investissement Deconinck ("SID") and KKR International Flooring 2 S.à.r.l., an affiliate of the KKR group ("KKR"). In addition, Tarkett GDL S.A. and the Company itself hold shares representing approximately 0.4% of the Company's share capital.

- Société Investissement Deconinck ("SID")

SID, a French simplified stock company (société par actions simplifiée), having its registered office at 1 Terrasse Bellini - Tour Initiale - 92919 Paris La Défense Cedex, registered with the Nanterre Trade and Companies Register under number 421 199 274, is wholly owned, directly and indirectly, by the members of the Deconinck family. Its share capital is €42,333,415.07, divided into 277,689 shares of €152.45 par value each.

As of December 31, 2015, SID's shares of the Company represent 50.18% of the Company's share capital.

- KKR International Flooring 2 S.à.r.l. ("KKR International Flooring")

KKR International Flooring is a Luxembourg limited liability company (société à responsabilité limitée) affiliated with KKR.

Founded in 1976 and managed by Henry Kravis and George Roberts, the KKR group is a global investment firm with a long history in France. With offices throughout the world, the KKR group manages investment funds and accounts covering many types of assets. The KKR group seeks to create value by bringing its operational expertise to the companies in its portfolio and by actively monitoring its investments. KKR & Co. L.P. is listed on the New York Stock Exchange (NYSE: KKR).

As of December 31, 2015, KKR International Flooring's shares of the Company represent 21.50% of the Company's share capital.

- Shareholding by Executives and Employees

Certain officers and employees of the Group hold shares of the Company acquired in connection with the Company's incentive plans and free share grant plans. Shares received in connection with certain plans described in this Registration Document or purchased on the market may be held in bearer form or have been resold in whole or in part.

For a description of the Group's share plans and grants made thereunder, see Section 2.5, "Free Shares (LTIP)".

- Treasury shares: shares held by Tarkett GDL SA (Luxembourg)

Tarkett GDL SA, a Luxembourg limited liability corporation (société anonyme) with share capital of €274,123,080, having its registered office at 2, Op der Sang, L-9779

Lentzweiler and registered with the Luxembourg Trade and Companies Register under number B 92 165, is a holding company that is wholly controlled by the Company and holds equity investments in various Group entities. It holds 81,726 shares of the Company as of December 31, 2015, representing approximately 0.13% of the Company's share capital.

- Treasury shares: shares held by Tarkett

As of December 31, 2015, Tarkett holds 101,650 shares of the Company, in addition to 15,663 shares held in connection with the liquidity agreement, representing approximately 0.18% of the Company's share capital.

The number of shares thus held by Tarkett (excluding the shares held in connection with the liquidity agreement) corresponds to the free shares that will be granted in July 2016 to those beneficiaries of the LTIP 2011-2014 who reside outside of France.

- Crossing of thresholds

To the Company's knowledge and on the basis of notifications filed with the AMF, no shareholder reported holding more than 5% of the Company's share capital or voting rights during the fiscal year ended December 31, 2015.

As of December 31, 2015, other than as described in Section 7.3.1 "Simplified Shareholder Chart", the Company has not been informed of any other shareholders holding, directly or indirectly, more than 5% of the Company's share capital or voting rights.

### 7.3.3 SHAREHOLDERS' VOTING RIGHTS

Article 8 of the Company's Bylaws provides for a double voting right for all fully paid shares held in registered form by the same holder for a minimum period of two years. The duration of the shareholding prior to the date of the Company's initial public offering will not be taken into account in determining whether the shares held by a shareholder carry double voting rights.

Since November 22, 2015, the Company has granted double voting rights to shares meeting the legal criteria.

In accordance with Article L. 225-123 of the French Commercial Code, in the event of an increase in the Company's share capital through incorporation of reserves, profits or share premium, the newly issued shares will carry double voting rights if they are granted to a shareholder in relation to existing shares that already carry double voting rights.

Double voting rights may be exercised at any shareholders' meeting.

Double voting rights terminate if the shares are converted into bearer form or if their ownership is transferred.

A merger or spinoff of the Company has no effect on the double voting right, which may be exercised within the surviving company if the Bylaws of such company so provide.

### 7.3.4 CONTROL OF THE COMPANY

As of December 31, 2015, SID directly holds 50.18% of the Company's share capital, and KKR International Flooring holds 21.50%.

SID and KKR International Flooring have entered into a shareholders' agreement governing their relationship (see Section 7.5, "Shareholders' Agreement").

However, the Company believes that there is no risk of control being exercised in an abusive manner. In that regard, the Company has provided that one-third of the members of its Supervisory Board are independent and that each of its two specialized committees includes two independent members and is chaired by an independent member of the Supervisory Board.

To the Company's knowledge, as of December 31, 2015, there are no agreements whose implementation could, at a later date, result in a change in control of the Company.

### 7.3.5 CHANGES IN ALLOCATION OF THE SHARE CAPITAL AND VOTING RIGHTS OVER THE LAST THREE YEARS

Over the last three years, the allocation of the share capital and the voting rights has changed as follows:

	Dec. 31 2015			Dec. 31 2014			Dec. 31 2013		
	Number of shares	% of capital	% of voting rights	Number of shares	% of capital	% of voting rights	Number of shares	% of capital	% of voting rights
Société Investissement Deconinck (SID) <sup>(1)</sup>	31,975,071	50.18	58.93	31,975,071	50.18	50.32	31,925,071	50.10	50.29
KKR International Flooring 2 <sup>(1)</sup>	13,703,462	21.50	23.75	13,703,462	21.50	21.57	13,703,462	21.50	21.59
Concert	45,678,533	71.68	82.68	45,678,533	71.68	71.89	45,628,563	71.60	71.88
Public	17,845,124	28.01	17.32	17,860,787	28.03	28.11	17,854,163	28.02	28.12
Tarkett	117,313	0.18 <sup>(2)</sup>	0.00	101,650	0.16 <sup>(3)</sup>	0.00	0	0.00	0.00
Tarkett GDL SA	81,726	0.13	0.00	81,726	0.13	0.00	240,000	0.38	0.00
<b>TOTAL</b>	<b>63,722,696</b>	<b>100.00</b>	<b>100.00</b>	<b>63,722,696</b>	<b>100.00</b>	<b>100.00</b>	<b>63,722,696</b>	<b>100.00</b>	<b>100.00</b>

(1) Société Investissement Deconinck and KKR International Flooring 2 act in concert (see Section 7.5 "Shareholders' agreement").

(2) Treasury shares held directly by Tarkett include 15,663 shares held in the name and on behalf of Tarkett in connection with its liquidity agreement.

(3) Treasury shares held directly by Tarkett do not include shares acquired in the name and on behalf of Tarkett in connection with its liquidity agreement.

## 7.4 FINANCIAL AUTHORIZATIONS

The table below shows financial authorizations in effect as of December 31, 2015.

### **Financial authorizations in effect as of December 31, 2015**

Nature of authorizations	Expiration and duration of authorization	Maximum par value authorized (in euros)	Usage in 2015
Authorization to be granted to the Management Board to trade in the Company's shares Combined General Meeting ("AGM"), April 24, 2015 (13th resolution)	October 24, 2016 (18 months)	10% of existing shares as of December 31, 2014	Usage by decision of the Management Board on April 24, 2015
Capital increase by incorporation of premiums, reserves or otherwise AGM, April 24, 2015 (14th resolution)	June 24, 2017 (26 months)	50 million	None
Delegation of authority to be given to the Management Board to decrease the share capital by cancellation of treasury shares AGM, April 24, 2015 (15th resolution)	June 24, 2017 (26 months)	10% of existing shares	None

The Annual Ordinary and Extraordinary Shareholders' Meeting on April 26, 2016 will be asked to renew those authorizations that will expire in 2016.

### **Table of financial authorizations proposed for renewal at the Annual Ordinary and Extraordinary General Shareholders' Meeting on April 26, 2016**

Nature of authorizations	Expiration and duration of authorization	Maximum par value authorized (in euros)
Authorization to be granted to the Management Board to trade in the Company's shares (11th resolution)	October 26, 2017 (18 months)	10% of existing shares as of December 31, 2015

There are no other financial authorizations providing for increase(s) in the share capital or dilution of the shareholding.

## 7.5 SHAREHOLDERS' AGREEMENT

In connection with the Company's initial public offering, on November 26, 2013, SID and KKR International Flooring entered into a shareholders agreement (the "**Shareholders' Agreement**") to govern their relationship as shareholders of the Company.

The parties are deemed to act "in concert" under the Shareholders' Agreement, which includes the following terms:

- As of the IPO listing date, the Supervisory Board was required to include four members appointed upon proposal by SID, two members appointed upon proposal by KKR International Flooring and three independent members. The Shareholders' Agreement does not contain any restriction or voting undertaking with respect to the ongoing composition of the Supervisory Board;
  - KKR International Flooring will have the right to nominate one member to each committee of the Supervisory Board so long as one or more of the members appointed upon proposal by KKR International Flooring remains on the Supervisory Board. Apart from this, the Shareholders' Agreement does not contain any other restriction with respect to the composition of the Company's governing bodies, each party remaining free to exercise its voting rights for decisions relating to nomination, co-optation, and removal of members of the Supervisory Board;
  - SID and KKR International Flooring are required to consult with each other to seek a common position with respect to any matter of business submitted to a Supervisory Board or shareholders' meeting, although the parties are free to exercise their voting rights at such Supervisory Board or shareholders' meeting if a common position has not been reached. It is noted, however, that if the parties vote differently on one or more of the Key Decisions discussed in Section 7.6.2.1, "Powers and Duties of the Management Board (Article 16 of the Bylaws and Article 3.2 of the Supervisory Board's Internal Regulations)", both the Shareholders' Agreement and the "concert" will be terminated as described below;
  - To the extent reasonably practicable, each of SID and KKR International Flooring is required to notify the other in the event of a proposed sale of the Company's securities (except in the case of a transfer to one or more financial institutions with a view towards offering such securities);
  - KKR funds and their affiliates are required to hold 100% of the share capital and voting rights of KKR International Flooring at all times and may only reduce their shareholding in the Company by causing KKR International Flooring to sell the shares it holds directly in the Company. If the KKR funds and their affiliates were to hold less than 100% of the share capital and voting rights of KKR International Flooring, KKR International Flooring would be required to convert all of its shares of the Company into bearer form.
  - Each party is prohibited from acting "in concert" regarding the Company with a third party unless prior approval from the other party has been obtained.
- The shareholders' agreement was entered into for a term of four years to end on November 21, 2017 and will be automatically terminated (unless the parties choose otherwise) upon the occurrence of certain events, including the following:
- One of the parties ceases to hold 5% or more of the Company's share capital and voting rights;
  - The parties cease to hold a minimum of 50% in the aggregate of the Company's share capital and voting rights;
  - The parties, through their respective Supervisory Board nominees or during a shareholders' meeting, adopt contrary positions with respect to certain Key Decisions, described in further detail in Section 7.6.2.1, "Powers and Duties of the Management Board (Article 16 of the Bylaws and Article 3.2 of the Supervisory Board's Internal Regulations)". For these purposes, abstention would not be considered a contrary position;
  - The members of the Supervisory Board appointed upon a proposal by KKR International Flooring no longer hold their offices prior to the expiration of the Shareholder Agreement's four-year term, and such members are not replaced by other members appointed upon proposal by KKR International Flooring;
  - One of the parties agrees to act "in concert" with a third party, despite the fact that the other party has refused to grant its prior approval;
  - SID may terminate the agreement if KKR International Flooring sells more than 5% of its shareholding to a third party (known by KKR International Flooring at the moment of the sale) or allows, to KKR International Flooring's knowledge, a third party to hold 10% (acting alone or "in concert", publicly disclosed prior to the sale) or more of the Company's share capital and voting rights when the purchaser(s) have reasonably been considered hostile in the context of the preliminary information process;
  - SID may also terminate the agreement if KKR funds and their affiliates no longer hold, directly or indirectly, 100% of the share capital and voting rights of KKR International Flooring (notwithstanding KKR International Flooring's obligation in such a scenario to convert its shares into bearer form).

## 7.6 BYLAWS OF THE COMPANY

The Company's Bylaws were drafted in accordance with French laws and regulations applicable to sociétés anonymes with Management and Supervisory Boards. The primary provisions described below are taken from the Company's Bylaws as adopted on November 21, 2013.

The Bylaws were modified by decision of the Supervisory Board on February 18, 2015 to reflect the transfer of the Company's registered office, which decision was ratified by the General Shareholders' Meeting on April 24, 2015.

The Internal Regulations of the Supervisory Board specify the conditions pursuant to which such Board operates.

### 7.6.1 CORPORATE PURPOSE (ARTICLE 3 OF THE BYLAWS)

The Company's purpose, in France and abroad, is as follows:

- to research, design, develop, operate, direct and manage all commercial, industrial, real estate or financial matters or businesses relating to activities in the flooring industry;
- to participate directly or indirectly in all transactions or undertakings by means of the creation of companies, establishments or groups of a real estate, commercial, industrial or financial nature or to participate in their creation or in the capital increase of existing companies;
- to manage a portfolio of equity investments and securities and the transactions related thereto;
- to own and manage any real property; and
- generally, to carry out any industrial, commercial, financial, securities or real estate transactions that may be directly or indirectly related to the purposes listed above.

### 7.6.2 MANAGEMENT AND SUPERVISORY BOARDS (ARTICLES 11 TO 23 OF THE BYLAWS)

#### 7.6.2.1 MANAGEMENT BOARD

##### ■ **Nomination (Articles 11 and 12 of the Bylaws)**

The Company is administered and managed by a Management Board under the supervision of a Supervisory Board. The Management Board is composed of at least two and at most five members appointed by the Supervisory Board.

Members of the Management Board are appointed for a term of three years. The Supervisory Board must fill any vacancy within two months. Otherwise, any interested party may petition the presiding judge of the commercial court, ruling on an interim basis, to make a temporary appointment to fill the vacancy.

Members of the Management Board must be natural persons. Their terms are always renewable.

Any member of the Management Board is automatically deemed to have resigned as of the close of the shareholders' meeting approving the financial statements for the fiscal year during which such member reached the age of 65.

Each member of the Company's Management Board is subject to applicable regulations with regard to the holding of multiple offices or positions. Members of the Management Board may not serve as a Managing Director, member of a Management Board, CEO or member of a Supervisory Board of any listed company outside of the Group.

Each member of the Management Board must receive an opinion from the Supervisory Board before accepting any new office or position with a listed company that is not directly or indirectly controlled by the Company.

##### ■ **Removal (Article 11 of the Bylaws)**

Members of the Management Board may be removed by the general shareholders' meeting or by the Supervisory Board. In the absence of cause, their removal may give rise to damages. The removal of a member of the Management Board does not have the effect of terminating such member's employment agreement, if any, with the Company.

##### ■ **Chairman of the Management Board and Managing Directors (Article 14 of the Bylaws)**

The Supervisory Board appoints one of the members of the Management Board to the position of Chairman.

The Chairman of the Management Board represents the Company in its relations with third parties. The Supervisory Board may grant the same representative power to one or more members of the Management Board, which members shall then hold the title of Managing Director.

The Chairman of the Management Board or the Managing Director(s) may delegate powers to a third party. The powers granted pursuant to such delegation, however, must be limited and relate to one or more specific purposes.

The Chairman of the Management Board or any member named a Managing Director by the Supervisory Board may validly make undertakings to third parties on behalf of the Company.

##### ■ **Management Board Meetings (Article 15 of the Bylaws)**

It may be convened by its Chairman or by another member by any means, including orally.

Management Board meetings may be held at the registered office or at any other location indicated in the notice of meeting.

A member of the Management Board may appoint another member of the Management Board to represent him at a meeting. In the event of the Chairman's absence, the Management Board designates one of its members to chair the meeting. The Management Board may also designate a secretary, who need not be a member of the Management Board.

The Management Board may validly meet so long as a majority of its current members are present (including by means of video or telephone conference) or represented.

Decisions are taken by a majority of the members present (including participation by video or telephone conference) or represented. In the event of a tie, the vote of the meeting's chairman does not prevail unless the meeting is chaired by the Chairman of the Management Board.

Minutes of Management Board meetings are recorded in a special ledger kept at the registered office and are signed by the Chairman of the Management Board and by the secretary or another member of the Management Board. Copies or extracts of minutes may be certified by the Chairman, a Managing Director, or a member of the Management Board.

■ ***Powers and Duties of the Management Board (Article 16 of the Bylaws and Article 3.2 of the Supervisory Board's Internal Regulations)***

Subject to the powers that the law or the Company's Bylaws grant expressly to the Supervisory Board or the shareholders' meeting, and within the limits of the Key Decisions that require the prior authorization of the Supervisory Board, the Management Board has the broadest powers to act in all circumstances in the name and on behalf of the Company.

At least once per quarter, the Management Board presents a report to the Supervisory Board. Within three months after the close of each fiscal year, the Management Board finalizes and delivers the annual company and consolidated financial statements, as well as the report to be presented to the annual shareholders' meeting, to the Supervisory Board for review. It also provides the Supervisory Board with a proposed allocation of the previous year's results.

In addition, the Supervisory Board may ask the Management Board at any time to provide a report on its management and current operations, in addition to provisional Company accounts, if necessary.

The Management Board convenes the general shareholders' meeting, sets its agenda and carries out its decisions.

Subject to Supervisory Board authorization, the members of the Management Board may allocate their management tasks among themselves. However, such allocation shall in no event have the effect of altering the collective nature of the Management Board's management of the Company.

The Company is bound by the actions of the Management Board even where they are not within the corporate purpose, unless the Company proves that the third party

knew that the action exceeded such corporate purpose or could not have been unaware of that fact in light of the circumstances.

However, without prejudice to matters with respect to which prior authorization of the Supervisory Board is required by law, the Management Board must seek the prior authorization of the Supervisory Board before making any of the following decisions ("**Key Decisions**") within the Company and/or its controlled subsidiaries, within the meaning of Article L.233-3 of the French Commercial Code (together, the "**Tarkett Group**"):

- (a) grants by any company of the Group of guarantees that exceed an annual aggregate threshold set by the Supervisory Board (although guarantees granted above such threshold will be deemed valid in respect of third parties acting in good faith);
- (b) transactions that result in a significant change in the primary business of the Group (flooring and sports surfaces) (although pursuing incidental new activities does not require the Supervisory Board's prior authorization, unless it is otherwise a Key Decision);
- (c) provided that it exceeds a certain threshold (either global or per transaction type) set by the Supervisory Board (or failing that, by the Internal Regulations of the Supervisory Board), the acquisition or sale (and generally any transfer of ownership or investment) or collateralization of any asset of the Group as part of a project, such as asset contributions governed by the rules applicable to spin-offs, mergers, corporate restructurings (either internal or involving a third party);
- (d) listing shares of any Group company (apart from the Company) on a securities exchange;
- (e) the entry by any company in the Group into any loan whose nominal amount (i) exceeds a certain threshold set by the Supervisory Board (or failing that, by the Internal Regulations of the Supervisory Board) or (ii) results in an increase of the aggregate nominal amount of loans above the maximum global amount (in principal) authorized by the Supervisory Board for the applicable period (or failing that, by the Internal Regulations of the Supervisory Board), as well as any material modification thereto;
- (f) decisions pertaining to, or resulting in, amendments to the Company's Bylaws and those of any Group company (i) whose assets' book value is greater than a certain threshold set forth in the Internal Regulations of the Supervisory Board or (ii) that owns assets of strategic value for the Group, insofar as such modifications alter the rights of the Group company that controls such subsidiary;
- (g) approving joint venture agreements or agreements for other significant partnerships (i.e., those that involve asset contributions by any entity of the Group (including when made by way of a cash payment or of a set-off) that exceed a certain threshold set by the Internal Regulations of the Supervisory Board);

- (h) any material change in the accounting principles applied by the Company in preparing its consolidated financial statements (annual or interim), apart from changes required under IAS or IFRS;
- (i) adopting the Group's annual budget and any significant changes thereto;
- (j) adopting the Group's strategic medium- or long-term plan as well as the annual update thereof (together with the annual budget);
- (k) the inclusion in the shareholders' meeting agenda and the exercise of delegations granted by the shareholders' meeting relating to the issuance of shares or other equity-linked securities by the Company (or by another Group company) to a non-Tarkett related party;
- (l) any acquisition or sale (and generally any transfer of ownership) of derivatives, foreign exchange contracts, swaps, option agreements or any other speculative financial instrument except when made (i) for the Group's hedging purposes or (ii) as part of a buyback program relating to the Company's shares;
- (m) implementing any bankruptcy proceeding of a Group company (i) whose number of employees exceeds a certain number set by the Internal Regulations of the Supervisory Board or (ii) with assets of strategic value for the Group (insofar as these modifications affect the rights of the Group company that controls such subsidiary);
- (n) any loan granted by the Group to a third party (apart from customer advances, employee advances and any loan granted in the ordinary course of business);
- (o) (i) recruiting or dismissing the Group's senior executives defined under the Internal Regulations of the Supervisory Board, or (ii) any significant change to their compensation (including pension plans or specific departure conditions);
- (p) implementing or amending the management incentive plan (including any share or bonus incentive plan);
- (q) creating or amending any stock option plan or share award plan relating to shares of the Company or any Group company (or any similar securities) for the benefit of executives or employees of the Group, or of any category of them;
- (r) entering into or modifying any significant collective bargaining agreement, pension plan or redundancy plan that exceeds a certain number of employees set by the Internal Regulations of the Supervisory Board;
- (s) initiating, stopping or settling any dispute or litigation (including any tax-related dispute) or waiving certain claims that exceed in each case a certain threshold set by the Internal Regulations of the Supervisory Board;
- (t) appointing, re-nominating or removing the Company's statutory auditors; and

- (u) any grants, corporate sponsorships or other type of donation that exceeds €100,000.

At least once per quarter, the Management Board presents a report to the Supervisory Board. Within three months after the close of each fiscal year, the Management Board presents the annual financial statements to the Supervisory Board for purposes of verification and review.

■ ***Compensation of Members of the Management Board (Article 12 of the Bylaws)***

In its nomination decision, the Supervisory Board sets the form and amount of compensation for each member of the Management Board.

**7.6.2.2 SUPERVISORY BOARD**

■ ***Composition and Term in Office (Articles 17 to 19 of the Bylaws and Article 1 of the Internal Regulations of the Supervisory Board)***

Members of the Supervisory Board serve for a term of four years. By way of exception, the general shareholders' meeting may decide when appointing certain members of the Supervisory Board that their term of office will be shorter than four years, in order to permit rolling renewal of the terms of the various members of the Supervisory Board.

Part of the Supervisory Board is renewed each year, such that the entire Supervisory Board is renewed on a rolling basis over a period of four years.

Members of the Supervisory Board may always be reelected.

The number of Supervisory Board members older than 75 may not be greater than one-third of the Board's then-current membership.

No member of the Supervisory Board may be a member of the Management Board. If a member of the Supervisory Board is appointed to the Management Board, such member's term on the Supervisory Board ends as soon as the new appointment takes effect.

In the event of a vacancy in one or more seats by reason of death or resignation, the Supervisory Board may, between two shareholders' meetings, make interim appointments.

Interim appointments made by the Supervisory Board are submitted for ratification by the next ordinary shareholders' meeting. A member appointed to replace another member remains in office only for the time remaining in predecessor's term.

If the number of members of the Supervisory Board falls below three, the Management Board must immediately convene an ordinary shareholders' meeting to fill the vacancies.

If temporary appointments are not ratified, the prior votes and actions of the Supervisory Board remain valid.

The Supervisory Board ensures, to the extent possible, that at least one-third of its membership is composed of independent members and that the Audit Committee and the Nominations and Compensation Committee each include at least two independent members (including, in each case, the chairman). It is noted that the characterization of independence does not imply a value judgment as to the qualities and skills of the members of the Board.

At the time of each renewal or nomination of a member of the Supervisory Board and at least once per year prior to the publication of the Company's annual report, the Board must evaluate the independence of each of its members (or candidates). During such evaluation, the Board, after receiving the opinion of the Nominations and Compensation Committee, examines the status of each of its members (or candidates) on a case-by-case basis with regard to the criteria referred to below, the specific circumstances and the position of the member or candidate in relation to the Company. The conclusions of this examination are brought to the attention of the shareholders in the annual report and, where applicable, to the shareholders' meeting in connection with the election of members to the Supervisory Board.

Members of the Supervisory Board may be removed at any time by the ordinary shareholders' meeting.

- ***Supervisory Board Officers (Article 20 of the Bylaws and Article 1.3 of the Supervisory Board's Internal Regulations)***

The Supervisory Board elects a Chairman and a Vice Chairman from among its members, in accordance with the provisions of its Internal Regulations.

- ***Powers and Duties of the Supervisory Board (Articles 16 and 22 of the Bylaws and Articles 1.4, 2.8, 2.9 and 3 of the Supervisory Board's Internal Regulations)***

The Supervisory Board oversees the Management Board's management of the Company on an ongoing basis.

At any time during the year, the Supervisory Board carries out the controls and verifications that it deems appropriate and may obtain any documents that it deems useful for such purpose.

Within limits set by the Supervisory Board and with the power to sub-delegate, the Supervisory Board may authorize the Management Board to sell real property, to sell all or a portion of its equity investments, and to give security as well as deposits, backing or guarantees in the name of the Company.

A list of Management Board decisions that require prior approval of the Supervisory Board is included in Article 16 of the Company's Bylaws and Article 3.2 of the Supervisory Board's Internal Regulations (see Section 7.6.2.1, "Powers and Duties of the Management Board").

Each year at the Shareholders' Meeting, the Supervisory Board presents its comments on the Management Board's report and on the financial statements for the previous year.

It may delegate special authority to one or more of its members to accomplish one or more specific objectives.

The Supervisory Board may establish Internal Regulations providing, in particular, for the creation of one or more Supervisory Board committees, of which it determines the composition and powers and, where applicable, the compensation of each of its members. Members of the Supervisory Board and of the Management Board, as well as observers, are required to comply with such Internal Regulations.

Until he or she holds 1,000 Company shares, each member of the Supervisory Board must use half of his attendance fees to acquire shares of the Company. When they take office, members of the Supervisory Board must convert their shares of the Company into registered form. Shares acquired at a later date must also be held in registered form.

Each member of the Supervisory Board must comply with applicable regulations with respect to market abuse and inside information. Moreover, each member must report to the Company any transaction in the Company's securities, in accordance with applicable laws and regulations. The members of the Supervisory Board are reminded of these provisions on an annual basis and from time to time in the event of any significant change.

- ***Information of the Supervisory Board (Article 4.4 of the Supervisory Board's Internal Regulations)***

The Management Board regularly apprises the Supervisory Board of developments in the Group's activity, financial results and financial condition, as well as of any commitments of the Company or the Group, in accordance with applicable provisions of the law, the Company's Bylaws or the Internal Regulations of the Supervisory Board or its committees.

- ***Supervisory Board Meetings (Articles 20 and 21 of the Bylaws and Article 5 of the Supervisory Board's Internal Regulations)***

Supervisory Board meetings are convened by the Chairman. However, the Chairman is required to convene the Supervisory Board whenever at least one member of the Management Board or at least one-third of the members of the Supervisory Board deliver a written reasoned request to the Chairman, within 15 days of receipt of such request. If the Chairman does not respond to such request, the authors of the request may convene the meeting themselves, indicating the meeting's agenda.

Supervisory Board meetings may be convened by any means, including email, with at least five (5) business days' notice. The notice period may be shortened on the proposal of the Chairman of the Supervisory Board if all members of the Supervisory Board are present or

represented at the Supervisory Board meeting or if the members who are absent and not represented consent to the meeting being held in their absence.

Meetings take place at the Company's registered office or at any other location indicated in the notice of meeting.

The notice of meeting must contain the meeting agenda.

The Supervisory Board may validly deliberate only if at least one-half of its members are present. To the extent authorized by the law, members participating in a meeting by videoconference, telephone conference, or any other means permitted by law are deemed to be present for purposes of calculating quorum and majority.

Decisions of the Supervisory Board are taken by a simple majority of members present or represented. In the event of a tie, the vote of the Chairman of the Supervisory Board prevails; the vote of the meeting's chair does not prevail unless the meeting is chaired by the Chairman of the Supervisory Board.

Decisions of the Supervisory Board are recorded in minutes to be prepared within 15 days following the meeting and signed by the chairman of the meeting and one member of the Supervisory Board (or, in the event that the meeting's chairman is unavailable, by at least two members of the Board), and kept in a special register held at the Company's registered office.

Copies or extracts of Supervisory Board minutes are certified by the Chairman of the Supervisory Board, the Vice Chairman of the Supervisory Board, or any member of the Management Board.

■ ***Compensation of Members of the Supervisory Board (Article 23 of the Bylaws and Article 7 of the Supervisory Board's Internal Regulations)***

The shareholders' meeting may allocate an annual amount of attendance fees to members of the Supervisory Board as compensation for their functions.

Upon the recommendation of the Nominations and Compensation Committee, the Supervisory Board (i) freely distributes to its members the attendance fees allocated to the Board by the shareholders' meeting. A proportion determined by the Board and deducted from the amount of the attendance fees allocated to the Board is paid to the Committee members based in particular on their attendance at Committee meetings; (ii) determines the amount of the compensation allocated to the Chairman and to the Vice Chairman; (iii) may, moreover, allocate exceptional compensation to certain of its members for assignments or mandates that they are asked to perform.

Such compensation will be paid in addition to the attendance fees and pursuant to conditions provided for by law.

■ ***Observers (Article 26 of the Bylaws and Article 10 of the Supervisory Board's Internal Regulations)***

The general shareholders' meeting and the Supervisory Board may each nominate observers (who may be individuals or entities) in a number not to exceed two. Observers are nominated for a renewable term of four years, although the body that appoints them may remove them at any time.

Observers are convened to Supervisory Board meetings as observers and may be consulted by the Supervisory Board. They may present observations to the shareholders' meeting on proposals submitted to them. They must receive notice of each Supervisory Board meeting pursuant to the same terms and conditions as those that apply to members of such Board. The Supervisory Board may entrust specific assignments to observers.

The Supervisory Board may, on the recommendation of the Nominations and Compensation Committee, authorize reimbursement of expenses incurred by observers in the interest of the Company.

**7.6.3 RIGHTS, PRIVILEGES AND RESTRICTIONS ON SHARES (ARTICLES 6 TO 9 OF THE BYLAWS)**

The Company's share capital is composed exclusively of ordinary shares.

The Company's ordinary shares are freely negotiable. The transfer of ordinary shares is carried out by transfer from account to account. Shares may be in registered or bearer form, at the option of the shareholder, pursuant to applicable regulations.

Whenever it is necessary to hold a specific number of shares to exercise any right, or in the event of an exchange or grant of securities giving the right to new shares in return for the return of a specific number of existing shares, any odd-lot shares or shares that fall short of the minimum number required will not provide shareholders with rights vis-à-vis the Company. It is the responsibility of shareholders to group their shares or to purchase or sell the necessary number of shares.

All fully paid shares held continuously in registered form by the same holder for at least two years benefit from double voting rights. The duration of the shareholding prior to November 22, 2013 is not taken into account in determining whether the shares held by a shareholder carry double voting rights.

In accordance with Article L. 225-123 paragraph 2 of the French Commercial Code, in the event of an increase in the Company's share capital through incorporation of reserves, profits or share premium, the newly issued shares will carry double voting rights if they are granted to a shareholder in relation to existing shares that already carry double voting rights.

Double voting rights may be exercised at any shareholders' meeting. Double voting rights terminate if the shares are

converted into bearer form or if their ownership is transferred.

Each share gives the right to a portion equal to the share of the capital that it represents with respect to ownership of corporate assets and liquidation proceeds.

Shares are indivisible vis-à-vis the Company.

#### **7.6.4 MODIFICATIONS TO THE RIGHTS OF SHAREHOLDERS**

To the extent that the Bylaws are silent, modification of the rights attached to the Company's shares is subject to applicable law.

#### **7.6.5 SHAREHOLDERS' MEETINGS (ARTICLE 25 OF THE BYLAWS)**

Shareholders' meetings are convened subject to the conditions provided for by law. They meet at the Company's registered office or at any other location indicated in the notice of meeting.

The Management Board is authorized to decide at the time it convenes the shareholders' meeting to broadcast the meeting publicly by videoconference or any other means of telecommunication or transmission, including the Internet. A shareholder may give a proxy to another shareholder or to any other individual or entity to represent him at the shareholders' meeting.

The proxy, as well as, where applicable, its revocation, must be in writing and delivered to the Company in accordance with the conditions provided for by applicable regulations.

Shareholders may participate in meetings either in person or by proxy by proving their identity and their ownership of shares in the form in which such shares are held, pursuant to applicable laws and regulations.

Joint owners of indivisible shares are represented at meetings by one of the joint owners or by a proxy chosen by mutual agreement of the joint owners. In the event that the joint owners fail to reach an agreement as to the choice of a proxy, a proxy may be designated by order of the presiding judge of the commercial court, ruling on an interim basis at the request of the more diligent joint owner.

If the Management Board so provides in the notice of meeting, shareholders may also participate in such meeting by videoconference or other means of telecommunication or electronic transmission, including the Internet, pursuant to legal and regulatory requirements. Such shareholders are deemed present for purposes of calculating quorum and majority.

Meetings are chaired by the Chairman of the Supervisory Board, or, in his absence, by the Vice Chairman, or, in his absence, by any member of the Supervisory Board specially delegated for such purpose by the Supervisory Board. Otherwise, the meeting elects its own chairman.

The two members of the meeting who are present, agree to serve such role and have the greatest number of voting rights serve as scrutineers.

The meeting officers designate a secretary, who need not be a shareholder.

An attendance sheet is kept at each meeting containing the information required by law.

Copies or extracts of the minutes of shareholders' meetings may be certified by the Chairman of the Supervisory Board, the Vice Chairman, a member of the Management Board acting as Managing Director or by the secretary of the shareholders' meeting.

Ordinary and extraordinary shareholders' meetings voting pursuant to their respective quorum and majority requirements exercise the powers assigned to them by the law.

#### **7.6.6 STATUTORY PROVISIONS LIKELY TO HAVE AN IMPACT IN CASE OF A CHANGE OF CONTROL OF THE COMPANY**

None

#### **7.6.7 SHAREHOLDING THRESHOLDS AND IDENTIFICATION OF SHAREHOLDERS**

##### **7.6.7.1 CROSSING OF THRESHOLDS (ARTICLE 7 OF THE BYLAWS)**

Any individual or entity, acting alone or in concert with others, who comes to own, directly or indirectly, 1% or more of the share capital or voting rights of the Company and thereafter increases or decreases its shareholding by an amount greater than or equal to 1% of the share capital or voting rights, including above the legal threshold, must notify the Company thereof and provide the information required by the AMF by registered mail with acknowledgment of receipt, within four trading days from the date on which any such threshold is met or crossed.

The sanctions provided for by law for failure to comply with reporting obligations when legal thresholds are crossed shall not apply to thresholds provided for in the Bylaws except by request, recorded in the minutes of the shareholders' meeting, of one or more shareholders holding at least 1% of the Company's capital or voting rights.

Subject to the above provisions, this statutory obligation is governed by the same provisions as those governing the legal obligation, including legal or regulatory provisions with respect to assimilation with previously owned shares.

The Company reserves the right to disclose to the public and to the shareholders either the information reported to it or any failure by the person in question to comply with the above obligation.

**7.6.7.2 IDENTIFICATION OF SHAREHOLDERS (ARTICLE 7 OF THE BYLAWS)**

The Company has the right to apply applicable regulations to identify the holders of securities granting voting rights at shareholders' meetings, either immediately or in the future.

Holders who fail to comply with Tarkett's request for information within the time period provided for by applicable laws and regulations or who transmit incomplete or inaccurate information will not be permitted to exercise voting rights with respect to any such shares or other equity-linked securities and to receive dividends pertaining thereto (if any) until the date on which such holders comply with Tarkett's request for information.

**7.6.8 CHANGES IN SHARE CAPITAL**

To the extent that the Bylaws are silent, the share capital may be increased, decreased or redeemed by any means authorized by law.

**7.6.9 DISTRIBUTION OF PROFITS (ARTICLE 28 OF THE BYLAWS)**

Each fiscal year's net income is determined in accordance with applicable legal and regulatory provisions.

Under French law, Tarkett is required to allocate 5% of its net income in each fiscal year, after reduction for losses carried forward from previous years, if any, to a legal reserve fund until the amount in that fund equals 1/10 of the nominal amount of its share capital.

Upon proposal by Tarkett's Management Board and in light of the report of the Supervisory Board, Tarkett's shareholders may decide to allocate all or part of distributable profits to special or general reserves, to carry them forward to the next fiscal year as retained earnings, or to allocate them to the shareholders as dividends.

The annual shareholders' meeting for approval of the annual financial statements may grant an option to the shareholders to receive all or part of their dividends or interim dividends in cash or shares, in accordance with French law. Moreover, it may decide that for all or part of the dividends or interim dividends, reserves or premiums to be distributed, or for any share decrease, this distribution or decrease will be made in kind in the form of securities or assets of the Company. Each shareholder's share of the Company's profits and contribution to the Company's losses is equal to the proportion of the share capital held.

## 7.7 EQUITY INVESTMENTS IN NON-TARKETT GROUP ENTITIES

Information concerning entities in which the Company holds a fraction of the share capital likely to have a significant impact on the valuation of its assets and liabilities, financial condition or results of operations is

included in Section 4.1.1.7, “Acquisitions”, as well as in Note 2, “Scope of Consolidation”, and Note 12, “Principal Consolidated Entities,” included in Section 5.2, “Notes to the Consolidated Financial Statements”.

## 7.8 EVENTS LIKELY TO HAVE AN IMPACT IN THE EVENT OF A TENDER OFFER

To the Company’s knowledge, there are no agreements that could lead to a change in control.

The information required by Article L.225-100-3 of the French Commercial Code is included in the Registration Document as follows: the capital structure and direct and indirect holdings in the Company’s capital of which the Company is aware are described and detailed in Section 7.2 “Information About the Share Capital”.

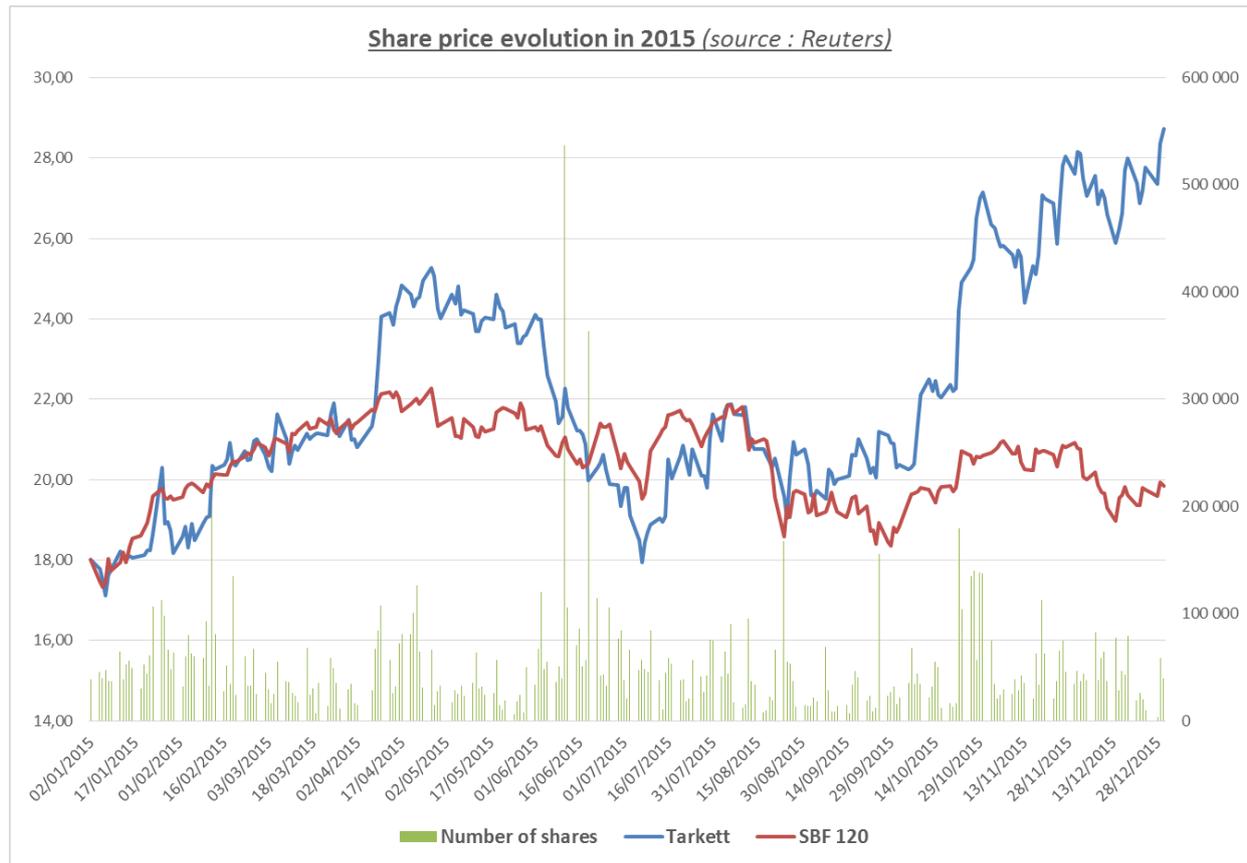

Moreover, to the Company’s knowledge and other than as described in Sections 2.3 “Compensation and Benefits Granted to the Management and Supervisory Bodies” and 2.4 “Other Information About the Company Officers”, there are no agreements providing for indemnification of members of the Management Board or employees in the event of their dismissal due to a tender offer, nor has the Company entered into any agreement that could be modified or terminated in the event of a change of control of the Company.

## 7.9 STOCK EXCHANGE INFORMATION

Tarkett’s shares are listed on Euronext Paris - Compartment A - ISIN Code: FR00004188670 - Stock symbol: TKTT.

## 8.1 DRAFT AGENDA AND RESOLUTIONS PRESENTED TO THE GENERAL SHAREHOLDERS' MEETING OF APRIL 26, 2016

### 8.1.1 AGENDA

#### 1st Resolution:

Approval of the Company financial statements as of and for the fiscal year ended December 31, 2015;

#### 2nd resolution:

Approval of the consolidated financial statements as of and for the fiscal year ended December 31, 2015;

#### 3rd resolution:

Allocation of the net result for the fiscal year ended December 31, 2015 and determination of the dividend;

#### 4th resolution:

Approval of regulated agreements and commitments referred to in Article L. 225-86 et seq. of the French Commercial Code;

#### 5th resolution:

Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Michel Giannuzzi in his capacity as Chairman of the Management Board;

#### 6th resolution:

Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Fabrice Barthélemy in his capacity as a member of the Management Board;

#### 7th resolution:

Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Vincent Lecerf in his capacity as a member of the Management Board;

#### 8th resolution:

Renewal of Mr. Eric Deconinck's term as a member of the Supervisory Board;

#### 9th resolution:

Renewal of Mr. Bernard-André Deconinck's term as an independent member of the Supervisory Board;

#### 10th resolution:

To ratify the cooptation of Ms. Guylaine Saucier as a member of the Supervisory Board;

#### 11th resolution:

Authorization to be granted to the Management Board to trade in the Company's shares;

#### *Extraordinary Shareholders' Meeting*

#### 12th resolution:

Authorization to be granted to the Management Board to grant free shares to employees and/or certain company officers of the Company or related companies, duration of the authorization, ceiling, duration of vesting and retention periods;

#### *Ordinary Shareholders' Meeting*

#### 13th resolution:

Powers to carry out the necessary legal formalities.

## 8.1.2 RESOLUTIONS ON THE AGENDA FOR THE GENERAL SHAREHOLDERS' MEETING

### First Resolution

*(Approval of the Company financial statements as of and for the fiscal year ended December 31, 2015)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings and after reviewing (i) the report of the Chairman of the Supervisory Board; (ii) the report of the Management Board; (iii) the report of the Supervisory Board; and (iv) the report of the statutory auditors on the annual Company financial statements as of and for the fiscal year ended December 31, 2015, **approves** the Company financial statements as of and for the fiscal year ended December 31, 2015 as presented to them and including the balance sheet, income statement and annexes, showing net income of €54,159,597, as well as the transactions described in such financial statements and summarized in such reports.

Pursuant to Article 223 quater of the French General Tax Code, the General Shareholders' Meeting also **takes note** that total expenses and charges as referred to in Article 39-

4 of the French General Tax Code were €53,679.63 for the most recently ended fiscal year.

### Second Resolution

*(Approval of the consolidated financial statements as of and for the fiscal year ended December 31, 2015)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings and after reviewing (i) the report of the Chairman of the Supervisory Board; (ii) the report of the Management Board; (iii) the report of the Supervisory Board; and (iv) the report of the statutory auditors on the annual consolidated financial statements as of and for the fiscal year ended December 31, 2015, **approves** the consolidated financial statements as of and for the fiscal year ended December 31, 2015 as presented to them and including the balance sheet, income statement and annexes, showing net income of €83.3 million, as well as the transactions described in such financial statements and summarized in such reports.

### Third Resolution

*(Allocation of the net result for the fiscal year ended December 31, 2015 and determination of the dividend)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, after reviewing the report of the Management Board, and noting that the financial

statements as of and for the fiscal year ended December 31, 2015, show a net profit of €54,159,597, **decides**, upon the proposal of the Management Board, to allocate the distributable profit as follows:

<b>Distributable amount for 2015</b>	
Profit for the fiscal year	€54,159,597
Retained earnings from prior years	€723,172,152
<b>Total</b>	<b>€777,331,749</b>
<b>Allocation of distributable profit</b>	
Dividend per share of €0.52, corresponding to a total amount of <sup>(1)</sup>	€33,074,799.16
Balance allocated to retained earnings	€744,256,950

*(1) The total amount of the distribution referred to above is calculated on the basis of the number of shares with dividend rights as of December 31, 2015 (63,605,383 shares) and may change if the number of shares with dividend rights changes between January 1, 2016 and the ex-dividend date, in particular with respect to the number of treasury shares and final grants of free shares (where the recipient has dividend rights under the relevant plan).*

As a result, the General Shareholders' Meeting sets the per-share dividend at €0.52 for the fiscal year ended December 31, 2015, attached to each share with rights thereto.

The General Shareholders' Meeting **specifies** that the Company will not receive any dividend in respect of shares that it holds on the payment date. If, when the dividend is paid, the Company holds any of its own shares, the amounts corresponding to the dividends not paid in respect of such shares will be allocated to retained earnings. As a result, the General Shareholders' Meeting delegates authority to the Management Board to adjust the final

amount of the distribution and the final amount of retained earnings, if necessary.

In accordance with Article 243 bis of the French General Tax Code, it is specified that when paid to shareholders who are natural persons and residents of France for tax purposes, this distribution is eligible for the 40% tax deduction provided for in Article 158 3.2 of the same Code. In addition, it is noted that since July 1, 2012, the social security contribution on dividend distributions is 15.5%.

Dividends paid over the past three fiscal years	Year distributed		
	2015	2014 <sup>(3)</sup>	2013
Total dividends (in millions of euros)	24.1 <sup>(1)</sup>	39.5 <sup>(1)</sup>	124.8 <sup>(1)(2)</sup>
Dividends per share (in euros)	0,38	0,62	2.00 <sup>(3)</sup>

(1) The amounts presented in the table represent total dividends after deduction of the dividend on treasury shares held by the Company.

(2) The total amount of the dividend was €30.0 million. The amount shown in the table represents the total amount after deduction of the share of the dividend paid to Partholdi, which merged into Tarkett in November 2013.

(3) The net dividend per share is shown before division of the par value by four in connection with the pre-IPO reorganization on November 21, 2013, which had the effect of multiplying the number of existing ordinary shares of the Company by four.

The dividend will be detached from the shares at the end of the accounting day on July 5, 2016, and the dividend will be paid on July 7, 2016.

#### Fourth Resolution

*(Approval of regulated agreements and commitments referred to in Article L. 225-86 et seq. of the French Commercial Code)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, and having reviewed the special report of the statutory auditors on agreements and commitments governed by Articles L.225-86 et seq. of the French Commercial Code, **approves** such report and **notes that** no new agreements were entered into during the fiscal year ended December 31, 2015.

#### Fifth Resolution

*(Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Michel Giannuzzi in his capacity as Chairman of the Management Board)*

The General Shareholders' Meeting, consulted in accordance with the recommendation of paragraph 24.3 of the Afep-Medef Corporate Governance Code of November 2015, which is the Company's reference code within the meaning of Article L.225-68 of the French Commercial Code, and pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, **issues a favorable opinion** on the components of the compensation due or granted for the fiscal year ended December 31, 2015 to Mr. Michel Giannuzzi as set forth in Section 2.6.1 "Components of compensation due or granted to Michel Giannuzzi during the fiscal year ended December 31, 2015" of the 2015 Registration Document.

#### Sixth Resolution

*(Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Fabrice Barthélemy in his capacity as a member of the Management Board)*

The General Shareholders' Meeting, consulted in accordance with the recommendation of paragraph 24.3 of the Afep-Medef Corporate Governance Code of November 2015, which is the Company's reference code within the meaning of Article L.225-68 of the French Commercial Code, and pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, **issues a favorable opinion** on the components of the compensation due or granted for the fiscal year ended December 31, 2015 to Mr. Fabrice Barthélemy as set forth in Section 2.6.2 "Components of compensation due or granted to Fabrice

Barthélemy during the fiscal year ended December 31, 2015" of the 2015 Registration Document.

#### Seventh Resolution

*(Advisory vote on the components of the compensation due or granted for the 2015 fiscal year to Mr. Vincent Lecerf in his capacity as a member of the Management Board)*

The General Shareholders' Meeting, consulted in accordance with the recommendation of paragraph 24.3 of the Afep-Medef Corporate Governance Code of November 2015, which is the Company's reference code within the meaning of Article L.225-68 of the French Commercial Code, and pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, **issues a favorable opinion** on the components of the compensation due or granted for the fiscal year ended December 31, 2015 to Mr. Vincent Lecerf as set forth in Section 2.6.3 "Components of compensation due or granted to Vincent Lecerf during the fiscal year ended December 31, 2015" of the 2015 Registration Document.

#### Eighth Resolution

*(Renewal of Mr. Eric Deconinck's term as member of the Supervisory Board)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, having reviewed the report of the Management Board and noting that the term of Mr. Eric Deconinck is expiring, **decides** to renew Mr. Eric Deconinck for a term of four (4) years to expire at the close of the annual shareholders' meeting called in 2020 to approve the financial statements for the fiscal year ending December 31, 2019.

Mr. Eric Deconinck indicated in advance that he would accept the renewal of his term if this Meeting so decides, and that he does not hold any position, nor is he subject to any measure, liable to render him ineligible.

#### Ninth Resolution

*Renewal of Mr. Bernard-André Deconinck's term as a member of the Supervisory Board;*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, having reviewed the report of the Management Board and noting that the term of Mr. Bernard-André Deconinck is expiring, **decides** to renew Mr.

Bernard-André Deconinck for a term of four (4) years to expire at the close of the annual shareholders' meeting called in 2020 to approve the financial statements for the fiscal year ending December 31, 2019.

Mr. Bernard-André Deconinck indicated in advance that he would accept the renewal of his term if this Meeting so decides, and that he does not hold any position, nor is he subject to any measure, liable to render him ineligible.

### Tenth Resolution

*(Ratification of the cooptation of Ms. Guylaine Saucier as an independant member of the Supervisory Board)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, having reviewed the report of the Management Board and the decision of the Supervisory Board dated July 29, 2015, **ratifies** the decision to coopt Ms. Guylaine Saucier to replace Ms. Sonia Bonnet-Bernard, who resigned, as an independent member of the Supervisory Board for the remainder of her predecessor's term, which will expire at the general shareholders' meeting called in 2017 to approve the financial statements ending December 31, 2016.

### Eleventh Resolution

*(Authorization to be granted to the Management Board to trade in the Company's shares)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to ordinary shareholders' meetings, and having reviewed the report of the Management Board, **authorizes** the Management Board to purchase or cause the purchase of the Company's shares, with the power to sub-delegate as permitted by law, in accordance with Articles L.225-209 et seq. of the French Commercial Code, for the purpose of:

- granting free shares pursuant to Articles L.225-197-1 et seq. of the French Commercial Code; or
- granting free shares to the employees or executive officers of the Company or an affiliate of the Company (in particular the Company's direct and indirect subsidiaries) under any plan that is not subject to Articles L.225-197-1 et seq. of the French Commercial Code, and in particular under long term incentive plans; or
- canceling shares that are bought back but not allocated; or
- maintaining a liquidity market in Tarkett's shares through an investment services provider in the framework of a liquidity agreement that complies with the market ethics charter recognized by the AMF.

The Company may buy back a number of shares such that:

- the number of shares that the Company buys during the term of the share buyback program shall not exceed 10% of the shares making up the Company's share capital at any time, as adjusted following any transaction affecting it subsequent to this General meeting (such number being 6,372,269 shares as of December 31, 2015), provided, that where the shares are bought in order to maintain liquidity pursuant to the conditions defined by the AMF General Regulation, the number of shares

taken into account for purposes of calculating the 10% limit provided for above shall be the number of shares bought less the number of shares resold during the period of the authorization; and

- the number of shares that the Company holds may not at any time exceed 10% of the shares comprising the Company's share capital on the date in question.

Shares may be bought, sold or transferred at any time (other than during a tender offer for the Company's shares) up to the limits authorized under applicable laws and regulations, on regulated markets or multilateral trading facilities, through systematic internalizers or over the counter, including through block trades (without limiting the portion of the buyback program that may be carried out by this means), by tender or exchange offer, or through the use of options or other derivative financial instruments traded on regulated markets, multilateral trading facilities, through systematic internalizers or over the counter, or by delivery of shares following the issuance of securities giving access to the Company's share capital by conversion, exchange, reimbursement, exercise of a warrant or in any other manner, either directly or indirectly through an investment services provider acting pursuant to the conditions of Article L.225-206 II of the French Commercial Code.

The maximum share purchase price in connection with this resolution is €60.

The General Shareholders' Meeting **delegates** to the Management Board, in the event of a change in the shares' par value, a capital increase by incorporation of reserves, a grant of free shares, a stock split or a reverse stock split, a distribution of reserves or of any other assets, a capital redemption, or any other transaction affecting shareholders' equity, the power to adjust the maximum purchase price stated above in order to account for the effect of such transactions on the value of the shares.

The total amount allocated to the share buyback program shall not be greater than €15 million.

The General Shareholders' Meeting **grants** all powers to the Management Board, with the power to delegate as permitted by law, to decide upon and implement this authorization, to specify, if necessary, its terms and conditions, to carry out the share buyback program, and in particular to place any stock market order, to enter into any agreement, to allocate or reallocate the acquired shares for their intended purposes in accordance with applicable laws and regulations, to set the terms and conditions governing the maintenance of shareholder or option holder rights in accordance with legal, regulatory or contractual provisions, to file any declarations with the AMF or any other competent authority and to carry out all other formalities and, generally, to perform all necessary acts.

As of the date hereof and up to the amount, if any, that has not yet been used, this authorization cancels any power previously given to the Management Board to trade in the Company's shares. It is given for a period of 18 months as from the date hereof.

### Twelfth Resolution

*(Authorization to be granted to the Management Board to grant free shares to employees and/or certain company officers of the Company or related companies, duration of the authorization, ceiling, duration of vesting and retention periods)*

The General Shareholders' Meeting, pursuant to the quorum and majority requirements applicable to extraordinary shareholders' meetings and in accordance with applicable legal provisions, including Articles L. 225-197-1 of the French Commercial Code, having reviewed the report of the Management Board and the special report of the statutory auditors,

- (i) takes note of the entry into force of Law No. 2015-990 of August 6, 2015 for growth, activity and equal economic opportunities (the "Macron Law"); and
- (ii) authorizes the Management Board, as from the date of this General Shareholders' Meeting and for a duration to expire at the close of the General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2016, subject to the prior authorization of the Supervisory Board, to make one or more free grants of existing shares of the Company, subject to performance conditions determined by the Management Board in cooperation with the Supervisory Board and on the proposal of the Nominations and Compensations Committee, pursuant to the terms set forth below.

The total number of existing free shares of the Company that may be granted pursuant to this resolution may not represent more than 1.8% of the Company's share capital as of the date of this General Shareholders' Meeting, it being specified that grants made pursuant to this resolution to each of the members of the Company's Management Board must be authorized in advance by the Supervisory Board, are subject in full to performance conditions, and may not represent more than 30% of the number of shares authorized by this resolution.

The beneficiaries shall be some or all eligible employees or officers (within the meaning of Article L. 225-197-1 II paragraph 1 of the French Commercial Code and subject to compliance with Articles L. 225-186-1 and L. 225-197-6 of the French Commercial Code) of the Company or of related companies or groups, within the meaning of Article L. 225-197-2 of the French Commercial Code or certain categories of them.

On the basis of the recommendations of the Nominations and Compensation Committee, and pursuant to legal requirements, the Management Board shall determine, at the time of each grant decision, the vesting period at the end of which the grant of the shares will become definitive. The vesting period may not be shorter than two years as from the date of the grant.

On the basis of the recommendations of the Nominations and Compensation Committee, where applicable, the Management Board shall determine the period during which the beneficiaries must retain their shares, which period shall

run from the vesting date and which may be eliminated, since the vesting period may not be shorter than two years.

In the event that a beneficiary becomes disabled, coming within the scope of the second or third category provided for in Article L.341-4 of the French Social Security Code, the shares will be definitively granted to such beneficiary before the end of the remaining vesting period and will be immediately transferable.

The existing shares to be granted under this resolution must be acquired by the Company either pursuant to Article L. 225-208 of the French Commercial Code or, if applicable, in connection with the share buyback program proposed in the 11th resolution above pursuant to Article L. 225-209 of the French Commercial Code or in connection with any other share buyback program that may apply at a later date.

In that regard, the General Shareholders' Meeting grants all powers to the Management Board, subject to the prior authorization of the Supervisory Board, to implement this authorization, and, in particular, to:

- determine the identity of the beneficiaries, the grant criteria (in particular performance and continued presence), the number of shares to be granted to each, the terms and conditions for the grant of shares and, in particular, the vesting period and retention period applicable to each grant, subject to the minimum periods defined in this resolution;
- determine, upon the proposal of the Nominations and Compensation Committee and in accordance with legal conditions and limits, the dates on which the free share grants will be made;
- determine the dividend date for the newly issued shares, which may be retroactive;
- determine the terms pursuant to which the free shares granted will be adjusted in order to preserve the rights of the beneficiaries; and
- generally, enter into any agreements, prepare any documents, carry out any formalities, and make all filings with all authorities and do whatever else may be necessary.

The Management Board shall inform each Ordinary Shareholders' Meeting of the grants made in connection with this resolution, in accordance with Article L.225-197-4 of the French Commercial Code.

### Thirteenth Resolution

*(Powers to carry out the necessary legal formalities)*

The General Shareholders' Meeting **grants** all powers to the bearer of an original, a copy or an extract of the minutes of this General Shareholders' Meeting to carry out all filings, formalities and publications required by law.

## 8.2 MANAGEMENT BOARD'S REPORT ON DRAFT RESOLUTIONS PRESENTED TO THE GENERAL SHAREHOLDERS' MEETING OF APRIL 26, 2016

### 1. Approval of the Company and consolidated financial statements for fiscal year 2015 (first and second resolutions)

In its first and second resolutions, the Management Board asks the Meeting to approve the Company financial statements and the consolidated financial statements as of and for the fiscal year ended December 31, 2015, which show:

- With respect to the Company financial statements, an income statement showing net profit in the amount of €54,159,597 in 2015 as compared with €111,147,117 in 2014;
- With respect to the consolidated financial statements, net income, Group share, in the amount of €83.3 million in 2015 as compared with €61.2 million in 2014. Details of the financial statements and the corresponding statutory auditors' reports are included in Chapters 4 "Management's discussion and analysis of financial condition and results of operations" and 5 "Financial statements" of the Registration Document.

### 2. Allocation of the results and determination of the dividend amount (third resolution)

The purpose of the third resolution is to ask the Meeting:

- (i) to allocate the results;
- (ii) to set the dividend at €0.52 per share, payable in cash, for the fiscal year ended December 31, 2015.

The dividend will be paid on July 7, 2016.

### 3. Regulated agreements and commitments (fourth resolution)

The fourth resolution presents to the Meeting the commitments or agreements referred to in Articles L. 225-86 et seq. of the French Commercial Code that were entered into or remained in force during the fiscal year ended December 31, 2015, as presented in the statutory auditors' special report (included in Section 8.5 "Special report of the statutory auditors on the free grant of shares" of the Registration Document). The Management Board notes that no new agreements were entered into. The agreements mentioned are those entered into during previous fiscal years and that remained in force during the fiscal year ended December 31, 2015.

### 4. Advisory vote on the components of the compensation due or granted to the members of the Management Board for the 2015 fiscal year (fifth, sixth and seventh resolutions)

Pursuant to the recommendation of Article 24.3 of the Afep-Medef Corporate Governance Code, as revised in

November 2015, the Supervisory Board proposes to submit for an advisory vote of the General Shareholders' Meeting the components of the compensation due or granted for the 2015 fiscal year to Messrs. Michel Giannuzzi, Fabrice Barthélemy and Vincent Lecerf, members of the Company's Management Board, as set forth in Section 2.3 "Compensation and benefits granted to the management and supervisory bodies" of the Registration Document.

The Management Board recommends that you issue a favorable vote on the components of the compensation due or granted for the 2015 fiscal year to Messrs. Michel Giannuzzi, Fabrice Barthélemy and Vincent Lecerf, members of the Management Board.

### 5. Renewal of the terms of two members of the Supervisory Board (eighth and ninth resolutions)

The terms of Messrs Eric Deconinck and Bernard-André Deconinck will expire at the close of the General Shareholders' Meeting of April 26, 2016.

The Supervisory Board, upon the recommendation of the Nominations and Compensation Committee, recommends that you renew them for four-year terms.

**Eric Deconinck** is a member of the Company's Supervisory Board and, since 2013, has been a member of the Management Board and Chairman of the Bureau des Assemblées (as the representative of Demunich) of SID. He has served as CEO of SIF. At Sommer Allibert, he was Managing Director of the subsidiary Sommer Brazil from 1976 to 1981, and then President of Allibert Habitat from 1993 to 1997.

Mr. Deconinck began his career with Publicis and then worked as a Budget Manager for Euro-Advertising from 1972 to 1976. He subsequently joined L'Oréal, where he was Managing Director of Garnier from 1981 to 1985 and then Managing Director of Lancôme from 1985 to 1988. He then joined LVMH as President of Christian Lacroix from 1990 to 1991.

He founded and developed the consulting firm Marketing and Business from 1998 to 2013. Since 2013, he has been founder and manager of Demunich.

**Bernard-André Deconinck** is a member of the Company's Supervisory Board and, since 2013, has been the Chairman of the Management Board and a member of the Bureau des Assemblées (as the representative of Heritage Fund) of SID. He has been a member of SIF's Management Board. He began his career with the Group in 1969 as an engineer, then beginning in 1970 held positions in factory management and operational management at the division level then as vice-president of purchasing, investing, style, and Group research and development.

### 6. Ratification of the appointment of Ms. Guylaine Saucier as an independent member of the Supervisory Board (tenth resolution)

At its meeting on July 29, 2015, the Supervisory Board took note of the resignation of Ms. Sonia Bonnet-Bernard as a member of the Supervisory Board.

At the same meeting, upon the recommendation of the Nominations and Compensation Committee, the Supervisory Board coopted Ms. Guylaine Saucier to the Supervisory Board for the duration of her predecessor's term, to expire at the close of the annual shareholders' meeting called in 2017 to approve the financial statements for the fiscal year ending December 31, 2016.

The Supervisory Board asks the Meeting to ratify the cooptation of Ms. Guylaine Saucier as a member of the Supervisory Board

**Guylaine Saucier** holds a business degree from the Ecole des Hautes Etudes Commerciales of Montreal. She is a certified director with the Institute of Corporate Directors, and received the title of Fellow from the CPA Order of Quebec.

Ms. Saucier was Chairwoman and CEO of the Gérard Saucier Ltée group from 1975 to 1989. A director of numerous large companies, including the Bank of Montreal, AXA Assurances Inc., Danone and Areva, she was also Chairwoman of the Mixed Committee on Corporate Governance (ICCA, CDNX, TSX) (2000-2001), Chairwoman of the Board of Director of the Canadian Institute of Chartered Professional Accounts (1999 to 2000) and a member of the Board of Directors of the Bank of Canada from 1987 to 1991. She was also named to chair the Quebec Chamber of Commerce.

#### **7. Authorization to be granted to the Management Board to trade in the Company's shares (eleventh resolution)**

To ensure that the Company is at all times able to buy back its own shares, a resolution is submitted for your approval to authorize the Management Board, with the power to sub-delegate as permitted by law, to purchase or cause the purchase of shares of the Company, in order to carry out the following transactions:

- granting free shares pursuant to Articles L.225-197-1 et seq. of the French Commercial Code; or
- granting free shares to employees or executive officers of the Company or an affiliate of the Company (in particular the Company's direct and indirect subsidiaries) under any plan that is not subject to Articles L.225-197-1 et seq. of the French Commercial Code, and in particular under the plans named " Long Term Incentive Plans"; or
- canceling shares that are bought back but not allocated; or
- maintaining a liquidity market in Tarkett's shares through an investment services provider in the framework of a liquidity agreement that complies with the market ethics charter recognized by the AMF.

The share buyback program could also be used in order to carry out any market practice permitted by the AMF, and, more generally, to carry out any transaction that complies with applicable regulations.

Tarkett's shareholding is subject to applicable regulations.

Purchases, sales and transfers could be carried out at any time, up to the limits authorized by applicable laws and regulations (other than during a tender offer), and by any means.

The Company could buy back a number of shares such that:

- the number of shares that the Company buys during the term of the share buyback program does not exceed 10% of the shares making up the Company's share capital at any time, as adjusted following any transaction affecting it subsequent to this General meeting (such number being 6,372,269 shares as of December 31, 2015), provided, that where the shares are bought in order to maintain liquidity pursuant to the conditions defined by the AMF General Regulation, the number of shares taken into account for purposes of calculating the 10% limit provided for above would be the number of shares bought less the number of shares resold during the period of the authorization;
- the number of shares that the Company holds may not at any time exceed 10% of the shares comprising the Company's share capital on the date in question.

Shares could be bought, sold or transferred at any time (other than during a tender offer for the Company's shares) up to the limits authorized under applicable laws and regulations, on regulated markets or multilateral trading facilities, through systematic internalizers or over the counter, including through block trades (without limiting the portion of the buyback program that may be carried out by this means), by tender or exchange offer, or through the use of options or other derivative financial instruments traded on regulated markets, multilateral trading facilities, through systematic internalizers or over the counter, or by delivery of shares following the issuance of securities giving access to the Company's share capital by conversion, exchange, reimbursement, exercise of a warrant or in any other manner, either directly or indirectly through an investment services provider acting pursuant to the conditions of Article L.225-206 II of the French Commercial Code.

It is recommended that you set the maximum purchase price at €60 per share.

The General Shareholders' Meeting would delegate to the Management Board the power to adjust the maximum purchase price stated above in order to account for the effect of such transactions on the value of the shares in the event of a change in the shares' par value, a capital increase by incorporation of reserves, a grant of free shares, a stock split or a reverse stock split, a distribution of reserves or of any other assets, a capital redemption, or any other transaction affecting shareholders' equity.

The total amount allocated to the share buyback program could not be greater than €15 million.

As of the date hereof and up to the amount, if any, that has not yet been used, this authorization would cancel any power previously given to the Management Board to trade in the Company's shares.

This authorization would be given for a period of 18 months as from the date hereof.

**8. Authorization to grant free shares to employees and/or certain company officers of the Company or related companies, duration of the authorization, ceiling, duration of retention periods (twelfth resolution)**

We propose that you grant authorization to the Management Board, subject to the performance conditions defined by the Management Board in agreement with the Supervisory Board and on the proposal of the Nominations and Compensation Committee, to grant free existing shares of the Company representing not more than 1.8% of the Company's share capital as of the date of the Extraordinary General Shareholders' Meeting to some or all employees and/or certain officers of the Company or of related companies. Grants made pursuant to this resolution to members of the Management Board would be approved in advance by the Supervisory Board, would be subject in full to performance conditions, and could not represent more than 30% of the number of shares authorized by this resolution.

This proposal takes into account the extensive changes to the corporate, tax and employment legislation governing grants of free shares introduced by Law No. 2015-990 of August 6, 2015 for growth, activity, and equal economic opportunities (the "Macron Law") and the applicability of the new regime to the free shares the grant of which was authorized by a decision of the Extraordinary Shareholders' Meeting after promulgation of the law, which was published in the Journal Officiel on August 7, 2015.

In connection with the authorization, we recommend that you grant authority to the Management Board to determine, on the basis of the recommendations of the Nominations and Compensation Committee, and pursuant to legal requirements, at the time of each grant decision, the vesting period at the end of which the grant of the shares will become definitive, which period may not be longer than two years.

We also recommend that you authorize the Management Board to determine, on the basis of the recommendations of the Nominations and Compensation Committee, where applicable, to determine the period during which the beneficiaries must retain their shares, which period shall run from the vesting date and which may be eliminate, since the vesting period may not be shorter than two years.

We also recommend that you provide that in the event that a beneficiary becomes disabled, coming within the scope of

the second or third category provided for in Article L.341-4 of the French Social Security Code, the shares will be definitively granted to such beneficiary before the end of the remaining vesting period and will be immediately transferable.

We recommend that you require that the existing shares to be granted under this resolution be acquired by the Company either pursuant to Article L. 225-208 of the French Commercial Code or, if applicable, in connection with the share buyback program proposed in the 11th resolution above pursuant to Article L. 225-209 of the French Commercial Code or in connection with any other share buyback program that may apply at a later date.

We recommend that you grant this authorization as from the date of the Ordinary and Extraordinary Shareholders' Meeting for a period to expire at the close of the General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2016.

Within that framework, it is recommended that you grant all powers to the Management Board within the limits set forth above and subject to the prior authorization of the Supervisory Board, to implement this authorization, and in particular to:

- determine the identity of the beneficiaries, the grant criteria (in particular performance and continued presence), the number of shares to be granted to each, the terms and conditions for the grant of shares and, in particular, the vesting period and retention period applicable to each grant, subject to the minimum periods defined in this resolution;
- determine, upon the proposal of the Nominations and Compensation Committee and in accordance with legal conditions and limits, the dates on which the free share grants will be made;
- determine the dividend date for the newly issued shares, which may be retroactive;
- determine the terms pursuant to which the free shares granted will be adjusted in order to preserve the rights of the beneficiaries; and
- generally, and with the right to delegate and to sub-delegate as permitted by law, enter into any agreements, prepare any documents, carry out any formalities, and make all filings with all authorities and do whatever else may be necessary.

We hope that you will approve all of the resolutions submitted for your vote.

\_\_\_\_\_  
The Management Board

### 8.3 OBSERVATIONS OF THE SUPERVISORY BOARD ON THE MANAGEMENT BOARD'S REPORT AND THE 2015 FINANCIAL STATEMENTS

Ladies and Gentlemen,

Our Company's Management Board has called this Annual Ordinary General Shareholders' Meeting, in accordance with law and the Company's bylaws, in order to report to you on the activity and financial condition of our Company and of our Group during the fiscal year ended December 31, 2015, and to submit the financial statements for such fiscal year and allocation of the results for your approval.

We note that the Management Board distributed the annual financial statements, the consolidated financial statements and the management report to the Supervisory Board within the legal time limits.

The Supervisory Board

In accordance with Article L.225-68 of the French Commercial Code, we have examined the annual financial statements, the consolidated financial statements, and the Management Board's management report, and we believe that such documents do not give rise to any particular observations.

We hope that all of the recommendations that the Management Board has made to you in its report will meet with your approval, and that you will decide to adopt the resolutions submitted to you.

### 8.4 MANAGEMENT BOARD'S MANAGEMENT REPORT ON FISCAL YEAR 2015

The table below identifies the sections of the 2015 Registration Document containing all of the items of the Management Board's management report required by applicable laws and regulations.

Item in the Management Report	Section of the Registration Document
1. The Group's business	Section 1.4
2. Significant events in fiscal year 2015	Section 1.2
3. 2015 results of operations	Sections 5.1 and 5.4
4. Indebtedness	Section 4.3.3 to 4.3.6
5. Financial risk management	Section 6.1
6. Description of the principal risks and uncertainties to which the Company is exposed	Section 6.1
7. Research and development	Section 1.6.4
8. Subsequent events	Section 5.2 (Note 11)
9. Information on trends and forecasts	Section 4.6
10. Allocation of results	Section 8.1.2
11. Table of results for the past five years	Section 5.4
12. Dividends	Section 5.6
13. Non tax-deductible expenses	Section 8.1.2
14. Offices and positions held by each Company officer	Section 2.1.1
15. Organization of the Company's senior management	Section 2.1.1
16. Subsidiaries and equity investments	Section 5.6
17. Shareholders	Section 7.3
18. Compensation paid to the Company officers	Section 2.3
19. Share subscription or purchase option plans and allocation of performance shares	Section 2.5
20. Delegations with respect to capital increases	Section 7.4
21. Transactions in the Company's securities carried out by the Company officers and related parties (Article L.621-18-2 of the French Monetary and Financial Code)	Section 2.8
22. Events likely to have an impact in the event of a tender offer	Section 7.8
23. Share buybacks	Section 7.2.4
24. Table of supplier and client payment terms	Section 5.3 (Note 14)
25. Labor, environmental and social information	Sections 3.1, 3.2 and 3.3
26. Report of the Chairman of the Supervisory Board on corporate governance and on internal control and risk management procedures	Section 6.4

## 8.5 SPECIAL REPORT OF THE STATUTORY AUDITORS ON THE FREE GRANT OF SHARE

To the Shareholders,

In our capacity as your company's statutory auditors and in accordance with the terms of our engagement defined by article L.225-197-1 of the French Commercial Code, we hereby report to you on the project of authorization to allocate existing free shares to the members of salaried personnel and/or corporate officers of your company, or companies or groups related to it in the meaning of article L. 225-197-2 of the French Commercial Code, an operation which is submitted to your approval.

The total number of shares that may be allocated for free under the twelfth resolution may not exceed 1.8% of your company's share capital at the date of the present Shareholders' Meeting.

Your Executive Board proposes, on the basis of its report, to authorize it for a term expiring at the close of the Shareholders' Meeting called to approve the financial statements for the year ending December 31, 2016, to allocate existing free shares of your company.

It is the responsibility of your Executive Board to prepare a report on this proposed operation. Our responsibility is to report on the information provided to you on the proposed operation.

We have performed the procedures that we have considered necessary regarding professional standards of the National Audit Authority (*Compagnie nationale des commissaires aux comptes*) for this mission. These procedures consisted notably in verifying that the terms given in the Executive Board report are in compliance with the provisions of French law.

We have no matters to report on the information given in the Executive Board report in connection with the proposed operation to allocate existing free shares.

## 8.6 STATUTORY AUDITORS' SPECIAL REPORT ON REGULATED AGREEMENTS AND COMMITMENTS

To the Shareholders,

In our capacity as your company's statutory auditors, we hereby report to you on regulated agreements and commitments.

It is our responsibility to report to shareholders, based on the information provided to us, on the main terms and conditions as well as the reasons that justify the interest for the company of those agreements and commitments that have been disclosed to us or that we may have identified as part of our engagement, without commenting on their relevance or substance or identifying any undisclosed agreements or commitments. Under the provisions of article R.225-58 of the French commercial code, it is the responsibility of the shareholders to determine whether the agreements and commitments are appropriate and should be approved.

Where applicable, it is also our responsibility to provide shareholders with the information required by article R.225-58 of the French commercial code in relation to the implementation during the year of agreements and commitments already approved by the Shareholders' meeting.

We performed the procedures that we deemed necessary in accordance with the guidance issued by the French Institute of statutory auditors ("*Compagnie Nationale des Commissaires aux Comptes*") for this type of engagement. These procedures consisted in verifying that the information given to us is consistent with the underlying documents.

### **AGREEMENTS AND COMMITMENTS SUBMITTED TO THE APPROVAL OF THE SHAREHOLDERS' MEETING**

We have been informed of no agreements and commitments authorized during the last year and requiring the approval of the Shareholders' Meeting by virtue of article L.225-86 of the French commercial code.

### **AGREEMENTS AND COMMITMENTS PREVIOUSLY APPROVED BY THE SHAREHOLDERS' MEETING**

In accordance with article R.225-57 of the French commercial code, we have been informed of the following agreements and commitments approved in prior years and which remained current during the last year.

#### **With Société Investissement Deconinck (« S.I.D. »)**

*Persons concerned: Messrs Bernard-André Deconinck, Didier Deconinck and Eric Deconinck, members of Tarkett's Supervisory Board and shareholders of S.I.D., which held more than 10 % of Tarkett's voting rights.*

- Service agreement

The agreement was authorized by your Supervisory Board on 17 December 2013, and states that your company provides in favor of S.I.D. legal, social and fiscal services necessary for its business.

An income of €75,000, excluding taxes, has been recorded in the financial statements of your company under this agreement, for the year ended 31 December 2015.

- Assistance and guidance agreement

The agreement was authorized by your Supervisory Board on 9 October 2013, and states that SID, which holds 50.18% of Tarkett's voting rights, assists Tarkett in defining its strategic objectives.

An expense of €500,000 has been recorded in the financial statements of your company under this agreement, for the year ended 31 December 2015.

#### **With Mister Michel Giannuzzi, Chairman of Tarkett's Management Board**

At the time of the listing of Tarkett's shares on NYSE Euronext Paris, Mr. Michel Giannuzzi's employment agreement was terminated, leaving in place his corporate office. In this context, the following agreements were authorized by your Supervisory Board on 27 September 2013.

- Retention Bonus

A retention bonus in the amount of €300,000 will be paid to Mr. Michel Giannuzzi on 1 November 2017 if he remains with Tarkett on such date.

- Severance or other benefits due or likely to become due as a result of termination of service or change of functions

Subject to the performance requirements defined below, Mr. Giannuzzi will be entitled to a severance payment equal to two years of his gross base salary and bonus during the twelve months prior to his departure as Chairman of the Management Board and, if applicable, pursuant to his employment contract. In the event that Mr. Giannuzzi is to receive both severance pay and the non-compete payment described below, the total amount that he receives will be limited to two years of the gross base salary and bonus received during the 12 months prior to his departure as

Chairman of the Management Board and, if applicable, pursuant to his employment contract.

Performance is measured by the extent of achievement of annual performance goals defined by the Supervisory Board upon the proposal of the Nominations and Compensation Committee, which serve as the basis for calculating variable compensation. The amount is equal to the average performance achieved by Mr. Giannuzzi during the three calendar years preceding his departure. In the event that his departure should occur before the end of 2016, performance will be measured by the extent of achievement of the annual performance goals used as the basis for calculating the variable portion of his compensation as Chairman of the Management Board and his compensation as an employee.

The severance payment is contingent on achieving 50% to 100% of the performance goals (i.e., no payment will be made unless the performance goal is reached to the extent of at least 50% and full payment will be received if the performance goal is achieved to the extent of 100%). The severance payment will be calculated in strict proportion to the extent of achievement of the performance goal.

Subject to achievement of the performance conditions, the Company will be required to pay this severance payment in the event of Mr. Giannuzzi's forced departure as Company officer (including, in particular, as a result of a change of control or a disagreement as to strategy) on the initiative of the Supervisory Board, regardless of whether Mr. Giannuzzi is removed or his mandate is not renewed. This

payment would not be available in the event of serious or gross misconduct.

- Compensation under a non-compete clause

Mr. Giannuzzi benefits from a clause providing for payment in the event that the non-compete clause provided for in connection with his office is triggered.

Mr. Giannuzzi will receive compensation for his non-compete clause in an amount equal to his gross base salary and bonus received during the twelve months prior to his departure from his position as Chairman of the Management Board. This compensation will be payable in 24 monthly payments for the duration of the non-compete clause. This compensation will be deducted from Mr. Giannuzzi's severance payment, such that the total amount received as severance and non-compete payments will not exceed two years of gross base salary and bonus received during the 12 months preceding his departure. The Company has the right to waive the non-compete clause.

For the year ended on 31 December 2015, no amount was paid to Mr. Michel Giannuzzi, under any of the three above-mentioned.

Fabrice Barthélemy  
Chief Financial Officer  
Tour Initiale - 1 Terrasse Bellini - 92919 Paris La Défense, France  
Tel. +33 (0)1 41 20 40 40 02

## 9.4 TENTATIVE FINANCIAL DISCLOSURE SCHEDULE

The financial information that Tarkett discloses to the public will be available on Tarkett's website ([www.tarkett.com](http://www.tarkett.com)).

For informational purposes only, Tarkett's financial disclosure schedule through December 31, 2016 is expected to be as follows:

	2016 Schedule
First quarter results	April 21, 2016
General Shareholders' Meeting	April 26, 2016
First half results	July 27, 2016
Third quarter results	October 26, 2016

## 9.5 STATUTORY AUDITORS

### 9.5.1 STATUTORY AUDITORS

#### **KPMG Audit, a department of KPMG S.A.**

Represented by Mr. Philippe Grandclerc  
Tour Eqho  
2 avenue Gambetta  
92066 Paris La Défense

KPMG S.A. is a member of the *Compagnie Régionale des Commissaires aux Comptes de Versailles* (the Regional Association of Auditors of Versailles).

KPMG S.A.'s term as statutory auditor was renewed at the Combined Shareholders' Meeting of the Company held on May 13, 2014, for a duration of six fiscal years. Its term will therefore expire at the close of the annual shareholders' meeting convened in 2020 to approve the financial statements as of and for the year ended December 31, 2019.

#### **Cabinet Mazars**

Represented by Ms. Juliette Decoux and Mr. Eric Schwaller  
61 rue Henri Regnault  
Exaltis  
92400 Courbevoie

Cabinet Mazars is a member of the *Compagnie Régionale des Commissaires aux Comptes de Versailles* (the Regional Association of Auditors of Versailles).

Cabinet Mazars was appointed statutory auditor at the Combined Shareholders' Meeting of the Company held on May 13, 2014, for a duration of six fiscal years. Its term will therefore expire at the close of the annual shareholders' meeting convened in 2020 to approve the financial statements as of and for the year ended December 31, 2019.

## 9.5.2 ALTERNATE STATUTORY AUDITORS

### KPMG AUDIT S.A.

Represented by François Caubrière  
Tour Eqho  
2 avenue Gambetta  
92066 Paris La Défense

KPMG AUDIT S.A. is a member of the *Compagnie Régionale des Commissaires aux Comptes de Versailles* (the Regional Association of Auditors of Versailles).

KPMG AUDIT S.A. was appointed as alternate statutory auditor at the Combined Shareholders' Meeting of the Company held on May 13, 2014, for a duration of six fiscal years. Its term will therefore expire at the close of the annual shareholders' meeting convened in 2020 to approve the financial statements as of and for the year ended December 31, 2019.

### Mr. Jérôme de Pastors

61 rue Henri Regnault  
Exaltis  
92400 Courbevoie

Mr. Jérôme de Pastors is a member of the *Compagnie Régionale des Commissaires aux Comptes de Versailles* (the Regional Association of Auditors of Versailles).

Mr. Jérôme de Pastors was appointed as alternate statutory auditor at the Combined Shareholders' Meeting of the Company held on May 13, 2014, for a duration of six fiscal years. His term will therefore expire at the close of the annual shareholders' meeting convened in 2020 to approve the financial statements as of and for the year ended December 31, 2019.

## 9.6 PUBLICLY AVAILABLE DOCUMENTS

Copies of this Registration Document are available at no charge at the Company's registered office. This document may also be consulted on the Company's website ([www.tarkett.com](http://www.tarkett.com)) and on the AMF's website in its French version ([www.amf-france.org](http://www.amf-france.org)).

During the period of validity of this Registration Document, the following French-language documents (or copies thereof) may be consulted:

- the Company's Bylaws;
- all reports, correspondence and other documents, historical financial information, evaluations and declarations prepared by an expert at the Company's request of which a portion is included or referred to in this Registration Document; and
- the historical financial information included in this Registration Document.

All of such legal and financial documents (in French and in English versions where available) relating to the Company and required to be made available to shareholders under applicable regulations may be consulted at the Company's registered office.

Regulated information (*information réglementée*) within the meaning of the AMF's General Regulation is available on the Company's website.
